SECTION 3 - GENERAL DESCRIPTION OF LOCAL CHANNEL SERVICES

3.3 SERVICE COMPONENTS

A private line local channel service is comprised of components which include Local Channels, Bridged and Inter-Bridge Channels, access coordination functions, channel options, miscellaneous functions and miscellaneous equipment items.

3.3.1 LOCAL CHANNEL

A local channel is a channel between (1) an AT&T Central Office and a Customer's premises or (2) two Customer premises.

3.3.2 BRIDGED CHANNEL

A bridged channel is a channel between (1) an AT&T Central Office and a Local Exchange Company bridge or (2) a Customer premises and a Local Exchange Company bridge. Bridged channels are available on Voice Grade Local Channel Services only.

3.3.3 INTER-BRIDGE CHANNEL

An Inter-Bridge Channel is a channel between two Local Exchange Company bridges located in different wire centers. Inter-Bridge channels are available on Voice Grade Local Channel Services only.

3.3.4 ACCESS COORDINATION FUNCTION

The access coordination function provides for the design, ordering, installation coordination, pre-service testing and service turn-up, trouble sectionalization and restoration coordination on a channel provided by AT&T under this tariff or an (CT) equivalent channel provided by the Customer. In addition, the access coordination function is available on Feature Group A and B Switched Access Service channels.

3.3 SERVICE COMPONENTS (Continued)

3.3.5 CHANNEL OPTIONS

Channel options are features which can be added to a local channel to change and/or augment its transmission characteristics. Typical channel options are signaling and data conditioning.

3.3.6 (RESERVED FOR FUTURE USE)

3.3.7 MISCELLANEOUS FUNCTIONS

Miscellaneous functions are optional functions performed at AT&T Central Offices which enable a Customer to increase the efficiency or usefulness of a service. The only miscellaneous functions available are transfer arrangements and bridging for Digital Data Local Channel Service.

3.3.8 MISCELLANEOUS EQUIPMENT ITEMS

Miscellaneous equipment items are optional items and arrangements which may be ordered on a local channel service.

3.3.9 DIGITAL DATA ACCESS MULTIPLEXING

Digital Data Access Multiplexing is a local channel service component provided in connection with Digital Data Local Channel Service (see Digital Data Access Multiplexing, Section 6.2.6).

Replacing Original Sheet 84

SECTION 4 - CHANNEL MILEAGE MEASUREMENT

4.1 GENERAL

The rate mileages for two point and multipoint local channel services are determined as set forth herein.

4.1.1 TWO-POINT LOCAL CHANNEL SERVICE MILEAGE MEASUREMENT

When a two-point local channel service is furnished and two serving wire center areas are involved, the rate mileage is the airline distance measured as follows:

- The rate mileage for a local channel between two Customer premises is measured using the V&H coordinates of the serving wire centers of the Customer premises.
- The rate mileage for a local channel between an AT&T Central Office and the Customer's premises is measured using the V&H coordinates of the serving wire centers of the AT&T Central Office and the Customer's premises. The appropriate AT&T Central Office to use is determined as set forth in B. following.

A. DETERMINING THE SERVING WIRE CENTER FOR A CUSTOMER'S PREMISES

The serving wire center for a Customer's premises is the Local Exchange Company wire center (i.e., NPA-NXX) which normally provides dial tone to the Customer's premises. The appropriate V&H coordinates associated with these wire centers are found in the NECA Tariff F.C.C. No. 4 and AT&T Tariff F.C.C. No. 10.

SECTION 4 - CHANNEL MILEAGE MEASUREMENT

4.1 GENERAL (Continued)

4.1.1 TWO-POINT LOCAL CHANNEL SERVICE MILEAGE MEASUREMENT (Continued)

B. DETERMINING THE PRICING CENTRAL OFFICE

The Customer may specify a particular AT&T Central Office within a LATA (i.e., Customer specified routing). In such cases, the local channel will be physically routed to the AT&T Central Office specified by the Customer and priced to the serving wire center of that central office. If the Customer does not make such a specification, AT&T will use the serving wire center of the Customer's premises and the service category of the local channel service to be provided to determine the pricing central office, as follows:

Example: The Customer's serving wire center is 314-782 for which the V&H coordinates as shown in NECA Tariff F.C.C. No. 4 are (V)06994 (H)03817. The Customer orders a Digital Data Local Channel Service.

1. In Section 3 of AT&T Tariff F.C.C. No. 10, look up the area code and first three digits of the wire center serving the Customer's premises and find its rate center listing.

Example: The rate center for 314-782 is Russellville.

2. In Section 4 of AT&T Tariff F.C.C. No. 10, look up the rate center and find its LATA number.

Example: The LATA number for Russellville, MO is 521.

Section 4  
1st Revised Sheet 86  
Replacing Original Sheet 86

SECTION 4 - CHANNEL MILEAGE MEASUREMENT

4.1 GENERAL (Continued)

4.1.1 TWO-POINT LOCAL CHANNEL SERVICE MILEAGE MEASUREMENT (Continued)

B. DETERMINING THE PRICING CENTRAL OFFICE (Continued)

3. In Section 5 of AT&T Tariff F.C.C. No. 10, look up the LATA number and find the AT&T Central Offices within the LATA. Determine the AT&T Central Offices within the LATA which provide the service category required. If there is only one AT&T Central Office in a LATA for the category of service required, that Central Office is the pricing Central Office.

Example: In LATA number 521, DATAPHONE® Digital Service is available at the following AT&T Central Office:

Columbia, MO, CLLI - CLMAMORS  
Jefferson City, MO, CLLI - JFCYMOXA

4. In Section 7 of AT&T Tariff F.C.C. No. 10, look up the V&H coordinates for the serving wire center of each AT&T Central Office determined in 3. preceding. If the serving wire center for any of the AT&T Central Offices determined in 3. preceding and the Customer's premises is the same (i.e., the V&H coordinates are the same), that AT&T Central Office is the pricing central office and no further calculation is necessary because no mileage charge applies. If the serving wire centers are different, proceed as in 5. following.

Example: The V&H coordinates for the serving wire center of the AT&T Central Office identified are as follows:

CLMAMOX (V)06901 (H)03841  
JFCYMOXA (V)06963 (H)03782

Because the V&H coordinates associated with the Customer's serving wire center differ from the above, a mileage charge applies.

1st Revised Sheet 87  
Replacing Original Sheet 87

SECTION 4 - CHANNEL MILEAGE MEASUREMENT

4.1 GENERAL (Continued)

4.1.1 TWO-POINT LOCAL CHANNEL SERVICE MILEAGE MEASUREMENT (Continued)

B. DETERMINING THE PRICING CENTRAL OFFICE (Continued)

5. The AT&T Central Office used to determine mileage will be the one whose serving wire center is nearest to the serving wire center of the Customer's premises. Determine which Central Office is the pricing Central Office by calculating the airline distance using the V&H coordinates (as shown in NECA Tariff F.C.C. No. 4) of the serving wire centers of the Customer's premises and each AT&T Central Office as shown in F.C.C. No. 10 Section 7. (see Calculation of Airline Mileage, Section 4.1.3 following). If two AT&T Central Offices are measured equidistant from the Customer's premises using the rounded mileage, the Central Office to be used is the one which is the nearest using unrounded mileage.

Example: The airline mileages between the Customer's serving wire center and the serving wire centers of the identified AT&T Central Office are calculated to be:

CLMAMOX - 31 miles  
JFCYMOXA - 15 miles

Therefore, the pricing central office is JFCYMOXA, Jefferson City, MO.

4.1.2 MULTIPOINT LOCAL CHANNEL SERVICE MILEAGE MEASUREMENT

When a multipoint local channel service is furnished, bridged and inter-bridge channels are utilized, as appropriate. The rate mileage for a bridged or inter-bridge channel is the airline distance measured in accordance with the physical routing of the service and is determined as follows:

- The rate mileage for a bridged channel is measured using (1) the V&H coordinates of the serving wire center of the Customer's premises or AT&T Central Office, as appropriate and (2) the V&H coordinates of the wire center of the Local Exchange Company bridge.

SECTION 4 - CHANNEL MILEAGE MEASUREMENT

4.1 GENERAL (Continued)

4.1.2 MULTIPOINT LOCAL CHANNEL SERVICE MILEAGE MEASUREMENT (Continued)

- The rate mileage for an inter-bridge channel is measured using the V&H coordinates of the wire centers of the Local Exchange Company bridges.

In all cases above, the airline mileage is determined as set forth in Section 4.1.3 following.

4.1.3 CALCULATION OF AIRLINE MILEAGE

Airline mileage between serving wire centers is calculated as set forth in AT&T Tariff F.C.C. No. 10. Following is an example of how mileage is calculated in accordance with those regulations.

A. EXAMPLE MILEAGE CALCULATION

After determining the V&H coordinates of the serving wire centers as described in Section 4.1.1 preceding, calculate the mileage between the V&H coordinates as follows:

1. V & H:

Russellville, MO (V) 06994 (H) 03817  
Jefferson City, MO (V) 06963 (H) 03782

2. Obtain the difference between the V coordinates. Then obtain the difference between the H coordinates. (The difference is always obtained by subtracting the smaller coordinate from the larger.)

	V	H
	06994	03817
	<u>-06963</u>	<u>-03782</u>
Difference	31	35

SEP 15 1991

4.1.2 MULTIPOINT LOCAL CHANNEL SERVICE MILEAGE MEASUREMENT (Continued)

- The rate mileage for an inter-bridge channel is measured using the V&H coordinates of the wire centers of the Local Exchange Company bridges.

In all cases above, the airline mileage is determined as set forth in Section 4.1.3 following.

4.1.3 CALCULATION OF AIRLINE MILEAGE

Airline mileage between serving wire centers is calculated as set forth in AT&T Tariff F.C.C. No. 10. Following is an example of how mileage is calculated in accordance with those regulations.

A. EXAMPLE MILEAGE CALCULATION

After determining the V&H coordinates of the serving wire centers as described in Section 4.1.1 preceding, calculate the mileage between the V&H coordinates as follows:

1. V & H:

Russellville, MO (V) 06994 (H) 03817  
Jefferson City, MO (V) 06963 (H) 03782

2. Obtain the difference between the V coordinates. Then obtain the difference between the H coordinates. (The difference is always obtained by subtracting the smaller coordinate from the larger.)

	V	H
	06994	03817
	-06963	-03782
Difference	31	35

SECTION 5 - TERRESTRIAL 1.544 MBPS LOCAL CHANNEL SERVICES

5.1 GENERAL

A Terrestrial 1.544 Mbps Local Channel Service provides for the transmission of 1.544 Mbps digital signals over terrestrial channels.

5.1.1 DESCRIPTION

A Terrestrial 1.544 Mbps Local Channel Service is capable of simultaneous two-way transmission of serial, bipolar, return-to-zero isochronous digital signals at a transmission speed of 1.544 Mbps on a two point basis only. A Terrestrial 1.544 Mbps Local Channel Service is comprised entirely of terrestrial channels, i.e., it contains no satellite channels in its make-up.

A Terrestrial 1.544 Mbps Local Channel Service is suitable for the transmission of voice, data (including ACCUNET Spectrum of Digital Services) or any other application required by the Customer which utilizes digital signals within the specified transmission parameters of the local channel.

The transmission specification standards for Terrestrial 1.544 Mbps Local Channel Services are contained in Technical Publications-PUB 62508 and 62411 (see Technical Publication Information, Sheet 18).

(CT)

A Terrestrial 1.544 Mbps Local Channel Service may be furnished (1) between a Customer's premises and an AT&T Central Office, or (2) between two Customer premises, or (3) solely as an access coordination function.

The Customer is responsible for providing Channel Service Unit Functionality at each local channel service termination on a Customer's premises (see Connection of Channel Service Unit Functionality, Section 5.1.3.F following).

SECTION 5 - TERRESTRIAL 1.544 MBPS LOCAL CHANNEL SERVICES

5.1 GENERAL (Continued)

5.1.1 DESCRIPTION (Continued)

Terrestrial 1.544 Mbps Local Channel Services use one of two types of DS1 signal formats. They are:

- A framed DS1 signal format (D4 or ESF), or
- An unframed DS1 signal format for U.S. Government Agencies only.

Customers (except U.S. Government Agencies and others furnishing service to U.S. Government Agencies) are required to select either D4 format or where available, the Extended Superframe (ESF). The D4 format is described in Sections 7 and 8 of Technical Publication-PUB 62411 and ESF is described in Technical Publication PUB 54016 (see Technical Publication Information, Sheet 18). U.S. Government Agencies may obtain Terrestrial 1.544 Mbps Local Channel Services free from any format constraint by notifying AT&T of such an election at the time service is ordered.

5.1.2 SIGNALS AT THE INTERFACE

All signals generated by Customer equipment and presented to the interface must meet certain signal and format constraints. Some of these constraints are listed below. Additional details are set forth in Sections 5 through 8 of Technical Publication-PUB 62411 (see Technical Publication Information, Sheet 18).

(CT)

A. SIGNAL AND FORMAT CONSTRAINTS FOR FRAMED AND UNFRAMED DS1 SIGNALS

- Data Rate: 1.544 Mbps +/- 75 bps.
- Consecutive Zeros: No more than 15 consecutive zeros may be generated.
- Pulse Density: At least three pulses in any 24 bit interval.

C. INSTALLATION CHARGE WAIVER

Installation charges will be waived for Terrestrial 1.544 Mbps Local Channel Services including the Access Coordination Function for Customers who order a new Terrestrial 1.544 with IOC or ACCUNET Spectrum of Digital Service (ASDS) with IOC provided under AT&T's Tariff P.S.C. Mo. No. 9, used in conjunction with Terrestrial 1.544 Mbps Local Channel Service.

In order for a Customer to qualify for the waived installation charges, the Terrestrial 1.544 Local Channel Service must be ordered with a Terrestrial 1.544 IOC or must be connected through the M24 multiplexing office function to a minimum of one new ASDS IOC at speeds of 128 kbps and above or to a minimum of two new ASDS IOCs at speeds of between 56 kbps and 64 kbps and the IOCs must be ordered simultaneously with the new Terrestrial 1.544 Mbps Local Channel Service.

Excluded from the installation charge waiver are:

- Replacement of existing service with a service of the same type and speed
- Additions to and/or rearrangements to existing services

A Customer who discontinues service prior to 12 full months will be billed for the waived charges.

However, a Customer may discontinue service without liability for waived charges as specified in Section 5 under AT&T's Tariff P.S.C. Mo. No. 9.

5.2.5 CHANNEL OPTIONS

The following channel options are available for use with  
Terrestrial 1.544 Mbps Local Channel Services:

A. SPECIAL ROUTING

A Terrestrial 1.544 Mbps Local Channel Service is normally furnished using facilities selected by AT&T. However, special routing options are available where the required components are available. If complete Special Routing is not available when ordered, or if it becomes unavailable at a later date due to network rearrangements, Special Routing may only be furnished on a partial basis. The Customer will be advised before partial Special Routing is provided and may cancel or discontinue the special routing if the partial Special Routing is not acceptable. No cancellation charge will apply in such case. Diversity is the special routing option for Terrestrial 1.544 Mbps Local Channel Services.

1. DIVERSITY

Two or more Terrestrial 1.544 Mbps Local Channel Services may be furnished partially or entirely over not more than two physically separated routes. Diversity is furnished for a portion of the local channel or for the entire local channel depending on the facilities available. If there are more than two local channels, the local channels are divided into two groups and furnished partially or entirely over two physically separated routes.

Charges will be developed on an individual case basis. MAR 16 1998

1. DIVERSITY

Two or more Terrestrial 1.544 Mbps Local Channel Services may be furnished partially or entirely over not more than two physically separated routes. Diversity is furnished for a portion of the local channel or for the entire local channel depending on the facilities available. If there are more than two local channels, the local channels are divided into two groups and furnished partially or entirely over two physically separated routes.

Charges will be developed on an individual case basis.

5.2.5 CHANNEL OPTIONS

The following channel options are available for use with Missouri Public Service Commission  
Terrestrial 1.544 Mbps Local Channel Services:

A. SPECIAL ROUTING

A Terrestrial 1.544 Mbps Local Channel Service is normally furnished using facilities selected by AT&T. However, special routing options are available where the required components are available. If complete Special Routing is not available when ordered, or if it becomes unavailable at a later date due to network rearrangements, Special Routing may only be furnished on a partial basis. The Customer will be advised before partial Special Routing is provided and may cancel or discontinue the special routing if the partial Special Routing is not acceptable. No cancellation charge will apply in such case. Diversity is the special routing option for Terrestrial 1.544 Mbps Local Channel Services.

B. CLEAR CHANNEL CAPABILITY

(AT)

This option provides a Customer with the capability to transmit DS0 (64 kbps) or DS1 (1.544 Mbps) signals with more than 15 consecutive zeros in a transmission. B8ZS (bipolar eight zero substitution) is the only coding technique acceptable for use with ACCUNET T1.5 Service to provide 64 kbps clear channel capability. B8ZS coding is described in Technical Publication-PUB 62411.

Compatible Customer premises equipment is required with this option. This equipment must be capable of transmitting and receiving B8ZS coding and must conform to extended superframe format. Extended superframe format is described in Technical Publication-PUB 54016.

An order for the Clear Channel Capability option must be placed coincidently with the Customer's order for Terrestrial 1.544 Mbps Local Channel service, is subject to the availability of Local Exchange Company access and may not be available in all locations. The rates for Clear Channel Capability apply per local channel service and are set forth in 1. following.

SECTION 6 - DIGITAL DATA LOCAL CHANNEL SERVICES

**RECEIVED**

6.1 GENERAL

SEP 22 1993

A Digital Data Local Channel Service provides for the transmission of data at various speeds.

MISSOURI  
Public Service Commission

6.1.1 DESCRIPTION

A Digital Data Local Channel Service provides an all digital channel for the simultaneous two-way transmission of data at synchronous speeds of 9.6 kbps or 56.0 kbps. 56.0 kbps is only available on a two-point basis.

The transmission specification standards for Digital Data Local Channel Services are contained in Technical Publications-PUB 62310 and 62507 (see Technical Publication Information, Sheet 18).

Digital Data Local Channel Service is furnished between a Customer's premises and an AT&T Central Office for connection to DATAPHONE Digital Services or ACCUNET Spectrum of Digital Services (CT) provided under Private Line Services Tariff P.S.C. Mo. No. 9 of this schedule. Digital Data Local Channel Service requires Digital Data access multiplexing, as specified in Section 6.2.6 following.

In addition, a Digital Data Local Channel Service may consist solely of an access coordination function.

The Customer is responsible for providing Channel Service Unit Functionality at each local channel service termination on a Customer's premises (see Connection of Channel Service Unit Functionality, Section 6.1.2.C).

6.1.2 REGULATIONS

In addition to the regulations in Section 2 preceding, the following apply.

6.1 GENERAL (Continued)

6.1.2 REGULATIONS (Continued)

A. AVAILABILITY OF A LOCAL CHANNEL SERVICE

Digital Data Local Channel Services are available from the AT&T Central Offices in Tariff F.C.C. No. 10. Digital Data Local Channel Services may not be available in every LATA or to all serving wire center areas within a LATA.

B. CREDIT ALLOWANCES FOR INTERRUPTIONS

For purposes of determining credit allowance in accordance with the regulations in Section 2.7 preceding, a Digital Data Local Channel Service is considered to be inoperative when:

- There has been a loss of continuity on the local channel service, or
- The error performance is below the 99.875% error-free-seconds design objective.

C. CONNECTION OF CHANNEL SERVICE UNIT FUNCTIONALITY

The Customer is responsible for providing Channel Service Unit Functionality for each termination of a Digital Data Local Channel Service at a Customer's premises.

In the event that a trouble indication exists which necessitates a visit of a repair person to a Customer's premises because of the absence of a loop-back in the Customer's equipment, a Maintenance of Service Charge will apply (see Maintenance of Service Charge, Section 18.2.4).

The connection of Channel Service Unit Functionality to Digital Data Local Channel Services shall be in accordance with Part 68 of the FCC's Rules and Regulations (Registration Program).

6.1.7 SELECT SAVINGS PLAN (SSP)

MO. PUBLIC SERVICE COMM.

Select Savings Plans (SSP) with terms from one to five years are available as an alternative to conventional monthly rates for Local Channel Services and Channel Options of Digital Data Local Channel (DDLCL) Services, Voice Grade Local Channel (VGLC) Services and ACCUNET Generic Digital Access (AGDA) Services connected to ACCUNET Spectrum of Digital Services (ASDS). In exchange for a term commitment on each individual service, the customer is given monthly rates that are discounted for the duration of the term. Rates may change from time to time however, the discount levels applied will not change during the term of the plan. If a customer requests additions/changes to any service currently included under a SSP, the monthly discounts that were in effect on the date the customer originally committed to a plan will be applied to the new rates.

Non-recurring charges will not be discounted. When a customer requests service, the non-recurring charges will be applied based on the rates in effect on the date that the service order is completed by AT&T.

A. SELECT SAVINGS PLAN STRUCTURE

A SSP will include all the AGDA Services, DDLCL Services and VGLC Services or service components with the exception of Voice Grade Signaling Channel Option and Digital Data Transfer Arrangements.

The plan will be available in one month increments from twelve months (one year) through sixty months (five years). The discount is fixed for the life of a plan. Monthly rates for all months will be discounted based on the term commitment as follows:

<u>Term commitment</u>	<u>Discount</u>
12-23 Months	6%
24-35 Months	8%
36-60 Months	10%

AUG 15 1995

6.1 GENERAL (Continued)

6.1.7 SELECT SAVINGS PLAN (Continued)

MO. PUBLIC SERVICE COMM.

B. SELECT SAVINGS PLAN COMMITMENT AND PLAN RESTRICTIONS

The customer must commit each individual service into a SSP. Each service must include all AT&T Private Line Services Tariff - Schedules 9 and 11 components under a plan. Both existing and new services are eligible. The following are not eligible for inclusion in a SSP:

- Individual Case Basis (ICB) rates
- Local Channel Special Routing
- Local Channels not connected through an AT&T Central Office
- Signaling
- Transfer Arrangements
- Administrative Charges
- Non-recurring Charges
- Special Access Surcharge

C. DISCONTINUANCE OF SELECT SAVINGS PLAN - WITHOUT LIABILITY

The customer may terminate a SSP without liability under the following conditions:

1. An ASDS Customer with 9.6 kbps or 56 kbps service and voice grade access may replace their end to end service with a new ASDS 9.6 kbps or 56 kbps service with digital access, provided the replacement service is enrolled in a SSP with an expiration date equal to or later than that of the service being replaced. The requested installation date for the new service must be on or before the requested disconnect date of the service being replaced.

SECTION 6 - DIGITAL DATA LOCAL CHANNEL SERVICES

6.1 GENERAL (Continued)

6.1.7 SELECT SAVINGS PLAN (Continued)

MO. PUBLIC SERVICE COMM.

C. DISCONTINUANCE OF SSP - WITHOUT LIABILITY (Continued)

2. An existing SSP service may be replaced with a new AT&T ACCUNET digital service of a higher speed, provided the replacement service, if it is ASDS, is enrolled in a SSP that has an expiration date that is equal to or later than that of the service being replaced. The installation date requested for the new ACCUNET service must be on or before the requested disconnect date of the service being replaced.
3. A customer may also move an existing SSP service to a different location(s) or change the AT&T point-of-presence provided that the installation date requested for the move and/or change is on or before the requested disconnect date, and both installation and disconnect requests are made concurrently. The moved and/or changed service will be subject to the time commitment remaining under the original SSP.
4. If the customer commits to a new twenty-four through sixty month replacement SSP with an expiration date that is 12 or more months later than the expiration date of the plan being replaced. The plan being replaced will terminate on the day preceding the start date of the new plan. The rates for the new SSP will be determined using the rates in effect at the time the customer commits to service under the new plan.
5. An ASDS Customer with DDLG access service may replace their DDLG access service with AGDA Service, provided AGDA Service is of equal speed. The AGDA Service will be subject to the time commitment remaining under the customers' original SSP, and all SSP components will be repriced and/or recalculated as specified in existing SSP regulations, concerning customer requested additions and/or changes.

RECEIVED

6.1 GENERAL (Continued)

AUG 15 1995

6.1.7 SELECT SAVINGS PLAN (Continued)

D. DISCONTINUANCE OF A SELECT SAVINGS PLAN - WITH LIABILITY

MO. PUBLIC SERVICE COMMISSION

Discontinuance of a service and/or service component furnished under a SSP, prior to the expiration of the applicable term, will result in customer liability as follows:

1. For service discontinued prior to the completion of the specified term plan the customer is liable for a percentage of the total undiscounted fixed monthly rates for the remaining portion as follows:

<u>Remaining Portion</u>	<u>Local Channel Liability</u>
1-12 months	50%
13-24 months	40%
25-36 months	30%
37-48 months	20%
49-60 months	10%

The following examples illustrate how the customer will be charged for early discontinuance:

Examples

- (a) A 12 month plan is established for a two-point service but the service is disconnected prior to the end of the 9th month. Discontinuance charges will be calculated at 50% of the monthly charges for the remaining portion of the 9th month and all of months 10-12.
- (b) A 30 month plan is established for a two-point service but the service is disconnected prior to the end of the 22nd month. Discontinuance charges will be calculated at 40% of the monthly charges for the remaining portion of the 22nd month and for all of month 23-24. In addition, discontinuance charges will be calculated at 30% for months 25-30.

6.1 GENERAL (Continued)

AUG 15 1995

6.1.7 SELECT SAVINGS PLAN (Continued)

MO. PUBLIC SERVICE COMM.

E. EXPIRATION AND RENEWAL OF A SELECT SAVINGS PLAN

Upon expiration of a SSP, the customer has the option to obtain a new SSP, or other available plan or to obtain service under conventional monthly rates.

If the customer chooses to subscribe to a new SSP, the start date of the new plan may not be earlier than the day following the expiration date of the former plan.

To continue the same service under monthly rates, no action is required on the part of the customer. Upon expiration of the SSP, and unless notification to the contrary is received, the customer's service will automatically be continued at rates specified under the monthly rate plan in effect at that time.

The customer may renew service under a new SSP by notifying AT&T in writing anytime prior to the expiration of the current SSP.

(c) A 60 month plan is established for a multipoint service but the service is disconnected prior to the end of the 40th month. Discontinuance charges will be calculated at 20% of the remaining portion of the 40th month and for all of months 41-48. In addition, discontinuance charges will be calculated at 10% for months 49-60.

(d) A 24 month plan is established for a multipoint service but one location is disconnected prior to the end of the 6th month. Discontinuance charges for all service components associated with the disconnected location will be calculated at 50% for the remaining portion of the 6th month and all of months 7-12. In addition, for the disconnected service components, discontinuance charges will be calculated at 40% for months 13-24. No discontinuance charges are applied to the service components that remain in service at all of the other circuit locations.

6.2.8 CHANNEL OPTIONS

MISSOURI  
Public Service Commission

The following channel options are available for use with Digital Data Local Channel Services.

A. SPECIAL ROUTING

A Digital Data Local Channel Service is normally furnished using facilities selected by the Company. However, special routing options are available where the required local channel facilities are available. If complete Special Routing is not available when ordered, or if it becomes unavailable at a later date due to network rearrangements, Special Routing may only be furnished on a partial basis. The Customer will be advised before partial Special Routing is provided and may cancel or discontinue the special routing if the compromise is not acceptable. No cancellation charge will apply in such case. Diversity is the only special routing option for Digital Data Local Channel Services. It is available only for 56 kbps local channel services. (CT)

1. DIVERSITY

Two or more 56 kbps Digital Data Local Channel Services may be furnished partially or entirely over not more than two physically separated routes. Diversity is furnished for a portion of the local channel or for its entirety. If there are more than two local channels, the local channels are divided into two groups and furnished partially or entirely over two physically separated routes.

a. DIVERSITY FROM ANOTHER 56 KBPS LOCAL CHANNEL SERVICE

Charges will be developed and filed on an individual case basis.

B. SECONDARY CHANNEL

The secondary channel option provides the Customer with the capability to derive an independent, slower speed auxiliary (secondary) channel that operates in parallel with a primary Digital Data Local Channel without reducing the operating speed of the primary channel. It is available for all speeds of Digital Data Local Channels. For 56 kbps channels, the option may be used only in two-point configurations which do not require the installation of loop repeater equipment. The technical parameters for a Digital Data Local Channel with a secondary channel option are set forth in Technical Publication - PUB 62120 (see Technical Publication Information, Sheet 18). The speeds of the secondary channels are as follows:

533 bps with a primary 9.6 kbps channel  
2,666 bps with a primary 56 kbps channel

7.1 GENERAL

REC'D MAY 04 1999 (AT)

AT&T Regional Frame Relay Service (RFRS) is a public data network offering which provides high speed, order-preserving transmission of frames between Local Area Networks (LANs) or other high speed data communications equipment for distributed computing applications.

7.1.1 DESCRIPTION

Regional Frame Relay Service is offered within LATA 520 and within LATA 524 and between these LATAs via InterLATA PVCs, in the State of Missouri, where facilities and billing capabilities permit. Service is available for use 24 hours a day, seven days a week. Except as otherwise provided in this tariff, all terms, conditions, features and functions may be found in AT&T Tariff F.C.C. No. 4. Charges for additional AT&T Frame Relay Services which may be used in conjunction with AT&T Regional Frame Relay Service may be found in AT&T Tariff F.C.C. No. 4.

The following AT&T Frame Relay Service features are not available under this tariff for AT&T Regional Frame Relay Service:

- Disaster Recovery Options
- Frame Relay Service Level Agreement
- Frame Relay Service Domestic Gateway Capability
- International Frame Relay Service
- AT&T International End-to-End Frame Relay Service
- Frame Relay Volume Pricing Plan
- Digital Services Volume Pricing Plan

Regional Access Ports furnished under this tariff operate at transmission speeds of 56/64, 128, 256, 384, 512, 768, and 1544 kbps. The port speed defines the maximum rate that the Customer can transmit data to and receive data from the FRS network.

SECTION 7 - REGIONAL FRAME RELAY SERVICE (Continued)

REC'D MAY 04 1999

7.1.2 REGULATIONS

A. RESPONSIBILITIES OF THE CUSTOMER

The customer must provide the following additional information to the Company when ordering RFRS:

- The number and location of the Ports ordered,
- The initial set of software functions for each Port per Technical Publication No. TR 50052,
- The transmission speed of each Port,
- The CIR of each PVC,
- The Port origination and destination of each PVC CIR, and
- Requirements for Regional and Global addressing for PVC Data Link Connection Identifiers (DLCI) per Technical Publication No. TR 50052, for transmission through FRS.

B. NOTICE OF DISCONTINUANCE

The Notice of Discontinuance for RFRS components in service is 15 days. Recurring charges apply for a period of 15 days from the date the Company receives the Notice of Discontinuance or until the requested discontinuance date, whichever is later. The charges will continue to apply whether or not the customer continues to use the RFRS components. Orders involving the discontinuance of RFRS components may be delayed or withdrawn, without charge, at any time prior to the discontinuance date. A Notice of Discontinuance cannot be withdrawn or delayed on the Due Date for discontinuance.

C. CANCELLATION, DELAY OR CHANGE OF AN ORDER

The regulations set forth in this section apply for the cancellation, delay or change of an order for RFRS components. These regulations are in lieu of those specified in Section 2.6.7., preceding. When an order is placed for installation of a Regional Access Port or Regional PVC, or for a change to a Regional Access Port's speed or to a Regional PVC CIR, a Due Date for that order will be established by the Company. Such Due Date will be confirmed with the Customer. In the event that such Due Date is delayed, the provisions specified in 7.1.2.E. or 7.1.2.F., following will apply.

SECTION 7 - REGIONAL FRAME RELAY SERVICE (Continued) **Missouri Public Service Commission**

7.1.2 REGULATIONS (Continued)

REC'D MAY 04 1999

D. CANCELLATION OF AN ORDER

A customer may cancel an order for the installation or change of RFRS any time prior to the Due Date. An order cannot be canceled on the Due Date. An order is considered to have been canceled when the Company receives a notification of cancellation from the Customer. Such notification may not be retroactive. There is no cancellation charge if the notification of cancellation is received by the Company 30 calendar days or more prior to the initial Due Date. If the notification of cancellation is received by the Company less than 30 calendar days prior to the initial Due Date, the following cancellation charges will apply.

Cancellation Charge

- |                                     |          |
|-------------------------------------|----------|
| - per canceled Regional Access Port | \$500.00 |
| - per canceled Regional PVC         | \$ 40.00 |

E. DELAY OF DUE DATE BY COMPANY

The company will make every reasonable effort to assure that the service ordered is furnished on the Due Date. However, in some cases a delay in the Due Date may be unavoidable.

1. If the Company delays a Due Date for less than six (6) cumulative calendar days from the initial Due Date, not counting any delays requested or caused by the Customer, the Customer may either: (a) cancel the delayed order at no charge, or (b) after the installation or change is completed, the Company will credit the Customer's bill in an amount equal to 50% of one month's Monthly Charge (less applicable discount) for each delayed Regional Access Port or Regional PVC.
2. If the Company delays a Due Date for six (6) or more cumulative calendar days from the initial Due Date, not counting any delays requested or caused by the Customer, the Customer may either: (a) cancel the delayed order at no charge, or (b) after the installation or change is completed, the Company will, credit the Customer's bill in an amount equal to 100% or one month's Monthly Charge (less any applicable discount) for each delayed Regional Access Port or Regional PVC.

SECTION 7 - REGIONAL FRAME RELAY SERVICE (Continued)

Missouri Public  
Service Commission

7.1.2 REGULATIONS (Continued)

REC'D MAY 04 1999

F. DELAY OF DUE DATE BY THE CUSTOMER

A Customer may delay an order for the installation or change of RFRS components at any time prior to the Due Date. However,

1. If a Customer delays an order within the three (3) calendar days immediately prior to the Due Date, a Due Date Change Charge will apply, regardless of the length of delay.

Due Date Change Charge

- per delayed Regional Access Port	\$500.00
- per delayed Regional PVC	\$ 40.00

2. If a Customer delays a Due Date by more than twenty (20) cumulative calendar days from the initial Due date, the Customer may either: (a) accept billing for the service ordered commencing on the first day after the 20th cumulative calendar day, or (b) cancel the order and pay the applicable cancellation charge as set forth in 7.1.2.D. preceding.
3. If a Customer is not ready on the Due Date and has not requested a delay prior to the Due Date, the service ordered will commence on the Due Date.

G. CHANGE OF AN ORDER

When a Customer changes the speed of a Regional Access Port or Regional PVC before the Due Date, such a change is considered to be a design change, not a cancellation of an order. No design change charges apply for RFRS. However, if the Customer requests a Regional Access Port speed change from 56 kbps to a higher Regional Access Port speed, less than twenty (20) calendar days prior to the Due Date, a new Due Date will be established by the Company. Such new Due Date will be confirmed with the Customer.
