SERVICE CHARGES

F. Customer-Provided Equipment and Inside Wire (Cont'd)

1. General (Cont'd)

d. Responsibility of the Customer (New Installations) (Cont'd)

- 3) The customer may be required, as a condition of service, to pay in full all sums due the Company including, but not limited to, service charges, termination charges, minimum charges, and reimbursement for loss or damage to Company facilities as may apply.
- 4) A customer must subscribe to, and be capable of providing operation for, sufficient quantities of main terminals to provide adequate access to his customer-provided equipment and/or inside wire in accordance with accepted communications industry standards.
- 5) The customer must provide all of the terminal equipment and/or inside wire on the customer's side of the point of demarcation between Company owned equipment and customer-owned equipment.
- 6) Use of Company facilities or service in connection with any device for recorded public announcements is subject to the following conditions:
 - a) For purposes of identification, customers to telephone service who transmit recorded public announcements over facilities provided by the Company must include in the recorded message the name of the organization or individual responsible for the service and the address at which the service is provided.
 - b) Customers transmitting factual public announcements such as time, stock market quotations, airline schedules and similar information are excluded from the preceding condition.

Issued: July 18, 2002

Effective: September 1, 2002

SERVICE CHARGES

F. Customer-Provided Equipment and Inside Wire (Cont'd)

1. General (Cont'd)

d. Responsibility of the Customer (New Installations) (Cont'd)

6) (Cont'd)

c) Nonpublished telephone service will not be furnished for use with recorded public announcements.

d) Failure to comply with the provisions of this Tariff shall be cause for termination of the service.

e. Responsibility of the Company

1) The Company shall not be responsible to the customer for changes in the technical criteria or in any of the facilities, operations or procedures initiated by the Company or appropriate regulatory agencies which might render any customer-provided equipment obsolete or require modification or alteration of such equipment or otherwise affect its use or performance. The Company will make a reasonable effort to notify a customer in advance of changes in technical criteria, operations or procedures which might affect customer-provided equipment or systems.

2) The Company shall not be responsible for the installation, operation or maintenance of any customer-provided communications systems, equipment, or inside wire.

GENERAL AND LOCAL EXCHANGE TARIFFSERVICE CHARGES

F. Customer-Provided Equipment and Inside Wire (Cont'd)

2. Maintenance of Service Charge

- a. The following charge is applicable for time spent by a Company employee when it is determined that the service difficulty or trouble report results from customer-provided terminal equipment and/or communications systems and/or inside wire connected or arranged for connection to Company facilities. Normal working hours are from 8:00 a.m. to 5:00 p.m., Monday through Friday, holidays excepted.

Nonrecurring
Charge

1) In or out of Base Rate Area, per occurrence \$25.00

- b. The above charge is in addition to all other rates and charges billed to the customer for other services and equipment.
- c. The above mentioned charge will be waived for customers who have not been equipped with a network interface jack and who have not been instructed on how to use the network interface jack to isolate their own trouble.

CENTURYTEL CALLING SERVICES

A. General & Special Promotions

1. General

- a. CenturyTel Calling Services consist of one or more of the following services, which provide special kinds of customer controlled or prearranged and fixed communications services on individual access, lines. CenturyTel Calling Services are available only through central offices, which, at the Company's option, are appropriately equipped. Operating specifics may vary by central office equipment type but can be described generally as follows.

CenturyTel Calling Services may be provided only in conjunction with individual line residence and business services and some multi-line services. Party-line customers, Key customers, PBX customers, Centrex customers, Semi-Public and Public Telephone Services are restricted from CenturyTel Calling Services.

2. Special Promotions

- a. At various times throughout the year, the Company may propose to offer a special promotion in various exchanges equipped to provide CenturyTel Calling Services, in order to increase the number of features in service. The Company will notify the Commission in advance of these promotions and obtain their approval.

1) Simple Choice Metro Promotion

For a period of 90 days beginning July 10, 2009, residential customers who during the promotional period subscribe to a 12 (twelve) month commitment for Simple Choice™ Metro (where available)⁽¹⁾ will be eligible to receive the plan at the following monthly rates and will be given the option to subscribe for an additional 12 (twelve) months at the same promotional rate, for a total of up to 24 months. During the promotion all applicable non-recurring charges as found in Section 5, will be waived.

(C)

	<u>Residence</u>
<u>Simple Choice Metro MCA-4, MCA-5 and MCA-6</u>	\$29.95

To be eligible, customers must not have had service disconnected for nonpayment or any past due bills for regulated service owed to the Company within the past 12 months. A termination charge will apply if the customer disconnects this service offering prior to the expiration of their term commitment. The charge will consist of 50% of the monthly rate for the service disconnected times the number of months remaining on the contract.

(1) See Section 6, Sheet 19.6 for availability.

2) Simple Choice Metro Promotion

The Company will offer a promotion for the period beginning November 2, 2005 through December 31, 2005. Residential customers who during the promotional period subscribe to a 12 (twelve) month commitment for Simple Choice™ Metro (where available)⁽⁴⁾ will be eligible to receive the plan at the following monthly rates and will be given the option to subscribe for an additional 12 (twelve) months at the same promotional rates, for a total of up to 24 months. During the promotion all applicable non-recurring charges as found in Section 5, will be waived. (N) (N)

	<u>1st 3 Months</u>	<u>Remaining Promotion Months</u>
Simple Choice Metro and MCA-4 or MCA-5	\$24.95	\$29.95
With additional line ⁽¹⁾ and dial-up Internet access	\$44.95	\$49.95
With DSL Broadband Plus – 768 kbps ⁽²⁾	\$59.95	\$64.95
With DSL Broadband Premium – 1.5 mbps ⁽³⁾	\$69.95	\$74.95

To be eligible, customers must not have had service disconnected for nonpayment or any past due bills for regulated service owed to the Company within the past 12 months. A termination charge will apply if the customer disconnects this service offering prior to the expiration of their term commitment. The charge will consist of 50% of the monthly rate for the service disconnected times the number of months remaining on the contract.

- (1) Additional line does not include Simple Choice features.
- (2) DSL Broadband Plus offered for single line users at 768 kbps downstream/128 kbps upstream.
- (3) DSL Broadband Premium offered for single line users at 1.5 Mbps downstream/256 kbps upstream.
- (4) See Section 6, Sheet 19.6 for availability.

CENTURYTEL CALLING SERVICES

B. Service Descriptions

1. Anonymous Call Block - allows subscribers of this service to block calls from a person that is using either Selective or Complete Blocking (which prevents the display of the caller's telephone number to Caller ID customers). The person calling, whose identification is blocked, will receive a message to hang up and call back with the calling number unblocked.
2. Busy Redial *66 - is an arrangement which permits the customer to redial automatically the last number dialed. If the called line is found to be busy, a 30-minute queuing process begins. The customer is then given an indication that the network will attempt to set up the call when the called line is idle. The network periodically tests the busy/idle status of the called line until both lines are found idle, the customer cancels the request, or the queuing process expires. If both lines are found to be idle, the calling party is alerted with a distinctive ring signifying that the call can now be completed.

This feature is offered on a per line or per activation basis. When Busy Redial *66 is implemented on a per activation basis, a charge will apply each time the service is invoked. This service is implemented by dialing *66. There is a billing limit of ten activations per month. Any activations in excess of ten per month will not be billed.

3. Call Return *69 - allows a customer to automatically return the last incoming call whether it is answered or not. Upon activation of the service, the number of the most recent party who called is dialed automatically. If the called line is found to be busy, a 30-minute queuing process begins. The customer is given an indication that the network will attempt to set up the call when the called line is idle. The network periodically tests the busy/idle status of both parties until both lines are found idle, the customer cancels the request, or the queuing process expires. If both lines are found to be idle, the calling party is alerted with a distinctive ring signifying that the call may now be completed.

This feature is offered on a per line or per activation basis. When Call Return *69 is implemented on a per activation basis, a charge will apply each time the service is invoked. This service is implemented by dialing *69. There is a billing limit of ten activations per month. Any activations in excess of ten per month will not be billed.

GENERAL AND LOCAL EXCHANGE TARIFF

CENTURYTEL CALLING SERVICES

B. Service Descriptions (Cont'd)

4. Call Block - allows a customer to block incoming calls from a maximum of 12 telephone numbers. The customer also can block incoming calls placed from the last calling number even if the number is unknown to the customer. Blocked calls are routed to a recorded announcement which specifies that the called party is not accepting calls.
5. Call Forwarding - Permits the customer to have all incoming calls to his line automatically transferred to another dialable telephone number, while this service is activated. Where a toll message charge is applicable to a call between the customer's telephone and the telephone number to which calls are to be forwarded, such charges will be billed to the Call Forwarding customer. Call Forwarding may be arranged for:
 - a. Fixed operation, which provides for Company establishment or change of the forwarded telephone number destination requested by the customer. In the event of an interruption in "fixed" Call Forwarding service, the Company will reestablish the most current forwarded telephone number destination shown in its records. Service activation and deactivation is the responsibility of the customer.
 - b. Variable operation, which provides for customer establishment and change of the forwarded telephone number destination. The customer is also responsible for service activation and deactivation as well as reestablishing the forwarded telephone number destination upon interruption of "variable" Call Forwarding service.

NOTE: The grade of transmission on calls forwarded and three-way calling may vary upon the distance and routing required to complete such calls; therefore, the normal grade of end-to-end transmission cannot be guaranteed on such calls.

CENTURYTEL CALLING SERVICES

B. Service Descriptions (Cont'd)

6. Call Forward Busy (Fixed) - This service, permanently activated, provides customers the ability to redirect incoming calls to their home or business to the customer's preselected automatic access line number, Centrex line number, or other line number of the customer at another location on a different premises when such incoming calls encounter a normal busy line condition.
 - a. Calls forwarded beyond the local (toll free) calling area will be charged to the customer, at the dial station-to-station rate, on every call answered at the "forwarded to" number.

7. Call Forward Busy/No Answer (Fixed) - This service, permanently activated, provides customers the ability to redirect incoming calls to their home or business to the customer's preselected automatic access line number, Centrex line number or other line number of the customer at another location on a different premise when such incoming calls encounter either a normal busy line condition or a no answer condition.
 - a. Calls forwarded beyond the local (toll free) calling area will be charged to the customer, at the dial station-to-station rate, on every call answered at the "forwarded to" number.

NOTE: The grade of transmission on calls forwarded and three-way calling may vary upon the distance and routing required to complete such calls; therefore, the normal grade of end-to-end transmission cannot be guaranteed on such calls.

CENTURYTEL CALLING SERVICES

B. Service Descriptions (Cont'd)

- 8. Call Forward Busy/No Answer (Variable) - This service permits the customer to have incoming calls transferred to another telephone number when his number is busy and/or not answered after a specified number of rings. The customer is responsible for the establishment and change of the forwarded telephone number destination. The customer is also responsible for service (Busy, No Answer or Busy/No Answer) activation and deactivation as well as reestablishing the forwarded telephone number upon interruption of the Call Forwarding service. Where a toll message charge is applicable to the call to be forwarded, such charges will be billed to the Call Forwarding customer. This service is not available in connection with Call Forwarding service as described in B.2, 3 and 5 or line (rotary) hunting service.

- 9. Call Forward No Answer (Fixed) - This service, permanently activated, provides customers the ability to redirect incoming calls to their home or business to the customer's preselected automatic access line number, Centrex line number, or other line number of the customer at another location on a different premises when such incoming calls encounter a no answer condition after a specific number of rings, such number of rings to be specified when this service is ordered.
 - a. Calls forwarded beyond the local (toll free) calling area will be charged to the customer, at the dial station-to-station rate, on every call answered at the "forwarded to" number.

NOTE: The grade of transmission on calls forwarded and three-way calling may vary upon the distance and routing required to complete such calls; therefore, the normal grade of end-to-end transmission cannot be guaranteed on such calls.

CENTURYTEL CALLING SERVICES

B. Service Descriptions (Cont'd)

10. Call Trace *57 - allows the customer to immediately and automatically trace the last incoming call received from a local service. Upon the customer's request the trace information will be provided to law enforcement agencies by the Company but will not be released directly to the customer. To initiate the call trace, the customer must contact the Company at the number provided in the voice announcement within ten (10) days of the incident. Call Trace Service performs the function of recording call information, but in no way identifies the person(s) actually placing the call(s). By accepting the Service, the customer agrees that CenturyTel shall not be liable for damages due to an inability to trace the call(s). Call Trace Service will be the only nuisance call tracing service available to residential one-party and business one-party customers where this service is offered.
11. Call Waiting - Provides for signaling a customer, who is talking on his line, that another call has been placed to his line. He may, by switchhook operation, hold the first call, answer the second, return to the first or converse alternately with both.
12. Call Waiting ID - is a service that will allow a Caller ID/Call Waiting subscriber who is offhook on an existing call to receive caller identification information on a new incoming call. Once the customer receives the Caller ID data, he or she may decide whether to ignore the waiting call, interrupt the current call and flash to answer the waiting call, or end the current conversation in order to be connected to the new caller. These options are the same as for the existing Call Waiting service except that the subscriber has the ability to identify the waiting caller. The customer must be using Call Waiting ID compatible equipment and not have activated Cancel Call Waiting. Customers must subscribe to Call Waiting and Caller ID or Caller ID Number Only at the tariffed rates for each service or in a "flexible package". The customer must subscribe to this service specifically even though there are not additional rates or charges.

GENERAL AND LOCAL EXCHANGE TARIFF

CENTURYTEL CALLING SERVICES

B. Service Descriptions (Cont'd)

13. Calling Identification Services

- a. Caller ID Number Only - is an arrangement which permits a customer with local exchange service, other than foreign central office service, to be immediately apprised of the calling telephone number of a call placed to the customer.

At the time the incoming call is placed, the calling telephone number is forwarded from the terminating central office to compatible customer provided display equipment associated with the customer's local exchange service. The calling telephone number is then delivered to the display device during the first silent interval of ringing.

- b. Caller ID - is an arrangement that permits a customer to receive the name, as well as the telephone number, associated with the calling party for calls placed to the customer. The calling telephone number and name will be forwarded from the terminating central office to compatible customer-provided display equipment associated with the customer's Local Exchange Service.

If the calling telephone number and name are not available for forwarding to the called party, a message indicating unavailability will be forwarded. The calling party can prevent the Caller ID customer from seeing the calling name and telephone number display by activating Selective Blocking (per call). Complete Blocking (per line) also functions the same as described in this section of the tariff.

CENTURYTEL CALLING SERVICES

B. Service Descriptions (Cont'd)

13. Calling Identification Services (Cont'd)

- c. For calls originating from a line with a multiline hunt group, ordinarily the main telephone number is delivered. If the calling identification information is not available for forwarding to the called party, the customer's display device will give an anonymous indication. Calling identification information is unavailable from calls made through some large PABX systems, from most cellular radio calls, and currently from interexchange carrier calls. Nor is the calling identification information made available when incoming calls have been handled by an operator or charged to credit cards.

Customers subscribing to Calling Identification Services will be responsible for the provision of compatible display equipment. The Company assumes no liability for any incompatibility of the customer provided display equipment.

Calling Identification Service information may not be sold or given to another party without the caller's consent. Calling Identification Service information may only be used for: (a) routing or completion of calls, (b) billing of calls, (c) account management purposes, (d) services directly related to the call or transaction, (e) verification of calling party identity and (f) marketing products or services that are directly related to those previously acquired by the customer from the name and/or number delivery services subscriber. This applies if the name and/or number delivery services subscriber has an existing relationship with the customer. Calling Identification Service customers failing to comply with any of these conditions will have their service terminated.

Anonymous Call Reject *77 is available in conjunction with these services.

GENERAL AND LOCAL EXCHANGE TARIFF

CENTURYTEL CALLING SERVICES

B. Service Descriptions (Cont'd)

14. Camp On/Busy Number Redial* - Permits the customer to dial a camp-on code when a busy station is reached. The call is retried automatically through the central office until both parties are available. A special tone alerts the customer that a successful camp-on has been activated. When the customer answers, the called party's line is rung, and the two parties are connected in a normal two-way call. Only busy calls within the central office are retried automatically.
15. Selective Blocking (Per Call) - Allows customers, in areas where Calling Number Identification is available, to inhibit the delivery of their telephone number to an identification device, by activating blocking immediately prior to a call.
16. Complete Blocking (Per Line) - Allows a single-line customer to make all calls with the delivery of his/her calling number identification (CNI) marked as "private" to the people he/she is calling. If the preassigned access code for Selective Blocking (Per Call) is dialed on the line, the calling number will be delivered on the next call placed.

This service is available only to established shelters of domestic violence intervention agencies, state and county departments of human resource shelters and other such agencies, their employees and volunteers, or individuals where it is certified that the personal safety of these employees or individuals will be jeopardized without Per Line blocking.

17. Last Number/Save Number Redial* - Permits the customer to dial a code which activates the switch to automatically place a call to the last called number stored. Each time a customer dials, the most recent number is stored. Save Number Redial allows the customer to store the called number by dialing a code at any point during a call, or upon encountering a busy or no answer condition when placing a call. The customer may place and receive any number of calls in the normal manner after a number is stored. A customer wishing to reinitiate a call to the party whose number was stored dials a code and the call is placed automatically.

* This service is limited to all existing customers at their existing locations.

Issued: July 18, 2002

Effective: September 1, 2002

GENERAL AND LOCAL EXCHANGE TARIFF

CENTURYTEL CALLING SERVICES

B. Service Descriptions (Cont'd)

18. Distinctive Ring - Allows distinctive ringing to be applied to an individual line, where each of two numbers, a main number and a Distinctive Ring number, will have a uniquely separate ring for customer identification. Because two telephone numbers are associated with one telephone line, only one conversation can be conducted at a time.

Regulations for directory listings set forth elsewhere in this Tariff will apply for the main number. The customer is entitled to one free listing in the alphabetical section of the telephone directory for the Distinctive Ring number, regardless of the class of service.

19. Selective Call Accept *64 - allows a customer to select (maximum of 12) customer telephone numbers from which calls are to be received. All other calls are intercepted and routed to a recorded announcement that informs the caller the customer is not accepting calls. Calls from numbers outside the specified exchanges will ring normally.
20. Selective Call Forward *63 - is an arrangement which permits a customer to prespecify telephone numbers (maximum of 12) from which incoming calls are to be forwarded. During the period that Selective Call Forwarding is activated, only calls from the prespecified numbers will be forwarded.
21. Special Call Waiting* - allows a customer to choose up to 12 numbers which can activate Call Waiting. Incoming calls placed from numbers not selected by the customer receive busy signals when the customer's line is busy. Customer may not subscribe to Call Waiting and Special Call Waiting on the same line.

* This service is limited to all existing customers at their existing locations.

CENTURYTEL CALLING SERVICES

B. Service Descriptions (Cont'd)

- 22. Speed Call - Permits local and long distance calls to be placed by dialing an abbreviated code. This arrangement is available in an eight-number capacity and a thirty-number capacity.
- 23. 3-Way Calling - Permits a customer to add a third party to an existing conversation, whether the original call was incoming or outgoing.

This feature is offered on a per line or per activation basis. When Three-Way Calling is implemented on a per activation basis, a charge will apply each time the service is invoked. The service is invoked by properly executing a hook-switch flash while engaged in a two-way conversation and initiating a conversation with a dialed third-party, then executing a second hook-switch flash to complete a three-way conversation.

- 24. VIP Alert - allows a customer to program up to twelve (12) telephone numbers of selected callers enabling the customer to distinguish certain incoming calls from all others by a distinctive ring tone. If a customer also subscribes to Call Waiting, calls from the selected numbers will be distinguished by a special Call Waiting tone.

C. Satisfaction Guarantee

- 1. If at anytime the customer notifies the Company he is not satisfied with the service(s), and wishes to discontinue the service(s), the customer will be entitled to a full refund of one (1) month's monthly recurring charge (MRC), or portion thereof if subscription is less than 30 days. The service(s) for which the credit is being issued will be discontinued from the customer's line. This refund will be applied as a credit on the customer's bill. Each customer will be entitled to the credit one time per service.

The Satisfaction Guarantee will apply to all CenturyTel Calling Services listed in this section.

NOTE: The grade of transmission on calls forwarded and three-way calling may vary upon the distance and routing required to complete such calls; therefore, the normal grade of end-to-end transmission cannot be guaranteed on such calls

CENTURYTEL CALLING SERVICES

D. Rates and Charges

1. Service Charges

- a. When a CenturyTel calling service or package is established at the same time as the associated exchange line, only the appropriate service charges for establishing the exchange service will apply. When a CENTURYTEL calling service or package is ordered subsequent to the installation of its associated exchange line, the Subsequent Service Ordering charge shall be waived for up to sixty (60) days of the initial request for service.
- b. When CenturyTel Calling Services, under the threshold amount of four services when subscribing to flexible packaging*, are ordered outside the waiver period subsequent to the establishment of the associated exchange service, the Subsequent Service Ordering Charge, as specified in Section 5 of this tariff, will apply. (Refer also to Section 5 for CENTURYTEL Calling Special Promotion information.)
- c. Established rates and charges will apply for other services provided in addition to those established in a. and b., preceding.
- d. Subsequent Service Ordering charges do not apply to customers ordering flexible packaging or when one service is substituted for another or when other services are added after the initial installation of a flexible package.

*This service is limited to existing customers at their existing locations

CALLING SERVICES

D. Rates and Charges

3. Flexible packaging – Residence**

a) This service offers a discount of 40% off the rates as specified in D.2.a. preceding to residential customers who subscribe to individual calling services. This discount applies only when the customer subscribes to four or more of the following services*:

- Busy Redial
- Call Return*69
- Call Block
- Call Forwarding
- Call Waiting
- Caller ID Number
- Caller ID Name and Number
- Distinctive Ring
- Special Call Acceptance
- Select Call Forwarding
- Speed Calling
- Three Way Calling
- VIP Alert

b) If four or more services are ordered, on an account basis, the discount will apply on rates of all services.

c) If the customer subscribes to less than four services or the customer removes a service(s) such that the total subscription becomes less than four, the discount does not apply.

d) A service may be added at a later date for the discount to apply. A service may also be substituted for another at a later date so that the discount may continue to apply.

* Anonymous Call Block is not included in the threshold amount of four, however, this service will be discounted if the threshold amount is met.

** This service offering is limited to existing subscribers at their present locations.

7. PREPAID LOCAL TELEPHONE SERVICE (PLTS)

(N)

Prepaid Local Telephone Service (PLTS) is a residential payment plan where the customer agrees to pay for service one month in advance. Upon establishment of the PLTS plan, the customer will be billed for one month service. The Company will require payment of these charges prior to establishment of service. Thereafter, the customer will be required to pay one month's service on a monthly basis. Once payment for service is received, one month's service will be provisioned and is non-refundable if the customer cancels service prior to the end of the month. No deposits, non-recurring charges or connection fees apply. This is a prepaid monthly service.

A. PLTS is configured as follows:

1. Voice grade residential flat rate line, or local measured service line, if available.
2. All mandatory services, including extended area service, expanded local calling, etc. (all tariffed charges applicable).
3. Tone Dialing (Tariffed tone dialing/touch tone charges are applicable).
4. Ability to dial 911.
5. Ability to report service problems seven days a week.
6. Ability to dial CenturyTel Customer Service.
7. Primary directory listing (nonpublished/nonlisted available at tariffed charges).
8. Access to Directory Assistance.
9. Toll blocking/usage sensitive services blocking (tariff charges applicable).
10. Call Waiting, Caller ID, and Call Forwarding included.

B. Customers who are unable to pay the required charges to maintain their present service may activate a PLTS plan, but may be required to agree to a repayment plan for their current charges.

C. New customers who do not qualify for service due to a poor credit history may subscribe to PLTS.

GENERAL AND LOCAL EXCHANGE TARIFF

CALLING SERVICES

E. PACKAGED SERVICES

7. PREPAID LOCAL TELEPHONE SERVICE (PLTS) Cont'd

(N)

D. The monthly rate for PLTS shall be in addition to any surcharges and fees established or authorized by a government entity, including but not limited to 911, subscriber line charge, sales tax and municipal fees.

E. Subscribers to PLTS are required to have mandatory toll blocking and usage sensitive blocking placed on their telephone line. It is the customer's responsibility to not make or receive calls, except for Directory Assistance, for which additional charges are billed to the customer's telephone number. After the first three directory assistance calls, tariffed rates for directory assistance will apply.

F. The Company may disconnect PLTS service, with notice, for any of the following reasons:

1. Failure to make monthly payments to maintain the PLTS balance.
2. Use of the service in a manner that interferes with the service of others.
3. If the customer accrues new billable charges for toll or other service on their telephone bill.

G. The Company may disconnect PLTS service without notice for any of the following reasons:

1. Where a known dangerous condition exists.
2. Where service is connected without authority by a person who has not applied for the service, or who has reconnected service without authority following termination of service.

H. If the PLTS customer is disconnected due to failure to comply with any terms of PLTS, they will no longer be eligible for PLTS. The customer can return to basic local telephone service if they meet the requirements for service, including payment of outstanding essential charges if applicable and payment of a deposit if their credit history is such that a deposit would normally be required.

9. Business Unlimited Service

(N)

Business customers with 1-10 lines will be eligible for discounted unlimited calling services. Subscription to the Business Unlimited bundle includes one line of Unlimited Local & Long Distance Calling and choice of calling features. Additional lines of Unlimited Local and Long Distance calling, up to a maximum of ten (10) lines, may be added per line plus all other applicable monthly service charges.

For Customers with 4-10 lines, a 12 month minimum service commitment is required. An early termination fee of \$500 will be applied if the service is canceled before the 12 month minimum service commitment period has expired.

Unlimited Local Calling does not apply to metered/measured line services, PBX, Key, or Centrex accounts. Toll and EAS services are not included in Local Calling plan. Unlimited Long Distance does not apply to metered/measured line services, PBX, Key, or Centrex accounts. Unlimited Long Distance services are provided by CenturyTel Long Distance, LLC. To receive Unlimited Long Distance plan rates, customer must choose CenturyTel Long Distance, LLC as their IntraLATA and InterLATA toll carrier. The Unlimited Calling plan is for typical domestic voice usage only, and cannot be used for any purpose inconsistent with typical domestic voice usage. If usage under this plan is not consistent with typical domestic voice usage, as determined in CenturyTel's sole discretion, CenturyTel reserves the right to move customer to an alternative plan or may suspend, restrict or cancel customer's service. Further, calls that do not fall within the Unlimited Long Distance plan include but are not limited to fax and data calls (billed at 10 cents per minute; includes calls to long distance dial-up Internet providers), calls to 900 numbers, directory assistance, calling card, operator services, international calling, toll free calling services, commercial facsimile, auto-dialing, resale, call centers and direct telemarketing centers. Additional costs apply for operator services, international calls, directory assistance, calling card rates and payphone surcharges. Long distance plan rates apply to direct dialed U.S. calls including Alaska, U.S. Puerto Rico, Guam and U.S.V.I.

CALLING SERVICESREMOTE CALL FORWARDING SERVICE

A. General

1. Remote Call Forwarding (RCF) Service allows all calls dialed to a telephone number equipped for RCF Service to be automatically forwarded to another dialable telephone number. The RCF customer is the called party who receives the automatically forwarded call.
2. The telephone number equipped for RCF Service is hereinafter referred to as an RCF number.

B. Conditions

1. RCF Service is offered subject to the availability of suitable facilities and is limited to central offices specifically equipped to provide RCF Service.
2. RCF Service can not be used for toll by-pass. The RCF customer and the RCF number must be located within the same local exchange, or the RCF customer must be located beyond the local calling area of the RCF number. Therefore, RCF Service may not be used in conjunction with local calling plans (except Metropolitan Calling Area Service (MCA)) and the RCF call may not terminate in an exchange which is an EAS point of the originating exchange.
3. Normal grade end-to-end transmission is not guaranteed because transmission characteristics may vary depending on distance and routing to complete the forwarded portion of the call.
4. RCF Service is not suitable for satisfactory transmission of data.
5. RCF Service is not offered when the answering location for a forwarded call is a coin/coinless station.
6. RCF Service or Call Forwarding Services will not be offered as a service at the RCF answering location.
7. The Company will not provide identification of the calling party number to the RCF customer.

Issued: July 18, 2002

Effective: September 1, 2002

CENTURYTEL CALLING SERVICES

REMOTE CALL FORWARDING SERVICE

B. Conditions (Cont'd)

8. The Company will provide one alphabetical directory listing, without charge, for each RCF Service. Additional directory listings may be provided at the rates specified elsewhere in this Tariff.
9. Each RCF Service allows for forwarding one call at a given time. An additional service is necessary for each additional call to be forwarded simultaneously.
10. RCF Service will only be provided when, in the judgment of the Company, the customer subscribes to sufficient RCF Service at the answering location to adequately handle calls without interfering with or impairing any services offered by the Company.
11. The minimum contract period for RCF Service is three months.
12. RCF Service is not allowed if service is to be used in conjunction with international calling.

C. Rates and Charges

1. The following rates apply for the RCF service only and are in addition to Service Charges, toll and local charges specified in applicable tariffs:

		<u>Monthly Rate</u>

DIGITAL DATA AND NETWORK SERVICES

DIGITAL CHANNEL SERVICE

A. General

1. Digital Channel Service is an intraexchange multifunctional digital channel service which provides access transport between a customer's premises and the local serving office on a channelized basis (DSO) over a single high-capacity (DS1) digital facility.
2. Digital Channel Service is provided in capacity increments of 24 digital channels within a single DS1 signal.
3. The following types of network services as specified in other tariffs are available on a channelized basis via Digital Channel Service. These services may be furnished on a link basis across multiple jurisdictions when connected with Digital Channel Service.
 - a. Analog Voice Service (exchange lines/trunks), and Centrex lines, foreign exchange, off-premises extensions, and voice private lines.
 - b. Analog Data Service
 - c. Digital Data Service (2.4; 4.8; 9.6; 19.2; 56 Kbps)
 - d. DS1 (1.544 Mbps) Service
 - e. Switched Data Service

GENERAL AND LOCAL EXCHANGE TARIFF

DIGITAL DATA AND NETWORK SERVICES

DIGITAL CHANNEL SERVICE

A. General (Cont'd)

4. Digital Channel Service is comprised of the following components:

- Digital Channel Capacity
- Digital Channel Activation
- Service Activation
- Customer Premises Channelization

- a. The Digital Channel Capacity, Digital Channel Activation and Service Activation will be at the rates and charges as specified in this Tariff. Digital Channel Capacity may also be provided at the rates and charges specified for CenturyTel Lan Service where CenturyTel Lan Service is available. See Section G. of the Digital Data Transmission Service tariff, PSC MO. NO. 6 for applicable rates and charges.
- b. Customer Premises Channelization has two rate components, Digital Channel Capacity and Service Activation, and may be provided by the Company or customer. When provided by the Company, rates and charges as specified in this Tariff. When provided by the customer, rules and regulations as specified in this Tariff.
- c. Digital Channel Service customers will have to select capacity in increments of 24 digital channels. Customers will be offered a Term Payment Plan of 36, 60, or 84 months with a month-to-month option available only after completion of selected payment plan.

GENERAL AND LOCAL EXCHANGE TARIFF

DIGITAL DATA AND NETWORK SERVICESDIGITAL CHANNEL SERVICE

B. Digital Architecture

1. Digital Channel Service differs in provisioning method and numbering format from end-to-end services. These services will be available from the Company on a link (partial channel) basis rather than as an end-to-end service. This architecture is intended to promote more efficient connectivity of analog and digital networks in the future.
2. The time required to provision service is known as the service date interval. The service date interval for Digital Channel Service and related network services connected to Digital Channel Service will differ from the normal guidelines applicable to end-to-end services.
3. Digital Channel Service will be available on a digital basis at the network interface on a customer's premises. Traditional analog services, like off-premises stations, and automatic access lines, can be provided on a digital basis to a customer's premises by the Company when a customer desires them encoded in a DS1 bit stream. Under those conditions, they will be provided as DSO channels by the Company. Both the Company and the customer have joint responsibilities to ensure the proper transmission of the provided services. Normal analog channel network interface specifications will be superceded by the electrical specifications of the 1.544 Mbps (DS1) channel which is actually terminated. Each digital channel provided will have identity only as a "time slot" within a DS1 channel. Compatible digital to analog conversion equipment must be provided by the customer (optional) to derive the desired analog services. Any Channel Service Units (CSUs) necessary for digital services are the responsibility of the customer (optional).

Issued: July 18, 2002

Effective: September 1, 2002

GENERAL AND LOCAL EXCHANGE TARIFFDIGITAL DATA AND NETWORK SERVICESDIGITAL CHANNEL SERVICE

C. Definitions

Digital Channel Capacity - A multifunctional DS1 signal between the customer premises and the central office. This digital link can be used to transport switched and dedicated services. This element acts as the transport medium for the service activations ordered by the customer. Digital Channel Capacity is available in increments of 24 digital channels.

Digital Channel Activation - The Digital Channel Activation is the quantity of channels the customer has activated at the central office. The Digital Channel Activations ordered by the customer cannot exceed the quantity of the Digital Channel Capacity.

Service Activation - A Service Activation is the connection between Digital Channel Service and the network service accessed.

Customer Premises Channelization - Provides access to the DSO time slot within the DS1 signal associated with a specific Digital Channel Service. Customer Premises Channelization utilizes D4 type channel bank equipment.

Channel Service Unit (CSU) - The term CSU denotes network channel terminating equipment provided by the customer to terminate digital channel facilities on a customer's or user's premises.

DS0 - The term DS0 denotes a channel service expressed in terms of its digitally encoded data bit rate in accordance with the North American hierarchy of digital signal levels. It is generally referred to as having a 64 Kbps transmission bit rate signal; however, customer transmitted bit rates are limited to 56 Kbps. The required format and interface specifications are stated in Section 7000 of the GTE Technical Interface Reference Manual.

DS1 - The term DS1 denotes a channel service expressed in terms of its digitally encoded bit rate in accordance with the North American hierarchy of digital signal levels. It has a 1.544 Mbps transmission data rate and provided for the two-way simultaneous transmission of isochronous timed, Bipolar Return-to-Zero (BPRZ) bit stream format. Unframed signal formats are not permitted or compatible with Company equipment. The required format and interface specifications are stated in Section 7000 of the GTE Technical Interface Reference Manual.

GENERAL AND LOCAL EXCHANGE TARIFFDIGITAL DATA AND NETWORK SERVICESDIGITAL CHANNEL SERVICE

D. Regulations

1. Digital Channel Service is furnished subject to the availability of facilities from digital central office equipment located in a central office building owned or leased by the Company.
2. This service is available within an exchange where appropriate digital facilities are available as determined by the Company. Service inquiries will be necessary to determine availability. Special Construction Charges as specified elsewhere in this Tariff may be applicable.
3. The 1.544 Special Transport Mileage will apply when a customer's request for Digital Channel Service is provisioned in a central office other than the customer's local serving office.
4. The customer may activate any number or combination of digital channels within the limitations as set forth in this Section. Digital channels may be activated coincident with installation or at any time subsequent to Digital Channel Capacity installation. Once activated, a digital channel is subject to a minimum service period.
5. All Digital Channel Service must be channelized in a single equipment location on a customer's premises. Digital Channel Service cannot be split between premises, or multiple locations within a premises. Extensions (as specified in other sections of this Tariff) may be furnished on a link basis between multiple locations. Standard network interfaces will be provided by the Company for analog and digital services consistent with existing practices.
6. Individual digital channels may be activated and furnished on a link (partial channel) basis with service offered in other sections of this Tariff. The regulations, rates, and charges specified in this Tariff are applicable for the Digital Channel Service component of the customer's end-to-end service. The regulations, rates, and charges in other sections of this Tariff are applicable to the customer's interconnected services (i.e., private lines, etc.), for the non-Digital Channel Service component of the customer's end-to-end service.

Issued: July 18, 2002

Effective: September 1, 2002

Vice President External Relations
Monroe, Louisiana

GENERAL AND LOCAL EXCHANGE TARIFFDIGITAL DATA AND NETWORK SERVICESDIGITAL CHANNEL SERVICE

D. Regulations (Cont'd)

7. The total number of digital channels activated by the customer may not at any time exceed the total Digital Channel Capacity. Additionally, there are some necessary restrictions in total system capacities where certain types of services are channelized, i.e., some channelizing equipment may require two DSO channels per channel provided by the Company thereby reducing the basic system stated capacity substantially. The Company will notify the customer when the Digital Channel Capacity is affected.
8. Central Office channelization (component of Digital Channel Capacity) generally provides analog to digital conversion to permit individual exchange services and private line channel services to be transported over digital high capacity facilities. This channelization is also intended for use at Company or customer designated locations where different high capacity digital network links terminate in the same central office and must be converted to individual analog or digital channels before individual service links can be crossconnected. Digital Channel Capacities are provided in groups of 24 DSO channels, and are subject to the limits as set forth in the previous paragraph.
9. Customer Premises Channelization generally provides analog to digital conversion at a customer's premises. This allows individual exchange services and private line services to be transported over digital high capacity facilities. The termination of this channelization will be in a single equipment location on a customer's premises. The customer must provide suitable floor space, controlled environment, and a source of nonswitched 120 volt 60 Hz. AC power to support this service. Emergency backup power and ring generating equipment capabilities are available for an extra charge on an Individual Case Basis.
10. When the Company provides Digital Channel Service channelization equipment at a customer's premises, it is not necessary for the customer to provide Channel Service Units (CSU's) for associated channels.

DIGITAL DATA AND NETWORK SERVICES

DIGITAL CHANNEL SERVICE

D. Regulations (Cont'd)

11. Channelization on a customer's premises may be provided by the customer or the Company. Joint provisioning of channelized services introduces joint responsibilities between the customer and the Company as specified following:
 - a. Responsibilities of the Company:
 - 1) The Company will endeavor to activate its portion of joint service in a timely manner on the negotiated date to support installation requirements.
 - 2) The Company will provide the customer with information regarding the type and the manufacturer of central office channelization equipment to be used in each application.
 - 3) The Company will attempt to limit its selection of central office equipment to avoid operational and administrative difficulties associated with a multi-vendor central office environment.
 - 4) The Company reserves the right to change its equipment vendors should equipment availability, price or technological advantages make such a change attractive or necessary.
 - 5) The Company will notify the customer, generally a minimum of six months in advance, of any need to change its central office equipment to allow the customer sufficient time to respond, make any necessary changes, and schedule cooperative testing for cutover, if required.
 - 6) Digital synchronization timing for Digital Channel Service will be provided by the Company.

Issued: July 18, 2002

Effective: September 1, 2002

Vice President External Relations
Monroe, Louisiana

GENERAL AND LOCAL EXCHANGE TARIFF

DIGITAL DATA AND NETWORK SERVICES

DIGITAL CHANNEL SERVICE

D. Regulations (Cont'd)

11. (Cont'd)

b. Responsibilities of the Customer:

- 1) The customer must be prepared to activate his portion of joint service in a timely manner on the negotiated date, providing testing equipment and personnel to support installation requirements, as may be necessary.
- 2) The customer will be responsible for selecting his own equipment. Customer equipment must be compatible with the Company provided channelization at the central office.

c. Trouble Resolutions:

- 1) The Company will assist the customer in resolving any installation or day-to-day channel service problems. However, the Company does not assure responsibility for the compatibility or suitability of the customer's equipment. Dispatches to customer premises caused by customer equipment troubles will result in Service Charges as set forth in this Tariff, to the customer.
12. The technical specifications and standard network interfaces for DS1 and associated channelized services are stated in Section 7000 of the GTE Technical Interface Reference Manual. Channelized DS1 service is available only with D4 channel bank equipment or compatible, equivalent equipment.

Issued: July 18, 2002

Effective: September 1, 2002

GENERAL AND LOCAL EXCHANGE TARIFF

DIGITAL DATA AND NETWORK SERVICESDIGITAL CHANNEL SERVICE

D. Regulations (Cont'd)

13. Emerging technology, such as low bit rate voice multiplexing techniques, may permit additional quantities of individual channels to be channelized on a single DS1 signal. Equipment providing this capability does not generally assure compatibility between different manufacturers. Some equipment may not be suitable for data transmission or tandem network line application. Rates, charges, and availability of this equipment will be negotiated with the customer on an Individual Case Basis.
14. When a customer's Digital Channel Service is interrupted due to any cause other than the negligence or willful act of the customer or the failure of the facilities provided by the customer, a pro-rata adjustment of the monthly charges involved will be allowed automatically for the service and facilities rendered useless and inoperative by reason of the interruption during the time said interruption continues in excess of 24 hours from the time it is reported to or detected by the Company except as otherwise specified in this Tariff. The adjustment shall not be applicable for the time that the Company stands ready to repair the service and the customer does not provide access to the Company for such restoration work.

GENERAL AND LOCAL EXCHANGE TARIFFDIGITAL DATA AND NETWORK SERVICESDIGITAL CHANNEL SERVICE

E. Application of Rates

1. Three basic rate elements; Digital Channel Capacity, Digital Channel Activation, and Service Activation are applicable to each Digital Channel Service.
2. The Digital Channel Capacity element provides for the mileage based transport and the central office channelization. Digital Channel Capacity is offered with 36, 60, or 84 month Term Payment Plan periods. A month-to-month option is available only after the completion of the selected Term Payment Plan period.
3. Digital Channel Activation is a recurring charge for each DSO channel activated within the Digital Channel Capacity. The Digital Channel Activation is offered on a month-to-month basis. When Digital Channel Service facilities are used to transport DS1 Service, the DS1 Service Activation charge is applied in lieu of the Digital Channel Activation charge.
4. Service Activation charges are recurring charges and are applicable for each network service (switched or dedicated) required by the customer. Service Activation is offered on a month-to-month basis. For DS1 services, a DS1 Service Activation charge is applicable.
5. Customer Premises Channelization is an optional component. Channelization at the customer's premises is available as a Company functionality at the rates described in this Tariff. In addition to this charge, a Customer Premises Service Activation charge will apply for each network service with Company provided channelization. Otherwise, the customer has the option to support premises channelization with CPE devices.
6. Monthly rates and charges as specified in this Tariff for Digital Channel Capacity apply according to the requested channel capacity. These rates apply regardless of the number of digital channels that are actually activated by the customer at a point time.
7. Digital Channel Capacity may also be provided as CenturyTel Lan Service, where CenturyTel Lan Service is available. See Section G. of the Digital Data Transmission Service tariff, PSC MO. NO. 6.

Issued: July 18, 2002

Effective: September 1, 2002

GENERAL AND LOCAL EXCHANGE TARIFFDIGITAL DATA AND NETWORK SERVICESDIGITAL CHANNEL SERVICE

E. Application of Rates (Cont'd)

7. Exchange and long-distance calling is provided within Digital Channel Service via the appropriate service activation. A network access charge will apply to each Service Activation that utilizes basic exchange access from the local serving office, except foreign exchange service. The network access charges when utilized for Centrex will be ordered and billed as specified in this Tariff. This charge is in addition to all other applicable Digital Channel Service charges.
8. Rates and charges specified in other Tariff sections for services such as CenturyTel Calling Services, etc., are in addition to the monthly rates for Digital Channel Service. End User Subscriber Line charges are applicable to Digital Channel Service.
9. The rates and charges for other services connected or extended beyond Digital Channel Service (i.e., off-premises extensions and private lines, etc.) are in addition to the rates specified in this Tariff for the Digital Channel Service portion necessary to provide customer end-to-end service. This will also apply to Nonrecurring Charges and Service Charges as specified in other Tariffs for activities involving the non-Digital Channel Service portion of the customer end-to-end service.
10. Digital Channel Capacity is available under Term Payment Plans only for rate periods of 36, 60, or 84 months. All elements of a Term Payment Plan will expire at the same time (be coterminous).
 - a. The customer may order additional Digital Channel Capacity(s) during a Term Payment Plan period. The expiration date of the additional capacity(s) will be the same expiration date as the original Term Payment Plan period.
 - b. Customer Premises Channelization Capacity charges (applicable only if Company provided) are available under Term Payment Plans only for rate periods of 36, 60, or 84 months.
 - c. Digital Channel Activation charges are available only on a month-to-month basis.

Issued: July 18, 2002

Effective: September 1, 2002

Jeffrey Glover
Vice President External Relations
Monroe, Louisiana

GENERAL AND LOCAL EXCHANGE TARIFF

DIGITAL DATA AND NETWORK SERVICES

DIGITAL CHANNEL SERVICE

E. Application of Rates (Cont'd)

10. (Cont'd)

- d. Service Activation charges are available on a month-to-month basis.
- e. Individual network services (switched or dedicated) that are connected to Digital Channel Service, are not available under the Term Payment Plan rate stability provisions. Those services are subject to their standard tariff provisions and minimum service periods as appropriate.
- f. When Digital Capacity is provided as CenturyTel Lan Service, the CenturyTel Lan DS-1 Service Activation charge or the CenturyTel Lan DS-3 Service Activation charge from Section G. of the Digital Data Transmission Service tariff, PSC MO. NO. 6, is applied in lieu of the DCS DS-1 Service Activation rate.

11. Termination Liability Terms and Conditions, See Section 2, Rules and Regulations.

12. A Termination Liability Charge will be applicable should the customer discontinue service prior to the end of the Term Payment Plan. This is subject to the following exemptions:

- a. No Termination Liability Charge will be applicable for the Digital Channel Capacity when the customer renegotiates a new Term Payment Plan for the same equipment or larger system at the same location for a period of time greater than the time remaining on the existing Term Payment Plan, subject to payment periods contained in E.10.
- b. All Digital Channel Service Components are coterminous with the Digital Channel Capacity with which they are associated. Any activations subscribed to on a month-to-month basis have a minimum service period of one month and no associated Termination Liability Charge.

GENERAL AND LOCAL EXCHANGE TARIFF

DIGITAL DATA AND NETWORK SERVICES

DIGITAL CHANNEL SERVICE

E. Application of Rates (Cont'd)

13. A Termination Liability Charge will be calculated based on the sum of the monthly payments remaining under the customer's Term Payment Plan, adjusted to the present value at the date of termination, based upon a 12% APR discount. The Termination Liability Charge is due in full at the date of termination.
14. Transfer of service responsibility between customers is permitted subject to the Rules and Regulations as specified in this Tariff.
15. Unless specified herein, the regulations contained elsewhere in this Tariff are applicable to Digital Channel Service. These regulations include but are not limited to:
 - Cancellation of Service
 - Application for Service
 - Payment Arrangements
 - Limitation of Liability
16. Should customers request interconnection between different Digital Channel Services provisioned in two or more different local serving offices, the 1.544 special transport mileage rates will apply. This charge will apply in addition to Digital Channel Service charges for each customer's premises which Digital Channel Service is provisioned.

Issued: July 18, 2002

Effective: September 1, 2002

Jeffrey Glover
Vice President External Relations
Monroe, Louisiana

GENERAL AND LOCAL EXCHANGE TARIFF

DIGITAL DATA AND NETWORK SERVICES

DIGITAL CHANNEL SERVICE

F. Rates and Charges

1. Service Charges

a. Service Establishment Charge

- 1) This charge applies to the initial Digital Channel Capacity(s) ordered by a customer for receiving, recording and processing the request for service. This charge includes processing orders to establish initial Digital Channel and Service Activations and/or Company provided Customer Premises Channelization. This charge includes common centralized testing, coordination and accounting activities.
- 2) This charge also applies to subsequent orders received to establish additional Digital Channel Capacity(s).

b. Service Change Charge

- 1) This charge applies on a per Digital Channel Capacity Service Activation basis associated with a customer request for modifications to an existing service. This would include activities such as, but not limited to:
 - Change of associated channel assignment
 - Additional supplemental features
 - Activate/deactivate Digital Channel Activation
 - Activate/deactivate Service Activation
- 2) This Service Change Charge will be applied on a first and each additional basis and is in addition to Service Charges as specified elsewhere in this Tariff.

c. Charges	<u>GSEC</u>	<u>Nonrecurring Charge</u>
1) Service Establishment Charge	DCSSEC1	\$300.00
2) Service Change Charge	DCSSCC	100.00

GENERAL AND LOCAL
EXCHANGE TELEPHONE TARIFF

Filed with Board

DIGITAL DATA AND NETWORK SERVICESCyberDS1 SERVICE

A. General

1. CyberDS1 Service provides network dial tone service between a customer's premises and the local serving office on a channelized basis (DSO) over a single high capacity (DS1) digital facility that terminates on the trunk side of the switch in the local serving office. CyberDS1 is available for data dialed access use.
2. CyberDS1 is provided in capacity increments of 24 digital channels within a single DS1 (1.544 Mbps) signal.
3. CyberDS1 provides a trunk side DS1 connection with 24 channels. CyberDS1 does not provide the function of analog to digital (or vice versa) conversions and no service types can be specified on the DS1.
4. The CyberDS1 Capacity will be offered at the rates and charges as specified following in this Tariff.
5. CyberDS1 customers will have to select capacity in increments of 24 digital channels.

B. Digital Architecture

1. CyberDS1 differs in provisioning method and numbering format from end-to-end services. These services will be available from the Company on a link basis rather than as an end-to-end service. This architecture is intended to promote more efficient connectivity of analog and digital networks.
2. CyberDS1 will be available on a digital basis at the network interface on a customer's premises. Both the Company and the customer have joint responsibilities to ensure the proper transmission of the provided services. Normal analog channel network interface specifications will be superseded by the electrical specifications on the 1.544 Mbps (DS1) channel which is actually terminated. Each digital channel provided will have an identity only as a "time slot" within a DS1 Channel. Compatible digital to analog conversion equipment must be provided by the customer to derive the desired analog services. Any Channel Service Units (CSUs) necessary for digital services are the responsibility of the customer.

Issued: July 18, 2002

Effective: September 1, 2002

DIGITAL DATA AND NETWORK SERVICES

CyberDS1 SERVICE

C. Regulations

1. CyberDS1 is furnished subject to the availability of facilities from digital central office equipment located in a central office building owned or leased by the Company. Clear Channel Capability (B8ZS) will be provided where available.
2. CyberDS1 is available within an exchange where appropriate digital facilities are available as determined by the Company. Special Construction Charges as specified in Section 2 of this Tariff may be applicable.
3. All CyberDS1 must be channelized in a single equipment location on a customer's premises. CyberDS1 cannot be split between premises, or multiple locations within a premise. Standard network interfaces, without Integrated Services Digital Network (ISDN) signaling and without any line type features, will be provided by the Company for analog and digital services consistent with existing practices.
4. The technical specifications and standard network interface for DS1 and associated channelized services are stated in Section 7000 of the GTE Technical Interface Reference Manual.

DIGITAL DATA AND NETWORK SERVICESCyberDS1 SERVICE

D. Definitions

Channel Service Unit (CSU) - The term CSU denotes network channel terminating equipment provided by the customer to terminate digital channel facilities on a customer's or user's premises.

CyberDS1 Capacity - A DS1 signal between the customer premises and the central office. This digital Link can be used to transport switched data services. CyberDS1 is available in increments of 24 digital channels.

CyberDS1 Term Pricing - Term Pricing offers customers who sign a 12 month term agreement, discount rates for CyberDS1 Service. Customer is required to maintain the service for length of the term agreement. Customer must contact the Company to renew the agreement at the end of the term to maintain the discount rate. If Customer terminates service prior to the end of the term agreement, the customer must pay 25% of the remaining balance of the term agreement.

DSO - The term DSO denotes a channel service expressed in terms of its digitally encoded data bit rate in accordance with the North American hierarchy of digital signal levels. It is generally referred to as having a 64 Kbps transmission bit rate signal; however, customer transmitted bit rates are limited to 56 Kbps. The required format and interface specifications are stated in Section 7000 of the GTE Technical Interface Reference Manual.

DS1 - The term DS1 denotes a channel service expressed in terms of its digitally encoded bit rate in accordance with the North American hierarchy of digital signal levels. It has a 1.544 Mbps transmission data rate and provides for the two-way simultaneous transmission of isochronous timed bit stream format. Unframed signal formats are not permitted or compatible with Company equipment. The required format and interface specifications are stated in Section 7000 of the GTE Technical Interface Reference Manual.

GENERAL AND LOCAL EXCHANGE TARIFF

DIGITAL DATA AND NETWORK SERVICES

DIGITAL DATA SERVICE

A. General

1. Digital Data Service is an intraexchange service which supports synchronous, full-duplex transmission at bit rates of 2.4, 4.8, 9.6, 19.2 and 56 Kilobits per second (Kbps) between the serving wire center of the customer designated locations.

2. There are five synchronous speeds offered through Digital Data Service.

2.4 Kbps - These facilities are best used for single terminal configurations.

4.8 Kbps - These facilities are best used for single terminal configurations.

9.6 Kbps - These facilities can be used for single terminal configurations and multiple terminal configurations through the addition of customer-provided multiplexers.

19.2 Kbps - These facilities can be used for single terminal configurations as well as multiple terminal configurations through the addition of customer-provided multiplexers.

56 Kbps - These facilities are suitable for all data transmissions. They require the ability to connect to a synchronous network. These facilities may be ordered as two-point or multipoint configurations. However, multipoint configurations are rare due to the considerable bandwidth of the circuit, but are available. Customer-provided multiplexing of the lower speed synchronous or asynchronous circuits between two CDLs is common at this speed.

Issued: July 18, 2002

Effective: September 1, 2002

Jeffrey Glover
Vice President External Relations
Monroe, Louisiana

GENERAL AND LOCAL EXCHANGE TARIFF

DIGITAL DATA AND NETWORK SERVICESDIGITAL DATA SERVICE

B. Conditions

1. Digital Data Service provides a transmission path for digital data signals between two customer designated locations within an exchange.
2. Digital Data Service is furnished for duplex operation on a full-time basis (24 hours a day, seven days per week).
3. Digital Data Service can only be provided within the same exchange where existing digital facilities and equipment permit. Services between serving wire centers must have digital service components (digital connectivity) between all intermediate offices to have the ability to provide the service.
4. There are two types of facility configurations over which Digital Data Service is provided, two-point and multipoint.
 - a. Two-Point - A two-point configuration is a circuit which is provided to connect two CDLs.
 - b. MultiPoint Service - A multipoint configuration is a circuit that is provided to connect three or more CDLs through a telephone company hub wire center. Multipoint Digital Data Service is provided in the following manner:
 - 1) Special Access Line per CDL to their respective serving wire centers.
 - 2) Special Transport facility between hub wire centers.
 - 3) Special Transport facility between the serving wire centers associated with the customer designated locations and the hub wire center.
 - 4) Special Transport Termination at each end of the Special Transport facility terminating in a telephone company serving wire center when applicable.
 - 5) Supplemental Features - Bridging equipment charges for each bridging location and other Supplemental Features when applicable.

Issued: July 18, 2002

Effective: September 1, 2002

Jeffrey Glover
Vice President External Relations
Monroe, Louisiana

GENERAL AND LOCAL EXCHANGE TARIFF

DIGITAL DATA AND NETWORK SERVICES

DIGITAL DATA SERVICE

C. Rates and Charges

1. There are four basic rate elements which may apply to Digital Data Service:

- Special Access Line (SAL)
- Special Transport (ST)
- Special Transport Termination (STT)
- Supplemental Features

2. Special Access Line

A Special Access Line (SAL) provides the transmission facilities to a customer designated location (CDL) or the facilities between a CDL and the serving wire center. This rate element varies by the bit-rate of the circuit ordered.

The applicable rates are the nonrecurring charge and monthly rate set forth per Digital Special Access Line installed.

One SAL charge applies per CDL at which the facility is terminated. This charge applies even if the facilities to the CDL do not transit a serving wire center. This charge also applies even if the CDL and the serving wire center are collocated in a telephone company building, except as specified below.

3. Special Transport

Special Transport provides the transmission facilities between the serving wire centers associated with two CDLs. This rate element is per airline mile. Fractional miles are rounded to the next whole mile.

The Special Transport rate will not apply if both CDLs are in the same serving wire center.

Issued: July 18, 2002

Effective: September 1, 2002

Jeffrey Glover
Vice President External Relations
Monroe, Louisiana

GENERAL AND LOCAL EXCHANGE TARIFF

DIGITAL DATA AND NETWORK SERVICESDIGITAL DATA SERVICE

C. Rates and Charges (Cont'd)

4. Special Transport Termination

Special Transport Termination provides the equipment and arrangements necessary to terminate the Special Transport facility at a telephone company serving wire center. One Special Transport Termination charge applies for the termination of each end of a Special Transport facility for Digital Data Services.

The Special Transport Termination rate will not apply if both CDLs are in the same serving wire center.

5. Supplemental Features

Supplemental Features may be added to a Digital Data Service circuit to improve its utility to meet specific communications requirements. These are not necessarily identifiable with specific circuit bit-rate, but rather represent the end result in terms of performance characteristics which may be obtained. Although the facilities necessary to perform a specified function may be installed at various locations along the path of the Digital Data Service circuit, including the customer designated location, it will be provided for as a single rate element. The Supplemental Feature available for Digital Data Service is described below:

a. Digital Data Service Bridging

- 1) Provides for a multi-junction unit (MJU) arrangement to bridge 2.4 Kbps, 4.8 Kbps, 9.6 Kbps, 19.2 Kbps or 56 Kbps Digital Data Service facilities. Different speeds cannot be mixed on the same bridge. This function is provided on a per port basis.

DIGITAL DATA AND NETWORK SERVICESCENTURYTEL DIAL DATALINKSERVICE

A. General

1. CenturyTel Dial DatalinkService is an enhancement to residential and business individual line service to provide higher quality transmission standards than normally provided for voice transmission. It is designed for customers requesting a better grade of service for data transmission. Lines conditioned with this level of service may also be used for normal voice communication. This service is offered subject to the availability of suitable facilities.

B. Conditions

1. The parameters of CenturyTel Dial Datalinkservice are designed to support transmission of data up to 4800 bits per second on the local loop from the point of demarcation to the serving central office switch.
2. The quality of the line is guaranteed only between the customer point of demarcation and the serving central office switch. No guarantee is made for a transmission level over the entire circuit.
3. CenturyTel Dial DatalinkService may not be compatible with other services offered in this Tariff, such as Call Waiting and is not offered in conjunction with the following:
 - Party line service
 - PBX trunks or stations
 - Foreign Exchange Service
 - Centrex Service
 - Off-premise extensions
 - Foreign Central Office Service
 - Outward WATS
 - Residence or business service provided by analog station carrier (e.g. 82A & 84A)

DIGITAL DATA AND NETWORK SERVICES

HIGH CAPACITY DIGITAL DS1 (1.544 Mbps) SERVICE

A. General

1. High Capacity Digital DS1 Service is an intraLATA dedicated high capacity channel used for simultaneous two-way transmission of serial, bipolar, return-to-zero isochronous digital signals at a transmission speed of 1.544 megabits per second (Mbps). This service is designed to provide an average performance of at least 95% (percent) error free seconds of transmission over a continuous 24 hour period.

B. Conditions

1. DS1 Service is available only on a point-to-point intraexchange/intraLATA basis. This service is provided between two Customer Designated Locations (CDLs).
2. DS1 Service is furnished on a full-time basis, 24 hours a day, seven days per week.
3. DS1 Service can only be provided within the same exchange where existing digital facilities and equipment permit.

C. Rates and Charges

1. There are three basic rate elements which may apply to DS1 Service:
 - Special Access Line (SAL)
 - Special Transport (ST)
 - Special Transport Termination (STT)
2. Special Access Line
 - a. A Special Access Line (SAL) provides the transmission facilities between a Customer Designated Location and the serving wire center.

Issued: July 18, 2002

Effective: September 1, 2002

DIGITAL DATA AND NETWORK SERVICES

HIGH CAPACITY DIGITAL DS1 (1.544 Mbps) SERVICE

C. Rates and Charges (Cont'd)

3. Special Transport

- a. Special Transport (ST) is defined as the facilities for digital transmission provided between two serving wire centers. This rate element is per airline mile. Fractional miles are rounded to the next whole mile.
- b. The Special Transport rate will not apply if both CDLs are in the same serving wire center.

4. Special Transport Termination

- a. Special Transport Termination (STT) provides the equipment and arrangements necessary to terminate the Special Transport facility at a serving wire center. One Special Transport Termination charge applies for the termination of each end of a Special Transport facility for DS1 Services.
- b. The Special Transport Termination rate will not apply if both CDLs are in the same serving wire center.

5. Optional Payment Plan (OPP)

- a. A customer may elect to participate in an Optional Payment Plan (OPP) arrangement for DS1 Service. The OPP allows a customer to order the "First System" DS1 Special Access Line over a 12, 36, or 60 month payment period. The OPP applies to the "First System" DS1 Special Access Line rate element ordered between a customer designated location and its serving wire center. When the same customer orders "Additional System" DS1 Special Access Lines at the same Customer Designated Location, the standard nonrecurring and monthly rates, as set forth in this Tariff for "Each Additional System", will apply.

C. Rates and Charges (Cont'd)

6. Early Termination Liability

- a. When a "First System" DS1 OPP Special Access Line is discontinued prior to the end of the payment period, two levels of termination liability may apply based on the remainder of the OPP payment period in effect at the time of disconnect as indicated below.

1) 12 Month Contract OPP

- a) 50% of any remaining portion of the first year's recurring charges.

2) 36 Month Contract OPP

- a) 50% of any remaining portion of the first year's recurring charges. In addition, for any remaining portion of the second and third year, the customer will be liable for 10% of the total monthly charges in that time period.

3) 60 Month Contract OPP

- a) 50% of any remaining portion of the first year's recurring charges. In addition, for any remaining portion of the second and third year, the customer will be liable for 20% of the total monthly charges in that time period.

7. Early Termination Without Liability

- a. During the OPP payment period, should the currently effective rate for a customer's "First System" DS1 OPP Special Access Line increase, the customer may, at their option, terminate the service without penalty or liability.

8. Notification of Discontinuance

- a. Notice of discontinuance must be given by the customer at least thirty (30) days prior to actual discontinuance. Monthly charges will apply for a period of thirty (30) days from the date the Company receives discontinuance notification or until the requested discontinuance date, whichever period is longer.

11. Clear Channel Capability

a. Description of Service

An arrangement that allows the customer to transport 1.536 Mbps of information through a High Capacity Digital (DS1) Service with no constraint on the quantity or sequence of one (mark) and zero (space) bits utilizing the Bipolar with Eight Zero Substitution (B8ZS) method of providing bit sequence independence. This arrangement is capable of transporting DS1 signals which utilize Superframe or Extended Superframe Format (ESF) as defined by the American National Standards Institute (ANSI) T1.107-1988 standard. The installation interval for Clear Channel Capability may exceed standard intervals where equipment in the central office is not readily available. The charges apply on a per SAL basis.

This arrangement requires the customer signal at the channel interface to conform to the B8ZS method of providing bit sequence independence, as described in ANSI T1.102-1987 and Section 6103 of the Technical Interface Reference Manual.

GENERAL AND LOCAL EXCHANGE TARIFF

DIGITAL DATA AND NETWORK SERVICES

MILEAGE CHARGES INTRA-EXCHANGE

A. General

1. Mileage charges apply to line extensions. All mileage is measured on an airline basis unless otherwise indicated.

B. Conditions

1. Applicable line extension mileage will be determined in the following manner:
 - a. Off-premises mileage charges are assigned to telephone stations not located on the same contiguous property as the central office access line or PBX frame. Routing of facilities will be provided in such manner as the Company may select. Mileage applications include but are not limited to extensions for services such as Telephone Answer Bureau Service.
 - b. If the loop of the additional station is bridged at the Central Office with the loop of the central office access line, the airline distance between the central office and the additional station is the mileage measurement. The mileage measurement includes inter-central office airline mileage if the two points are located in different central office areas of the same multi-office exchange. If the additional station is connected with the central office access line by a nonloop, the airline distance between the central office access line and additional station is the mileage measurement.
 - c. If the circuit connecting a PBX station with a PBX frame is routed through the central office in a loop, the airline distance between the demarcation point for the PBX station and PBX frame via the central office is the mileage measurement. If the circuit connecting the PBX station and PBX frame is not routed through the central office, the airline distance between the demarcation points for the PBX station and PBX frame is the mileage measurement.
 - d. Mileage charges are made on the basis of quarter mile airline units between the demarcation points for the station and the central office access line or PBX frame, with each fractional quarter mile unit counting as an additional full quarter mile unit.

Issued: July 18, 2002

Effective: September 1, 2002

GENERAL AND LOCAL EXCHANGE TARIFF

DIGITAL DATA AND NETWORK SERVICESMILEAGE CHARGES INTRA-EXCHANGE

B. Conditions (Cont'd)

2. Special equipment or arrangements in addition to that regularly provided may be provided at charges and/or rates based upon costs incurred.
3. Off premises extensions (OPX) will be allowed under the following conditions:
 - a. The service is limited to intraexchange individual central office access lines only (not semi-public service).
 - b. A business customer may have an extension from the customer's business to another business location if the other location is also the same billed account in the same exchange. A separate central office access line is not required in this instance.
 - c. Business stations may be located on the premises of another business when each party has its own separate central office access line.
 - d. Extensions from residence to residence are permitted when each party has its own separate central office access line.
 - e. Extensions from residence to business are permitted when each party has its own separate central office access line. If residence OPX service is installed at a business location, the residence main service and OPX must change to business rates.
 - f. Extensions from business to residence are permitted when the residence location has its own separate central office access line. If a proprietor actually lives in his business establishment, a separate central office access line is not required for extension service.
 - g. The offering is subject to the availability of facilities. If special construction is required in regard to the installation of extensions, construction charges will be applied. If the OPX leaves the serving wire center, construction charges may also apply.
 - h. When facilities must be constructed to provide service to the applicant beyond the Base Rate boundary, charges shall be determined as found under Line Extension Mileage in this Tariff.

GENERAL AND LOCAL EXCHANGE TARIFF

DIGITAL DATA AND NETWORK SERVICES

PRIVATE LINES - LOCAL

A. General

1. Charges are assigned to communications services which meet the following conditions:
 - a) Private line service is an intraexchange voice grade service between the serving wire center and customer designated locations.
 - b) The service cannot access nor be accessed by message services provided to the general public.
 - c) The service is furnished for the exclusive use of a customer and the customer's authorized users between specified points in the same Local Exchange Service Area.
 - d) The service does not qualify for intrastate toll or interstate toll regulation.

B. Conditions

1. Private Line Service provides a transmission path for voice grade signals between two customer designated locations within an exchange.
2. Private Line Service is furnished for duplex operation on a full-time basis (24 hours a day, seven days per week).
3. Private Line Service can only be provided within the same exchange where existing facilities and equipment permit.

Issued: July 18, 2002

Effective: September 1, 2002

GENERAL AND LOCAL EXCHANGE TARIFF

DIGITAL DATA AND NETWORK SERVICES

PRIVATE LINES - LOCAL

B. Conditions (Cont'd)

4. There are two types of facility configurations over which Private Line Service is provided, two-point and multipoint.

a. Two-Point

A two-point configuration is a circuit which is provided to connect two CDLs.

b. MultiPoint Service

A multipoint configuration is a circuit that is provided to connect three or more CDLs through a telephone company hub wire center. Multipoint Private Line Service is provided in the following manner:

- (1) Special Access Line per CDL to their respective serving wire centers.
- (2) Special Transport facility between hub wire centers.
- (3) Special Transport facility between the serving wire centers associated with the customer designated locations and the hub wire center.
- (4) Supplemental Features - Bridging equipment charges for each bridging location and other Supplemental Features when applicable.

GENERAL AND LOCAL EXCHANGE TARIFF

DIGITAL DATA AND NETWORK SERVICESPRIVATE LINES - LOCAL

C. Element Descriptions

1. General

There are three basic rate elements which may apply to Private Line Service:

- Special Access Line (SAL)
- Special Transport (ST)
- Supplemental Features

2. Special Access Line

A Special Access Line (SAL) provides the transmission facilities to a customer designated location (CDL) or the facilities between a CDL and the serving wire center.

One SAL charge applies per CDL at which the facility is terminated. This charge applies even if the facilities to the CDL do not transit a serving wire center. This charge also applies even if the CDL and the serving wire center are collocated in a telephone company building.

3. Special Transport

Special Transport provides the transmission facilities between the serving wire centers associated with two CDLs. This rate element is per airline mile. Fractional miles are rounded to the next whole mile.

The Special Transport rate will not apply if both CDLs are in the same serving wire center.

4. Supplemental Features

a. Private Line Service Bridging

Provides for a multi-junction unit (MJU) arrangement to bridge facilities. This function is provided on a per port basis.

DIGITAL DATA AND NETWORK SERVICESSWITCHED DATA SERVICE

A. General

This section contains the application, description, definitions, standard/optional feature packages, regulations, and rates and charges applicable to Switched Data Service furnished by the Company where available to customers served by and within the service territories of CenturyTel only. This service is only available where technology and facilities permit.

B. Description of Service

1. Switched Data Service is a network service which provides the capability for switched digital and end-to-end data transport.
2. The customer may subscribe to Switched Data Service under the following service arrangements, except when conditions as specified in this Tariff are applicable:
 - a. Low Speed Switched Data - Low Speed Switched Data Service supports 300, 1200, 2400, 4800, 9600 and 19,200 bits per second asynchronous full or half duplex connections and 1200, 2400 4800, 9600 and 19,200 bits per second synchronous full or half duplex connections.

Single Line
Centrex line

- b. High Speed Switched Data - High Speed Switched Data Service supports 48,000, 56,000 and 64,000 bits per second synchronous full duplex connections.

Single Line
Centrex line

GENERAL AND LOCAL EXCHANGE TARIFF

DIGITAL DATA AND NETWORK SERVICESSWITCHED DATA SERVICE

B. Description of Service (Cont'd)

2. (Cont'd)

- c. Switched Data Channel Access - A 1.544 high capacity digital facility which transports Switched Data usage between the customer's premise and the local serving central office on a channelized basis. Each Switched Data Channel Access provides 24 digital channels which support data transmission only. On a per channel basis, the customer can transmit data up to 56,000 bits per second.

C. Definitions

Asynchronous - A method of transmitting data in which each transmitted character is preceded by a start bit and followed by a stop bit, thus permitting the interval between characters to vary.

Bit - A binary digit. The smallest unit of information in the binary system of notation.

Bits Per Second - The number of bits transmitted per second. A measure of the speed of transmission of digital information.

Digital - Information which is expressed in discrete or noncontinuous form.

Full Duplex - Type of communication that supports the transmission of signals in both directions simultaneously. This is not associated with simultaneous transmission of voice and data communications.

Half Duplex - Type of communication that supports transmission of signals alternately in both directions, but is not capable of simultaneous and independent transmission and reception. This is not associated with simultaneous transmission of voice and data communications.

Hunting - A search through a group of numbers until an idle station is found or the last number of the group is reached.

GENERAL AND LOCAL EXCHANGE TARIFF

DIGITAL DATA AND NETWORK SERVICESSWITCHED DATA SERVICE

C. Definitions (Cont'd)

Synchronous - A method of transmitting data in which the data characters and bits are transmitted at a fixed rate with the transmitter and receiver synchronized, eliminating the need for individual start bits and stop bits.

D. Standard Features

1. Data Line Security - This feature prevents a call from being interrupted by override tones, such as a call waiting tone, or other test or busy verification tests that would interrupt the flow of data.
2. Intercom Dialing - This feature allows customer group stations to complete calls to other stations without the assistance of an attendant, by dialing a 2 through 7 digit number. This feature is applicable to CentraNet- customer groups only and is restricted to the serving wire center only.
3. Direct Dialing - This feature allows the user to place local and long distance calls without the assistance of an attendant by using the standard 7 through 10 digit dialing methods.

E. Optional Features

1. Data Direct Connect - This feature provides an automatic connection between a Switched Data calling line that goes off-hook and a predetermined location.
2. Data Closed User Group - This feature, restricted to Centrex Lines, provides partitioning of Switched Data lines into groups where calls within such a group are allowed, but calls between such groups are denied.
3. Voice Option - This feature allows simultaneous voice and data communications over a single Switched Data line. This feature is available where technical capabilities exist. This feature is not available with Switched Data Channel Access nor with Switched Data Individual Line Loop Extension.

f. Optional Feature Packages

The following feature packages are available for use with Switched Data Service, except where specified:

1. Feature Package Data 1000 includes:
 - a. Data Individual Speed Call-Short Lis: - The use of the Individual Speed Call-Short List is limited to an individual Switched Data line. A short list consists of a maximum of eight stored numbers. This feature is not available with Switched Data Channel Access nor with Switched Data Individual Line Loop Extension.
 - b. Data Call Forward (All/Busy/No Answer) - This feature allows a customer to have incoming calls to a Switched Data line automatically forwarded to a predetermined number. Data Call Forward consists of three variations as follows: all calls, busy and no answer. This feature is not available with Switched Data Channel Access nor with Switched Data Individual Line Loop Extension.
 - c. Data Last Number Redial - This feature enables a subscriber to redial the last called number by depressing a single key rather than the entire number. This feature is not available with Switched Data Channel Access nor with Switched Data Individual Line Loop Extension.
 - d. Data Toll Restriction - This feature will restrict toll calls from being placed over Switched Data lines.
 - e. Data Sequential Hunt Group - This feature assigns a pilot telephone number to the hunt group. Hunting is sequential, i.e., starting at the first line assigned to the pilot telephone number and ending at the last line.

F. Optional Feature Packages (Cont'd)

2. Feature Packaae Data 2000 - This package offers the customer a choice of combining any or all of the features contained in Feature Package Data 1000 plus:
 - a. Data Call Back - This feature allows a Switched Data user encountering a busy station to be notified when the busy station becomes idle and to automatically establish the call. This feature is available with Centrex intercom calling only. This feature is not available with Switched Data Channel Access nor with Switched Data Individual Line Loop Extension.
 - b. Data Saved Number Redial - This feature allows a customer to dial a saved number by depressing a single key rather than the entire number. This feature is not available with Switched Data Channel Access nor with Switched Data Individual Line Loop Extension.
 - c. Data Circular Hunting - This feature assigns a pilot telephone number to the hunt group. Hunting starts after the first idle line found by the previous hunt and continues until the hunting starting point is reached. This feature is not available with Switched Data Channel Access nor with Switched Data Individual Line Loop Extension.
 - d. Data Group Speed Calling - This feature provides storage for an abbreviated numbers list which is shared for use by a group of data lines. The list may be updated by a service order or by a user designated as the controller. Only the controller can add to, change or delete numbers from the list. Other lines with access to this list are restricted. This feature is available to Centrex intercom calling only. This feature is not available with Switched Data Channel Access nor with Switched Data Individual Line Loop Extension.
 - e. Data Individual Speed Call-Long List - The use of the Individual Speed Call-Long List is limited to an individual Switched Data line. A long list consists of maximum of thirty (30) stored numbers. This feature is not available with Switched Data Channel Access nor with Switched Data Individual Line Loop Extension.

G. Regulations

1. In addition to the following regulations, the appropriate regulations in other sections of this Tariff will also apply.
2. Switched Data Service is comprised of the following rate elements:
 - Switched Data Customer Line
 - Service Connection Charges
 - Optional Features
 - Software Reconfiguration Charge
 - Network Usage Charge
 - Customer Premises Channelization (Optional)
3. The minimum billing period for which service is provided is one month.
4. FCC Subscriber Line Charges as specified in the Federal access tariff will apply to Switched Data Service.
5. For Presubscription of an Interexchange Carrier, the rates and regulations as set forth in the Federal access tariff will apply to Switched Data Service.
6. A directory listing for Switched Data Service will be provided, upon request, in accordance with this Tariff.
7. Customer Premises Channelization, a component of Switched Data Service, may be provided by the customer or the Company. When the Company provides channelization equipment at a customer's premises, it is not necessary for the customer to provide a channel access card for the associated channels. The termination of this channelization will be in a single equipment location on a customer's premises. The customer must provide suitable floor space, controlled environment, and a source on a non-switched 120 volt, 60 Hz AC power to support this service. Emergency backup power and ring generating equipment capabilities are available for an extra charge on an individual case basis.
8. Switched Data Channel Access is required where:
 - a. Customers are restricted by the technical requirements as specified herein.

GENERAL AND LOCAL EXCHANGE TARIFF

DIGITAL DATA AND NETWORK SERVICESSWITCHED DATA SERVICE

G. REGULATIONS (Cont'd)

8. (Cont'd)

- b. A customer's local serving central office is not capable of providing Switched Data. The Company will determine the nearest central office capable of providing Switched Data. Interoffice digital high capacity mileage (1.544) will apply from the noncapable central office to the central office capable of providing Switched Data at the rates shown in Section 5 of the Facilities for Intrastate Access Tariff. In this situation, the customer will utilize the dialing plan associated with the central office that delivers the digital dial tone.

9. Switched Data Individual Line Loop Extension is required where:

- a. Customers are restricted by technical requirements as specified herein.
- b. A customer's local serving central office is not capable of providing Switched Data. The Company will determine the nearest designated central office capable of providing Switched Data Service. Interoffice digital data service (DDS) mileage will apply from the noncapable central office to the central office capable of providing Switched Data at the rates shown in Section 5 of the Facilities for Intrastate Access Tariff. In this situation, the dialing plan associated with the central office that will be providing the Switched Data service to the customer will be utilized.

10. Dialing Method

- a. Access to Switched Data Service is obtained through a dial-up connection via the public switched telephone network using the standard 7 through 10 digit methods.
- b. Origination of calls for 800, 900, 976, 0- (intraLATA) and 0+ (intraLATA) is limited to voice calls only. These calls will be provided with the Voice Option feature of Switched Data Service when requested by the customer.

GENERAL AND LOCAL EXCHANGE TARIFFDIGITAL DATA AND NETWORK SERVICESSWITCHED DATA SERVICE

G. REGULATIONS (Cont'd)

11. Technical Requirements

- a. Switched Data requires the use of customer provided data equipment which must be compatible with the Company's equipment and facilities.
- b. Customers who choose to subscribe to the Single Line or Centrex/Digital Centrex Line arrangement are subject to the distance limitations listed below as a result of digital signal power loss which are technology dependent. Switched Data Service will be provided where local loops do not exceed the following limitations:
 - 1) on the DMS-100 central office switch: 42 dB loss at 80 kilohertz, equating to a range from approximately 12,000 feet to approximately 18,000 feet, depending on cable gauge and including customer wiring.
 - 2) on the GTD-5 central office switch: 26 dB loss at 80 kilohertz, equating to a range from approximately 8,000 feet to approximately 15,000 feet, depending on cable gauge and including customer wiring.
 - 3) on a non-ISDN equipped 5ESS central office switch: 42 db loss at 80 kilohertz, equating to a range from 12,000 feet to approximately 14,000 feet, depending on cable gauge and including customer wiring.

Where these conditions cannot be met, the customer must subscribe to Switched Data Individual Line Loop Extension or subscribe to Switched Data Channel Access for Switched Data Service.

GENERAL AND LOCAL EXCHANGE TARIFF

DIGITAL DATA AND NETWORK SERVICES

SWITCHED DATA SERVICE

H. APPLICATION OF RATES

1. Switched Data Centrex Line rates are determined by the total number of either Low Speed or either High Speed lines, (i.e., if a customer requests 55 Low Speed lines and 25 High Speed lines, all 55 Low Speed lines will be billed at the "50-100" rate and all 25 High Speed lines will be billed at the "2-49" rate).
2. Rates and charges specified in other sections of this Tariff for services provided in conjunction with Switched Data Service (i.e., Centrex features etc.) are in -addition to the monthly rates for Switched Data Service.
3. Customer Premises Channelization is an optional component of Switched Data Channel Access. The customer has the option to support premises channelization with CPE devices or to be made available by the Company. Channelization at the customer premises when provided by the Company is available at the rates specified in this section of the Tariff. Both the Customer Premises Termination per access (24 channels) and the Customer Premises Channelization per channel will apply.
4. Switched Data lines placed in a business group do not require Network Access Registers (NARS) for outbound data traffic. However, the customer may choose to purchase additional NARS to support all terminating traffic that may be increased by Switched Data.
