1. Definitions (Cont'd)

Calling Number Delivery: This feature enables the customer to view on a display unit the calling party directory name and/or number (CPN) on incoming telephone calls. When a Caller ID is activated on a customer's line, the CPN of incoming calls are displayed at the called CPE during the first, long silent interval of the ringing cycle.

Per line blocking for the blocking of CPN will be available upon request, at no charge, to the following entities for lines over which the official business of the agency is conducted, including those at the residences of employees/volunteers, where an executive officer of the agency registers a need for blocking and provides the required certification to MCImetro a) private, nonprofit, tax exempt, domestic violence intervention agencies and b) federal, state, and local law enforcement agencies. The CPN will not be transmitted from a line equipped with this capability. Per line blocking is operational on a continuous basis but can be deactivated by the customer by dialing an access code immediately prior to placing a call. Line blocking customers can unblock their CPN information on a per call basis, at no charge, by dialing an access code (\*82 on their touch tone pad or 1182 from a rotary phone) immediately prior to placing a call.

A customer may prevent the delivery of their calling name and/or number to the called party by dialing an access code (\*67 on their touch tone pad or 1167 from a rotary phone) immediately prior to placing a call. The access code will activate per call blocking, which is available at no charge. If the calling party activated blocking, the CPN will not be transmitted across the line to the called party. Instead, Calling Line Identification customers will receive an anonymous indicator. This anonymous indicator notifies the Caller ID customer that the calling party has elected to block the delivery of their name and telephone number. The blocking of CPN will not be provided on calls originating from Customer Owned Pay Telephones. If the Caller ID customer also subscribes to Anonymous Call Rejection, the calling party will be routed to a telephone company recording advising the caller that the called party will not accept calls whose CPN has been blocked.

Any customer subscribing to Caller ID will be responsible for the provision of a display device, which will be located on the customer's premises. The installation, repair and technical capability of that equipment to function in conjunction with the feature specified herein will be the responsibility of the customer. MCImetro assumes no liability and will be held harmless for any incompatibility of this equipment to perform satisfactorily with the network features described herein.

Telephone CPN information transmitted via Caller ID is intended solely for the use of the Caller ID subscriber. Resale of this information is prohibited by this tariff. CPN will not be displayed if the called party is off-hook or if the called party answers during the first ring interval. CPN will be displayed for calls made from another central office only if it is linked by appropriate facilities. Caller ID is not available on operator handled calls.

Remote Call Forwarding (RCF): RCF allows all calls dialed to a telephone number equipped for RCF service to be automatically forwarded to another dialable telephone number. This service enables a customer to list a local directory number that is forwarded to a different city or exchange. Each RCF service allows for the forwarding of one call at a given time. The RCF customer is responsible for any applicable usage rates/charges between the RCF number and the terminating number.

Conditions:

1. RCF service is not offered when the answering location for a forwarded call is a coin/coinless, Semi-public/public telephone service.
2. The Company cannot guarantee the grade of transmission on remotely forwarded calls. Normal grade end-to-end transmission is not guaranteed because transmission characteristics may vary depending on distance and routing required to complete the forwarded portion of the call.
3. RCF service will only be provided when, in the judgement of the Company, the customer subscribes to sufficient RCF facilities at the terminating (answering) location to adequately handle calls without impairing, disrupting or deteriorating any services offered by the Company. In the event that the use of RCF service causes impairment, disruption or deterioration, the Company shall have the right to discontinue the RCF service.

RCF service is required for each directory number being forwarded. A customer can request additional RCF service (call paths) provided the customer has a receiving group of lines equal to the number of RCF services requested, (i.e., directory number is forwarded to a remote group of 5 lines - the customer can have up to 5 RCF services.)

However, a customer may opt to increase their "path" quantities per number based on their ability to process simultaneous call volumes during overflow conditions. A monthly recurring charge will apply based on a "per path/per number" scenario". In addition, toll charges may be assessed if the alternate number designated by the customer is not toll free and is outside of their service address rate center. N

2.5.7.3 Telecommunications Service Priority (TSP)

The Telecommunications Service Priority (TSP) program is a federally-established program under which the Office of Priority Telecommunications in the Executive Office of the President prioritizes the restoration and provisioning of telecommunications services - including services to private companies and institutions -- that support national security or emergency preparedness (NS/EP). The FCC defines telecommunications services under the TSP program to include the sending and receiving of signals or most any kind, by virtually any means. NS/EP services are those used to maintain a state of readiness or to respond to and manage any event or crisis (local, national, or international) that causes or could cause injury or harm to the population, damage to or loss of property, or that degrades or threatens the NS/EP posture of the United States. For telecommunications services enrolled in the program, the Company will provision and restore TSP-coded circuits, and provide TSP Special Construction services, under the terms set forth in this TSP service product description, and as required by the FCC's TSP regulations (currently at 47 CFR Part 64, Subpart D, Appendix A), and other applicable law. TSP services are in two categories: Priority Provisioning (including Emergency Provisioning and Essential Provisioning) and Priority Restoration.

Customers are subjected to the features, rate and charges as described in the Company's "Service Publication and Price Guide" (The Guide), located on the Company's website at [www.mci.com](http://www.mci.com).

2.5.7.4 Local Disaster Recovery

MCI Disaster Recovery Plans Service is an optional feature for customers of MCI Local Line and/or Trunk Services. MCI Disaster Recovery Plans Service is not available for circuits provided via UNE-P.

MCI Disaster Recovery provides MCI Local Customers with pre-established Disaster Recovery Plans to be invoked in case of a local line/trunk outage related to an emergency /disaster. Disaster Recovery can be defined as a collection of actions, procedures, and information that is developed, tested and held in readiness for use in the event of an emergency / disaster. For purposes of this optional feature, an emergency / disaster is defined as any event that may cause a lengthy disruption of the Customer's local line/trunk service. These events include, but are not limited to, natural events, accidents, or events of sabotage. The customer must notify MCI when to invoke these pre-established plans with a secure password. These pre-established plans may consist of specific restoration processes involving the redirection of traffic through Remote Call Forward Feature Service; or Trunk Group Redirection. More complex plans that involve over100 numbers may also be established on an individual case basis. Changes or modifications to these plans can be made as part of the monthly recurring fee.

2.5.7.5 811 Dialing Service

2.5.7.5.1 General

811 Dialing Service (811) is a custom call-routing application utilizing a three-digit local dialing arrangement, terminating to a subscriber-provided number for access to advance excavation notice services. It provides the calling party an easy-to-remember three-digit dialing code with call delivery to established 811 subscribers. The 811 code was assigned for this purpose pursuant to the Sixth Report and Order, released March 14, 2005 by the Federal Communications Commission in CC Docket No. 92-105, which specifies that such calls be delivered to a number provided by the relevant 811 subscriber that is not a toll call for the party dialing the number (i.e., either a toll-free (8XX) or local number). This tariff covers calls originating on lines terminating in a Verizon Access Transmission Services switch (i.e., originating and terminating within the same MSA); it does not cover 1+, 0+, 0- operator-assisted, 101XXXX, or inmate calls).

2.5.7.5.2 Conditions

Calls placed using 811 are automatically routed to the 811 subscriber's terminating number, which the subscriber must provide in the form of either a toll-free number or a local number whose local calling area covers all of the locations to which the service is provided. The subscriber shall provide Verizon Access Transmission Services with this number in advance so that Verizon Access Transmission Services may properly translate its central office switches. If charges are required to re-route the call to the terminating number, they will be cared for by the use of a subscriber-provided toll-free number. Verizon Access Transmission Services is not responsible for redirecting or otherwise handling 911 and other calls misdialed or misrouted as 811 calls. The subscriber shall provide sufficient terminating number paths to its toll-free or local terminating number so as to not clog nor impair Verizon Access Transmission Services network.

Verizon Access Transmission Services offering of 811 to the subscriber also is conditioned on the subscriber's representation that it has been authorized by appropriate state authorities to receive and respond to 811 calls from the public within the areas served by Verizon Access Transmission Services and that the subscriber has obtained all licenses, authorizations, and other prerequisites necessary to provide that service, and will at all times comply with all applicable laws and regulations.

Credit allowances for service outages that exceed 24 hours in duration will be rounded up to the next whole 24 hours.

2.6.2 Limitations on Allowances

No credit allowance will be made for:

- (a) interruptions due to the negligence of, or noncompliance with the provisions of this tariff by, the Customer, Authorized User, Joint-User, or other common carrier providing service connected to the service of Company except where contracted by the Company;
