6.17 AUTOCONNECTsm

REC'D DEC 29 1998

6.17.1 General

- A. AutoConnectsm is a call completion service for persons receiving telephone number information from Directory Assistance (DA). If the DA caller requests the telephone number of a customer subscribing to AutoConnect, the caller will be advised that the call can be completed at no additional call completion charge to the caller. The call completion charges will be paid by the customer that is being called. Customers may subscribe to AutoConnect by contacting their local business office.
- B. AutoConnect is a variation of the currently available Directory Assistance Call Completion (DACC) service, in which the DA customers complete calls resulting from a query to Directory Assistance. With DACC, the DA customer chooses to incur an additional charge to complete the call.
- C. If call completion is paid for under the terms of the AutoConnect service, Directory Assistance Call Completion (DACC) charges found in this tariff will not apply.
- D. Any business customer listed in the DA database may subscribe to AutoConnect.
- E. AutoConnect is available only as fully-automated call completion.
- F. AutoConnect is only available in connection with requests for local telephone numbers.
- G. AutoConnect charges cover only the call completion service. The caller will be responsible for any local message charges and/or DA charges.
- H. AutoConnect customers can subscribe to AutoConnect for select lines and/or listings, as specified by the customer.

EXPLANATION OF TERMS

ACCESSORY: A device which is mechanically attached to, or used with, the facilities furnished by the Telephone Company and which is independent of, and not electrically, acoustically or inductively connected to, the conductors in the communications path of the telecommunications system.

(RT)

ALTERNATING CURRENT SUPPLY: Electrical energy which is used for the operation of bells and signal devices.

ATTENDANT POSITION: An attendant switchboard or console which provides an answering point for customer-provided communications systems. It is used for answering and distributing the incoming calls and for assisting certain users.

AUTHORIZED PROTECTIVE CONNECTING MODULE: A protective unit designed by the Telephone Company and manufactured under the control of Telephone Company quality assurance procedures; such unit is to be incorporated in a conforming answering device.

BASE RATE: A schedule rate for any class-of-exchange service available within the base rate area.

BASE RATE AREA: That portion of the exchange area in which Exchange Service is furnished at schedule rates for each class of service without mileage or construction charges.

Southwestern Bell Telephone Company
St. Louis, Missouri

No supplement to this tariff will be issued except for the purpose of canceling this tariff.

General Exchange Tariff
Section 8
3rd Revised Sheet 6
Replacing 2nd Revised Sheet 6

EXPLANATION OF TERMS

DATA SWITCHING: When used in connection with Composite Data Service, denotes the switching of data (non-voice) messages by the interchange, controlling and routing of data messages via communications facilities, wherein the information content of the message remains unaltered.

DEMARCATION POINT: That point (referred to as Demarc Point or Network Interface) of interconnection between the Telephone Company's facilities and the wiring at the subscriber's premises. The Demarc Point shall consist of wire or a jack conforming to Subpart F of Part 68 of the Federal Communications Commission's Rules and Regulations. The Demarc Point will generally be within twelve inches of the protector or, absent a protector, within twelve inches of the entry point to the customer's premises. If conforming to the twelve inches is unrealistic or technically impossible, the Demarc Point will be the most practicable minimum point of entry to the customer's premises.

The network interface may be located at a point other than the normal demarcation point where the network interface is already established by the presence of network equipment with the effective date of this tariff. For multiunit (e.g., apartments, college campuses, shopping centers) the structure owner shall make the final decision on whether the structure shall be treated as a multipremises structure with one demarcation point per premise or, as a single premise with one demarcation point for the entire structure. The structure owner shall have the option of having the demarcation point placed at a location other than that determine by the Telephone Company provided the structure owner pays any additional construction costs and such location is consistent with the minimum point of entry standard.

(AT) Upon request of the subscriber or their agent, the Telephone Company shall provide additional regulated network entrance facilities and/or demarcation arrangements in single tenant multiunit or multibuilding situations in accordance with Section 5, Paragraph 5.4, (Special Construction), of this Tariff. Each additional regulated network entrance facility will terminate in a demarcation arrangement located at a minimum point of entry within a specified designated telecommunications equipment space.
(AT)

With regard to premises for any structure that is built to be mobile (e.g., mobile homes, recreational vehicles), the Telephone Company may place the Demarc Point on a post or pole at or near the pad where such structure is intended to rest. Boat docks and similar premises may be treated by the Telephone Company as a single unit premises, with the Demarc Point being placed on the shore.

DIRECT CURRENT SUPPLY: Electrical energy for talking and signaling purposes, other than ringing, except in the case of intercommunicating systems when direct current may be used for ringing the telephone bells.

No supplement to this tariff will be issued except for the purpose of canceling this tariff.

General Exchange Tariff
Section 8
1st Revised Sheet 6
Replacing Original Sheet 6

EXPLANATION OF TERMS

DATA SWITCHING: When used in connection with Composite Data Services, denotes the switching of data (non-voice) messages by the interchange, controlling and routing of data messages via communications facilities, wherein the information content of the message remains unaltered.

RECEIVED
NOV 26 1986

(AT) DEMARCATION POINT: That point at which the Telephone Company's responsibility for installation and maintenance on a tarified basis ends, and the customer's option to install and/or maintain inside wire begins.

RECEIVED
NOV 26 1986
Public Service Commission

For Simple Inside Wire the demarcation point is the first penetration at or inside a customer's premises on the customer's side of the protector where inside wiring becomes dedicated to an individual customer's use. In those locations where there is a Telephone Company-provided Network Interface, that plug-in jack will serve as the demarcation point. The drop and block, including the protector and Network Interface, will continue to be provided by and remain the property of the Telephone Company.

For Complex Inside Wire the demarcation point is the first jack or interconnection strip on the customer's side of the Telephone Company Network Terminal. This jack or interconnection strip is generally located within twenty-five (25) feet of the customer's common equipment, i.e., communications apparatus in which two or more business lines terminate and which facilitates pick up by associated stations. This jack or interconnection strip remains the property of the Telephone Company.

EXPLANATION OF TERMS

GRANDFATHERED COMMUNICATIONS SYSTEMS: The term "Grandfathered Communications Systems" denotes communications systems (including their equipment, premises wiring and protective circuitry, if any) connected at the customer's premises, in accordance with any telephone company's tariffs, and that are considered to be grandfathered under the Federal Communications Commission's Rules and Regulations, because such systems are connected to the telecommunications network prior to January 1, 1980, and are of a type of system which was directly connected (i.e., without Telephone Company-provided connecting arrangements) to the telecommunications network as of June 1, 1978.

GRANDFATHERED CONNECTIONS OF COMMUNICATIONS SYSTEMS: The term "Grandfathered Connections of Communications Systems" denotes connections via Telephone Company-provided connecting arrangements of customer communications systems (including their equipment and premises wiring) at the customer's premises, in accordance with any telephone company's tariffs, and that are considered to be grandfathered under the Federal Communications Commission's Rules and Regulations, because such connections to the telecommunications network are made via Telephone Company-provided connecting arrangements prior to January 1, 1980, and such connecting arrangements are of a type of connecting arrangement connected to the telecommunications network as of June 1, 1978.

GRANDFATHERED TERMINAL EQUIPMENT: The term "Grandfathered Terminal Equipment" denotes terminal equipment (including protective circuitry, if any) connected at the customer's premises, in accordance with any telephone company's tariffs, and that is considered to be grandfathered under the Federal Communications Commission's Rules and Regulations, because such terminal equipment was connected to the telecommunications network prior to July 1, 1979, and is of a type of terminal equipment which was directly connected (i.e., without Telephone Company-provided connecting arrangements) to the telecommunications network as of October 17, 1977.

GRANDFATHERED CONNECTIONS OF TERMINAL EQUIPMENT: The term "Grandfathered Connections of Terminal Equipment" denotes connections via Telephone Company-provided connecting arrangements of customer-provided terminal equipment connected at the customer's premises, in accordance with any telephone company's tariffs, and that are considered to be grandfathered under the Federal Communications Commission's Rules and Regulations, because such connections to the telecommunications network were made via Telephone Company-provided connecting arrangements prior to July 1, 1979, and such connecting arrangements are the same type of connecting arrangement connected to the telecommunications network as of October 17, 1977.

EXPLANATION OF TERMS

INDIVIDUAL (ONE-PARTY) LINE SERVICE: A grade of Exchange Service which provides for a maximum of one main station on a line.

INITIAL RATE: (See Base Rate)

INITIAL RATE AREA: (See Base Rate Area)

INSTALLATION/MOVE CHARGE: A nonrecurring charge made under certain conditions covering the cost or portion of the cost of the work connecting, furnishing or moving telephone service. (See Construction Charge and Service Connection Charges.)

INTERCOMMUNICATION SYSTEM: (See Private Branch Exchange)

INTEREXCHANGE CHANNEL: That portion of a channel which interconnects exchanges in which the stations are located.

(AT) INTERFACE: That point on the premises of the customer at which provision is made for connection of other than Telephone Company-provided facilities to facilities provided by the Telephone Company. (See Network Interface)

INTERNATIONAL RECORD CARRIER: A carrier, certified by the Federal Communications Commission, to provide overseas/international telecommunications service other than voice communication (e.g., teletypewriter, facsimile, data).

JACK: A fixed socket provided by the Telephone Company to accomplish the direct electrical connection between telephone facilities by means of cords ending in plugs.

JURISDICTION: A geographic area meeting each of the following conditions:

- A. Presided over by the same regulatory body;
- B. Within the boundary of a single state;
- C. An area in which Southwestern Bell is authorized to provide service.

EXPLANATION OF TERMS

LOCALITY RATE: A rate quoted as a single item but made up of base rate, plus an average or commuted mileage or construction charge, applied uniformly to all customers to the same class of service within a defined part of the schedule area, not a part of the base rate area of the schedule under which service is rendered.

LOCAL MESSAGE: (See Message)

LOCAL SERVICE AREA: The area within which service is furnished between stations without charge other than the regular Exchange Service charge.

MEASURED SERVICE: A class of service for which a charge is made in part on the basis of network access and, in part, on the basis of four local usage pricing elements, number of local messages, the duration of the message, the distance of the message within the local area and the time of day the message was placed.

MESSAGE: A telephone conversation of any prescribed length between two telephone stations. Messages may be classified as follows:

- A. LOCAL MESSAGE: A communication between telephone stations located within the area defined as the local service area of the station from which the message originates.
- B. TOLL MESSAGE: A communication between two telephone stations, the called station being outside of the local service area of the station from which the message originates.

MESSAGE RATE SERVICE: A class of Exchange Service, not including coin box service, for which charge is made wholly or in part on the basis of amount of use.

EXPLANATION OF TERMS

MOVE:

Inside Move: A relocation of telephone service from one location to another location on the same premises.

Outside Move: A discontinuance of telephone service at one premises and its installation at another premises, all within the same jurisdiction, between rate jurisdictions of a Bell Operating Company or between two jurisdictions in separate Bell Operating Companies, if appropriate.

MULTILINE: An individual flat rate business Exchange Service furnished by means of two or more exchange lines terminating in apparatus which facilitates pick-up by associated stations.

Multiline rate exceptions are as follows:

- A. Multiline rates do not apply where the PBX trunk rate applies or on Package PBX or Centrex Service.
- B. Multiline rates do not apply to announcement lines.
- C. Multiline rates do not apply to Secretarial Answering Lines terminated at a Telephone Answering Bureau. Extensions terminated at a Telephone Answering Bureau are not considered when determining whether multiline rates apply.
- D. Functions performed by data sets are not considered when determining whether multiline rates apply.

MULTILINE HUNT GROUP: Rotary (hunting) service provided in Electronic Switching System (ESS) offices where a standard seven-digit number is assigned only to the first line in a customer's number group. Subsequent lines are designated by using two-, three- or four-digit numbers dependent on the type of ESS office. The Telephone Company reserves the right to determine when Multiline Hunt Group numbers are assigned.

EXPLANATION OF TERMS

NETWORK: (See Telecommunications Network)

NETWORK ACCESS LINE: The exchange line from the serving office terminating directly at the customer-provided communications system.

NETWORK ACCESS TERMINAL: A special arrangement at a PBX, Centrex or an instrument on the customer's premises to provide access to a private line switched service network for incoming and/or outgoing calls.

NETWORK CONTROL SIGNALING: The transmission of signals used in the telecommunications system which perform functions such as supervision (control, status and charging signals), address signaling (e.g., dialing), calling and called number identification, audible tone signals (call progress signals indicating re-order or busy conditions, alerting, coin denominations, coin collect and coin return tones) to control the operation of switching machines in the telecommunications system.

NETWORK CONTROL SIGNALING UNIT: The terminal equipment furnished for the provision of network control signaling.

(CT) NETWORK INTERFACE: The point where the Telephone Company's installation and maintenance responsibility, on a tariffed basis, ends and the customer's installation and maintenance responsibility begins. It is a Telephone Company-provided jack or its equivalent. (See Demarcation Point)

NONLEAD NUMBERS: Any number in the customer's number group that is not the first number.

NONPUBLISHED EXCHANGE SERVICE: An Exchange Service, the listing of which, at the customer's request, is omitted from the alphabetical list of names of customers. Nonpublished telephone numbers are not divulged except in situations where the Telephone Company is served with valid legal process or is in receipt of lawful demand of a law enforcement agency.

PARTY LINE SERVICE: A grade of Exchange Service which permits the connection of two or more main stations on the same central office line.

PATRON: When used in connection with Composite Data Service, denotes a subscriber to the data switching services of a Composite Data Service Vendor.

PAY STATION: (See Public Telephone)

POTENTIAL EXCHANGE: (See Exchange)

PREMISES:

- A. See definition of term "building."
- B. All portions of the same building occupied by the same customer, provided that:
 - 1. The portions are not separated from each other by intervening offices, rooms or suites not occupied by the customer.
 - 2. The portions on different floors are contiguous and that the portion on the upper floor is directly above the portion occupied on the lower floor.
- C. All of the buildings occupied by the same customer, provided that:

All of the buildings are located on the same continuous plot of ground, all of which plot is owned and/or held under lease by the same customer, and the buildings are not intersected by a public vehicular thoroughfare which is governmentally owned.

PRIMARY CALLING AREA: (Primary Service Area): That area throughout which telephone calls may be completed without the application of message toll telephone charges.

EXPLANATION OF TERMS

PRIVATE BRANCH EXCHANGE:

A. Dial Systems

1. **Switchboard Systems:** A dial switchboard system provides automatic switching equipment to interconnect lines terminating in the switching equipment or to connect these lines to central office trunks. Incoming calls are manually switched to terminating lines by keys or cords.
2. **Key Station Systems:** A key station system provides automatic switching equipment to interconnect lines terminating in the switching equipment or to connect these lines to central office trunks with supervision of incoming calls at one or more master stations.

B. Manual Systems

Switchboard System: A manual switchboard system provides a manually operated switchboard operated by keys or cords to interconnect the lines terminating in the switchboard or to connect these lines to central office trunks for incoming or outgoing calls.

C. Intercommunicating Systems

No. 1 and No. 2 Systems: A system in which each station is equipped with a set of pushbuttons that can be used to signal or connect that station to other stations connected to the system or to central office trunks.

D. Circuits and Equipment Ordinarily Furnished Include the Following:

PRIVATE BRANCH EXCHANGE TRUNK LINE: A circuit which connects a Private Branch Exchange with the central office for the purpose of telephone communication.

DIRECT CURRENT SUPPLY: (See Direct Current Supply)

ALTERNATING CURRENT SUPPLY: (See Alternating Current Supply)

RINGING CIRCUIT: A circuit connecting a Private Branch Exchange with the central office for the purpose of furnishing to the Private Branch Exchange alternating current for ringing purposes.

EXPLANATION OF TERMS

PRIVATE BRANCH EXCHANGE-(Continued)

D. Circuits and Equipment Ordinarily Furnished Include the Following.
(Continued)

TIE LINE: A circuit directly connecting two Private Branch Exchange switchboard systems.

PUBLIC TELEPHONE: An exchange station installed for the convenience of the public at a location chosen or accepted by the Company.

RATE CENTER: A specified geographic location within an exchange area or zone of a Metropolitan Exchange (or location outside the exchange area) from which mileage measurements are determined for the application of interexchange mileage rates.

REGISTERED: The term "Registered" denotes equipment which complies, and has been approved, within the Registration provisions of the Federal Communications Commission's Rules and Regulations.

RINGING: The term "ringing" refers to the method of signaling a customer's station and may be considered in three classes.

- A. **CODE RINGING:** A method of signaling on party lines whereby the bells at all stations are operated when any one station is signaled, the signals for the respective stations being distinguished by a code made up of a combination of short and long rings.
- B. **SELECTIVE RINGING:** A system of signaling on party lines which permits each station to be signaled without operating the bells at the other stations on the line.
- C. **SEMI-SELECTIVE RINGING:** A system of ringing on party lines whereby the bells of only a portion of the stations are operated when one station is signaled.

General Exchange Tariff
Section 8
Original Sheet 19

EXPLANATION OF TERMS

SERVICE POINT: When used in connection with customer-provided communications channels, denotes the point on the customer's premises where channels provided by or furnished to the customer are terminated in switching equipment used, at least in part, for communications with stations or customer-provided terminal equipment.

SERVICE STATION LINE: Telephone facilities provided by the customer in isolated and sparsely developed areas where it is not practicable for the Telephone Company to make such facilities available.

SERVICE TERMINATING ARRANGEMENT: Telephone Company-provided equipment which terminates WATS or Exchange Telephone Service at a customer's premises. The Service Terminating Arrangement provides a clearly delineated interface which facilitates the design, isolation and testing of WATS or Exchange Telephone Service. Where a protective connecting arrangement is required, the Service Terminating Arrangement is provided as a part of the protective connecting arrangement.

SERVING OFFICE: The office in the service area from which a customer would normally be served for Local Exchange Telephone Service. Where the serving office is not located in the service area, a theoretical location has been established by the Telephone Company for billing purposes.

SERVING OFFICE AREA: The specific area normally served by a serving office. A serving office area may be served in several ways, namely:

- A. By a single-unit serving office with one telephone number prefix.
- B. By a multi-unit serving office with multi-telephone number prefixes.
- C. By a theoretical serving office with switching equipment located in another exchange or serving office area.

SHORT-TERM RATE: A rate quoted for service for a period less than the regular service term and quoted specifically for such period of service.

EXPLANATION OF TERMS

(AT) SIMPLE INSIDE WIRE: Any inside wiring other than complex wire, e.g., wire on the customer's side of the Demarcation Point that terminates in telephone apparatus that does not facilitate pick-up by associated stations.

STATION: The network control signaling unit, data set or other equipment at the customer's premises which enables the customer to establish the communications connection to effect communications through such connections; also, denotes a termination of an individual exchange line or PBX trunk provided in accordance with the provisions of this Tariff in switching equipment located in an ex-change foreign to the exchange in which the customer is located.

SUBSCRIBER'S COIN BOX SERVICE: A classification of subscriber's service furnished to stations equipped with coin-collecting devices as part of the Telephone Company's service at rates which are dependent, wholly or in part, upon the number of local messages within a given period.

SUBSCRIBER: A person who has contracted for and is receiving telephone service. The contract may be written, verbal or merely an understanding.

SUBURBAN BASIC SERVICE AREA: (See Basic Service Area)

SUPPLEMENTAL CONTRACT: A contract for service, equipment or facilities in addition to that provided for under the original contract.

SUSPENSION OF SERVICE: An arrangement made at the request of the customer or at the initiative of the Telephone Company for temporarily discontinuing service without terminating the contract or removing the telephone equipment from the customer's premises.

EXPLANATION OF TERMS

SWITCHED CIRCUIT AUTOMATIC NETWORK (SCAN): A service arrangement at certain Telephone Company premises to interconnect Private Line Telephone Service channels of a switched service network provided to certain agencies of the Federal Government. The common control switching on the Telephone Company premises is provided on a four-wire basis. Such service may be arranged for cryptographic transmission.

SWITCHED SERVICE NETWORK (SSN): A private line network that uses SCAN and/or CCSA-type common control switching.

SWITCHING EQUIPMENT: Equipment which performs the function of establishing and releasing connections between:

- A. Two or more Telephone Company-provided services, or
- B. Telephone Company-provided service or services and a communications system or systems provided by the customer or Other Common Carrier.

Such equipment shall operate to establish each connection for the purpose of the transmission of communications and shall operate to release the connection or generate a supervisory signal for the manual release of the connection by an attendant immediately following the conclusion of each call.

TELECOMMUNICATIONS NETWORK: All facilities of the Telephone Company that are used to provide its services.

(CT) **TELEPHONE COMPANY:** Southwestern Bell Telephone L.P., d/b/a AT&T Missouri.

TELEPHONE NUMBER: A designation assigned to a subscriber's station for convenience in operating. Telephone numbers may include the name of a central office which is termed the "Central Office Designation."

EXPLANATION OF TERMS

TERMINATION CHARGE: A charge made to a subscriber if the contract is terminated prior to the expiration of the contract period.

THEORETICAL CENTRAL OFFICE DISTRICT: (See Serving Office Area)

THEORETICAL EXCHANGE: (See Exchange)

TIE LINE: (See Private Branch Exchange)

TOLL SERVICE: (Message Toll Telephone Service)

Message Toll Telephone Service is that of furnishing facilities for telephone communication between telephones in different local service areas in accordance with the regulations and system of charges specified in the Long Distance Message Telecommunications Service Tariff. The toll service charges specified in the Long Distance Message Telecommunications Service Tariff are in payment for all service furnished between the calling and called telephones.

UNLIMITED SERVICE: (See Flat Rate Service)

URBAN BASIC SERVICE AREA: (See Basic Service Area)

URBAN MILEAGE: The mileage applied in establishing the rate for service to a customer outside the base rate area and which represents the distance from the limits of the base rate area to the customer's station.

ZONE: That portion of a Metropolitan Exchange which has a separate rate center.

FOREIGN SERVING OFFICE AND FOREIGN EXCHANGE
(INCLUDING CENTREX STATIONS WITH SWITCHING
EQUIPMENT LOCATED ON TELEPHONE COMPANY PREMISES)

9.1 GENERAL REGULATIONS

9.1.1 Foreign Serving Office Service is Exchange Service furnished to a customer in a multi-office exchange from a serving office other than the one which serves the area in which he is located. Foreign Exchange Service is Exchange Service furnished to a customer from an exchange other than the one in which he is located.

9.1.2 Such services are not in accord with the general plan of furnishing telephone service, and they will be furnished only under special conditions where the service is warranted by the circumstances involved. The Telephone Company does not obligate itself to furnish these services, particularly when it involves undue expense or impairment of the service furnished the general public.

9.1.3 These services are available only in connection with One-Party Line, Multiline or Private Branch Exchange Service.

9.1.4 Foreign Exchange Service will be provided in connection with Hotel/Motel services only for the exclusive use of the hotel management.

9.1.5 Exchange Service and extensions are furnished subject to the exchange charges, rules and regulations of the foreign serving office or foreign exchange from which they are furnished.

All other services and equipment including urban mileage are subject to the charges, rules and regulations of the exchange in which the termination is located.

9.2 RATES

9.2.1 Foreign Serving Office and Foreign Exchange Service will be provided at the rates found in Section 2 of the Private Line Service Tariff.

Issued: December 29, 1983

Effective: January 1, 1984

By R. D. BARRON, Vice President-Missouri
Southwestern Bell Telephone Company
St. Louis, Missouri

No supplement to this tariff will be issued except for the purpose of canceling this tariff.

General Exchange Tariff
Section 10
Original Sheet 1

HOTEL AND MOTEL RESERVATION SERVICE AT
MUNICIPAL AIRPORT TERMINALS

10.1 GENERAL

- 10.1.1 Hotel and Motel Reservation Service is service furnished at municipal airports for the use of the public in calling hotels and motels in the metropolitan area regarding room reservations.
- 10.1.2 Hotel and Motel Reservation Service will be furnished only at Municipal Airport Terminals to municipal authorities or agencies representing such authorities or the hotels and motels. Such customers shall be responsible for the payment of all charges for telephone service and facilities furnished by the Telephone Company for use with the reservation service.
- 10.1.3 The type of service, equipment and facilities located on the Municipal Airport premises and used in providing Hotel and Motel Reservation Service shall be approved by the Telephone Company. The customer is responsible for providing, at its expense, suitable space and any special mounting arrangements, etc., that may be required.
- 10.1.4 It shall be the responsibility of the customer to provide suitable instructions for the proper operation of the Hotel and Motel Reservation Service by the public; to provide and contract for adequate service, equipment and facilities to meet the requirements of the public.
- 10.1.5 The liability of the Telephone Company for damages arising out of mistakes, omissions, interruptions, delays or errors or defects in transmission occurring in the course of furnishing service or other facilities shall in no event exceed an amount equivalent to the proportionate charge to the customer for the period of service during which such mistake, omission, interruption, delay or error or defect in transmission occurs. Such proportionate charge for each day for which an allowance is to be made shall be computed as one thirtieth (1/30) of the total charge for service for the month in which such interruption occurs. If, in the case of such interruption, service is restored on or before the day after said interruption is reported to or detected by the Telephone Company, no allowance will be made. No allowance shall be made and the Telephone Company shall not be liable in any amount for damages caused by the negligence of the customer or interruption caused by the misuse or abuse of the equipment by the transient public.

Issued: December 29, 1983

Effective: January 1, 1984

HOTEL AND MOTEL RESERVATION SERVICE AT
MUNICIPAL AIRPORT TERMINALS

10.2 RATES

- 10.2.1 Hotel and Motel Reservation Service lines, each, per month, the flat rate trunk rate as shown in the Local Exchange Tariff applies.

Issued: December 29, 1983

Effective: January 1, 1984

By R. D. BARRON, President-Missouri Division
Southwestern Bell Telephone Company
St. Louis, Missouri

No supplement to this tariff will be issued except for the purpose of canceling this tariff.

General Exchange Tariff
Section 11
Original Sheet 1

MESSAGE RATE SERVICE

- 11.1 Customers contracting for message rate service are billed monthly at rates specified in the Local Exchange Tariff plus charges for local messages in excess of the message allowance, if any, used during the preceding month.
- 11.2 The monthly period for the message allowance begins on the first billing date following the date of connection. For the fraction of the month preceding the message period, a proportionate part of the monthly contract rate is billed and a proportionate allowance of local messages is made; excess messages, if any, are charged for in each excess message rate step in like proportion.
- 11.3 When a customer changes to or from message rate service, a proportionate part of the monthly contract rate and a corresponding allowance of local messages are made for the fraction of the billing period during which Message Rate Service is used; excess messages, if any, are charged for in each excess message rate step in like proportion.
- 11.4 If the allowance is not used in any one month, no credit of messages not used is applied against messages used in any other month.
- 11.5 The furnishing of flat and message rate (including semi-public telephone) services on the same premises is not permitted except as specified in Section 17 of this Tariff under the caption Paralleling Service.
- 11.6 Unless otherwise requested by the customer, all message rate services of the same class furnished the same customer from the same central office designation and installed on the same customer premises are considered collectively in determining the message allowance and excess messages. However, message rate services of the same class or of different classes furnished the same customer and installed on different premises or with different central office designations are not considered collectively in determining message allowances and excess messages.
- 11.7 The provisions of this Tariff apply to all Message Rate Service except semi-public telephone.

MILEAGE

12.1 URBAN MILEAGE-(Continued)

12.1.2 Shortest air line measurement from the customer's premises to the base rate area boundary is used in computing urban mileage charges. In those cases where the base rate area boundary follows the center line of a street or highway, all dwellings or structures facing or adjoining the street or highway and within 150 feet of the center line of the street or highway shall be considered within the base rate area. Urban mileage charges are payable in the same manner as charges for the associated service.

12.1.3 Where a party line customer has the exclusive use of one-half mile or more of a circuit outside the base rate area, and there are no prospects of obtaining additional customers to share the circuit within a reasonable length of time, the customer is charged the one-party line urban mileage rate for the portion of the circuit so used.

12.1.4 In certain outlying sections, having a community of interest, an average, or commuted urban mileage charge may be applied throughout the section, upon proper official approval. The average urban mileage charge is computed on the shortest air-line distance between the center of the section and the boundary of the base rate area. The sum of the average, or commuted urban mileage charge and the base rate is the locality rate for each class of service furnished.

13.1 GENERAL REGULATIONS

- 13.1.1 The following rates and charges with their associated regulations will apply for the equipment and facilities which are not regularly furnished under the various classes of exchange service. They apply in addition to the established charges for the service with which the equipment is associated.
- 13.1.2 Unless specifically excepted, Installation/Move Charges quoted in this Section do not apply to reconnections of in-place miscellaneous equipment.
- 13.1.3 For the purpose of applying private line charges, the regulations and charges specified in Section 2 of the Private Line Service Tariff will apply.
- 13.1.4 When the customer's requirements cannot be met with regularly offered equipment, services and arrangements, modifications of standard equipment, specially designed equipment or special services and arrangements will be furnished. They will be provided under the Special Service Arrangements procedure. These will not be furnished if detrimental to the general service.
- 13.1.5 The rates and charges shown herein apply in addition to other applicable nonrecurring charges as described in the Service Connection Charges Section, Section 19, of this Tariff.
- 13.1.6 The Service and Equipment Charges listed in this Section will apply for each item of equipment installed in addition to any applicable Installation/Move or Nonrecurring Charges. The Service and Equipment Charges do not apply to inside moves of equipment.

MISCELLANEOUS SERVICE OFFERINGS

(AT) 13.2 ACD-ESS CENTRAL OFFICE SERVICE(1)

13.2.1 Automatic Call Distributing Systems Provided by Electronic Switching Systems (ACD-ESS)

A. General

- 1. Automatic Call Distributing Systems provided by Electronic Switching Systems (ACD-ESS) is a range of ACD services. Service provision utilizes No. 1 Electronic Switching System central office equipment. ACD-ESS service automatically distributes calls from groups of incoming facilities to one or several groups of answering positions. If all positions are busy, incoming calls are held in queue, in their order of arrival, until positions become available.
- 2. The following terms as used in this Section are defined below:

Network Access Registers - provide access between the local exchange network and the ACD-ESS. It performs a service comparable to a Private Branch Exchange (PBX) trunk.(2)

Primary Location - refers to the customer's principal premises used for answering calls. There is only one primary location per ACD-ESS System.

Secondary Location - refers to any premises, other than the customer's primary location, served by one or more answering positions of an ACD-ESS System.

B. Rules and Regulations

- 1. The following rules and regulations are in addition to other rules and regulations as stated in this tariff.
- 2. Provision of this service, or a portion thereof, is available only where facilities and operational conditions permit.
- 3. The rates and charges for the ACD-ESS System are in addition to the established monthly and nonrecurring charges applicable to other services terminated in the ACD-ESS System.

- (AT) (1) Obsolete - applicable to existing installations at existing locations for existing customers.
- (FC) (2) Directory Assistance Service General Regulations, Allowances, Exemptions and Rates found in Directory Services Section of this tariff as they apply to Private Branch Exchange Service trunks are applicable.

MISCELLANEOUS SERVICE OFFERINGS

(AT) 13.2 ACD-ESS CENTRAL OFFICE SERVICE-(Continued)(1)

13.2.1 Automatic Call Distributing Systems Provided by Electronic Switching Systems (ACD-ESS)-(Continued)

B. Rules and Regulations-(Continued)

4. Facilities

- a. Facilities are contracted for out of this and other tariffs to support not only all simultaneous calls being answered, but also those calls being held in queue. The customer must contract for a sufficient number of facilities, including network access registers, so as to prevent impairment of general telephone service as discussed in Section 17 of this tariff.
- b. Facilities connecting more than one ACD-ESS or an ACD-ESS with a Centrex System served by a No. 1 Electronic Switching System are considered tie lines regardless of the extent of collocation of systems within a No. 1 Electronic Switching System.
- c. PBX and Centrex stations may be terminated on the ACD-ESS central office queuing equipment. This is considered a trunk-to-station tie line and applicable charges for universal tie line terminals or charges for comparable service should be applied. Centrex stations terminated in ACD-ESS are considered "trunk-to-stations" tie lines regardless of the extent of collocation of systems within a No. 1 Electronic Switching System.
- d. Charges for facilities connecting agent or supervisory premises consoles to ACD-ESS central office queuing equipment are included in facility charges. If the total number of consoles arranged to receive incoming calls exceeds the total number of Foreign Exchange, Foreign Serving Office, WATS, Tie Lines, CCSA and Network Access Registers, channel charges as found in Section 2 of the Private Line Service Tariff apply from the ACD-ESS serving office to the customer's premises for the channel associated with each such excess console.

(AT) (1) Obsolete - applicable to existing installations at existing locations for existing customers.

MISCELLANEOUS SERVICE OFFERINGS

(AT) 13.2 ACD-ESS CENTRAL OFFICE SERVICE-(Continued)(1)

13.2.1 Automatic Call Distributing Systems Provided by Electronic Switching Systems (ACD-ESS)-(Continued)

B. Rules and Regulations-(Continued)

4. Facilities-(Continued)

- e. Appropriate Private Line Service Tariff charges will apply for channels required to provide supplemental ACD functions, supervisory signaling and Management Information System.
- f. The ACD-ESS offering contemplates a system to be located within a single premises. When portions of a system are located at one or more secondary premises requiring connecting facilities between the premises, private line mileage charges and/or construction charges may be applicable for provision of the facilities.
- g. When ACD-ESS secondary locations are to be served directly from the ACD-ESS serving office but the premises is physically located in another central office serving area, additional Private Line Service Tariff mileage charges should be applied as described in Paragraph 13.2.1, B.4.h.
- h. The ACD-ESS offering contemplates the customer's location being located within the same serving office area as the central office equipment providing the ACD-ESS service. However, at the discretion of the Telephone Company and subject to operating limits and facility availability, ACD-ESS service may be extended to a customer's location in a different serving office area than that served by the central office equipped to provide ACD-ESS service. When ACD-ESS service is extended in this manner, additional charges are applicable. In addition to those charges discussed in Paragraph 13.2.1, B.4.d. of this tariff, Private Line Service Tariff channel charges for the distance from the ACD-ESS serving office to the normal serving office of the customer's location will be applied for each console.

(AT) (1) Obsolete - applicable to existing installations at existing locations for existing customers.

MISCELLANEOUS SERVICE OFFERINGS

13.2 ACD-ESS CENTRAL OFFICE SERVICE-(Continued)

13.2.1 Automatic Call Distributing Systems Provided by Electronic Switching Systems (ACD-ESS)-(Continued)

B. Rules and Regulations-(Continued)

4. Facilities-(Continued)

- e. Appropriate Private Line Service Tariff charges will apply for channels required to provide supplemental ACD functions, supervisory signaling and Management Information System.
- f. The ACD-ESS offering contemplates a system to be located within a single premises. When portions of a system are located at one or more secondary premises requiring connecting facilities between the premises, private line mileage charges and/or construction charges may be applicable for provision of the facilities.
- g. When ACD-ESS secondary locations are to be served directly from the ACD-ESS serving office but the premises is physically located in another central office serving area, additional Private Line Service Tariff mileage charges should be applied as described in Paragraph 13.2.1, B.4.h.
- h. The ACD-ESS offering contemplates the customer's location being located within the same serving office area as the central office equipment providing the ACD-ESS service. However, at the discretion of the Telephone Company and subject to operating limits and facility availability, ACD-ESS service may be extended to a customer's location in a different serving office area than that served by the central office equipped to provide ACD-ESS service. When ACD-ESS Service is extended in this manner, additional charges are applicable. In addition to those charges discussed in Paragraph 13.2.1, B.4.d. of this Tariff, Private Line Service Tariff channel charges for the distance from the ACD-ESS serving office to the normal serving office of the customer's location will be applied for each console.

MISCELLANEOUS SERVICE OFFERINGS

(AT) 13.2 ACD-ESS CENTRAL OFFICE SERVICE-(Continued)(1)

13.2.1 Automatic Call Distributing Systems Provided by Electronic Switching Systems (ACD-ESS)-(Continued)

B. Rules and Regulations-(Continued)

4. Facilities-(Continued)

i. If ACD-ESS consoles are extended off premises, extension line mileage charges are applicable for each channel extension. If special construction and/or equipment assembly are required to provide the service, supplemental charges, based on cost, will be applicable via Special Service Arrangement Requests.

j. The operating range of ACD-ESS agent and supervisor consoles will allow provision of service to most customer locations. It may be found in some cases, however, that the combination of distance from the ACD-ESS central office and the mix of normal distribution and trunking facilities available between the locations will limit the capabilities of the consoles. The Telephone Company is under no obligation to provide ACD-ESS service to such locations. Special Service Arrangements and/or special distribution or trunking facilities may be required to restore some or all of the capabilities specified for the consoles. If the customer agrees to pay the supplemental charges based on costs of such Special Service Arrangements and/or facilities and to accept the service with any limitations which may remain, the Telephone Company may agree to provide the ACD-ESS service.

5. Temporary suspension of service at the request of the customer, either partial or complete, is not applicable to equipment provided under this offering.

6. Responsibilities of the Customer

a. Chairs, desks or tables required for mounting equipment and operating the service are furnished and maintained by the customer.

b. Operation of console and display unit equipment will be performed at the expense of the customer.

(AT) (1) Obsolete - applicable to existing installations at existing locations for existing customers.

Issued: February 28, 1990

Effective: March 30, 1990
