25.1 GENERAL REGULATIONS

(AT)
|
(AT)

25.1.1 This tariff section contains the general regulations and definitions governing Plexar-I Services furnished by the Telephone Company except as otherwise specified, or unless the terms and conditions of an individual customer agreement provided pursuant to the Customer Specific Pricing Plan Tariff, P.S.C. Mo. No. 37 apply.

Plexar-I is an optional communications system arrangement for business customers which combines 2 or more individual exchange access lines into a Plexar-I group. Plexar-I is provided subject to the capability of the central offices.

Plexar-I Service is obsolete to existing customers subscribing to Standard Package 2 and selected optional features. Moves, changes and additions shall be in accordance with the definition of "obsolete-existing customer" as defined in Section 8 of this Tariff.

Plexar-I lines can be equipped with DigiLine Service in accordance with Section 3 of the Integrated Services Tariff. These lines can be combined into a Plexar-I group and used to fulfill the minimum line requirement. For purposes of determining the minimum line requirement, each DigiLine Basic Rate Interface (BRI) is counted as one exchange access line.

25.1.2 In addition to the Plexar-I System Charges and Feature Capability Charge specified in the following, the Tariff rate for an Individual Flat Rate Line, Multiline or Measured Business Exchange Access Line shall apply, as appropriate as found in the Local Exchange Tariff. Plexar-I lines can also be arranged for hunting.

For Plexar-I lines equipped with DigiLine Service, the appropriate rate from Section 1 of the Integrated Services Tariff will apply in lieu of the exchange access line charge.

25.1.3 Directory listings will be furnished in accordance with the regulations set forth in Section 6 of this Tariff.

25.1.4 The assignment of telephone numbers for Plexar-I shall be in accordance with Section 17 of this Tariff.

Calling number subscribers will receive an anonymous indicator. This anonymous indicator notifies the calling number subscriber that the calling party has elected to block the delivery of their telephone number.

Line blocking for the delivery of calling number is available upon request, at no charge, to the following entities and their employees/volunteers, for lines over which the official business of the agency is conducted, including those at the residence of employees/volunteers, where an executive officer of the agency registers with the Telephone Company a need for blocking: (a) private, nonprofit, tax-exempt, domestic violence intervention agencies, and (b) federal, state and local law enforcement agencies. Calling number will not be transmitted from a line equipped with this capability.

PLEXAR®-I

25.1 GENERAL REGULATIONS-(Continued)

25.1.12-(Continued)

(AT) The blocking of the calling party's name and/or number will not be provided on calls originated from Payphone Exchange Access Service.

(CT) In addition to the provisions of the General Exchange Tariff, the Telephone Company shall not be liable for any claims for damages caused or claimed to have been caused, directly or indirectly, by the transmission to a calling name and/or number customer of a name and/or telephone number which the calling party has requested to be omitted from the telephone directory or by the disclosing of such name and/or telephone number to any person. The Telephone Company shall not be liable for any claims for damages caused or claimed to have been caused, directly or indirectly, by the transmission to a calling name and/or number customer of a name and/or telephone number which the calling party or the calling name and/or number customer finds erroneous, offensive, embarrassing, or misleading for any reason, including but not limited to the way in which the calling party's name has been abbreviated. The Telephone Company shall not be liable for any claims for damages caused by a telecommunications utility's failure to transmit the privacy to the called party when such indicator has been passed to the telecommunications utility by the Telephone Company.

(AT) 25.1.13 Calling Name and/or Number Service Interactions:

- (AT) 1. Calling Name and/or Number will not be displayed if the called party is off-hook.
- (AT) 2. Calling Name and/or Number will not be displayed if the called party answers during the first ring interval.
- (AT) 3. Calling Name and/or Number is not available with distinctive ringing services having a silent interval length insufficient for number transmission.
- (AT) 4. Identification of specific stations or extensions served by some CPE is not possible. The main directory number will be displayed.
- (AT) 5. Calling Name and/or Number will be displayed for calls made from another central office only if it is linked by appropriate facilities.
- (AT) 6. Calling Name and/or Number will not be displayed if the calling party has activated blocking.

(AT) 25.1.14 Calling Name and/or Number information may not be sold or given to another party without the caller's consent. Calling Name and/or Number information may only be used for: (a) routing or completion of calls, (b) billing of calls, (c) account management purposes, (d) services directly related to the call or transaction, (e) verification of calling party identity and (f) marketing products or services that are directly related to those previously acquired by the customer from the name and/or number delivery services subscriber. This applies if the name and/or number delivery services subscriber has an existing relationship with the customer. Calling Name and/or Number customers failing to comply with any of these conditions will have their service terminated.

25.2 PAYMENT PLANS

25.2.1 The customer shall select a service term of either Month-to-Month, 36, 48 or 60 consecutive months.

If the customer selects a 36, 48 or 60 month service term, the rates are not subject to Telephone Company initiated rate increases.

If the customer elects to pay month-to-month, the rates are subject to Telephone Company initiated rate changes.

25.2.2 Additions to service under the two options specified in paragraph 25.2.1, preceding, can be added to the existing agreement.

Additions to the 36, 48 and 60 month service term can be coterminous with the original contract or for a shorter term. If the customer chooses a shorter term for the additions, rates applicable to the chosen term will apply. Coterminous additions will be treated as follows: If 90 days or more remain on the contract, rates equivalent to those for the existing contract term will apply. If less than 90 days remain, rates applicable to the Month-to-Month plan will apply.

Additions to service under the Month-to-Month plan can be made at any time.

25.2.3 All charges specified in this tariff, excluding those that are rate referenced to other tariffs, are covered under the Plexar-1 payment plans. All other rates and charges not specifically covered in this section are not included. Plexar-1 access lines are not included in these payment plans, but are offered under terms and conditions specified in the appropriate access line tariff.

25.2 PAYMENT PLANS

25.2.1 The customer shall select a service term of either Month-to-Month, 36, 48 or 60 consecutive months.

If the customer selects a 36, 48 or 60 month service term, the rates are not subject to Telephone Company initiated rate increases.

If the customer elects to pay month-to-month, the rates are subject to Telephone Company initiated rate changes.

25.2.2 Additions to service under the two options specified in paragraph 25.2.1, preceding, can be added to the existing agreement.

Additions to the 36, 48 and 60 month service term can be coterminous with the original contract or for a shorter term. If the customer chooses a shorter term for the additions, rates applicable to the chosen term will apply. Coterminous additions will be treated as follows: If 90 days or more remain on the contract, rates equivalent to those for the existing contract term will apply. If less than 90 days remain, rates applicable to the Month-to-Month plan will apply.

Additions to service under the Month-to-Month plan can be made at any time.

25.2.3 All charges specified in this tariff, excluding those that are rate referenced to other tariffs, are covered under the Plexar-1 payment plans. All other rates and charges not specifically covered in this section are not included. Plexar-1 access lines are not included in these payment plans, but are offered under terms and conditions specified in the appropriate access line tariff.

25.2.4 If the customer disconnects the Plexar-1 and/or optional features prior to the expiration of the 36, 48 or 60 month service term, the customer shall pay a termination charge for the applicable rate elements disconnected. This charge will be waived if the customer converts the arrangement to another Plexar service for a service term that equals or exceeds the number of months remaining on the customer's Plexar-1 agreement. This charge will also be waived for Plexar-1 customers who move their service to another Southwestern Bell Telephone (SWBT) served location within Missouri if the service terms are continued at the new location. Payment of the termination charge does not release the customer from other previous amounts owed to SWBT. The termination charge shall be the lesser of:

A. The difference between the total rates and charges for the completed months of the original service term at the time of termination and the total rates and charges for the next lower service term(1) actually completed plus interest charges based on approved costs of money in effect at the time of termination; or

(1) If the service is terminated within the first 12 months the calculation is based on month-to-month rates and charges.

(MT) 25.2 PAYMENT PLANS-(Continued)

25.2.4 If the customer disconnects the Plexar-1 and/or optional features prior to the expiration of the 36, 48 or 60 month service term, the customer shall pay a termination charge for the applicable rate elements disconnected. This charge will be waived if the customer converts the arrangement to another Plexar service for a service term that equals or exceeds the number of months remaining on the customer's Plexar-1 agreement. This charge will also be waived for Plexar-1 customers who move their service to another Southwestern Bell Telephone (SWBT) served location within Missouri if the service terms are continued at the new location. Payment of the termination charge does not release the customer from other previous amounts owed to the Company.

(MT)

(AT) For Service Term Agreements which become effective on or after April 27, 2005:

- The termination charge shall be:
 - a) The number of applicable stations discontinued, multiplied by
 - b) The monthly Plexar-I charges, multiplied by
 - c) The number of months of the contract not being fulfilled, multiplied by
 - d) Fifty percent (50%)
- In addition, the remainder of any installation and nonrecurring charges that have been deferred must be paid in full. Payment of the termination charge does not release the customer from other previous amounts owed to the Company.

(AT) For Service Term Agreements in effect prior to April 27, 2005:

- The termination charge shall be the lesser of:
 - A. The difference between the total rates and charges for the completed months of the original service term at the time of termination and the total rates and charges for the next lower service term (1) actually completed plus interest charges based on approved costs of money in effect at the time of termination; or

25.2 PAYMENT PLANS-(Continued)

REC'D SEP 15 1999

25.2.4 -(Continued)

- B. The present worth of the monthly payments remaining on the service term for each disconnected Plexar-1 rate element.

Example: If the customer completes 38 months of a 48 month service term, the first calculation of a termination charge will equal the difference between 38 months of rates and charges at the 48 month service term and 38 months of rates and charges at the 36 month service term (which is the next lower service term actually completed), plus interest at the approved cost of money rate in effect at the time of termination. The second calculation will be the present worth of the sum of the 10 remaining monthly payments on the 48 month service term. The termination charge is the lesser of the two calculations.

25.2.5 Upon expiration of the 36, 48 or 60 month service term, the customer may:

- A. Continue service without establishing a new service term. Service will be provided on a month-to-month basis at the then current rate. This monthly rate will be subject to any rate changes approved by the Commission.
- B. Continue service by selecting a new service term of 36, 48 or 60 months at the then current rates. The new service term will commence on the day following the expiration of the previous service term.
- C. Discontinue the service.

25.2.6 If the service term agreement expires and the customer has not notified the Company regarding which option they elect, service will continue at the monthly rate in effect at that time for the month-to-month option.

JUL 15 1991

25.1 GENERAL REGULATIONS--(Continued)

25.1.9 The Add-On and Call Forwarding features are furnished subject to transmission limitations. The Company does not guarantee transmission on such arrangements. If the customer requests additional equipment to improve transmission, and facilities permit, additional rates and charges based upon the costs incurred apply.

25.1.10 Touch-Tone Service is required for Plexar-I. Each exchange access line must terminate in at least one Touch-Tone Instrument in order to utilize the Plexar-I features. The rates and charges for Touch-Tone, as specified in Section 24, are applicable for each exchange access line.

(AT) 25.1.11 When multiple features are activated on the same line, some features may take precedence over others.

(FC) 25.4 FEATURE DESCRIPTION

Add On/Consultation Hold:

This feature allows a Plexar-I station user to add on another Plexar-I user or outside line to an established call. In addition, the station user can place any call on hold, thereby freeing the line for the purpose of originating another call or answering a waiting call.

(RT)

(RT)

(CT)

Call Forwarding:(1)

This feature, when activated by the customer, allows all calls to a Plexar-I line to be automatically forwarded to a selected Plexar-I within the system or outside the system.

Call Forwarding - Inside System:

This feature allows for forwarding of an incoming call to a preselected Plexar-I line within the system when the called line does not answer after a predetermined number of rings and/or when a busy condition is encountered.

Call Forwarding - Outside System:

This feature allows for forwarding of an incoming call to a preselected telephone number outside of the system when the called line does not answer after a predetermined number of rings and/or a busy condition is encountered.

Call Hold:

This feature allows a Plexar-I station user to hold any call in progress by depressing the switchhook and then dialing a code, thereby freeing the line for the purpose of originating another call or answering a waiting call. The held call cannot be added to another call.

(RT)

(FC) (1) Not available to Plexar-I lines equipped with DigiLine Service.

Call Forwarding - This feature, when activated by the customer, allows all calls to a Plexar-I line to be automatically forwarded to a selected Plexar-I line within the system or outside the system.

MISSOURI

Call Hold - This feature allows a Plexar-I station user to hold any call in progress by depressing the switchhook and then dialing a code, thereby freeing the line for the purpose of originating another call or answering a waiting call. The held call cannot be added to another call.

Call Pickup - This feature allows a Plexar-I station user to answer any call within an associated preset pickup group. If more than one line within the pickup group has an unanswered call, the call that is answered is the one that has been ringing the longest.

Call Transfer Disconnect - This feature will allow a Plexar-I station user to transfer a call to another telephone number within or outside the Plexar-I system and hang up, leaving the two remaining parties intact. The Plexar-I station user would then be free to accept another call. The transferred call may originate from within or outside the Plexar-I system. The Plexar-I user is prohibited from using this feature to avoid toll charges.

Call Waiting - This feature allows a Plexar-I user engaged in a conversation to be alerted via an audible tone that another caller is attempting to reach him. The called line can retrieve the waiting call by depressing the switchhook, placing the existing call on hold and answer the waiting call.

Call Management Features

Auto Redial:(1)(2)

Enables the customer to automatically redial the last outgoing telephone number by dialing an activation code. When the recalled telephone number is busy, the Telephone Company's equipment will make repeated attempts to establish the call for a thirty (30) minute period beginning with the customer's activation. The customer will be signaled with a distinctive ring when the call can be completed.

Call Blocker:(1)

Enables a customer to block the last incoming call or calls from a designated list of telephone numbers. To block specified telephone numbers, the customer can construct or modify a telephone number screening list by dialing a unique code. The Telephone Company equipment will screen incoming calls against the customer's list and block those on the list. If facilities are unavailable to provide incoming call screening via the customer's list, standard call completion will occur. To block unknown telephone numbers, a customer can activate a code after receiving an unwanted call and block the number. Callers whose numbers are blocked are directed to a Telephone Company recorded announcement.

Call Return:(1)(2)

Enables the customer to automatically redial the telephone number of the most recent incoming call. The Telephone Company's equipment will make repeated attempts to establish the call for a thirty (30) minute period beginning with the customer's activation of Call Return if the most recent incoming call telephone number is busy. The customer will be signaled with a distinctive ring when the call can be completed. This feature cannot return a call to a line that is not associated with a telephone number (e.g., multiline hunt group) or to a line with Call Forwarding activated.

- (1) Not available to Plexar-I lines equipped with DigiLine Service.
- (2) Some customer provided equipment may not recognize the distinctive ringing patterns associated with these features.

Call Management Features

MO. PUBLIC SERVICE COMM.

Auto Redial:(1)(2)

Enables the customer to automatically redial the last outgoing telephone number by dialing an activation code. When the recalled telephone number is busy, the Telephone Company's equipment will make repeated attempts to establish the call for a thirty (30) minute period beginning with the customer's activation. The customer will be signaled with a distinctive ring when the call can be completed.

Call Blocker:(1)

Enables a customer to block the last incoming call or calls from a designated list of telephone numbers. To block specified telephone numbers, the customer can construct or modify a telephone number screening list by dialing a unique code. The Telephone Company equipment will screen incoming calls against the customer's list and block those on the list. If facilities are unavailable to provide incoming call screening via the customer's list, standard call completion will occur. To block unknown telephone numbers, a customer can activate a code after receiving an unwanted call and block the number. Callers whose numbers are blocked are directed to a Telephone Company recorded announcement.

Call Return:(1)(2)

Enables the customer to automatically redial the telephone number of the most recent incoming call. The Telephone Company's equipment will make repeated attempts to establish the call for a thirty (30) minute period beginning with the customer's activation of Call Return if the most recent incoming call telephone number is busy. The customer will be signaled with a distinctive ring when the call can be completed. This feature cannot return a call to a line that is not associated with a telephone number (e.g., multi-line hunt group) or to a line with Call Forwarding activated.

(FC) 25.4 FEATURE DESCRIPTION-(Continued)

Call Management Features-(Continued)

Call Trace:(1)

Enables the customer to initiate a trace of the last incoming call completed by dialing an activation code immediately after terminating the call. If the trace is successful, the Telephone Company's equipment will record the incoming call detail (not the conversation). The result of the trace will not be provided to the customer directly. For further action to be taken, the customer is required to contact the Telephone Company during normal work hours and work days.

(AT)

Calling Name Delivery:(1)

Enables the terminating customer to identify the calling party by a displayed name before the call is answered. The displayed name is associated with the Calling Party Number. Calling Name Delivery subscribers must provide, and connect, their own compatible customer premise equipment to process the Calling Name Delivery.

(AT)

Calling Number Delivery:(1)

Provides for the transmission of Calling Party Number (CPN) associated with an incoming call to the called party's access line. The CPN of the incoming call is transmitted during the silent interval between the first and second ring of the called party's line. Calling Number Delivery subscribers must provide, and connect, their own compatible premises equipment in order to process the CPN transmission.

Priority Call:(1)(2)

Provides the customer with a distinctive alerting signal, ring or Call Waiting tone (if the customer has subscribed to Call Waiting), when the customer is called from preselected telephone numbers. The customer can construct or modify a telephone number screening list by dialing a unique code. The Telephone Company equipment will screen incoming calls against the customer's list and provide a distinctive ring for the telephone numbers on the customer's list.

Call Trace:(1)

Enables the customer to initiate a trace of the last incoming call completed by dialing an activation code immediately after terminating the call. If the trace is successful, the Telephone Company's equipment will record the incoming call detail (not the conversation). The result of the trace will not be provided to the customer directly. For further action to be taken, the customer is required to contact the Telephone Company during normal work hours and work days.

Calling Number Delivery:(1)

Provides for the transmission of Calling Party Number (CPN) associated with an incoming call to the called party's access line. The CPN of the incoming call is transmitted during the silent interval between the first and second ring of the called party's line. Calling Number Delivery subscribers must provide, and connect, their own compatible premises equipment in order to process the CPN transmission.

Priority Call:(1)(2)

Provides the customer with a distinctive alerting signal, ring or Call Waiting tone (if the customer has subscribed to Call Waiting), when the customer is called from preselected telephone numbers. The customer can construct or modify a telephone number screening list by dialing a unique code. The Telephone Company equipment will screen incoming calls against the customer's list and provide a distinctive ring for the telephone numbers on the customer's list.

Selective Call Forwarding:(1)

Enables the customer to forward incoming calls from preselected telephone numbers to another telephone number. The customer can construct or modify a telephone number screening list by dialing an activation code. The Telephone Company equipment will screen incoming calls against the customer's list and forward only those telephone numbers on the list. The call forwarding customer is responsible for the payment of charges for each call between the Selective Call Forwarding line and the line to which the call is being forwarded. The transmission may vary depending on the distance and routing necessary; therefore, transmission may not meet normal standards.

(MT)

Call Pickup:

This feature allows a Plexar-I station user to answer any call within an associated preset pickup group. If more than one line within the pickup group has an unanswered call, the call that is answered is the one that has been ringing the longest.

Call Transfer Disconnect:

This feature will allow a Plexar-I station user to transfer a call to another telephone number within or outside the Plexar-I system and hang up, leaving the two remaining parties intact. The Plexar-I station user would then be free to accept another call. The transferred call may originate from within or outside the Plexar-I system. The Plexar-I user is prohibited from using this feature to avoid toll charges.

Call Waiting:(1)

This feature allows a Plexar-I user engaged in a conversation to be alerted via an audible tone that another caller is attempting to reach him. The called line can retrieve the waiting call by depressing

(C) the switchhook, placing the existing call on hold and answer the waiting call. Where facilities permit, Call Waiting subscribers may deactivate Call Waiting for the duration of one call by dialing a three or four character access code. Call Waiting is automatically reactivated for the next originating or terminating call.

(1) Not available to Plexar-I lines equipped with DigiLine Service.

25.4 FEATURE DESCRIPTION-(Continued)

Code Access Calling:(3)

This feature permits dial access to special facilities such as outward WATS.

Convenience Dialing I:(1)

This feature allows Plexar-I station users to have abbreviated codes assigned up to six frequently called numbers. The list of frequently called numbers may be common to the entire Plexar-I system or unique to each Plexar-I station line. A common list is controlled by one designated Plexar-I station line in the Plexar-I system. Unique lists are controlled by the individual Plexar-I station line.

Convenience Dialing II:(1)(2)

This feature is the same as Convenience Dialing I, except that up to 30 numbers can be programmed.

Conference Calling:(1)(2)

This feature allows a Plexar-I user to establish conference connections involving up to six conferees (including the conference controller).

Customer Alerting Enablement (Message Waiting Indication):(1)

(AT) Provides an audible alerting tone (intermittent dial tone) from the customer's serving central office and/or a signal which provides visual indication on the customer's CPE indicating waiting messages.

Directed Call Pickup:(2)

This feature provides the ability for a call directed to a Plexar-I station line that is in any Call Pickup group to be answered by another station user within the Plexar-I system by dialing a unique answer code and the extension number of the line to be answered.

- (1) Not available to Plexar-I lines equipped with DigiLine Service.
- (2) Obsolete - See Paragraph 25.3.C, for availability to existing customers who subscribed to this feature.
- (3) Obsolete - See Paragraph 25.3.D, for availability to existing customers who subscribed to this feature.

Service Commission

Remote Access To Call Forwarding:(1)

Permits a customer that also subscribes to the Call Forwarding feature to activate, deactivate or change Call Forwarding from a remote location. Remote Access to Call Forwarding can only be accessed from a touch-tone telephone. All charges incurred to access the remote number will be billed appropriately.

(MT)
(AT)

Simultaneous Ring One Number:

Extends the reach of a customer's Plexar-I station number, by causing one additional telephone device to ring simultaneously whenever the Plexar-I station number is dialed. Once the call is answered on either of the telephone devices, ringing on the other device will be terminated, and the originating caller will be connected directly to the device which answered the call. The other device will be freed up to initiate or receive new calls, without interfering with the original call.

If the Simultaneous Ring One Number customer answers an incoming call on a device other than the Plexar-I station corresponding with the telephone number that was actually dialed, the customer's Plexar-I telephone bill will be charged usage charges, as if a call was placed from the Plexar-I station to the device on which the call was answered. This usage will be billed by the customer's existing carrier for the type of call in question and will be billed according to the billing arrangement the customer has with that carrier. The simultaneously rung number can be any valid, non zero-plus telephone number (for example, another Plexar-I station, residential telephone line, or cellular phone line).

If the Simultaneous Ring One Number customer does not answer a call on either of the simultaneously rung devices, and either of the simultaneously rung telephone numbers has an associated answering device or voicemail, the first entity to answer the call will receive the message.

(AT)

- (1) Not available to Plexar-I lines equipped with DigiLine Service.
- (2) Obsolete - See Paragraph 25.3.C for availability to existing customers who subscribed to this feature.

Missouri Public Service Commission

Distinctive Ringing:(2)

REC'D SEP 15 1999

This feature is provided on a per-system basis and allows a Plexar-I user to distinguish between incoming exchange calls and incoming intercom calls. This is done by associating a Distinctive Ringing pattern with the incoming call based upon its source.

Remote Access To Call Forwarding:(1)

Permits a customer that also subscribes to the Call Forwarding feature to activate, deactivate or change Call Forwarding from a remote location. Remote Access to Call Forwarding can only be accessed from a touch-tone telephone. All charges incurred to access the remote number will be billed appropriately.

Station-To-Station Dialing (Intercom):

This feature provides intra-system communications for a maximum of 30 stations. This is accomplished by dialing a preassigned station code.

Toll-Restriction:

This feature restricts long distance calling to allow only WATS and Southwestern Bell Telephone Company Business Offices and Repair Services to be completed. All other long distance calls are denied, including calls to operator services. Denied calls are directed to a central office announcement.

Transfer:

This feature allows a Plexar-I station user to transfer any established call to another station within or outside the Plexar-I system. This is accomplished by depressing the switchhook while on a two-party call, dialing the desired party, utilizing the Consultation Hold and/or Add-On features and hanging up. Only one party on the final connection can be outside the Plexar-I system.

Uniform Call Distribution (UCD):(2)

UCD is a type of hunting which provides for an even distribution of incoming calls among the available members of a hunt group.

25.3 FEATURE DESCRIPTION-(Continued)

MISSOURI

Transfer - This feature allows a Plexar-I station user to transfer any portion of an established call to another station within or outside the Plexar-I system. This is accomplished by depressing the switchhook while on a two-party call, dialing the desired party, utilizing the Consultation Hold and/or Add-On features and hanging up. Only one party on the final connection can be outside the Plexar-I system.

Uniform Call Distribution (UCD) - UCD is a type of hunting which provides for an even distribution of incoming calls among the available members of a hunt group.

CUSTOM CALLING SERVICES

AUG 03 1993

26.1 GENERAL REGULATIONS

26.1.1 Custom Calling Services are optional telecommunication service arrangements which provide one or more of the following features:

MISSOURI
Public Service Commission

A. Call Waiting

Alerts a customer who is using his telephone that another caller is trying to reach him. Where facilities permit, Call Waiting subscribers may deactivate Call Waiting for the duration of one call by dialing a three or four character access code. Call Waiting is automatically reactivated for the next originating or terminating call.

B. Call Forwarding

Permits a customer to transfer incoming calls to another telephone number within the exchange or on the Long Distance Telecommunications Network where facilities permit. The Call Forwarding customer is responsible for the payment of charges for each call between his Call Forwarding-equipped telephone and the telephone to which the call is being forwarded. The transmission may vary depending on the distance and routing necessary; therefore, transmission may not meet normal standards.

C. Selective Call Forwarding

(CP) Enables the customer to forward incoming calls from previously specified
(CP) telephone numbers to another telephone number. The customer can
construct or modify a telephone number screening list by dialing an
activation code. The Telephone Company equipment will screen incoming
(RT) calls against the customer's list and forward only those telephone
numbers on the list. The transmission may vary depending on the
distance and routing necessary; therefore, transmission may not meet
normal standards.

D. Simultaneous Call Forwarding

Used in conjunction with Call Forwarding, permits a customer to transfer incoming calls simultaneously between switching entities. The number of calls transferred simultaneously is limited to the number of hunting lines/trunks subscribed to by the customer at the originating end. Simultaneous Call Forwarding is limited to customers served by No. 1 or 1A Electronic Switching Systems and may be established only on another line which is not part of the hunting group.

CUSTOM CALLING SERVICES

RECEIVED

26.1 GENERAL REGULATIONS-(Continued)

MAY 28 1993

26.1.1 Custom Calling Services are optional telephone service arrangements which provide one or more of the following features:-(Continued)

E. Three-Way Calling

Enables a customer to add a third party to an existing call without operator assistance, thereby establishing three-way conversation. The transmission may vary depending on the distance and routing necessary; therefore, transmission may not meet normal standards.

F. Speed Calling

Enables a customer to place calls to other telephone numbers by dialing a one- or two-digit code rather than the complete telephone number. The eight-code capacity and/or the 30-code capacity may be provided on the same line; however, duplicate code capacities may not be provided. The combination of code capacities is not available on multiline hunting lines.

(AT)

This service was classified as competitive effective May 14, 1993

G. Call Forwarding - Busy Line

Allows incoming calls that encounter a busy condition to be automatically forwarded to another telephone number within the exchange or the Long Distance Telecommunications Network where facilities permit. The Call Forwarding customer is responsible for the payment of charges for each call between the Call Forwarding equipped telephone line and the line to which the call is being forwarded. The forwarded to number is designated by the subscriber when the service is ordered. The transmission may vary depending on the distance and routing necessary; therefore, transmissions may not meet normal standards.

H. Call Forwarding - Don't Answer

Allows incoming calls which are not answered after a customer designated interval to be automatically forwarded to another telephone number within the exchange or the Long Distance Telecommunications Network where facilities permit. The Call Forwarding customer is responsible for the payment of charges for each call between the Call Forwarding equipped telephone line and the line to which the call is being forwarded. The forwarded to number is designated by the subscriber when the service is ordered. The transmission may vary depending on the distance and routing necessary; therefore, transmissions may not meet normal standards.

(AT)

J. Remote Access to Call Forwarding

Permits a customer that also subscribes to the Call Forwarding feature (described in Paragraph 26.1.1.B.) to activate, deactivate or change the Call Forwarding feature from a remote location by dialing a Telephone Company-provided remote access number. This feature can only be activated by using a Dual Tone Multi-Frequency (DTMF) telephone which has a full set of characters, including "*" and "#". All charges incurred in accessing the remote number will be billed as appropriate.
