(D) Features (continue)

.2 Public Dialing Plan

Public Dialing Plan allows the VPN user to dial a 1+10-digit number from a VPN switched station using the North American Dialing Plan and have that call rated as a VPN call. This functionality is specifically designed for Switched Access lines presubscribed to the Company for the provision of outbound long distance Service. The VPN user may complete three different call types using the Public Dialing Plan: (1) switched to dedicated (VPN On-Net), (2) switched to switched (Virtual On-Net), and (3) switched to switched (VPN Off-Net). This feature requires that the VPN Customer's Switched Access lines be presubscribed to the Company for the provision of interstate Service.

.3 Forced On-Net

Forced On-Net enables a VPN user to dial another station within the same VPN service using the North American Dialing Plan and have the call routed as if the user had dialed the private number.

When a call screen restriction is reached, the VPN user(s) will be informed by an announcement that they do not have the proper authority to place the call. To override the restriction and enable the call to proceed, user(s) are required to enter a VPN Authorization Code with the appropriate Authorization Level. The VPN Authorization Code may be from one (1) to twenty-three (23) digits in length.
