TARIFF FORMAT

Service Commission

- A. Sheet Numbering - Sheet numbers appear in the upper right corner of the sheet. Sheets are numbered sequentially. However, new sheets are occasionally added to the tariff. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 14 and 15 would be 14.1.
- B. Sheet Revision Numbers - Revision numbers also appear in the upper right corner of each sheet. These numbers are used to determine the most current sheet version on file with the Commission. For example, the 4th revised Sheet 14 cancels the 3rd revised Sheet 14. Because of various suspension periods, deferrals, etc. the Commission follows in their tariff approval process, the most current sheet number on file with the Commission is not always the tariff page in effect.
- C. Paragraph Number Sequence - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:

- 2.1.
- 2.1.1.
- 2.1.1.A.
- 2.1.1.A.1.
- 2.1.1.A.1.(a)
- 2.1.1.A.1.(a).I.
- 2.1.1.A.1.(a).I.(i).
- 2.1.1.A.1.(a).I.(i).(1).

3.3.1. This service permits use of a Prepaid Calling Card to access and pay for the Company's telecommunications services. Customers may purchase Prepaid Calling Cards directly from the Company, from authorized vendors or at a variety of retail outlets. Prepaid Calling Cards may be issued in denominations of \$10.00, \$20.00, \$30.00, \$50.00 and \$100.00 increments. The Company may issue Private Label Prepaid Calling Cards, as well as Prepaid Calling Cards with a fixed number of preprogrammed minutes.

3.3.2. Users obtain the service by dialing an 800 number or other access codes to access the Underlying Carrier(s) network. The User is prompted by an automatic voice response system to enter his/her PIN, and then to enter the terminating telephone number. The Underlying Carrier(s) processor tracks the call duration from when the call is answered by the Underlying Carrier(s) processor for rating purposes on a real time basis. Billing for all calls ends when either party hangs-up. The total price of each call, including applicable taxes, is deducted from the prepaid amount on the Prepaid Calling Card. For some cards, when a User obtains access to the Underlying Carrier(s) processor, the balance on the card will be announced. A warning tone or message may be played when 60 seconds or less is left on the Prepaid Calling Card. The User can then complete the call within the time remaining on the Prepaid Calling Card. Customers have the option of purchasing Prepaid Calling Cards containing an expiration date of either six (6) months from the date of issuance to the Customer or the date of last recharge, whichever is later.
