50.5 OUTGOING CALL CONTROL^{/1/} (CT)

50.5.1 Outgoing Call Control (OCC) allows customers to selectively restrict certain types of calls from originating from their telephone line. Four OCC settings exist which permit OCC customers to allow or calls in each of the following categories:

Long Distance (including interLATA and intraLATA)
International
900 or 976 calls
Directory Assistance (local and long distance)

50.5.2 By default, calls will be allowed in all four categories described above. Changes in these settings may be made by using an interactive voice response (IVR) system. There is no charge to the customer to change the OCC settings using the IVR system.

50.5.3 Customers will have a personal identification number (PIN) which may be used under two circumstances:

- A. The PIN may be used to override the current OCC setting and place a call that is currently restricted.
- B. The PIN must be used to enter the IVR system to make changes in the OCC settings on a line.

50.5.4 For Long Distance, International and 900/976 categories, OCC customers may enter a limited number of telephone numbers that are allowed, even when calls within the category are restricted. These telephone numbers are entered or deleted using the IVR system.

50.5.5 OCC is available on must business and residence lines, however the service cannot be provided in conjunction with certain complex business services including, but not limited to, Reserve Line, DID, Private Coin, Centrex, Plexar, DigiLine, Select Video and SmartTrunk.

50.5.6 Lines equipped with OCC may not originate sent-paid, operator handled calls, including sent-paid calls using Directory Assistance Call Completion.

50.5.7 OCC is available where facilities permit.

50.5.8 OCC customers may continue to be subject to Long Distance Availability Limits.

/1/ Effective March 1, 2014, Outgoing Call Control is grandfathered and obsolete to residence customers. (AT)
