## BEFORE THE PUBLIC SERVICE COMMISION OF THE STATE OF MISSOURI

Missouri Public Service Commission

In the matter of the application of Central Rivers Wastewater Utility, Inc., a certificate of convenience and necessity authorizing it to construct, install, own, operate, control, manage and maintain sewer system for the public, located on an unincorporated area in Clay County, Missouri.	) ) ) )	Case No	5A-2000-105
Clay County, Missouri.	)		

#### **APPLICATION**

Comes now Central Rivers Wastewater Utility, Inc. (Applicant), pursuant to Section 393.170, RSMo. (1986), and 4 CSR 240-2.060(2) and, for its application for a certificate of convenience and necessity authorizing it to construct, install, own, operate, control, manage and maintain a sewer system for the public in an unincorporated area of Clay County, Missouri, states to the Missouri Public Service Commission (Commission) as follows:

1. Applicant is a Missouri corporation duly organized and existing under the laws of the State of Missouri with its principal office and place of business located at 205 S. Spartan Drive, Richmond, Missouri 64085. A certified copy of its certificate of incorporation and articles of incorporation were filed with the Commission under previous application, namely for Case No. SA-98-530. By this Application, Applicant proposes to provide sewer service to the public as a public utility pursuant to the jurisdiction, regulation and supervision of the Commission.

2. Correspondence, communications, orders and decisions regarding this matter should be addressed to:

Mark Geisinger 205 S. Spartan Drive Richmond, MO 64085 Telephone No. (816) 470-3300

With copies to:

Kevin Hawthorne 1114 N. Walrond Kansas City, MO 64120 Telephone No. (816) 483-3888

And

Withers, Brant, Igoe & Mullennix, P.C. Attn: Mark Kelly 2 South Main Street Liberty, MO 64068 Telephone No. (816) 781-4788 Fax No. (816) 792-2807

3. By this application, Applicant seeks permission, approval and a certificate of public convenience and necessity authorizing it to construct, install, own, operate, control, manage and maintain a sewer system for the public in an unincorporated area of Clay County, Missouri, as set forth on the map attached to this application as <a href="Exhibit 1">Exhibit 1</a> and legally described by metes and bounds attached to this application as <a href="Exhibit 2">Exhibit 2</a>.

- 4. Marked as Exhibit 3A-3E, attached hereto and made a part of hereof for all purposes, is a feasibility study containing:
  - a) A narrative. (Exhibit 3A)
  - b) An overall plan for the existing STEP system and recirculating sand filter wastewater treatment system. (Exhibit 3B and Exhibit 3C)
  - c) Estimated operational cost of the facilities in the area proposed to be served including the proposed rates, charges, revenues and expenses for the estimated number of customers in the proposed area. (Exhibit 3D and Exhibit 3E)
- 5. There is currently one residence residing in the proposed service area. The name and address of the one residence is:

Don Schwartz 1461 NE 147<sup>th</sup> Street Kearney, MO 64060

- 6. There are no municipalities located within the proposed areas. Applicant has complied with all known legal requirements of the Clay County Commission to operate in said county.
- 7. Said sewer system will meet all requirements of the Commission and the

  Department of Natural Resources. A copy of the operating permit from the

  Department of Natural Resources will be forwarded to the Commission as soon as

  it is available. Application for the operating permit has been made to the

Missouri Department of Natural Resources. DNR is withholding granting of the operating permit until the Company has obtained the certificate of convenience and necessity from the PSC.

- 8. There are no other public utilities or governmental bodies operation or rendering sewer service within the area proposed to be served.
- 9. The area proposed to be served is rapidly being developed into a subdivision by a developer. The majority of the soils in the subdivision are not well suited for onsite disposal systems. Therefore, a public need exists for adequate sewer service within the area proposed to be served and the public convenience and necessity will be promoted by the granting of the authority herein requested. A central collection and treatment system that is operated and maintained in a safe and orderly manner is the best suited wastewater system for this subdivision and for the Citizens of Missouri in general.
- 10. The granting of this application is in the public interest because it will present an opportunity for the public in the area proposed to be served to obtain and utilize sewer service which is otherwise unavailable, and make the area more attractive to develop, with the corresponding benefits of temporary and permanent jobs and, in general, better livelihood for citizens of Clay County and the State of Missouri.

WHEREFORE, Applicant respectfully requests that the Commission issue its order:

- (a) Granting Applicant permission, approval and a certificate of convenience and necessity authorizing it to construct, install, own, operate, control, manage and maintain a sewer utility system for the public in an unincorporated area in Clay County, Missouri, as more particularly described herein;
  - (b) Granting such further relief as the commission deems appropriate.

		One	ations Cost:	@ 100% participation	\$	1,436.52	

Operations Cost: @ 100% participation \$ 1,436.52

Operations Cost: per Customer/Month \$ 35.91

Proforma Rate for 80% build-out \$ 32.00

NOTE: costs are not linear (i.e. 80% \* cost at 100% participation is not correct) and may be slightly different than detailed itemized costs. See detailed spreadsheet for cost breakdown

Note:

Due to the anticipated rapid development of this subdivision and the anticipated granting of nearby certificated areas, a proforma rate of \$32.00/month/customer is being submitted even though calculated expenses indicate a higher rate. The Company's belief is that a \$32.00/month/customer rate for this particular subdivision due to its location and specific features will ultimately prove to be an acceptable rate for the Company and for the citizens of this subdivision in general.

#### **FEASIBILITY STUDY**

For

#### WASTEWATER COLLECTION AND TREATMENT SYSTEM

at

#### FOX RUN ESTATES SUBDIVISION

CLAY COUNTY, MISSOURI

by

CENTRAL RIVERS WASTEWATER UTILITY, INC. 205 S. Spartan Richmond, MO 64085

#### Background

The rural areas of the rapidly developing Kansas City metropolitan region have been growing as more and more people find that the area offers many benefits and high quality of life. As this metropolitan area has developed and grown, wastewater treatment for these developments has become a primary concern. Due to soils that are not well suited for on-site wastewater disposal systems and higher density, central wastewater collection and treatment that is well operated and maintained has become a growing need. However, economic factors make a single large scale central collection and treatment facility in outlying subdivisions and communities impractical. Sound technological advances in how wastewater is collected and treated lead to a more practical approach. Cluster type treatment and collections systems, each serving a single subdivision or small group of subdivisions can be economically installed and economically maintained and can provide high quality wastewater treatment. Quality installation, operation and maintenance are essential for this type of system to consistently produce safe and effective wastewater treatment. Therefore, operation and maintenance should be handled by professionals that are well trained and have financial incentives to provide safe wastewater treatment facilities. The operation and maintenance authority should also be well regulated to ensure that the public good is served. A Missouri Public Service regulated private utility company is very well suited for this approach.

Central Rivers Wastewater Utility, Inc., upon final approval of its Tariff currently under review by the Missouri Public Service Commission, will maintain and operate a central wastewater collection and treatment facility in Ray County, Missouri (Case No. SA-98-530). Central Rivers Wastewater Utility, Inc. is also planning to provide wastewater treatment and collection system operation and maintenance for a new subdivision currently being developed in Clay County, Missouri. The new subdivision is known as Fox Estates Subdivision.

#### Purpose of serving Fox Run Estates Subdivision

Due to experience Central Rivers Wastewater Utility, Inc. is well suited to provide an operation and maintenance authority for this subdivision. The company can provide dependable wastewater collection and treatment service for this subdivision at a reasonable cost while at the same time provide a financial incentive to the owners of the company.

#### **Financing**

Costs to provide engineering documents necessary to obtain a Missouri Department of Natural Resources Construction Permit will be paid by the subdivision developer. The developer has paid to install the collection system's main collection lines. The developer has also paid for initial costs for the installation of the wastewater treatment facility.

Central Rivers Wastewater Utility, Inc. will reimburse the developer \$300 for each customer that takes service from Central Rivers Wastewater Utility, Inc.

The \$300 investment by this utility will be financed through \$300 equity. The rate of return on the equity investment is 10%. This rate is recommended based on current money market conditions. The company realizes that final interest and equity return rates must be approved by the Missouri Public Service Commission.

A contract between the subdivision developer and the utility in which the developer has agreed to fund the difference between revenue collected through rates and the required revenue has been signed and agreed upon by both parties. The developer has obtained an Irrevocable Letter of Credit from a reputable bank that the utility company will draw upon if the developer, for any reason, is unable or unwilling to pay the agreed upon difference. This agreement ensures that utility company will have sufficient revenue to operate the wastewater collection and treatment system in the initial stages of the development.

#### Plan

A map of the area is attached to the company's application. On the map is a layout of the collection system and treatment plant location. Wastewater from the homes will initially be collected in 1,500 gallon septic tanks located near the residence. The effluent will be screened and pumped into a force main that eventually will tie into the treatment facility. A second

phase of the treatment plant is planned to be installed when sewage flows require. The treatment plant has been constructed to meet Department of Natural Resources administered regulations and will be expanded as necessary to continue to do so.

#### Customers

There are currently no customers within the proposed service area. The newly constructed homes will each have an individual 1,500 gallon watertight septic tank located near the residence but within an easement granted to the utility company. The subdivision plan is to have approximately 40 homes when completely developed. All of the customers will be single family residences. It is anticipated that at least 60% of the customers will be connected within 5 years.

#### System Construction

The collection system has been constructed and is existing. The first phase recirculating sand filter has been constructed and is existing. Plans prepared by a professional engineer registered in the State of Missouri are on file at the Missouri Department of Natural Resources.

#### Operation

The management of the company will be furnished by the owners, Mr. Mark Geisinger and Mr. Kevin Hawthorne. The company will contract with Accurate Boring and Construction, Inc. for service calls and treatment plant operation and maintenance of this facility. Billing will be done on a contract basis and time sheets will be maintained for the purpose of determining cost tot he utility.

The utility company will keep in stock a new pump and controls for the residential pumping installation as well as repairable parts. One pump of each make will be kept for each fifty customers it has on the force main sewer system. The company will inspect the customer's pumping facilities once per year to assure that they are functioning properly. All maintenance will be provided by the utility company. The company will also replace the customer's pump and controls, as well as repairable parts, when necessary as part of the rate structure provided the customer does not purposefully or willfully cause intentional harm to the system through negligence or sabotage.

#### Tariff and Rules

The company's Tariff will be amended to include a service area that includes this subdivision. The rules governing the customers' responsibilities and the company's responsibilities will be those filed with its Tariff and approved by the Missouri Public Service Commission.

The base single family wastewater rate will likely be \$32.00/month. This rate is consistent with other similar wastewater collection and treatment facilities and reasonable for the area.

#### Conclusion

The proposed services by Central Rivers Wastewater Utility, Inc. for this proposed subdivision is feasible because the rates are within an acceptable range for this area and the style of homes to be constructed. The agreement between the developer and the company satisfies the financial obligation the company will need to remain viable until several customers are connected. By providing this service the developer is better able to market the lots in the subdivision and the County and subdivision are benefited by increased temporary and permanent jobs and better and safer overall living conditions for the residents.
