5. Computing the Charge for a Call - For the initial period, the rate applicable at the start of chargeable time at the calling station applies. For additional minutes, the rate applicable is that rate which is in effect at the calling station when the additional minute(s) begin. That is, if chargeable time begins during the Peak Rate Period, the Peak rate applies to the initial period and to any additional minutes that the call continues during that rate period. If the call continues into a different rate period, the appropriate rates from that rate period apply to any additional minutes occurring in that rate period. If an additional minute is split between two rate periods, the rate period applicable at the start of the minute applies to that entire minute. For Dial Station calls, if the computed charges include a fraction of a cent, the fraction is rounded to the nearest cent.
