

SECTION 4 - END USER NETWORK ACCESS SERVICES OCT 02 1997**4.1 Introduction**MISSOURI
Public Service Commission

The Company undertakes to provide end users with voice-grade network access services as described in this tariff. End User Network Access Service provides a Customer with the ability to connect its terminal equipment, inside wiring, or transmission facilities to the Company's switched network for the origination and reception of telephonic communications, and includes optional features designed to facilitate the use or expand the functionality of communications services. Services may be provided by the use of the Company's own facilities, by resale of services provided by other telephone companies, or by a combination of these methods.

Each End User Network Access Service is provided in the form of a Port (with an integral Terminal Interface) which corresponds to one or more analog, voice grade communications channels. Voice-grade access services are designed to transmit any electrical signal within the nominal frequency range of 300 to 3000 Hz. Customers may transmit any form of signals, including data transmissions, that are compatible with the transmission parameters of the service, but the Company does not warrant that the services will be suitable for any purpose other than voice communication.

4.1.1 Access to Public Switched Network Services

End User Network Access Services provide a Customer with one or more voice-grade Port connections to the Company's switched network, each of which enables the Customer to:

- A) Receive calls from other stations on the public switched telephone network;
- B) Access the Company's Local Exchange Services as specified in Section 4 of this tariff, Directory Assistance Services as specified in the Section 5, intraLATA toll services as specified in Section 4, and unregulated services offered by the Company;
- C) Access (at no additional charge) the Company's operators and business office for service related assistance; access toll-free telecommunications services such as 800 NPA; and access 9-1-1 service for emergency calling;

RECEIVED**SECTION 4 - END USER NETWORK ACCESS SERVICES**

OCT 02 1997

4.1 Description (Cont'd)**MISSOURI**
Public Service Commission**4.1.1 Access to Public Switched Network Services (Cont'd.)**

- D) Access the services of other providers which utilize the Company's Access Services under the Company's Access and Interconnection Tariff. Customers may presubscribe to another provider's interLATA or IntraLATA services in order to originate interLATA and intraLATA calls on a 1 + basis or to receive 800 service from such provider, or may access other providers' intraLATA and interLATA services on an ad hoc basis by dialing the provider's Carrier Identification Code. The Customer is solely liable for charges assessed by other providers for their services; and
- E) Originate calls to the Dual Party Relay Service (DPRS) which enables deaf, hard-of-hearing or speech-impaired persons using Telephone Devices for the Deaf (TDDs) or similar devices to communicate freely with the hearing population not using TDDs and vice versa. The Company does not impose any charge to end users for access to DPRS, however, persons using this service are liable for applicable per-call charges specified in the Company's tariffs. The Company will provide, at cost, a TDD device to each individual who is certified as deaf or severely hearing or speech impaired by a licensed physician, audiologist or qualified state agency.
- F) End User Network Access services are provided through a Terminal Interface at a Company-designated Point of Connection, or through a standard demarcation point established by another service provider. The Customer is responsible for providing the appropriate transmission facilities, cabling or wiring between the Point of Connection or demarcation point and its premises. Depending upon the service ordered by the Customer, there may be a choice of Terminal Interfaces. In such cases, the Customer is responsible for specifying a Terminal Interface which is compatible with the Customer-provided transmission facilities, cabling, wiring, or terminal equipment.
- G) Each End User Network Access service corresponds to one or more analog, voice-grade telephonic communications channels that can be used to place or receive one call at a time.

4.2 Interconnection of Interstate Facilities**4.2.1 Points of Connection****MISSOURI
Public Service Commission**

Services terminate at a Point of Connection established by the Company. The Point of Connection will ordinarily be located in the same building as the Customer's or User's Premises; however, a Customer may elect to be served by a Point of Connection in a different building, in which case the Customer is responsible for providing or obtaining, at its own expense, the necessary wire or cable to connect its Premises to the Point of Connection. In a multi-tenant building, the Point of Connection will ordinarily be established in a common area of the building such as an equipment room or wire closet. Customers may connect their transmission facilities, cabling, wiring or terminal equipment to the Company's network at the Point of Connection.

The Company will establish a Point of Connection upon request within a building, campus, or other customer premises located in a Company-served exchange area, if in the Company's opinion it can recoup its up front capital cost, ongoing operational cost and provide a fair return to shareholders from the revenue stream derived from the new Point of Connection. A Point of Connection may be established at any location where the preceding conditions are not satisfied, subject to the rates, terms, and conditions applicable to Special Construction as specified in the General Regulations Tariff.

SECTION 4 - END USER NETWORK ACCESS SERVICES **RECEIVED****4.3 LATA Calling Services****SEP 15 1998****4.3.1 Description****MO. PUBLIC SERVICE COMM**

LATA Calling Services allow for the origination from listed exchanges and termination of calls within local and toll calling areas as defined below. Local and Toll calling plans are marketed under the brand names of PrimeOne and PrimePlus service and are provided in conjunction with connection to the Company's network via the access lines listed below:

PrimePath Service
PrimeXpress Network Service
PrimeNBX Service
PrimePlex PRI Service
Prime Link Service
PrimePath NBX Service
Business Local Service

(N)

4.3.2 Timing of Calls

- A) "PrimeOne" local calls are untimed and billed on a flat-rate basis. "PrimePlus" IntraLATA toll calls are timed in six (6) second increments following the first eighteen (18) seconds.
- B) For station to station calls, call timing begins when a connection is established between the calling telephone and the called telephone station.
- C) For person to person calls, call timing begins when connection is established between the calling person and the particular person, station or mobile unit specified or an agreed alternate.
- D) Call timing ends when the calling station "hangs up," thereby releasing the network connection. If the called station "hangs up" but the calling station does not, chargeable time ends when the network connection is released either by automatic timing equipment in the telephone network or by the Company operator.
- E) Calls originating in one time period and terminating in another will be billed the rates in effect at the beginning of six second increments.
- F) For collect calls, call timing begins when connection is established between the calling person and the particular person, station or mobile unit specified or an agreed alternate.

4.3 LATA Calling Services (Cont'd)

4.3.3 PrimePlus IntraLATA Toll Service

PrimePlus IntraLATA toll service is furnished for telephone communication between telephones in different local calling areas within the same LATA in accordance with the regulations and schedules of charges specified in this tariff.

The toll service charges specified in this section are in payment for all service furnished between the calling and called telephone, except as otherwise provided.

A) Rating of Calls

Rating of PrimePlus IntraLATA toll calls is based on the duration of the call. Call duration is based on regulations found in Section 4.3.2. IntraLATA rates between points are based on the airline distance between rate centers. In general, each point is designated as a rate center; certain small towns or localities are assigned adjacent rate centers with which they are closely associated for communication purposes or by community of interest.

IntraLATA calling is offered by the Company to business Customers under the retail product name "PrimePlus".

B) PrimePlus Rates

1. Southwestern Bell Territory (N)

[As of July 27, 1999 the following rate is only offered to current PrimePlus customers for the duration of their term commitment.]

4.3.3 PrimePlus IntraLATA Toll Service (Cont'd)**B) PrimePlus Rates (Cont'd)**

[As of July 27, 1999 the following discounts will only be offered to current PrimePlus customers for the duration of their term commitment.]

(N)

(N)

1) <u>Volume Discounts</u>	<u>1 Year</u>	<u>2 Year</u>	<u>3 Year</u>
\$0 - \$1,000	5%	5%	5%
\$1,000 - \$3,000	15%	18%	20%
\$3,000 - \$8,000	20%	23%	25%
\$8,000 +	25%	28%	30%

C) PrimeOne/PrimePlus Usage Discount

(N)

Customers who commit to 1, 2, or 3 year term commitments are eligible to receive the discounts shown below on their PrimeOne and PrimePlus usage charges. Discounts are calculated based on the term commitment and are applied to the total amount of qualifying revenue in a billing period. Customers whose combined PrimeOne and PrimePlus monthly usage exceeds \$100,000.00 will not be eligible for discounts under this plan. At the end of the Customer's term commitment, the Customer will convert to month-to-month pricing at tariff rates in effect at that time.

For services requiring a one-year term commitment, the Customer will receive one-year term rates at tariff rates in effect at that time unless the Customer notifies the Company in writing thirty (30) days prior to the expiration of the Customer's term plan of their intent to discontinue service.

Customers who discontinue service prior to the end of their term commitment will be assessed an early termination charge equal to their average monthly usage charges times the number of months remaining on their term commitment. The average monthly usage will be determined by calculating the Customer's total PrimeOne and PrimePlus usage charges for the first six full months of service and dividing by six.

If the Customer has been in service less than six months, the average monthly usage will be determined by calculating the Customer's total usage charges and dividing by the number of months the Customer has been in service. Customers may discontinue service prior to the end of their term commitment without liability if they migrate to another Company local service offering with a term commitment equal to or greater than their current term commitment.

4.6 Network Access Line Services

MISSOURI
Public Service Commission

The provision of Network Access Line service at the rates, charges, terms and conditions shown is subject to the provision of other sections of this tariff.

4.6.1 Provision of Equipment and Facilities

- A) Pursuant to Commission Rule (4CSR 240.32.070), the Company shall use reasonable efforts to make available services to a Customer on or before a particular date, subject to the provisions of and compliance by the Customer with, the regulations contained in the tariffs of the Company.
- B) Pursuant to Commission Rule (4CSR 240.32.070), the Company shall use reasonable efforts to maintain only the facilities and equipment that it furnishes to the Customer. The Customer may not, nor may Customer permit others to disconnect, remove, attempt to repair, or otherwise interfere with any of the facilities or equipment installed by the Company, except upon the written consent of the Company.
- C) The Company may substitute, change or rearrange any equipment or facility at time and from time to time, but shall not thereby alter the technical parameters of the service provided the Customer.
- D) Equipment the Company provides or installs at the Customer Premises for use in connection with the services the Company offers shall not be used for any purpose other than that for which the Company provided it.
- E) The Customer shall be responsible for the payment of service charges as set forth herein Section 5.9.1, for visits by the Company's agents or employees to the Premises of the Customer or User when the service difficulty or trouble report results from the use of equipment or facilities provided by any party other than the Company, including but not limited to the Customer or User.

4.7 PrimePath Service - (Cont'd.)

4.7.5 Business Trunks

Business Trunks are designed to handle high traffic volumes associated with connection to Customer-provided Private Branch Exchange (PBX) equipment or capable key system. The Customer may opt to utilize Business Trunks for outgoing calls only (DOD), incoming calls to an attendant (One-way in Local Trunk), incoming calls without utilizing an attendant (DID) or a combination of both incoming calls to an attendant and outgoing calls (Two-way Combo). Direct Inward Dialing (DID) services allows incoming calls to be terminated directly to an end user behind a PBX or capable key. When DID service is ordered, direct inward dialing (DID) numbers must be purchased from the Company. No features are provided on business trunks. Service requires a 1 year term commitment. (T)

A) Rates - Southwestern Bell Territory

4.7 PrimePath Service - (Cont'd.)

4.7.6 PrimePath Easy Rate

(N)

PrimePath Easy Rate is a business line package that includes PrimePath business lines with unlimited local usage, Touch Tone, and a set of optional features for a single monthly recurring price. PrimePath Easy Rate is limited to PrimePath analog business lines. This plan is not available on PrimePath Key Lines, PrimePath Trunks, Prime Digital Trunks, PrimeXpress, PrimePlex, PrimeConnect or any services on INCS, Integrated Access, AT&T AccuRing, AT&T UltraAvailable Ring, DEF, or any other local service offering.

Customers must meet the following eligibility criteria and adhere to the restrictions in order to qualify for and maintain PrimePath Easy Rate Service:

- 1) Customers must agree to purchase a minimum of 100 PrimePath Easy Rate lines and must sign a PrimePath Easy Rate Certification Form identifying each location and telephone number that will be subscribed to the offer.
- 2) PrimePath Easy Rate lines may all be in one location or may be distributed across multiple locations where this service is available.
- 3) A customer's PrimePath Easy Rate lines can not be ordered or provisioned at the same location (service address) as the same customer's PrimePath Standard lines, if any.
- 4) A customer's PrimePath Easy Rate charges can not be billed on the same account as the same customer's PrimePath Standard lines, if any.
- 5) Customers that commit to a term plan for PrimePath Easy Rate must maintain all lines on the plan for the duration of the term, and are subject to a minimum retention period equal to the term commitment.

Customers with existing PrimePath Standard lines may change those lines to PrimePath Easy Rate and may add or move features as long as all above listed criteria is met. The non-recurring Service Order Charges and any Feature Change Charges (associated with features included in the PrimePath Easy Rate offer) will be waived at the time of the change from PrimePath Standard lines to PrimePath Easy Rate. Future changes will result in the billing of standard non-recurring charges as listed in this tariff.

SECTION 4 - END USER NETWORK ACCESS SERVICES

4.8 PrimeXpress Network Service

4.8.1 Description

- A) PrimeXpress Network Service provides dedicated connections from an end user's premises to Business Calling Service and to services provided by interexchange carriers that have interconnected to the Company's switch. PrimeXpress Network Service is delivered to the customer's premise at a DS1 (1.544 Mbps) rate. A PrimeXpress facility may be provided as stand-alone service or provisioned over an existing or new AT&T ACCU-Ring DS3 facility or Ultravailable Ring (UVN) facility. PrimeXpress Network Service is available in one, two or three-year term commitments. (T)

The Customer may opt to utilize PrimeXpress Network Service for outgoing calls only (DOD), incoming calls only (DID) or a combination of both inbound and outbound calls. When the Customer elects to utilize PrimeXpress Network Service for both inbound and outbound calls, they may choose Combo service which allows incoming calls to an attendant only or they can elect to utilize DID/DOD service which allows incoming calls to be terminated directly to an End User behind a PBX or capable Key System. When DID or DID/DOD service is ordered, direct inward dialing (DID) numbers must be purchased from the Company.

PrimeXpress Network Service trunks configured for Inbound and Outbound calling functionality that, upon detection by The Company, exceed 90% utilization for inbound calling will be subject to the rates, terms and conditions for the High Volume Inbound Calling option listed below. All end user equipment connecting to PrimeXpress Network Service must meet F.C.C. Part 68 requirements and be technically compatible with the parameters delineated herein. PrimeXpress Network Service is offered with the options of DTMF or MF signaling pulse and wink start or immediate start trunk signaling. (N)

SECTION 4 - END USER NETWORK ACCESS SERVICES**RECEIVED****4.8 PrimeXpress Network Service**

OCT 02 1997

4.8.1 Description (Cont'd)**MISSOURI****Public Service Commission****B) High Volume Inbound Calling Option**

Digital PrimeXpress Network Service can be configured to support high volumes of inbound calling. The High Volume Inbound Calling option is not available with wink start signaling. This option will support a maximum of two rate centers per facility or trunk group within the TCG-designated service area. Rates for the High Volume Inbound Calling Option are listed in section 4.6.2 following.

Per subscribed Rate Center, the Customer is required to subscribe to a sufficient number of trunks so as to not degrade the TCG network below an incoming call completion rate of 99%. The call completion rate is based on an average of the busy hours occurring during the Customer's busiest hours during the billing cycle. Once the service has been established, the Company may require the Customer to increase the number of PrimeXpress trunks to satisfy the call completion criteria listed above. Subject to the availability of facilities, Customers may request the High Volume Inbound Calling Option to be provisioned from a Rate Center other than that normally assigned by the Company.

SECTION 4 - END USER NETWORK ACCESS SERVICES

All material on this page is new.

4.8 PrimeXpress Network Service

4.8.1 Description (Cont'd.)

C) Incoming Call Redirect Option

Incoming Call Redirect (ICR) provides automated redirection of incoming calls to a pre-designated back-up site during T1 or PBX failures or when all trunks are busy. This option is available with PrimeXpress Network Service, PrimePlex PRI Service or Prime Digital Trunk Service only.

ICR can redirect all or only pre-selected DID numbers, depending on the Customer's application. Calls are redirected to another set of telephone numbers (Destination Numbers), and can route to the LEC trunks at the same location or distant locations. A separate route index will be set up for the redirection of selected DID numbers. Redirected calls will route to a single number at the pre-designated back-up site, and will deliver the original calling number if the back-up site is configured for PRI and Calling Party Number. It is the responsibility of the Customer to obtain any necessary permissions for the use of any Destination Number.

If ICR is ordered in two or more sites that provide back up to one another, the back up telephone number cannot be a number which can be redirected.

ICR is limited to a maximum of ten simultaneous redirected calls per T1, a maximum of twenty-four simultaneous calls for trunk groups of one to four T1's, and a maximum of forty-eight simultaneous calls for trunk groups of five T1's or more. A maximum of two (2) trunk groups per location can be equipped with ICR.

Customers will be responsible for all usage charges associated with redirected calls.

1) Application of Rates

Incoming Call Redirect rates consist of a non-recurring and a monthly recurring charge per T1, a local usage charge per redirected call, and a nonrecurring charge per change or group of changes requested in a Customer's listing of Redirected Numbers or Destination Numbers.

SECTION 4 - END USER NETWORK ACCESS SERVICES

4.9 PrimeNBX Service

4.9.1 Description

TCG PrimeNBX Service is a business access line service providing central office based functionalities in addition to access to the Public Switched Network. PrimeNBX lines are available in analog or digital formats depending on a Customer's premise equipment. PrimeNBX allows intercommunication service on a 4-digit basis in addition to access to and from the exchange network without Customer attendant assistance.

- * PrimeNBX is not available, either under this tariff section or through any TCG Contract Tariff or contract referencing this tariff section, to new or existing Customers who did not have it on order on or before June 28, 2004. Existing term plan customers with contracts for PrimeNBX in effect or on order prior to June 28, 2004 may continue under their existing terms and condition, and may move, add or change stations at their existing locations based on availability of existing facilities, but may not add new locations unless otherwise specified in their contracts. Customers with contracts that expired on or before June 28, 2004, will be placed on month-to-month tariff rates as of July 1, 2006, subject to the termination schedule stated below. Customers with contracts that expired on or before June 28, 2004 will receive PrimeNBX Service under the month-to-month rates. Customers with contracts that expire before July 1, 2006, will be placed on month-to-month tariff rates upon the expiration of their existing contract, unless otherwise specified in the contract, subject to (and unless otherwise provided in) the termination schedule stated below. Customers with contracts that expire after July 1, 2006, will be allowed either to choose to keep their rate up to and including July 31, 2011, subject to the limitations on moves, additions, and changes described above, or to choose to change to a month-to-month rate, subject to the schedule stated below. (C)

PrimeNBX services will be terminated based on the schedule set forth below:

- 1) Customers with expired contracts will have until July 31, 2011 to migrate to a different service, as their service will be terminated on that date. There will be no contract renewals for customers with expired contracts or who have terminated service; (C)
- 2) Customers with contracts that expire after December 15, 2007, will have until July 31, 2011 or their contract expiration date, whichever is later, to migrate to a different service, as their service will be terminated on that date; (C)

Early termination penalties will be waived for PrimeNBX customers wishing to terminate their PrimeNBX service and migrate to a different service prior to their contract expiration.

4.9 PrimeNBX Service

4.9.1 Description

MO. PUBLIC SERVICE COMM

TCG PrimeNBX Service is a business access line service providing central office based functionalities in addition to access to the Public Switched Network. PrimeNBX lines are available in analog or digital formats depending on a Customer's premise equipment. PrimeNBX allows intercommunication service on a 4-digit basis in addition to access to and from the exchange network without Customer attendant assistance. PrimeNBX lines are assigned a 7-digit telephone number and are provided with Direct Inward Dialing (DID) and Automatic Identification or Outward Dialing. PrimeNBX lines must be ordered at a minimum of 24 lines for digital service and 49 lines for analog service.

(C)

Customers may opt to utilize a Carrier Access Port Connection, which enables their Interexchange traffic to be routed between the Company's switch and the Customer's chosen Interexchange carrier via a dedicated DS0 or DS1 circuit. In such cases, the Customer's chosen Interexchange carrier will arrange for a DS0 or DS1 transport facility between its network and the Company's switch.

Public Service Commission

TCG PrimeNBX Service is a business access line service providing central office based functionalities in addition to access to the Public Switched Network. PrimeNBX lines are available in analog or digital formats depending on a Customer's premise equipment. PrimeNBX allows intercommunication service on a 4-digit basis in addition to access to and from the exchange network without Customer attendant assistance. PrimeNBX lines are assigned a 7-digit telephone number and are provided with Direct Inward Dialing (DID) and Automatic Identification or Outward Dialing. PrimeNBX lines must be ordered at a minimum of 24 lines.

Customers may opt to utilize a Carrier Access Port Connection, which enables their Interexchange traffic to be routed between the Company's switch and the Customer's chosen Interexchange carrier via a dedicated DS0 or DS1 circuit. In such cases, the Customer's chosen Interexchange carrier will arrange for a DS0 or DS1 transport facility between its network and the Company's switch.

4.9.3 PrimeNBX FeaturesMISSOURI
Public Service Commission

The following line and system features are included with PrimeNBX at no additional cost where facilities permit.

A) Standard Line Features**Call Forwarding:**

Call Forwarding - Busy Provides for the forwarding of all calls attempting to terminate at a busy line to be forwarded to a predetermined line within a Customer system or outside the system.

Call Forwarding - Don't Answer Provides for the forwarding of all calls attempting to terminate at a line which is not answered within a set number of rings to be forwarded to a predetermined line within a Customer system.

Call Forwarding - Don't Answer / Enhanced Provides for the forwarding of all calls attempting to terminate at a line which is not answered within a set number of rings to be forwarded to a predetermined line either within a Customer system or outside the system.

Call Forwarding - Variable When activated at a line by a Customer, provides for the forwarding of all calls attempting to terminate at that line to another Customer specified line within a Customers' system or outside the system.

Call Forwarding - Variable/Remote Activation Provides a PrimeNBX line with the capability of changing a call forwarding arrangement from a dual tone multi frequency telephone (Touch-Tone), outside the PrimeNBX group. Authorization codes are required to make such a change.

Call Hold Allows the user to hold one call for any length of time provided that neither party goes on-hook.

Call Park Allows a station line to park a call against its own line number. The parked call can be retrieved from any station line by dialing a feature code and the line number against which the call is parked.

4.9.3 PrimeNBX Features (Cont'd.)**MISSOURI
Public Service Commission****A) Standard Line Features (Cont'd)**

Call Pickup Allows a station line to answer incoming calls to another station line within a defined call pickup group. Call pickup is provided on individual station lines within a Customer group.

Call Transfer Allows a station line user to transfer any established call to another station line inside their Customer group without the assistance of the attendant.

Call Transfer-Enhanced Allows a station line user to transfer any established call to another line inside or outside the Customer group without the assistance of an attendant.

Call Waiting:

Call Waiting - Cancel Allows a Call Waiting Customer to cancel this feature for one call through the use of a cancel call waiting code.

Call Waiting - Dial Permits a station line to impose call waiting on a busy station line by dialing the call waiting feature activation code, followed by the station number. This feature is an originating line feature that is applicable to calls within the established user group only.

Call Waiting - Incoming Allows an incoming call to a busy station line to be held waiting while a signal is directed towards the busy station line user.

Call Waiting - IntraGroup Permits both incoming calls and calls originating from within the system to activate the call waiting feature.

Call Waiting Originating Allows a station line user to impose call waiting on a busy station line.

Public Service Commission****Directed Call Pickup:**

Directed Call Pickup with Barge-in Allows a station line user to answer a call that is ringing any other line within the same Customer group. If the called station line has already been answered, the initiating station line may barge-in to the answered call and be connected into a 3-way call.

Directed Call Pickup without Barge-in Allows a station line user to answer a call that is ringing any other line within the same Customer group. If the called station line has already been answered, the initiating station line will be connected to a reorder tone.

Distinctive Call Waiting Tones Permits a called station line user to determine whether an incoming waiting call is external or internal to the Customer group by providing different tone cadences for both occurrences.

Distinctive Ringing Allows a unique pattern of ringing to permit the station line user to distinguish between IntraGroup and DID calls.

Line Hunting

Circular Allows a call directed to a busy station configured in a circular hunt arrangement, to be directed to any station within the group until such time as a station becomes available.

Terminal Routes a call in a prearranged linear pattern until it reaches the last number in the series. If that last number is busy, the incoming caller receives a busy signal.

Speed Calling - Individual 8 Number List Permits the station line user to dial selected numbers by using fewer digits than normally required. This is accomplished by assigning of abbreviated codes to frequently called numbers. The list is dedicated to the individual station line user.

Station Message Detail Recording - Direct Output (Basic) Permits the capturing of call detail information by the switch and passing this information to a call accounting system.

Three-Way Calling Allows a station line user to add an internal third party to an existing conversation.

Touch Tone (DTMF) Provides for the origination of calls by means of instruments equipped for tone-type address signaling over special central office facilities.

B) Standard System Features

Automatic Identified Outward Dialing A feature that automatically provides you with an accurate record of all toll calls made by each line.

Automatic Route Selection - Basic This is a preset pattern of routing calls originated by a PrimeNBX station user to selected Interexchange carriers or dedicated facilities.

Direct Inward Dialing Allows Incoming calls from the local exchange and long distance networks to reach an individual line or group of lines in the system without the assistance of an attendant.

Direct Outward Dialing Permits lines of the system to gain access to the local exchange and long distance network without the assistance of an attendant by dialing an access code.

Intercept Routes incoming exchange calls made to a non-working Digital PrimeNBX line to an announcement machine.

4.9.3 PrimeNBX Features (Cont'd.)**MISSOURI**
Public Service Commission**B) Standard System Features (Cont'd.)**

Line Treatments Provides the capability to allow or deny individual station line features. The treatments can be arranged to control all calls originating or terminating on station lines.

Loudspeaker Paging Access Permits station line users to access Customer-provided loudspeaker paging equipment by dialing an access code. The Customer's equipment will dictate the type of termination that is provided by TCG. One access method could be the termination of a TCG PrimeNBX line on a standard jack interface. This assumes the paging equipment has a line card termination. In this method of operation users would dial the PrimeNBX line for access to the paging facilities. Another method of access to paging equipment is a four wire trunk side dedicated leased line which requires an access level or dial code in the TCG PrimeNBX. Users will dial this to access the paging equipment

Station-to-Station Calling Allows Customer group stations to complete calls to other stations without the assistance of an attendant.

4.10 TCG PrimePlex PRI Service

A) Description

TCG PrimePlex PRI service is an optional service arrangement for local exchange access based on the Primary Rate Interface (PRI) arrangement of the Integrated Services Digital Network (ISDN). PrimePlex PRI is a high capacity access path for communications providing voice or data transmission over the Company's exchange network. A PrimePlex PRI facility may be provided as stand-alone service or provisioned over an existing or new AT&T ACCU-Ring DS3 or Ultravailable Ring facility.

(T)

B) Explanation of Terms

Circuit Switching

A switching technique in which an entire circuit or, in a digital switch equipped for ISDN, a specific selection of time slots is dedicated to a given call.

PrimePlex Primary Rate Interface (PRI)

PrimePlex PRI is an alternative for individual local exchange access loop services such as Direct Inward Dialing (DID), Direct Outward Dialing (DOD), and business dial tone lines. It can also be used as loop transport for circuit switched data applications. PrimePlex PRI is provisioned on the 1.544 megabits per second (Mbps) bandwidth and uses ISDN architecture of 23 B or bearer channels and 1 D or data channel. It can also be provisioned as 24 B channels when coupled with controlling D facilities on other PRI circuits and backup D facilities. PRI provides the Customer with the capabilities of simultaneous access, transmission, and switching of voice, data, and imaging services via channelized transport. In addition, PrimePlex PRI provides the Customer with the service capabilities and features described herein.

4.10 TCG PrimePlex PRI Service (Cont'd.)

B) Explanation of Terms (Cont'd.)

Network Interfaces

ISDN Primary Rate Interface is comprised of a limited set of standard user-network interfaces. The PRI Customer Premises Equipment (CPE) located at the customer premises must be compatible with the network interface. This network interface is defined as follows:

The network interface is a metallic four-wire telephone loop interface between a switch (T) equipped with ISDN and the Network Termination 2 (NT2). The NT2 is customer premises equipment required for providing physical compatibility in terminating telephone facilities at the customer premises.

PRI Line Group

A PRI Line Group is a group of channels which are designated as one of the following:

- Incoming Business Dial Tone Line Group
- Outgoing Business Dial Tone Line Group
- Two-Way Business Dial Tone Line Group
- Call-by-Call Service Selection Line Group

Only one Call-by-Call line group may be provisioned on a PrimePlex PRI Arrangement. Where available, up to two of the other line group types may be provisioned on a PrimePlex PRI Arrangement. The total number of line groups per PRI Arrangement is limited to four. The capability to assign other than Call-by-Call line groups varies by central offices switch type.

Primary Rate Access Facility

Primary Rate Access Facility provides a high capacity access path at a transmission speed of 1.544 megabits per second (Mbps) for communications between the Customer's premises and the serving central office. Each Primary Rate Access Facility supports one PrimePlex PRI arrangement.

(N)

B) Explanation of Terms (Cont'd.)**MO. PUBLIC SERVICE COMM**Primary Rate Interface Arrangement

PrimePlex PRI Arrangement is a service providing ISDN capabilities between the customer premises and the serving central office. The PRI Arrangement consists of 23 "B" channels and one "D" channel or 24 "B" channels which are defined as follows:

B Channel

The B Channel is a 64 kilobits per second (Kbps) channel used for information transfer between users. The B channel may be used in conjunction with circuit-switched service.

D Channel

The D Channel is a 64 kilobits per second (Kbps) channel that carries signaling and control for the B channels.

Software Defined Lines

Software Defined Lines are lines which are provisioned on the Primary Rate Access Facility by establishing their identity in central office translations. These lines physically ride on the 4-wire ISDN Primary Rate Access Facility.

Simulated Facility Group

A Simulated Facility Group is a software-defined register used to limit the number of simultaneous calls with specific attributes.

C) Customer Premise Equipment (CPE)

The CPE used by the customers subscribing to PrimePlex PRI must comply with ISDN Primary Rate Interface specifications as designated by the Telephone Company or BellCore.

SECTION 4 - END USER NETWORK ACCESS SERVICES

4.10 TCG PrimePlex PRI Service (Cont'd.)

D) Service Capabilities

PrimePlex PRI provides the capability to: (N)

- 1) Transport Customer information in the form of circuit-switched voice or data up to 64 Kbps over any B channel.
- 2) Allow, where available, one D channel to control up to 20 PRI Arrangements. In such cases, a single D channel in one PRI Arrangement handles all the signaling and control requirements of multiple PRI Arrangements to consist of 24 B channels.
- 3) Allow B channels to be allocated for specific services, such as Direct Inward Dialing (DID) and Direct Outward Dialing (DOD), or configure channels to access multiple services on a Call-by-Call basis. All of the preceding services may be accessed on a Call-by-Call Service Selection basis, except two way lines which must be dedicated to specific channels.
- 4) Allow the user to have access to the directory number of the calling party. (T)

E) Conditions

This service is offered subject to the following conditions:

- 1) PrimePlex PRI is only available from serving central offices equipped with the necessary facilities to provide PRI service. Feature availability and service capabilities are dependent on the facilities and digital technology providing the service.
- 2) ISDN-compatible terminal equipment is required for operation. It is the Customer's responsibility to power and obtain such equipment.
- 3) PrimePlex PRI service does not preclude customers from originating or receiving circuit-switched voice calls from inside or outside either their serving central office or their Local Exchange Area. Where facilities are available, Customers will be able to originate and receive circuit-switched data calls outside their serving central office.

- 4) This tariff does not provide for the transmission of packet data on the B or D channels. Packet data is not offered on the B or D channels.
- 5) Existing local usage or MTS rates apply to circuit-switched voice and data calls. Circuit-switched data calls will be billed on a local usage-sensitive basis as specified in this tariff. Toll charges will apply when the circuit-switched data calls are made outside the Customer's Local Calling Area. The Unlimited Usage Package is not available with PrimePlex PRI service.
- 6) All PRI Arrangement configurations must have at least one 23B+D PRI Arrangement for signaling and control functions. A 23B+Backup D PRI Arrangement is required whenever more than 47 B channels are controlled by a single D channel.
- 7) When more than one TCG service is accessed over the same PrimePlex PRI Arrangement, Call-by-Call Service Selection may be required.
- 8) Each line group is equipped with one telephone number. Additional numbers may be ordered in blocks of 20 as specified herein.
- 9) Telephone numbers ordered in blocks of 20 and Individual Additional Telephone Numbers ordered from this Tariff may not be delivered on the same Simulated Facility Group or dedicated trunk group.
- 10) The quantity of Individual Additional Telephone Numbers may not exceed the size of the trunk group or Simulated Facility Group to which they are assigned.

SECTION 4 - END USER NETWORK ACCESS SERVICES

4.10 TCG PrimePlex PRI Service (Cont'd.)

E) Conditions (Cont'd.)

- 11) At the Company's discretion, the Company may reconfigure the Customer's service from PrimePlex PRI to the High Volume Inbound Calling Option if the Customer's PrimePlex PRI usage meets one or more of the following criteria: (1) equals or exceeds 90% utilization for inbound calling, (2) equals or exceeds an average call duration of 10 minutes per call, (3) equals or exceeds CCS loading of 32 CCS, and (4) equals or exceeds 300,000 minutes of use per PRI. The Customer will be charged rates for High Volume Calling Option as shown in Section 4.8(A). The Company reserves the right to audit the Customer's PrimePlex PRI usage for the above conditions.

F) Features

- 1) Backup D Channel: Automatically takes over for a failed D channel in case of trouble. This is purchased as part of a 23B+Backup D PRI Arrangement.
- 2) Call-by-Call Service Selection (CBC): Provides an option to the Dedicated B Channel Configuration allowing B channels to be configured to access multiple services on a per-call basis. With this optional feature, separate facilities are not needed for individual services such as DID, DOD, and business dial tone lines. The customer premises equipment signals the local serving central office as to what type of services to access for each call. (T)
- 3) Calling Party Number (CPN): Allows the user to have access to the directory number of the calling party. Provision of per-call and line blocking capabilities is a function of the customer premises equipment and is the responsibility of the customer.
- 4) Multiple Facility Signaling Control: Allows the D channel one PRI Arrangement to provide signaling for up to 20 PRIs terminating on a switch module. Requires Backup D channel.
- 5) Original Called Number (OCN): which must be ordered for specific PRI ISDN trunks, places the callers original dialed digits into the OCN field of the selected ISDN message, for inbound calls which have been forwarded one or more times. These ISDN messages, containing OCN information, will be transmitted over the designed Data-Channels (D-Channels, primary, secondary, and back-up) on the ISDN trunk.

G) Application of Rates

- 1) Business dial tone line functionality is included in the PrimePlex PRI Service rates and charges.
- 2) When DID numbers are ordered from the preceding, a DID line connection service charge applies for each B channel dedicated to DID service, or DID-simulated facility group member over which DID numbers are transmitted.
- 3) When a Customer converts existing DS1 facilities provided under PrimeXpress Service to Primary Rate Access Facilities, installation charges for the Primary Rate Access Facility are waived.
- 4) Hunting Service is included in PrimePlex PRI rates.

H) Payment Options

A PrimePlex PRI customer may select a one-, two- or three-year term commitment. All (T)
PRI services and features at a given premises must be subscribed to the same payment (T)
option.

I) Additions to Service

During the contract period, the customer may add PRI services at the same monthly rate as specified in the initial contract. The contract period for these additional services will end coterminous with the initial contract.

J) Changes in Future Contract Rates

If the monthly rates on a contract are lowered, the subscriber may be allowed to cancel the existing contract without penalty, providing the subscriber signs up for a new contract of equal or greater monetary value. The subscriber will be subject to all terms, conditions, and prices of the new contract.

SECTION 4 - END USER NETWORK ACCESS SERVICES

All material on this page is new.

4.10 TCG PrimePlex PRI Service (Cont'd.)

L) Incoming Call Redirect Option

Incoming Call Redirect (ICR) provides automated redirection of incoming calls to a pre-designated back-up site during T1 or PBX failures or when all trunks are busy. This option is available with PrimeXpress Network Service, PrimePlex PRI Service or Prime Digital Trunk Service only.

ICR can redirect all or only pre-selected DID numbers, depending on the Customer's application. Calls are redirected to another set of telephone numbers (Destination Numbers), and can route to the LEC trunks at the same location or distant locations. A separate route index will be set up for the redirection of selected DID numbers. Redirected calls will route to a single number at the pre-designated back-up site, and will deliver the original calling number if the back-up site is configured for PRI and Calling Party Number. It is the responsibility of the Customer to obtain any necessary permissions for the use of any Destination Number.

If ICR is ordered in two or more sites that provide back up to one another, the back up telephone number cannot be a number which can be redirected.

ICR is limited to a maximum of ten simultaneous redirected calls per T1, a maximum of twenty-four simultaneous calls for trunk groups of one to four T1's, and a maximum of forty-eight simultaneous calls for trunk groups of five T1's or more. A maximum of two (2) trunk groups per location can be equipped with ICR.

Customers will be responsible for all usage charges associated with redirected calls.

1) Application of Rates

Incoming Call Redirect rates consist of a non-recurring and a monthly recurring charge per T1, a local usage charge per redirected call, and a nonrecurring charge per change or group of changes requested in a Customer's listing of Redirected Numbers or Destination Numbers.

SECTION 4 - END USER NETWORK ACCESS SERVICES

4.10 TCG PrimePlex PRI Service (Cont'd.)

M) PrimePlex PRI High Volume Inbound Calling Option: PrimeConnect PRI

(N)

At the Company's discretion, the Company may reconfigure the Customer's service from PrimePlex PRI to PrimeConnect PRI Service if the Customer's PrimePlex PRI usage meets one or more of the following criteria: 1) Supports a maximum of two rate centers per PRI facility or T1 trunk, 23B+1D channel, within the TCG designated service area, 2) supports inbound calling only, 3) equals or exceeds an average call duration of 10 minutes per call, 4) equals or exceeds CCS loading of 32 CCS, and 5) equals or exceeds 200,000 minutes of use (MOU), per PRI, per month. The Customer will be charged rates for PrimeConnect PRI Service as listed below. The Company reserves the right to audit the Customer's PrimePlex PRI usage for the above conditions.

1. The Customer is required to subscribe to a sufficient number of DS1 trunks at a maximum usage of 400,000 MOU so as to not degrade the TCG network below an incoming call completion rate of 99%. The call completion rate is based on an average of the busy hours occurring during the Customer's busiest hours during the billing cycle. Once the service has been established, the Company may require the Customer to increase the number of PrimeConnect PRI trunks to satisfy the call completion criteria listed above.

2. PrimeConnect PRI Customer Access Requirements:

PrimeConnect PRI supports inbound calling only, and does not include outbound calling to Operated Assisted Services, Special Service Codes, Special Access Codes or Carrier Access Codes. The Customer is responsible for securing individual business lines, or other appropriate facilities, to access these services and/or codes, including:

- Conference Calls.
- Calls to Special Service Codes including 500, 700, 900, 976, N11 (where N = 2-9) or other special service codes that may be created, or
- Calls to 0 and 00

4.10 TCG PrimePlex PRI Service (Cont'd.)

M) PrimePlex PRI High Volume Inbound Calling Option: PrimeConnect PRI (Continued) (N)

3. PrimeConnect PRI is intended solely for the purposes of providing local and intraLATA non-toll access into a Customer's location. In the event that local and intraLATA non-toll calls placed into a Customer's location become subject to additional charges imposed by connecting carriers or by regulation, the Company reserves the right to modify the facility rate charges for traffic into the location upon 30 days written notice to the Customer. The Customer has the option to accept the rate change(s) or terminate the contract without penalty, unless specifically bound to specific commitments associated with capital recovery, special construction, or other issues written into the Customer's contract or agreement with the Company over and above the normal terms and conditions of the contract or agreement.

Rates are as specified in section 4.10.M following.

* A Usage Plan is associated with the Data Only PRI Arrangement. Rates are as specified on Sheet 76.8.4; discounts under Section 4.3.3 (C) apply.

(M)

Also requires an AT&T ACCU-Ring facility and multiplexing.

** Initial installation charges will be waived for new customers, or existing customers adding new locations' (not applicable for moves), where service is available, when Customer selects TCG as the primary carrier for a local and IntraLATA toll calling. If Customer terminates their Term Plan prior to expiration, they will be billed the appropriate installation charge.

SECTION 4 - END USER NETWORK ACCESS SERVICES

4.11 PrimeLink

A) Description

PrimeLink is an optional feature package available to business Customers of PrimePath, PrimeXpress, and PrimeNBX network access services. Non-recurring and monthly recurring charges for PrimeLink are applied on a per line or per trunk basis and are in addition to any applicable charges associated with network access services. PrimeLink requires all Customer locations to be connected to the same Company switch. All Customer locations must be affiliated with each other under the same corporate entity and the Customer is responsible for the applicable PrimeLink flat rate feature charges. The Customer must subscribe to PrimeLink on all network access lines used for voice communications at each Customer location.

PrimeLink service is offered subject to the availability of required Company facilities and compatibility with Customer-Provided Equipment (CPE). Use of the PrimeLink features may result in the loss of ANI (Automatic Number Identification) or CPN (Calling Party Number) information associated with the originating caller. PrimeLink provides the following services:

PrimeLink Abbreviated Digit Dialing--This allows abbreviated digit dialing between stations in different Customer locations, where all locations are part of the same wholly owned enterprise and are served by the same Company switch. Number of digits required for PrimeLink Abbreviated Digit Dialing is dependent upon the type of CPE.

PrimeLink Transfer --This allows users to transfer calls between stations in different Customer locations, where all locations are part of the same wholly owned enterprise and are served by the same Company switch. Availability of this feature is dependent upon the type of CPE.

PrimeLink 3-way Calling --This allows users to initiate three-way calls with one outside party and one party at another Customer location, where both Customer locations are part of the same wholly owned enterprise and are served by the same Company switch. Availability of this feature is dependent upon the type of CPE.

4.12 PrimePath NBX

A) Description

PrimePath NBX is a central office-based analog communications service over loop-start facilities for a retail end-user. The service provides direct inward dialing capability without the requirement of CPE such as a key system or PBX, as well as outward calling capabilities.

- * PrimePath NBX is not available, either under this tariff section or through any TCG Contract Tariff or contract referencing this tariff section, to new or existing Customers who did not have it on order on or before June 28, 2004. Existing term plan customers with contracts for PrimePath NBX in effect or on order prior to June 28, 2004 may continue under their existing terms and condition, and may move, add or change stations at their existing locations based on availability of existing facilities, but may not add new locations unless otherwise specified in their contracts. Customers with contracts that expired on or before June 28, 2004, will be placed on month-to-month tariff rates as of July 1, 2006, subject to the termination schedule stated below. Customers with contracts that expire on or before June 28, 2004, will receive PrimPath NBX Service under the month-to-month tariff rates. Customers with contracts that expire before July 1, 2006, will be placed on month-to-month tariff rates upon the expiration of their existing contract, unless otherwise specified in the contract, subject to (and unless otherwise provided in) the termination schedule stated below. Customers with contracts that expire after July 1, 2006, will be allowed either to choose to keep their contract rate up to and including July 31, 2011, subject to the limitations on moves, additions, and changes described above, or to choose to change to a month-to-month rate, subject to the schedule stated below. (C)

PrimePath NBX services will be terminated based on the schedule set forth below:

- 1) Customers with expired contracts will have until July 31, 2011 to migrate to a different service, as their service will be terminated on that date. There will be no contract renewals for customers with expired contracts or who have terminated service; (C)
- 2) Customers with contracts that expire after December 15, 2007, will have until July 31, 2011 or their contract expiration date, whichever is later, to migrate to a different service, as their service will be terminated on that date; (C)

Early termination penalties will be waived for PrimePath NBX customers wishing to terminate their PrimePath NBX service and migrate to a different service prior to their contract expiration.

SECTION 4 - END USER NETWORK ACCESS SERVICES**RECEIVED****4.12 PrimePath NBX****MAY 15 1998**

(N)

A) Description**MO. PUBLIC SERVICE COMM**

PrimePath NBX is a central office-based analog communications service over loop-start facilities for a retail end-user. The service provides direct inward dialing capability without the requirement of CPE such as a key system or PBX, as well as outward calling capabilities. Service charges are billed on a monthly basis, and are based on the service area in which the Customer is located. Standard, Implemented and Optional features are listed below. Standard features are provisioned on all lines and Implemented features are provisioned on all lines and Implemented features may be chosen on a per line basis at no additional recurring cost. Optional features are available for an additional per-month charge and one-time installation charge. Monthly recurring and non-recurring line and feature charges are shown below. A minimum of 10 PrimePath NBX lines per main customer location is required. Additional locations of the same customer within the same locally defined rate center may subscribe to the same PrimePath NBX system with a minimum of 6 PrimePath NBX lines where facilities permit. A PrimePath NBX system is associated with only one invoice. Customers must commit to at least a one-year term commitment; two year term plans are also available.

Customers requiring more than 48 lines per any location may purchase Prime NBX Service where facilities permit and under current tariffs with Prime NBX features and rates.

- 1) Customers subscribing to this service are required to pay the monthly rate for service as specified whether or not all implemented features are activated at initial installation. A non-recurring charge will apply when a customer elects to activate any implemented or optional feature subsequent to initial installation. Optional features carry an additional monthly recurring charge and an additional initial installation fee.
- 2) A customer may elect to subscribe to PrimePath NBX optional features at initial installation or subsequent to initial installation, subject to the applicable recurring and additional non-recurring charges.
- 3) If the service is terminated in whole or in part by the customer after initial installation, but prior to the completion of the service period, the customer shall be liable for the remaining contract period. The formula for such charges is number of lines times number of months remaining times line rate.

A minimum of 10 PrimePath NBX lines per main customer location is required. Additional locations of the same customer within the same locally defined rate center may subscribe to the same PrimePath NBX system with a minimum of 6 PrimePath NBX lines where facilities permit. A PrimePath NBX system is associated with only one invoice. Customers must commit to at least a one-year term commitment; two year term plans are also available.

Customers requiring more than 48 lines per any location may purchase Prime NBX Service where facilities permit and under current tariffs with Prime NBX features and rates.

- 1) Customers subscribing to this service are required to pay the monthly rate for service as specified whether or not all implemented features are activated at initial installation. A non-recurring charge will apply when a customer elects to activate any implemented or optional feature subsequent to initial installation. Optional features carry an additional monthly recurring charge and an additional initial installation fee.
- 2) A customer may elect to subscribe to PrimePath NBX optional features at initial installation or subsequent to initial installation, subject to the applicable recurring and additional non-recurring charges.

(M)

SECTION 4 - END USER NETWORK ACCESS SERVICES

4.12 PrimePath NBX (Cont'd.)

A) Description (Cont'd.)

- 3) If the service is terminated in whole or in part by the customer after initial installation, but prior to the completion of the service period, the customer shall be liable for the remaining contract period. The formula for such charges is number of lines times number of months remaining times line rate. (M)
- 4) If customer adds lines after initial installation during the time of the contract and these additional lines consist of less than or equal to 50% of the original order, the additional lines are contracted at the same rate as the initial lines, but the contract termination date shall be the original contracted date.
- 5) If customers add lines after installation during the time of the contract and these additional lines in total consist of more than 50% of the original order, then a new contract must be executed with a new termination date and at the current tariffed rate for all lines.
- 6) Customer's relocating within the same TCG metropolitan service area where PrimePath NBX is available may continue on the same contract, subject to additional installation and service order charges.
- 7) Customer's extending service beyond the contract period without a new contract will automatically renew on a month-to-month basis at the highest available line, feature and usage rates associated with PrimePath NBX.
- 8) Standard line treatment options for blocking apply to all lines, as well as standard 4 digit dialing plans for internal PrimePath NBX system calling. "Assume dial 9" is NOT available with PrimePath NBX.
- 9) Existing PrimePath NBX customers purchasing additional lines in excess of 48 lines per individual customer location for all locations may purchase Prime NBX at the same or greater term for all lines subject to availability, tariffs and new service agreement without termination liability under PrimePath NBX. Additional lines subject to Prime NBX installation and service order charges.
