

# GTE SPRINT COMMUNICATIONS

PSC MO #1

STATE OF MISSOURI  
PUBLIC SERVICE COMMISSION

At a Session of the Public Service  
Commission held at its office  
in Jefferson City on the 5th  
day of May, 1986.

Case No. TM-86-125

In the matter of the application  
of GTE Sprint Communications, US  
Telecom-Corporate Network Services  
Company and US Telecom-Communications  
Services Company to transfer Certificates  
of Public Convenience and Necessity to  
US Sprint Communications Company.

---

ORDER

On March 11, 1986, GTE Sprint Communications Corporation (GTE Sprint), US Telecom-Corporate Network Services Company (US Telecom-Corporate) and U.S. Telephone, Inc. filed their application for authority to transfer their certificates of public convenience and necessity to US Sprint Communications Company, contingent on receipt of the necessary federal approvals. On March 12, 1986, the Secretary of the Missouri Public Service Commission sent copies of the Applicants' tax impact statement pursuant to Section 393.190, RSMo (Supp. 1984) to the clerks of the affected counties. U.S. Telephone, Inc. filed a Notice of Change of Name of U.S. Telephone, Inc. to US Telecom-Communications Services Company and Changes of Principal Business Office with this Commission on March 17, 1986. On March 27, 1986, the Commission issued its Order authorizing U.S. Telephone, Inc. to change its name to US Telecom-Communications Service Company (US Telecom-Communications). Applicants filed their 1985 Annual Reports and updated balance sheets and income statements on March 31, 1985. The Staff of the Missouri Public Service Commission filed its Memorandum on April 29, 1986. On April 30, 1986 MCI Telecommunications Corporation filed its Application to Intervene.

The Commission, upon consideration of the application and the recommendation of its Staff, determines that a hearing is unnecessary to resolve the issues herein and finds and concludes as follows:

GTE Corporation is a holding company whose wholly-owned subsidiary, GTE Communications Services Incorporated, is the parent company of GTE Sprint. GTE Sprint provides communications services pursuant to Federal Communications Commission (FCC) authorization throughout the United States, the U.S. Virgin Islands, Guam, Puerto Rico and many international points including Canada, Australia and the United Kingdom. GTE Sprint also is authorized to provide intrastate telecommunications services in Missouri.

United Telecommunications, Inc. is a holding company whose wholly-owned subsidiary, US Telecom, Inc., owns US Telecom-Communications and US Telecom Corporate. US Telecom-Communications provides long distance telephone service to the fifty (50) states, the U.S. Virgin Islands and Puerto Rico. It is authorized to provide intrastate service in twenty (20) states including Missouri. U.S. Telecom is constructing a nationwide digital telecommunications network using fiber-optic technology which US Sprint's customers will have access to upon completion.

US Telecom Corporate offers video conferencing and specialized data communications services primarily to large corporate customers, government agencies and bulk transmission users. It is authorized to provide these services in Missouri.

Pursuant to a Letter of Intent executed on January 16, 1986 and a Partnership Agreement signed on January 31, 1986, US Sprint was formed under the laws of New York as a general partnership of GTE Communications Services Incorporated and US Telecom, Inc. Each partner holds a fifty percent (50%) interest in US Sprint. All of the assets, licenses, permits and other authorizations of GTE Sprint, US Telecom Corporate, US Telecom-Communications and the following subsidiaries: GTE Telenet, US Telecom-Data (formerly known as UNINET) and US Telecom, Inc. will be contributed to the partnership following the receipt of the necessary governmental

approvals. US Sprint, according to the Applicants, will be fully separated from GTE and United telephone operating companies.

Applicants attached their financial qualifications in Attachment F to the Application and filed updated Annual Reports, balance sheets and income statements in Case No. TM-86-125. Applicants state that their technical and managerial qualifications are evidenced by their lengthy, successful operations. Applicants further state that current services and operations will remain unchanged and for the most part will be managed by the same personnel.

Applicants request permission to continue billing customers at the rates set forth in their respective intrastate tariffs until their computer systems and data bases can be merged. Applicants state that subscribers during this period would have a choice between three US Sprint services: one based on the GTE Sprint tariff, another based on the US Telecom-Corporate tariff and a third based on the US Telecom-Communications tariff. Applicants further state that there would be no charge to the customers to switch between the services.

According to the Applicants, each partner will contribute key ingredients to the joint venture: GTE Sprint has a nationwide residential customer base and is well established in international markets while US Telecom-Communications has more experience in serving the needs of large corporate users and has under construction and planned a more extensive fiber optic digital network than GTE Sprint. Applicants state that these features, coupled with the ability to share expenses and avoid duplication of facilities will make US Sprint more efficient than GTE Sprint, US Telecom-Communications or US Telecom-Corporate. Applicants contend that the combined resources of the partners will enable US Sprint to deliver a wider range of services more efficiently and thus the formation and operation of US Sprint will serve the public interest.

The Commission's Staff in its Memorandum stated that it had no objection to this application and therefore would recommend that the application be granted. The Communications Department of the Staff recommended that the Applicants advise them on

a monthly basis as to the status of the consolidated tariff and the progress toward a combined billing system until such time as a unified tariff is filed with the Commission and the combined billing system is operational.

The Commission has jurisdiction over these telephone corporations pursuant to Chapters 386 and 392, RSMo (Supp. 1985). Section 392.300, RSMo (Supp. 1984) provides that a telephone corporation shall not merge without having first secured from the Commission an order authorizing it to do so. This Commission has held that the sole issue to be decided by it in this case is whether the proposed transactions are detrimental to the public interest, Re: Union Electric Company, 26 Mo. P.S.C. (N.S.) 418 (1983), Re: Kansas Power & Light Company, 26 Mo. P.S.C. (N.S.) 254 (1983). See State ex rel. City of St. Louis v. Pub. Serv. Comm'n., 335 Mo. 448, 73 S.W.2d 393, (en banc. 1934), State ex rel. Fee Fee Sewer Trunk Sewer, Inc. v. Litz, 596 S.W.2d 466 (Mo. App. 1980).

Having considered the application filed on behalf of GTE Sprint, US Telecom-Corporate and US Telecom-Communications and the Staff's Memorandum, the Commission finds that the proposed transactions do not appear to be detrimental to the public interest and therefore, should be approved contingent on receipt of the necessary federal approvals. The Commission further finds that US Sprint should notify the Communications Department of the Public Service Commission on a monthly basis as to the status of the consolidated tariff and combined billing system until a unified tariff is filed with the Commission and the combined billing system is operational.

MCI Telecommunications Corporation (MCI) filed its Application to Intervene in this case. Therein, MCI stated that in its position as an interexchange carrier, it has a substantial interest in insuring that competition in the interexchange market is fair. MCI further stated that it neither opposes nor supports the involved application at this time, but requests permission to intervene so that it will have an opportunity to protect its interests. MCI states that it reserves the right to challenge the proposed transfer of certificates, if it is allowed to intervene, in

the event that grounds for such a challenge arise. Having considered MCI's Application to Intervene the Commission finds that there is no need to grant or deny said application since MCI neither opposes nor supports the application and there is no request that proceedings in this matter be scheduled on any ground.

It is, therefore,

ORDERED: 1. That GTE Sprint Communications Corporation, US Telecom-Corporate Network Services Company and US Telecom-Communications Services Company be and hereby are, authorized to transfer their certificates of public convenience and necessity to US Sprint Communications Company upon the Secretary of the Commission receiving written notice that the necessary federal approvals have been received.

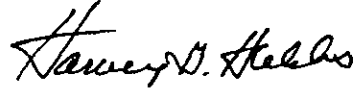

ORDERED: 2. That US Sprint Communications Company be and hereby is, directed to file a letter with the Secretary of the Commission within ten (10) days of receipt of the necessary federal approvals stating that said approvals have been received.

ORDERED: 3. That US Sprint Communications Company be and hereby is, directed to file a report on the 15th day of each month with the Communications Department of the Public Service Commission regarding the status of the consolidated tariff and the unified billing system until such time as a unified tariff is filed and the combined billing system is operational.

ORDERED: 4. That US Sprint Communications Company be and hereby is, authorized to provide service under the filed effective tariffs of GTE Sprint Communications Corporation, US Telecom-Corporate Network Services Company and US Telecom-Communications Services Company from the date that it is authorized to provide service in Missouri until the Commission approves US Sprint's consolidated tariff and it becomes effective.

ORDERED: 5. That this Order shall become effective on the 15th day of  
May, 1986.

STATE OF MISSOURI  
PUBLIC SERVICE COMMISSION

At a Session of the Public Service  
Commission held at its office  
in Jefferson City on the 27th  
day of June, 1986.

Case No. TM-86-125

In the matter of the application of GTE Sprint  
Communications, US Telecom-Corporate Network  
Services Company and US Telecom-Communications  
Services Company to transfer Certificates of  
Public Convenience and Necessity to US Sprint  
Communications Company.

---

ORDER APPROVING TARIFF

By its Order issued in this case on May 5, 1986, this Commission authorized GTE Sprint Communications Corporation, U.S. Telecom-Corporation Network Services Company and U.S. Telecom-Communications Services Company to transfer their certificates of public convenience and necessity to U.S. Sprint Communications Company upon the Secretary of the Commission receiving written notice that the necessary federal approvals have been received.

On June 25, 1986, and June 27, 1986, U.S. Sprint Communications Company submitted written documentation of federal approvals of the merger of the companies.

On May 19, 1986, U.S. Sprint Communications Company submitted for Commission approval its consolidated tariff with a requested effective date of July 1, 1986.

The Commission is of the opinion the proposed consolidated tariff submitted May 19, 1986, should be allowed to become effective on July 1, 1986.

---

It is, therefore,

ORDERED: 1. That the following tariff submitted by U.S. Sprint Communications Company be, and the same is, hereby approved for service rendered on and after July 1, 1986.

WATS and Monthly Mission

**2. GENERAL DESCRIPTION OF SERVICE**

GTE Sprint proposes to offer its Sprint, Sprint Advanced Leased Line services on an intrastate interLATA basis in Missouri. These services are also provided on an interstate basis under GTE Sprint's federal tariffs.

The switched message services, e.g., Sprint and Sprint Advanced WATS, offer the shared use of interexchange communications facilities by GTE Sprint's subscribers. Subscribers use local exchange service provided by the established local telephone companies to access long distance facilities which are owned by or have been leased by GTE Sprint.

For Sprint service, access to the GTE Sprint network in end offices not converted for equal access is accomplished by dialing a local seven-digit telephone number. This call is then answered by the GTE Sprint switching equipment, which provides a second dial tone enabling the subscriber to dial his personal multi-digit identification number (plus an assigned travel identification code if entering the network other than via his primary access number), and the ten-digit long distance telephone number of the desired destination. In equal access areas, Sprint subscribers access the GTE Sprint network with one-plus dialing or by dialing 10777.

Sprint subscribers, who may access the network 24 hours a day, are charged for the cost of each call made. Discounts are available for subscribers whose usage exceeds specified amounts. While there is no monthly subscription fee for the first authorization code, there is a small monthly fee for each additional code. Charges for Sprint calls are both time and distance sensitive.

Sprint Advanced WATS-1 calls are originated via dedicated facilities between (T) the subscriber's premises and GTE Sprint's terminal in the originating city and are terminated via normal shared use facilities. Charges vary with duration but do not vary with distance.

Sprint Advanced WATS-2 calls are originated, in equal access areas, via (N) Feature Group D connections and are terminated via normal shared use (N) facilities. Charges are time sensitive, but do not vary with distance.

At an additional cost, Sprint and Sprint Advanced WATS subscribers may elect one or more optional features applicable to switched service. With Call Detail Tape Service, GTE Sprint provides subscribers with the monthly call detail reports of switched service usage on a magnetic tape. Speedial is an abbreviated dialing arrangement whereby the Carrier provides subscribers with the ability to call pre-selected locations by dialing a three or four digit code. A separate list of Speedial numbers is provided for each Sprint number or Authorization Code to which Speedial service applies. Insprint, available only to Sprint subscribers, is an inward calling service that is toll free to the calling party. Accounting Code Service is an arrangement whereby GTE Sprint, by means of multi-digit accounting codes associated with a switched service billing number, provides subscribers with the capability to allocate usage costs to separate cost centers.

In addition to the switched message services, GTE Sprint also provides Monthly Leased Line Service. This is a non-switched point-to-point service over fully dedicated lines at a fixed monthly cost. These facilities are offered in numerous configurations depending on the individual subscriber's needs.

The GTE Sprint network circuits are designed and engineered to provide high quality transmission of the human voice with a minimum level of impairment such as noise and echo. However, overall quality may vary somewhat due to the variability in quality of the connections provided by the local telephone companies, which is beyond GTE Sprint's control.

The term "Dedicated Access Line" denotes a dedicated communications channel which terminates on a general access port provided by the Carrier.

**Designated Location (Applicable to Sprint and Sprint Advanced WATS Services only)**

The term "Designated Location" or "Location" refers to a terminal device (e.g., handset, PBX, facsimile machine) having a unique telephone number (or, in the case of locations served by direct inward dialing, a set of telephone numbers serving a single user), and to which the subscriber represents to Carrier that subscriber has a regular and continuing requirement for communications which are related directly to the business of the subscriber at the designated location (e.g., including but not limited to: affiliates, subsidiaries, subcontractors, suppliers, subscribers, and other regular business contacts).

**Distant City (Applicable to Sprint Advanced WATS Service Only)**

The term "Distant City" refers to a Sprint Advanced WATS termination point opposite a Closed End.

Intercity Channels (Applicable to Monthly Leased Line Service only)

The term "Intercity Channels" denotes those channels derived from Carrier's main network providing channels between cities. This channel system is operated in the analog mode with digital data channels derived through modern multiplexing techniques.

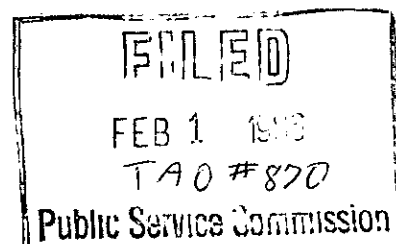

Intercity Circuit (Applicable to Sprint and Sprint Advanced WATS Services only)

"Intercity Circuit" denotes a circuit, created by Carrier by means of multiplex equipment, between Carrier's switches which are shared by subscribers. Shared intercity circuits will consist of identifiable and discrete circuits between a given city-pair.

Intercity Mileage (Applicable to Sprint and Monthly Leased Line Services only)

The term "Intercity Mileage" denotes the mileage, measured as the shortest distance between any two of the Carrier's technical operating centers using the Telephone Industry Standard Rate Centers ("V" & "H") associated with said Carrier's offices.

The term "Premises" denotes a building or buildings on contiguous property (except railroad rights of-way, etc.) not separated by a public highway.

Rate Center

The term "Rate Center" denotes a geographically specified point used to determine mileage dependent rates.

Regular Billing

The term "Regular Billing" denotes a standard bill sent in the normal monthly Carrier billing cycle. This billing consists of one bill for each account assigned to the subscriber, or, in the case of Monthly Leased Line service, one bill for each subscriber together with explanatory detail showing the derivation of the charges.

Regular Voice Grade Facility (Applicable to Monthly Leased Line Service only)

The term "Regular Voice Grade Facility" denotes a communications channel with a bandwidth of approximately 2,700 Hertz (300 to 3,000 Hertz).

Subscriber

The term "Subscriber" denotes the person, firm, company or corporation, or other entity, having a communications requirement of its own which contracts for service under this tariff and is responsible for the payment of charges as well as compliance with the Carrier's regulations pursuant to this tariff.

3.4 Liability of the CarrierMISSOURI  
Public Service Commission

- .1 The liability of the Carrier for damages arising out of mistakes, omissions, interruptions, delays, errors or defects in the transmission occurring in the course of furnishing service, channels or other facilities and not caused by the negligence of the subscriber, commences upon activation of service and in no event exceeds an amount equivalent to the proportionate charge to the subscriber for the period of service during which such mistakes, omissions, interruptions, delays, errors or defects in transmission occur, nor does it include unavoidable damage to the subscriber's premises. For the purpose of computing such amount, a month is considered to have 30 days.
- .2 When the facilities of other carriers are used in establishing connections to points not reached by the Carrier's facilities, the Carrier is not liable for any act or omission of the other carrier or carriers. The subscriber will indemnify and save harmless the Carrier from any third party claims for such damages referred to in Section 3.4.1.
- .3 The Carrier will make no refund of overpayments by a subscriber unless the claim for such overpayment together with proper evidence be submitted within two (2) years from the date of alleged overpayment.

3.5 Obligations of the Subscriber (Continued)**MISSOURI  
Public Service Commission**

- .3 The subscriber will be responsible for insuring ~~that subscriber~~ provided signals will not result in interference with any of the services provided by the Carrier or interfere with others using services provided by the Carrier. Physical arrangements for protection of the Carrier's facilities serving the subscriber shall be employed if needed. The subscriber will be required to use only those devices found to be necessary to insure proper operation of the local distribution facility and the intercity channel facility. The intent of this provision is to insure proper signal insertion so as to protect the entire network. All signals must be of the proper type bandwidth, and other technical parameters, so as not to damage the Carrier's equipment or degrade service to other subscribers. It shall also be the responsibility of the subscriber to provide adequate electrical power, wiring and electrical outlets necessary for the proper operation of Carrier's equipment on his premises.
- .4 The equipment and facilities which are connected with those of the Carrier shall be constructed, operated, and maintained by those providing same so as to work satisfactorily with the service furnished by the Carrier. Such equipment and facilities shall be suitable to avoid hazard or damage to Carrier's plant or injury to Carrier's employees or to the public because of the character or location of such equipment or facilities and sources of power to which it is connected. In cases in which additional protection equipment is required, this shall be provided by the subscriber or by the Carrier at the subscriber's expense.
- .5 Upon notice from the Carrier that the equipment or facilities of the subscriber, or of others so authorized to be connected, is causing or is likely to cause hazard or interference, the subscriber, or others so authorized to be connected, shall make such changes as may be necessary to remove or prevent such hazard or interference.

JAN 3 1986

MISSOURI

Each commercial applicant for service will be required to establish credit. Any applicant whose credit has not been duly established may be required to make a deposit to be held as a guarantee of payment of charges at the time of application. In addition, an existing subscriber may be required to make a deposit or increase a deposit presently held.

- .1 A deposit is not to exceed the estimated charges for two (2) months' service plus installation.

- .2 A deposit will be returned. . .

. . . when an application for service has been cancelled prior to the establishment of service. The deposit will be applied to any charges applicable in accordance with the tariff and the excess portion of the deposit will be returned.

. . . at the end of six (6) months' of a satisfactory credit history.

. . . or upon the discontinuance of service. The Carrier will refund the subscriber's deposit or the balance in excess of unpaid bills for that service.

- .3 The fact that a deposit has been made in no way relieves the subscriber from complying with the regulations with respect to the prompt payment of bills on presentation.

- .4 The Carrier will pay 9% interest on deposits.

Original Page 35**INTERCITY TELECOMMUNICATIONS SERVICES****RECEIVED**3. REGULATIONS (Continued)3.12 Mileage Between Service Locations

The mileage between the Carrier's service locations (or, in the case of Monthly Leased Line Service, the Carrier's TOCs) is calculated based on V and H coordinates as obtained by reference to AT&T Tariff FCC No. 10.

JAN 3 1986

MISSOURI

Public Service Commission

Method of Calculation

The airline mileages between two carrier service locations is calculated as follows:

$$\text{Mileage} = \sqrt{\frac{(V_1 - V_2)^2 + (H_1 - H_2)^2}{10}}$$

Where  $V_1$  and  $H_1$  are the V and H coordinates of point 1 and  $V_2$  and  $H_2$  are the coordinates of point 2.

The mileage is rounded up to an integer value to determine the airline mileage.

**3. REGULATIONS (Continued)****3.15 Interruption of Service**

It shall be the obligation of the subscriber to notify the Carrier of any interruption in service. Before giving such notice, the subscriber shall ascertain that the trouble is not being caused by any action or omission of the subscriber within his control, and is not in wiring or equipment connected to the terminal of the Carrier.

When Sprint or Sprint Advanced WATS Service is interrupted for eight (8) continuous hours or more, or when Monthly Leased Line Service is interrupted for sixty (60) continuous minutes or more, credit is allowed on demand to the Carrier, computed as set forth below, provided such interruption is not shown by the Carrier to have been caused by the negligence or willful act of the subscriber, or anyone at a subscriber terminal location, or is not caused by the failure of the subscriber's equipment or power supply.

Credit is computed by multiplying the monthly rate for the service by the ratio that the number of hours (including, for Monthly Leased Line service, fractional parts calculated to the nearest tenth of an hour) in the period of interruption bears to 720 hours. (For the purpose of this computation, each month shall be considered to have 720 hours). The monthly bill on which the credit will be based shall be the non-usage sensitive billing for the month during which the interruption occurred. An interruption is measured from the time the Carrier detects trouble, or the subscriber notifies the Carrier of the interruption by an expeditious means, until the trouble is cleared. Each interruption is considered separately for purposes of establishing credit allowance. Interruptions shall be accumulated to the nearest half hour period (or for Monthly Leased Line, to the nearest tenth of an hour).

P.S.C. Mo. Tariff No. 1

Original Page 39**INTERCITY TELECOMMUNICATIONS SERVICES****3. REGULATIONS (Continued)****3.16 Cancellation of Application for Service**

Where the subscriber or applicant cancels an application for service prior to the start of installation of service, or prior to the start of special construction, no charge applies.

Where installation of service (Sprint Advanced WATS and Monthly Leased Line service only) has been started prior to the cancellation, a cancellation charge equal to the costs incurred by the Carrier shall apply, but in no case shall such charge exceed the charge for the minimum period of the service ordered, including applicable installation charges, if any.

Where the subscriber or applicant delays activation of his service during the period 30 days preceding the scheduled installation date for a period of more than one week, normal charges for local distribution facilities shall apply from the scheduled date of installation. In the event that the customer-induced delay exists for more than 30 days after the scheduled installation date, the Carrier may consider the delay a cancellation of application for service.

Where special construction has been started prior to cancellation, a charge equal to costs incurred in the special construction, less net salvage, applies. In determining the charge, cancelled service is treated as discontinued as of the date on which it was to have been placed in service. Installation or special construction for a subscriber or applicant is considered to have started when the Carrier incurs any expense in connection therewith or in preparation therefor which would not otherwise have been incurred, provided that the subscriber or applicant has advised the Carrier in writing to proceed with the installation or special construction.

Under this service option, subscriber uses shared off-net access lines to originate calls from any Sprint metropolitan area, as specified in Section 4.1.1 below, and terminate calls in another LATA within the State of Missouri. Usage rates are specified in Section 5.1.1.

Usage charges are based on the distance and duration of each call as specified in Section 5.1.1. Discounts are available as specified in Section 5.1.2 to subscribers whose usage exceeds specified amounts.

A monthly Authorization Code charge does not apply to the subscriber's first Authorization Code. A fee as specified in Section 5.1.3 applies to each additional code. A subscriber must enter the network via an off-network access line using an authorization code except where equal access is available. In equal access areas, presubscribed Sprint subscribers access the GTE Sprint network with 1+ dialing and nonpresubscribed Sprint customers access the network by dialing 10777. Each subscriber is assigned an authorization code and a travel code. A subscriber must designate a primary local access number. A subscriber wishing to enter the network via an off-network access line other than via his primary access number or a presubscribed telephone must use the Authorization Code plus his assigned travel code.

**4.1 Sprint (Continued)**

MISSOURI

Public Service Commission

In "equal access" end offices (Feature Group D), subscribers who are presubscribed to Sprint dial 1 plus the ten-digit telephone number of the party the caller wishes to reach. Subscribers not presubscribed to Sprint, in calling from telephones connected to equal access end offices, dial 10777 plus the ten-digit telephone number.

All subscribers are provided with one authorization code at no charge. A fee as specified in Section 5.1.3 applies to each additional code. A subscriber must have at least one authorization code to enter the network via an off-network access line where equal access is unavailable.

Each authorization code is enabled with a two-digit travel security feature called Travelcode. A subscriber must designate a primary local access number. A subscriber wishing to enter the network via an off-network access line other than via the primary local access number (e.g. when away from normal local calling area) must use the authorization code plus an assigned travelcode.

In equal access offices, the subscriber may choose to use his authorization code rather than 1+ dialing for billing to another address. In this instance, he would follow the dialing sequence for Feature Group A or B, whichever is applicable.

This section describes miscellaneous services provided in conjunction with the Sprint offering. Rates and charges are specified in Section 5.1 following.

**.1 Accounting Code Service**

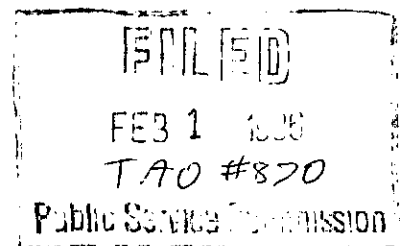

An arrangement whereby Carrier, by means of multi-digit Accounting Codes associated with a Sprint billing number, provides the subscriber with the capability to allocate Sprint usage costs to separate cost centers. A monthly Call Detail Report for each Accounting Code is included in the service. A separate list is generated for each Sprint number to which Accounting Code service applies. Accounting Codes apply to Sprint per authorization code.

The term "ANI Accounting Codes" refers to accounting codes in equal access areas which are limited to use with a subscriber's presubscribed lines. Subscribers in equal access areas requiring accounting codes for traveling would need to order one (1) set of ANI Accounting Codes (for use with presubscribed lines) and one (1) regular set (for traveling).

**.2 Call Detail Tape Service**

An arrangement whereby Carrier provides subscriber the monthly call detail reports of switched service usage on a magnetic tape.

**INTERCITY TELECOMMUNICATIONS SERVICES**4. SERVICE AND RATE DESCRIPTION (Continued)4.2 Sprint Advanced WATS

Sprint Advanced WATS has two options: Sprint Advanced WATS-1 (dedicated access) and Sprint Advanced WATS-2 (switched access)

(N)  
(N)

Under Sprint Advanced WATS-1 option, the subscriber orders a General Access Port in the traffic originating city as well as a required dedicated access facility. Via this dedicated facility, combination traffic originates and enters the network. The subscriber traffic traverses the network and terminates via shared off-network access lines. This configuration of service is restricted to one-way calling only (i.e., only calls originating at the originating end of the subscriber's service). Any call originating from a location other than the originating end of the subscriber's service will be blocked by the Carrier. If the subscriber requires both inward and outward service the subscriber must order another service option in addition to or in place of this GTE Sprint configuration.

(T)

Sprint Advanced WATS-2 subscribers enter the network via normal shared use Feature Group D circuits and terminate via shared off-network access lines.

(N)  
(N)

Subscribers may originate Sprint Advanced WATS-1 calls from the metropolitan areas listed in Section 4.2.1 below, and Sprint Advanced WATS-2 calls as described in Section 4.2.2 below, and terminate calls in all locations in another LATA within the State of Missouri.

(C)  
(C)

The per-minute rates set forth in Section 5.2.1 below are billed according to the average monthly use for each rate period of each Sprint Advanced WATS line within a service group. The rate charged is determined by the day and time call originates at the Sprint Advanced WATS originating location.

(N)

Sprint Advanced WATS-2 customers must maintain an average minimum of 55% day traffic per line.

4.2 Sprint Advanced WATSPENN  
PL 87-2

Under this option, the subscriber orders a General Access-Port in the traffic originating city as well as a required dedicated access facility. Via this dedicated facility, combination traffic originates and enters the network. The subscriber traffic traverses the network and terminates via shared off-network access lines. This configuration of service is restricted to one way calling only (i.e., only calls originating at the closed end of the subscriber's service). Any attempt to place a call from another location which would terminate on the dedicated access line (e.g., where the dedicated access line would be the called rather than the calling location) will be blocked by the Carrier. If the subscriber requires both inward and outward service, the subscriber must order another service option in addition to or in place of this GTE Sprint configuration.

Subscribers may originate Sprint Advanced WATS calls from the metropolitan areas listed in Section 4.2.1 below and terminate calls in all locations in another LATA within the State of Missouri. Rates for calls originating in locations listed in Section 4.2.1 and terminating in locations listed in Section 4.2.2 (i.e., on-network calls) are specified in Section 5.2.1. Rates for calls originating in locations listed in Section 4.2.1 and terminating in locations other than those listed in Section 4.2.2 (i.e., off-network calls) are specified in Section. 5.2.2.

Public Service Commission4. SERVICE AND RATE DESCRIPTION (Continued)4.2 Sprint Advanced WATS (Continued).3 Intercity Circuit

Intercity circuits between Carrier's service locations or city-pairs will be shared by subscribers. Each switched city-pair will have a unit usage rate per minute calculated to the next higher 6 seconds. In the event that Sprint Advanced WATS-1 subscriber's measured usage for a one-month period does not equal or exceed the minimum usage, his usage charge will be the minimum usage. In the event that the measured monthly usage exceeds the minimum usage, the subscriber's usage charge will be calculated as the actual usage multiplied by the appropriate per minute rate(s).

(T)

The minimum usage and rates and charges for each minute of usage are detailed in Section 5.2. Fractional minutes of usage are calculated to the next higher 6 seconds.

Sprint Advanced WATS-2 customers must maintain an average of 55% day traffic per line.

**INTERCITY TELECOMMUNICATIONS SERVICES**4. SERVICE AND RATE DESCRIPTION (Continued)4.2 Sprint Advanced WATS (Continued).4 Access Lines

- .1 A Sprint Advanced WATS-1 subscriber must subscribe to a dedicated access line connecting a general access port to his premises. For the purpose of this requirement, the definition of a subscriber's premises shall include the location of terminal equipment from which the subscriber is provided with telephone service, e.g., a telephone, key telephone system (KTS), PABX, and/or common control switched private line network service. (T)

Such access lines may be provided either by Carrier or by the local telephone company, or another common carrier, at the subscriber's option.

For access lines provided by the local telephone company or another common carrier, the rates in Section 5.2.3.1 will apply. For access lines provided by GTE Sprint, the rates in Section 5.2.3. will apply.

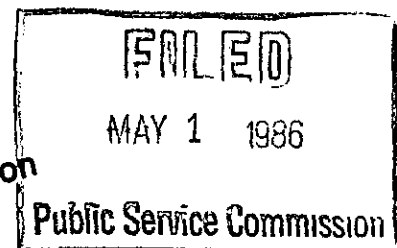

Subscribers' calls will exit the Sprint network via ONALs.

- Each Sprint Advanced WATS-1 subscriber must specify the service points at which he desires a Dedicated Access Line connected to an intercity circuit. As provided in Section 4.2.4.1 of the Sprint Advanced WATS section of this tariff, other services ordered by the subscriber from the Carrier or other carriers may be connected to any Sprint Advanced WATS termination point. (T)

- .2 A Sprint Advanced WATS-2 subscriber will access the Sprint network (in equal access areas only) via Feature Group D connections. (N)

Subscribers' calls will exit the Sprint network via shared use facilities. (N)

This section describes miscellaneous services provided in conjunction with Carrier's Sprint Advanced WATS service offering. Rates and charges are specified in Section 5.2 following.

**.1 Accounting Code Service**

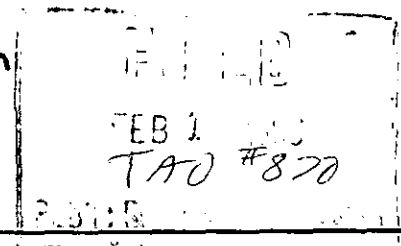

An arrangement whereby the Carrier, by means of multi-digit Accounting Codes associated with a Sprint Advanced WATS service billing number, provides the subscriber with the capability to allocate Sprint Advanced WATS service usage costs to separate cost centers. A monthly Call Detail Report for each Accounting Code is included in the service. A separate list is generated for each Sprint Advanced WATS service number to which Accounting Code Service applies. Accounting Codes apply to Sprint Advanced WATS per trunk group.

**.2 Call Detail Tape Service**

An arrangement whereby the Carrier provides subscriber the monthly Call Detail Reports of Sprint Advanced WATS service usage on a magnetic tape.

**.3 Speedial**

An abbreviated dialing arrangement whereby the Carrier provides subscriber with ability to call pre-selected locations by dialing a three or four digit code. A separate list of Speedial numbers is provided for each number to which Speedial service applies.

This charge is to cover the cost to the Carrier of a visit to subscriber's premises to determine what equipment is the cause of a malfunctioning channel. This charge applies in cases where the Carrier identifies the trouble to be caused by subscriber-provided equipment and is unrelated to any malfunction of the Carrier's service. The charge applies from the time the Carrier's personnel are dispatched until the problem is identified.

A charge also applies when the local telephone company, at the Carrier's request, makes the trouble shooting visit to the subscriber's premises and determines that the trouble is caused by subscriber-provided equipment. The subscriber will be charged for this trouble shooting at a rate equal to the charge assessed the Carrier by the local telephone company plus a surcharge for administrative expenses.

The subscriber may also be responsible for any charges when the Carrier, acting as subscriber's agent, requests that the vendor of the subscriber-provided equipment make a trouble shooting visit to subscriber's premise. The subscriber will be charged at a rate equal to the charge assessed the Carrier by the vendor, plus a surcharge for administrative expenses.

Equipment may be changed or may be moved within a subscriber location ("inside move") or between subscriber locations ("outside move") served from the same technical operating center. The subscriber may also order his service arrangement changed with or without a move. Rates and charges are specified in Section 5.3.3. It is subscriber's obligation to notify Carrier in writing at least 90 calendar days in advance when an equipment change, move or rearrangement is to be made. If Carrier is given inadequate notification, Carrier will not be liable for issuing credit for the period between the date subscriber desires the moved or rearranged service or change in equipment and the date the equipment change, move or rearrangement is actually ready for the subscriber's use.

**.2 Trouble Shooting Charges**

This charge is to cover the cost to the Carrier of a visit to subscriber's premises to determine what equipment is causing the malfunctioning channel. This charge applies in cases where the Carrier identifies the trouble to be caused by subscriber-provided equipment and is unrelated to any malfunction of the Carrier's service. The charge applies from the time the Carrier's personnel are dispatched until the problem is identified.

A charge also applies when the local telephone company, at the Carrier's request, makes the trouble shooting visit to the subscriber's premises and determines that the trouble is caused by subscriber-provided equipment. The subscriber will be charged for this trouble shooting at a rate equal to the charge assessed the Carrier by the local telephone company plus a surcharge for administrative expenses.

The subscriber may also be responsible for any charges when the Carrier, acting as subscriber's agent, requests that the vendor of the subscriber-provided equipment make a trouble shooting visit to subscriber's premise. The subscriber will be charged at a rate equal to the charge assessed the Carrier by the vendor, plus a surcharge for administrative expenses.
