OPERATOR SERVICES

I. BUSY VERIFICATION SERVICE

A. GENERAL

1. Busy Verification Service is furnished to customers upon request to provide Line Status or Busy Interrupt for a requested line or trunk.
2. This service is provided where facilities exist for Line Status of Busy Interrupt through a Telephone Company operator.
3. The provision of Line Status involves an operator determining the condition of a line or trunk that a customer requests to be checked. The status of this line or trunk is verified to the customer for a charge as listed below.
4. The provision of Busy Interrupt involves an operator interrupting a line or trunk that a customer requests to be checked. Information concerning the Busy Interrupt to this line or trunk is passed to the customer for a charge as listed below.
5. No request will be processed on a collect or reversal of charge basis.

B. CHARGES

The charges listed below are in addition to the rates and charges associated with local or Long Distance Message Telecommunications Service.

1.	Per Request	Charge	
	(a) Line Status	<b>\$2.50</b>	(1)
	(b) Busy Interrupt	<b>\$2.50</b>	(1)

No charge will apply if the line situation indicates a trouble condition. No charge applies when the request is identified as an emergency request by the customer and originates from or to emergency agencies, such as 911 service, police, fire, rescue, or ambulance.

III. NATIONAL DIRECTORY ASSISTANCE SERVICE

A. GENERAL

1. National Directory Assistance Service is provided to customers of the Telephone Company for the purpose of requesting telephone numbers of individuals or businesses who are located outside the customer's local Directory Assistance service area, as defined in Section 40 II.A.1. of this tariff.
2. National Directory Assistance Service is available only in exchanges for which the Telephone Company provides local operator services.

B. REGULATIONS

1. There are no call allowances or exemptions for National Directory Assistance Service.
2. A maximum of two requested telephone numbers is allowed per call.
3. The rate in C.2. following applies to each call to National Directory Assistance, even if one of the numbers requested is in the local Directory Assistance service area.
4. In locations where the customer has the capability to direct dial National Directory Assistance but places the call to the National Directory Assistance Service attendant via an operator, the operator handled service charges listed in Section 40 V.B. apply in addition to the rate in C.2. following.
5. This service may be alternately billed, i.e., billed to a third number; a special billing number; or a Telephone Company calling card.

III. DIRECTORY ASSISTANCE CALL COMPLETION

JAN 15 1997

A. GENERAL

1. Local Directory Assistance Call Completion (DACC) service provides customers who dial Directory Assistance the option of having the requested telephone number automatically dialed and the call completed by the automated Directory Assistance System.

When the customer receives the requested directory number from the automated Directory Assistance System, the customer hears the DACC announcement prompt offering to automatically dial the requested telephone number. DACC is activated by the customer when the customer depresses a specific digit on a touch-tone telephone during the DACC announcement prompt.

2. DACC will be furnished only where facilities permit and where the service used by the customer can support all billing requirements for the service.
3. Only the second provided Directory Assistance telephone number may be dialed and completed by DACC if two Directory Assistance requests are made during the same call.

B. RATES AND CHARGES

1. Alternate billing arrangements such as collect, third number, or calling card calls are not available for DACC.
2. DACC charges are not applicable to handicapped customers who are exempt from Directory Assistance charges.
3. The DACC service charge applies for all completed calls in addition to the appropriate Directory Assistance charge and other applicable charges. If a call is not completed (i.e. busy or no answer), the DACC service charge does not apply.

IV. DIRECTORY ASSISTANCE CALL COMPLETION

A. GENERAL

1. Local Directory Assistance Call Completion (DACC) service provides customers who dial Directory Assistance the option of having the requested telephone number automatically dialed and the call completed by the automated Directory Assistance System.

When the customer receives the requested directory number from the automated Directory Assistance System, the customer hears the DACC announcement prompt offering to automatically dial the requested telephone number. DACC is activated by the customer when the customer depresses a specific digit on a touch-tone telephone during the DACC announcement prompt.

2. DACC will be furnished only where facilities permit and where the service used by the customer can support all billing requirements for the service.
3. Only the second provided Directory Assistance telephone number may be dialed and completed by DACC if two Directory Assistance requests are made during the same call.

B. RATES AND CHARGES

1. Alternate billing arrangements such as collect, third number, or calling card calls are not available for DACC.
2. DACC charges are not applicable to handicapped customers who are exempt from Directory Assistance charges.
3. The DACC service charge applies for all completed calls in addition to the appropriate Directory Assistance charge and other applicable charges. If a call is not completed (i.e. busy or no answer), the DACC service charge does not apply.

OPERATOR SERVICES

V. LOCAL OPERATOR ASSISTANCE

A. GENERAL

1. Local Telecommunications Service is that of furnishing telephone communications within local service areas.
2. Local operator assistance is furnished to customers upon request in order to complete local calls.
3. Three classes of Local Service are offered: Dial Station-to-Station Service; i.e., Local Measured and Flat Rate, Operator Station-to-Station Service, and Person-to-Person Service. These definitions are found in the Long Distance Message Telecommunications Service tariff and these definitions apply to local calls as well.
4. Dial Station-to-Station class of service applies to operator Station-to-Station calls placed sent paid from residence service lines or trunks which are certified by a qualified authority as services of persons who are disabled and unable to dial telephone numbers. All Station-to-Station calling card calls charged to the certified line are subject to the charges in B.1. following.
5. Certification is provided upon the customer's written application to the Telephone Company for each residence line to be included. Certification becomes effective with the bill following approval of the application. Requests to change to or from certification are not subject to charge. Customers may verbally identify themselves as being unable to dial a call because of their disability. Only the Dial Station-to-Station charges will apply to these sent-paid calls.
6. Customers who identify themselves as being disabled and unable to dial the call will not be required to pay the operator-assisted charge for sent-paid Station-to-Station calls from Payphone Line Service telephones. (CT)
7. When an operator is used to complete a local call, the charges appearing in B.1., 2. and 3., following apply.

I. METROPOLITAN OPTIONAL SERVICE PLAN - LAKE LOTAWANA, MISSOURI

**MISSOURI  
Public Service Commission**

A. General

1. This plan is an optional interexchange service offered to Lake Lotawana, Missouri, exchange service customers of the Company providing an alternate rate treatment for calls to selected exchanges listed in the exchange list in C.3. following. Calls exceeding the individual Message Unit Plan contract will be billed at the intrastate Long Distance Message Telecommunications Tariff rates.
2. For application of Service Charges, see the Service Connection Charges Section of this tariff.

B. Message Unit Plan Rates (Business and Residence)

Monthly Rates

1. Plan 1 - 150 Units (ASBSTLP L1)	\$ 9.45
2. Plan 2 - 300 Units (ASBSTLP L2)	18.90
3. Plan 3 - 450 Units (ASBSTLP L3)	28.35

C. Application

1. Unit charges are calculated in this matter: Minutes of Use multiplied by the distance factor of the called exchange. Units are discounted 25 percent for calls placed 5 p.m. to 8 a.m. Monday through Thursday, and from Friday at 5 p.m. to Monday at 8 a.m. and holidays as specified in the Intrastate Long Distance Message Telecommunications tariff.
2. Distance Factors

CUSTOM CALLING SERVICES

I. GENERAL REGULATIONS

Custom Calling Services are optional telephone service arrangements which provide one or more of the following features:

A. **Enhanced** Call Waiting (T)

Alerts a customer who is using his telephone, by means of an audible tone, that another call is trying to reach him. **Where facilities permit, this feature includes** Call Waiting Control **which** allows customers to turn off the call waiting tone before or during a call (but before the call waiting tone has been heard), so that his call will not be interrupted by the call waiting tone. The call waiting tone capability will automatically be restored when the call is terminated. (M) (T) (T)

B. Three-Way Calling

Enables a customer to add a third party to an existing call without operator assistance, thereby establishing three-way conversation. To activate the service, the customer must place the first party on hold (hookflash), dial the second party's number, and once connected, hookflash to re-join the initial party. The transmission may vary depending on the distance and routing necessary; therefore, transmission may not meet normal standards.

Three-Way Calling is available at a flat monthly rate or on a usage sensitive basis. To use the service on a usage sensitive basis, the customer must press an activation code prior to dialing the second party's number. The customer will incur an activation charge for each completed call. The provisioning of this service on a usage sensitive basis is subject to technical limitations and is provided where facilities are available. Customers may request removal of this feature at no additional charge.

CUSTOM CALLING SERVICES

JAN 31 1997

I. GENERAL REGULATIONS

Custom Calling Services are optional telephone service arrangements which provide one or more of the following features:

MISSOURI  
PUBLIC SERVICE COMMISSION

A. Call Waiting

Alerts a customer who is using his telephone, by means of an audible tone, that another call is trying to reach him. Call Waiting Control is an enhancement to Call Waiting and allows customers to turn off the Call Waiting tone before or during a call (but before the Call Waiting tone has been heard), so that his call will not be interrupted by the Call Waiting tone. The Call Waiting tone capability will automatically be restored when the call is terminated.

B. Call Forwarding

Permits a customer to transfer all incoming calls to another telephone number within the exchange or on the Long Distance Telecommunications Network where facilities permit. The Call Forwarding customer is responsible for the payment of charges for each call between his Call Forwarding-equipped telephone and the telephone to which the call is being forwarded. The transmission may vary depending on the distance and routing necessary; therefore, transmission may not meet normal standards.

C. Three-Way Calling

Enables a customer to add a third party to an existing call without operator assistance, thereby establishing three-way conversation. To activate the service, the customer must place the first party on hold (hookflash), dial the second party's number, and once connected, hookflash to re-join the initial party. The transmission may vary depending on the distance and routing necessary; therefore, transmission may not meet normal standards.

CUSTOM CALLING SERVICES

JUN 27 1996

I. GENERAL REGULATIONS

Custom Calling Services are optional telephone services and enhancements which provide one or more of the following features.

MISSOURI  
Public Service Commission

A. Call Waiting (RT)

Alerts a customer who is using his telephone, by means of an audible tone, that another call is trying to reach him. Call Waiting Control is an enhancement to Call Waiting and allows customers to turn off the Call Waiting tone before or during a call (but before the Call Waiting tone has been heard), so that his call will not be interrupted by the Call Waiting tone. The Call Waiting tone capability will automatically be restored when the call is terminated. (CT)

B. Call Forwarding (RT)

Permits a customer to transfer all incoming calls to another telephone number within the exchange or on the Long Distance Telecommunications Network where facilities permit. The Call Forwarding customer is responsible for the payment of charges for each call between his Call Forwarding-equipped telephone and the telephone to which the call is being forwarded. The transmission may vary depending on the distance and routing necessary; therefore, transmission may not meet normal standards.

C. Three-Way Calling (RT)

Enables a customer to add a third party to an existing call without operator assistance, thereby establishing three-way conversation. The transmission may vary depending on the distance and routing necessary; therefore, transmission may not meet normal standards.

Speed Calling (RT)

Enables a customer to place calls to other telephone numbers by dialing a one- or two-digit code rather than the complete telephone number. The 8-code capacity or the 30-code capacity may be provided. The combination of code capacities is not available on multi-line hunting lines.

**MISSOURI**  
**Public Service Commission**

Custom Calling Services are optional telephone service arrangements which provide one or more of the following features:

A. Call Waiting (FCWIFLC)

Alerts a customer who is using his telephone, by means of an audible tone, that another call is trying to reach him. Cancel Call Waiting is an enhancement to Call Waiting and allows customers to turn off the Call Waiting tone before or during a call (but before the Call Waiting tone has been heard), so that his call will not be interrupted by the Call Waiting tone. The Call Waiting tone capability will automatically be restored when the call is terminated.

B. Call Forwarding (FCF1FLC)

Permits a customer to transfer all incoming calls to another telephone number within the exchange or on the Long Distance Telecommunications Network where facilities permit. The Call Forwarding customer is responsible for the payment of charges for each call between his Call Forwarding-equipped telephone and the telephone to which the call is being forwarded. The transmission may vary depending on the distance and routing necessary; therefore, transmission may not meet normal standards.

C. Three-Way Calling (F3W1FLC)

Enables a customer to add a third party to an existing call without operator assistance, thereby establishing three-way conversation. The transmission may vary depending on the distance and routing necessary; therefore, transmission may not meet normal standards.

D. Speed Calling (FS81FLC or FS31FLC)

Enables a customer to place calls to other telephone numbers by dialing a one- or two-digit code rather than the complete telephone number. The 8-code capacity or the 30-code capacity may be provided. The combination of the capacities is not available on multi-line hunting lines.

CUSTOM CALLING SERVICES

I. GENERAL REGULATIONS (Continued)

- C. Call Forward Features permit the forwarding of incoming calls under a variety of conditions to another telephone number either by dialing an activation code or via pre-programming by the Company. Calls may be forwarded to any number subject to the availability of the necessary facilities in the central office from which the calls are to be transferred. The customer subscribing to this service is responsible for applicable usage charges. Only one call forwarding arrangement, consisting of a single calling path, will be provided per exchange service line for which the customer subscribes to this feature, unless the customer is also subscribed to the Call Forward Additional Paths feature, in which instance one call path per Call Forward Additional Path feature subscribed to will be provided. **When the Customer's designated forward-to number is not in the Customer's local or expanded local calling area, the use of multiple paths for the completion of simultaneous toll calls may be subject to restrictions or prohibitions imposed by the Customer's Presubscribed Interexchange Carrier.**

(N)  
|  
(N)

Call Forward Features shall not be used to extend calls on a planned and continuing basis to intentionally avoid the payment in whole or in part, of usage charges that would regularly be applicable between the station originating the call and the station to which the call is ultimately transferred. If the Company determines that Call Forward Features are being used in manner not consistent with the intent of the service or in any other way violates the restrictions of the service, the Subscriber will be determined ineligible for the service and the service will be removed from the Customer's account.

1. Call Forwarding

This feature permits the manual forwarding of incoming calls to another telephone number. When activated, all calls will forward; calls cannot be answered from a line with Call Forwarding activated. Call Forwarding overrides Call Forward No Answer and Call Forward Busy, but those features resume functionality when Call Forwarding is deactivated.

Call Forwarding (FCF1FLC) – Provides a customer the capability to control activation/deactivation and the forward-to-number of the service by using dialing tones.

2. Call Forward No Answer

This feature permits the automatic forwarding of an incoming call to another telephone number when the called telephone remains unanswered for a predetermined number of rings, usually four or five.

- a. Call Forward No Answer – Fixed (FCD1FLC) – This feature is activated and the customer selected forward-to number is preprogrammed by the Company at the time service is established and can only be changed via service order.
- b. Call Forward No Answer – Customer Programmable (FCD1FLC PRG) – Provides a customer the capability to control activation/deactivation and the forward-to number of the service by using dial tones.

|  
(D)(N)  
(D)

- a. Call Forward Busy – Fixed (FCB1FLC) – This feature is activated and the customer selected forward-to number is programmed by the Company at the time service is established and can only be changed via service order.

(D)  
|  
(D)

4. Call Forward Additional Paths (FCF1FLC PTH)

Business customers who subscribe to Call Forward No Answer-Fixed or Call Forward Busy-Fixed may also subscribe to the Call Forward Additional Paths feature. This feature is not available with Call Forward Features that allow customers to remotely change the forward-to telephone number. Call Forward Additional Paths allows a business Call Forwarding subscriber the ability to specify the number of simultaneous calls that will be forwarded to the forward-to telephone number. Regulations for Call Forward features are also applicable for each Call Forward Additional Path.

- a. The forward-to telephone number must be a domestic telephone number.
- b. The Call Forward Additional Paths customer must subscribe to sufficient paths to adequately handle incoming calls without impairing any service offered by the Company.

CUSTOM CALLING SERVICES

I. GENERAL REGULATIONS (Cont'd)

D. Speed Dial <sup>(1)</sup> (T) (C)

Enables a customer to place calls to other telephone numbers by dialing a one- or two-digit code rather than the complete telephone number. The 8-code capacity (**Speed Dial 8**) or the 30-code capacity (**Speed Dial 30**) may be provided. The combination of code capacities is not available on multi-line hunting lines. (T) (T)

E. Directory Number Transfer <sup>(2)</sup> (C)

Permits a customer to transfer all calls to a fixed single telephone number within the exchange or on the Long Distance Telecommunications Network where facilities permit, (Analog office only).

F. Hot Line/Warm Line <sup>(2)</sup> (C)

Automatically routes the customer's telephone to a predetermined trunk or telephone number when the handset is removed. The Hot Line is switched immediately and the Warm Line is switched after a brief timing period and prior to dialing.

G. Intercom Service <sup>(2)</sup> (C)

Allows customers with an individual residence or business line to use their line to provide an intercom system between their telephones. This is accomplished by the customer dialing his own number, receiving a recording and hanging up. All telephones at that number will then ring and when one of the other telephones goes off-hook, the ringing will stop and the initiator of the call can go off-hook and engage in conversation.

Public Service Commission**

I. GENERAL REGULATIONS (Cont'd)

E. Directory Number Transfer (FDT1FLC)

Permits a customer to transfer all calls to a fixed single telephone number within the exchange or on the Long Distance Telecommunications Network where facilities permit, (Analog office only).

F. Hot Line/Warm Line (FHL1FLC)

Automatically routes the customer's telephone to a predetermined trunk or telephone number when the handset is removed. The Hot Line is switched immediately and the Warm Line is switched after a brief timing period and prior to dialing.

G. Intercom Service

Allows customers with an individual residence or business line to use their line to provide an intercom system between their telephones. This is accomplished by the customer dialing his own number, receiving a recording and hanging up. All telephones at that number will then ring and when one of the other telephones goes off-hook, the ringing will stop and the initiator of the call can go off-hook and engage in conversation.

H. Call Forwarding-Busy (FCB1FLC)

Allows a customer engaged in a telephone conversation to have incoming calls routed to another predetermined number. The customer purchasing the Call Forwarding feature is responsible for payment of all charges for each call between his call-forwarding-equipped telephone and the telephone to which the call is forwarded.

I. Call Forwarding-No Answer (FCD1FLC)

Allows automatic transfer of all incoming calls, not answered within a prescribed time, to another number. The customer purchasing the Call Forwarding feature is responsible for the payment of all charges for each call between his call-forwarding-equipped telephone and the telephone to which the call is forwarded.

|

(D)

H. Call Screening and Transfer-AS

(CT)

Allows the Customer to have forwarded calls screened and transferred back by an answering service which has Centrex service, when the Centrex is served out of the same serving office as the customer and the answering service has the terminal equipment necessary to read the identification information. The Customer purchasing the Call Screening and Transfer-AS feature is responsible for payment of all charges for each call between his call-forwarding-equipped telephone and the telephone to which the call is forwarded.

I. Call Forward Universal-AS

(CT)

Allows the customer to have calls forwarded to and uniquely identified by an answering service which has Centrex service, when the Centrex is served out of the same serving office as the customer and the answering service has the terminal equipment necessary to read the identification information. The Customer purchasing the Answering Service Call Forward Universal feature is responsible for payment of all charges for each call between his call-forwarding-equipped telephone and the telephone to which the call is forwarded.

J. SignalRing

(CT)

Provides for a second directory number to be added to an existing telephone line. The second number will have a distinctive coded ring. Directory listing charges as specified in Section 9 of this tariff apply for the second number.

MISCELLANEOUS EQUIPMENT AND SERVICE

I. GENERAL REGULATIONS (Cont'd)

O. Three-Way Calling with Transfer

1. Allows a user to hold an in-progress call and complete a second call while maintaining privacy from the first call, or to add on the previously held call for a three-way conference. Incoming calls may be transferred to another access arrangement on an inter- or intra-switch basis, except as specified in Section 43.I.O.

The subscriber can transfer the caller to the secondary destination in one of three ways:

- a. Blind Transfer - By placing the original caller on hold, dialing the secondary destination, and upon hearing the ring, hang up, resulting in the original caller being connected to the secondary destination.
  - b. Announced Transfer - By placing the original caller on hold, dialing the Secondary destination, and upon the party at the secondary destination answering the phone, the subscriber announces the transfer of the call (on hold at the time) and hangs up (on hook), resulting in the original caller being connected to the secondary destination.
  - c. Three-Way Conferencing with Option to Transfer - By placing the original caller on hold, dialing the secondary destination, and upon the party at the secondary destination answering the phone, taking the original caller off-hold; resulting in a three way connection. The subscriber can then hang up; resulting in the original caller continuing to be connected to the caller at the secondary destination.
2. The subscriber of Three-Way Calling with Transfer can receive or originate the initial call. Three-Way Call with Transfer allows the subscriber to originate both legs of a three way connection and subsequently disconnect, enabling the other parties to remain connected.
  3. Where the subscriber originates both legs of a three-way call, those legs will remain bridged together when the subscriber goes on hook when at least one of the legs is a call for which both the originating and terminating points are served by the same switch. Where the subscriber originates two inter-switch legs of a three-way call, both legs remain bridged when the subscriber goes on hook where the serving switch is not a 5ESS switch. For such calls in a 5ESS switch, both inter-switch legs are disconnected when the subscriber goes on hook.
  4. This feature shall not be used to extend calls on a planned and continuing basis to intentionally avoid the payment in whole or in part of message charges, toll or otherwise, that would regularly be applicable between the stations bridged together by the subscriber.

MISCELLANEOUS EQUIPMENT AND SERVICE

I. GENERAL REGULATIONS (Cont'd)

O. Three-Way Calling with Transfer (Cont'd)

1. The Three-Way Calling with Transfer subscriber is responsible for all applicable local and toll usage charges for calls originated by the subscriber, including connections which continue after the subscriber exits the call. **The use of this feature by the subscriber to complete simultaneous outgoing calls may be subject to restrictions or prohibitions imposed by the Customer's Presubscribed Interexchange Carrier, if the calls are not in the Customer's local or expanded local calling area.**

(N)  
|  
(N)

Custom Calling Services with the exception of Intercom Service will be provided in connection with individual and multi-line residence and business lines. Intercom Service will only be offered on individual lines. Party line or trunk facilities customers, Payphone Line Services, ISDN-BRI and ISDN-PRI are excluded from Custom Calling Services.

The service will be furnished only at locations where adequate and suitable facilities are available.

Other facilities, miscellaneous and supplemental equipment requested by customers and not detrimental to this service or other services of the Telephone Company will be furnished in accordance with regulations and at rates specified in the applicable sections of this tariff.

Custom Calling Service are available in central offices equipped to provide the service.

To ensure customer satisfaction with usage sensitive features, the Company will provide the following credit(s) upon the customer's requests: (1) a one time credit for all usage sensitive charges in a single billing period; (2) a second credit for the difference between the individual service's flat monthly rate and the actual usage sensitive charges for that single billing period. In both instances the Company will recommend the flat monthly rate in lieu of the usage sensitive options.

EXPRESSTOUCH

I. GENERAL DESCRIPTION

ExpressTouch is the Company's registered trade mark for a set of advanced call management features. These features are also commonly known as Custom Local Area Signaling Services (CLASS) and will only be offered on one-party service and will not be activated **on certain** FX lines, Payphone Line Services, ISDN-BRI and ISDN-PRI. ExpressTouch features may be offered in conjunction with Centrex services and consist of one or more of the following features:

(D)

A. Return Call

Return Call permits the subscriber to place a call to the telephone number associated with the most recent incoming call whether or not the call was answered or the telephone number is known by the subscriber. If the called line is available, the call is immediately completed. If the called line is not available, a queuing process, which may last up to thirty minutes, takes place. When both lines are available, the calling subscriber is notified via a distinctive ring that the network is ready to place the call. When the subscriber picks up the telephone, the call is automatically placed.

Return Call is available on a flat monthly rate or on a usage sensitive basis. Under the usage sensitive option, whether the customer chooses to advance the call or abandon the call, the usage activation charge applies, unless the originating line information is not available. The provision of this service on a usage sensitive basis is subject to technical limitations and is provided where facilities are available. Customer may request removal of this feature at no additional charge.

Return Call cannot return a call to the telephone number of the last incoming call if the telephone number was originally blocked by the calling party.

B. Caller ID - Number Only <sup>(1)</sup>

Caller ID - Number Only allows the subscriber, with the use of a display phone or adjunct display device, to view the directory number of an incoming call before answering. During the time that the incoming call is placed, the calling number is forwarded from the central office to a compatible customer provided Customer Premises Equipment (CPE) Display Unit associated with the customer's local exchange service. The calling telephone number is then delivered to the display device during the first silent interval of ringing.

<sup>(1)</sup> Limited to existing customers at existing locations as of June 20, 2008.

EXPRESSTOUCH

I. GENERAL DESCRIPTION (Cont'd)

B. Caller ID - Number Only <sup>(1)</sup> (Cont'd)

The calling telephone number is not available from calls made from most cellular phones or units and currently from some interexchange carriers and other local exchange carrier calls. The calling number is also not available when incoming calls have been handled by an operator or charged to credit cards. Number delivery for calls originated from a PBX will display the main PBX number only. If the caller's number is not part of the ExpressTouch **network or** is blocked, the number will not be displayed.

(D)

Caller ID - Number Only customers who do not wish to receive calls with blocked numbers can activate Anonymous Call Rejection by pressing \*77 (1177 on rotary phones). The code to deactivate is \*87 (1187 on rotary phones). While the feature is activated, incoming calls with blocked numbers are routed to an announcement in the central office. Anonymous Call Rejection is automatically available, in the deactivate state, to residence subscribers of Caller ID - Number Only and to business subscribers where technically feasible.

Subscription to Caller ID - Number Only on Centrex access lines is only available on the customer group level and not on a per line basis. Rates and charges, however, will apply on a per line basis.

Telephone numbers transmitted via Caller ID - Number Only may not be sold or given to another party without the caller's consent. Caller ID - Number Only information may only be used for: a) routing or completion of calls, b) billing of calls, c) account management purposes, d) services directly related to the call or transaction, e) verification of calling party identity and f) marketing products or services that are directly related to those previously acquired by the customer from the number delivery services subscriber. Caller ID - Number Only customers failing to comply with any of these conditions will have their service terminated.

If the caller's number is not part of the ExpressTouch network, is a multi-party line, or is blocked, the number will not be displayed.

Caller ID customers who do not wish to receive calls with blocked numbers can activate Anonymous Call Rejection by pressing \*77 (1177 on rotary phones). The code to deactivate is \*87 (1187 on rotary phones). While the feature is activated, incoming calls with blocked numbers are routed to an announcement in the central office. Anonymous Call Rejection is automatically available, in the deactivate state, to residence subscribers of Caller ID and to business subscribers where technically feasible.

Subscription to Caller ID on Centrex access lines is only available on the customer group level and not on a per line basis. Rates and charges, however, will apply on a per line basis.

Telephone numbers transmitted via Caller ID may not be sold or given to another party without the caller's consent. Caller ID information may only be used for: a) routing or completion of calls, b) billing of calls, c) account management purposes, d) services directly related to the call or transaction, e) verification of calling party identity and f) marketing products or services that are directly related to those previously acquired by the customer from the number delivery services subscriber. Caller ID customers failing to comply with any of these conditions will have their service terminated.

I. GENERAL DESCRIPTION (Cont'd)

B. Caller ID (Cont'd)

The calling telephone number is not available from calls made from most cellular phones or units and currently from some interexchange carriers and other local exchange carrier calls. The calling number is also not available when incoming calls have been handled by an operator or charged to credit cards. Number delivery for calls originated from a PBX will display the main PBX number only. If the caller's number is not part of the ExpressTouch® network, is a multi-party line, or is blocked, the number will not be displayed. (AT)

Caller ID customers who do not wish to receive calls with blocked numbers can activate Anonymous Call Rejection by pressing \*77 (1177 on rotary phones). The code to deactivate is \*87 (1187 on rotary phones). While the feature is activated, incoming calls with blocked numbers are routed to an announcement in the central office. Anonymous Call Rejection is automatically available, in the deactivate state, to residence subscribers of Caller ID and to business subscribers where technically feasible. (AT)

Caller ID customers intending to comply with any of these conditions will have their service terminated.

CANCELLED

C. Caller ID Blocking

DEC 16 1996  
BY R.S. # 8

Caller ID blocking allows the subscriber to elect the delivery of the subscriber's directory number on a per call basis (per call block) or per line basis (per line block).

MISSOURI  
Public Service Commission

Per call block will block the delivery of the subscriber's number for one call only and may be activated by dialing an activation code (\*67 from a Touch-Tone telephone or 1167 from a rotary telephone) immediately prior to placing a call. The activation code will initiate per call blocking, which is available at no charge.

If the calling party activates blocking, the directory number will not be transmitted across the line. Instead, Caller ID customers will receive an anonymous indicator. This anonymous indicator notifies the Caller ID customer that the calling party has elected to block the delivery of the telephone number.

B. Caller ID (Cont'd)

Telephone numbers transmitted via Caller ID may not be sold or given to another party without the caller's consent. Caller ID information may only be used for: a) routing or completion of calls, b) billing of calls, c) account management purposes, d) services directly related to the call or transaction, e) verification of calling party identity and f) marketing products or services that are directly related to those previously acquired by the customer from the number delivery services subscriber. Caller ID customers failing to comply with any of these conditions will have their service terminated.

C. Caller ID Blocking

Caller ID blocking allows the subscriber to prevent the delivery of the subscriber's directory number on a per call basis (per call block) or per line basis (per line block).

Per call block will block the delivery of the subscriber's number for one call only and may be activated by dialing an activation code (\*67 from a Touch-Tone telephone or 1167 from a rotary telephone) immediately prior to placing a call. The activation code will initiate per call blocking, which is available at no charge.

If the calling party activates blocking, the directory number will not be transmitted across the line. Instead, Caller ID customers will receive an anonymous indicator. This anonymous indicator notifies the Caller ID customer that the calling party has elected to block the delivery of the telephone number.

Per line block will automatically block delivery of the subscriber's telephone number on all calls. Line blocking for the delivery of the calling number is available upon request, at no charge, to the following entities and their employees/volunteers, for lines over which the official business of the agency is conducted including those at the residences of employees/volunteers, where an executive officer of the agency registers with the Company a need for blocking: (a) private, nonprofit, tax-exempt, domestic violence intervention agencies and (b) federal, state and local law enforcement agencies. The calling number will not be transmitted from a line equipped with this capability.

The blocking of the directory number will not be provided on calls originating from Public, Semi-Public and Customer-Owned Pay Telephone Services.

I. GENERAL DESCRIPTION (Cont'd)

C. Caller ID with Name

Caller ID with Name functions in the same manner as Caller ID - Number Only but also includes the delivery of a calling party's name. The name and number are displayed on compatible customer provided auxiliary equipment.

The name displayed shall be the name associated with the calling telephone number as shown on the Company's records. The Company, at its discretion, may abbreviate or limit that name for display purposes. The Company does not assure name accuracy, and it shall not be liable to any party for errors, omissions, or mistakes. The Company's sole and only obligation shall be to correct errors in names when notified in writing of such errors.

The calling telephone name and number is not available from calls made from most cellular phones or units and currently from some interexchange carriers and other local exchange carrier calls. The calling name and number are also not available when incoming calls have been handled by an operator or charged to credit cards. Name and number delivery for calls originated from a PBX will display the main PBX name and number only. If the caller's name and number are not part of the ExpressTouch **network** or is blocked, the name and number will not be displayed.

(D)

Caller ID with Name customers who do not wish to receive calls with blocked numbers can activate Anonymous Call Rejection by pressing \*77 (1177 on rotary phones). The code to deactivate is \*87 (1187 on rotary phones). While the feature is activated, incoming calls with blocked numbers are routed to an announcement in the central office. Anonymous Call Rejection is automatically available, in the deactivate state, to residence subscribers of Caller ID with Name and to business subscribers where technically feasible.

Subscription to Caller ID with Name on Centrex access lines is only available on the customer group level and not on a per line basis. Rates and charges, however, will apply on a per line basis.

C. Caller ID Blocking (Cont'd)

MISSOURI  
Public Service Commission

(MT)

Per line block will automatically block delivery of the subscriber's telephone number on all calls. Line blocking for the delivery of the calling number is available upon request, at no charge, to the following entities and their employees/volunteers, for lines over which the official business of the agency is conducted including those at the residences of employees/volunteers, where an executive officer of the agency registers with the Company a need for blocking: (a) private, nonprofit, tax-exempt, domestic violence intervention agencies and (b) federal, state and local law enforcement agencies. The calling number will not be transmitted from a line equipped with this capability.

The blocking of the directory number will not be provided on calls originating from Public, Semi-Public and Customer-Owned Pay Telephone Services.

Wherever per-line blocking is provided, per call unblocking is available at no charge to enable delivery of the calling party number. By dialing the activation code 82 or 1182 from a rotary phone, the next attempted call will deliver the calling party number.

D. Call Trace

Call Trace enables the customer to initiate automatic trace of the last incoming call received, regardless of the time lapse since that call, providing there have been no intervening outgoing calls. To initiate the trace, the customer must dial an activation code, then dial a "1". Upon activation by the customer, the network automatically sends a message to the Telephone Company indicating the calling number, the time the call was received, and the time the trace was activated. The customer using this feature would be required to contact the local telephone company business office for further action. The customer is not provided the traced number.

If the customer makes or receives another call before activating the trace, or if the Call Waiting feature (described in other sections of this tariff) is activated prior to activating the trace, Call Trace feature will not record the correct number.

Call Trace will trace only those calls which are originated from a location served by the ExpressTouch® network. A separate charge applies to each successful activation of this feature.

REC'D MAY 25 2004

I. GENERAL DESCRIPTION

D. Caller ID Blocking (Cont'd)

The blocking of the directory name and/or number will not be provided on calls originating from Payphone Line Service.

Wherever per-line blocking is provided, per call unblocking is available at no charge to enable delivery of the calling party name and/or number. By dialing the activation code, \*82 or 1182 from a rotary phone, the next attempted call will deliver the calling party name and/or number.

E. Call Trace

Call Trace enables the customer to initiate an automatic trace of the last incoming call received, regardless of the time lapse since that call, providing there have been no intervening outgoing calls. To initiate the trace, the customer must dial an activation code, then dial a "1". Upon activation by the customer, the network automatically sends a message to the Telephone Company indicating the calling number, the time the call was received, and the time the trace was activated. The customer using this feature would be required to contact the local telephone company business office for further action. The customer is not provided the traced number.

If the customer makes or receives another call before activating the trace, or if the Call Waiting feature (described in other sections of this tariff) is activated prior to activating the trace, Call Trace feature will not record the correct number.

Call Trace will trace only those calls which are originated from a location served by the ExpressTouch® network. A separate charge applies to each successful activation of this feature.

*In situations where the Call Trace functionality is activated by a subscriber, information pertaining to non-published numbers will be provided to the authorized law enforcement agency upon request of the agency.*

(N)  
(N)  
(N)

F. Call Waiting ID

Enables the customer to view the calling party's name and telephone number associated with an incoming Call Waiting call, unless the name and telephone number of the calling party is suppressed, either via Per Call or Per Line Blocking. This gives customers the opportunity to identify incoming callers without interrupting their current call, which helps the customer decide whether or not to answer the new call.

Call Waiting ID is available when a customer subscribes to the Sprint Essentials™ or Advantage With Name packages.

(D) (T)

(D)

H. **Repeat Dial**

(T)

**Repeat Dial** allows the subscriber to automatically redial the last number dialed from the subscriber's telephone regardless of the completion status of the last number dialed. If the called line is available, the call will be placed immediately. If the redialed line is busy, the network will queue the request for thirty minutes and process the call when both the called and calling party lines are idle. When the call can be completed, a distinctive ring will be provided to the caller's line to alert the subscriber that the requested callback is ready. When the subscriber picks up the telephone, the call is automatically placed.

(T)

**Repeat Dial** is available on a flat monthly rate or on a usage sensitive basis. Under the usage sensitive option, the customer will be billed each time a call is completed through the use of this feature. The provision of this service on a usage sensitive basis is subject to technical limitations and is provided where facilities are available. Customers may request removal of this feature at no additional charge.

(T)

This feature cannot be activated for calls originating from a line that is forwarded.

**EXPRESSTOUCH**

(T)

I. GENERAL DESCRIPTION (Cont'd)

I. Selective Call Forward

Selective Call Forward allows the customer to transfer selected calls to another telephone number. A screening list of numbers is created by the customer and placed in the network memory via an interactive dialing sequence. This list can only be created from **ExpressTouch** Service serving area telephone numbers. Only calls from those telephone numbers in the screening list may be forwarded to the designated telephone number.

(T)

For calls from a line within multi-line hunting the call is selectively forwarded only when the main telephone has been entered in the screening list.

Calls may be forwarded to a number within the subscriber's home exchange, EAS exchanges, or Expanded Local Calling Area or to a long distance message telecommunications point subject to the availability of the necessary facilities in the central office from which the calls are to be transferred. The customer subscribing to this service is responsible for applicable usage charges or toll charges. Due to transmission limitations, it is recommended that calls be transferred only within the customer's local calling area. This feature is available where facilities permit on an individual feature basis or any combination thereof.

J. Selective Call Rejection

Selective Call Rejection provides the customer the ability to prevent incoming calls from certain telephone numbers. Through an interactive dialing sequence, the customer creates a screening list of telephone numbers in the **ExpressTouch** network. When a call is placed to the customer's number from a number on the screening list, the calling party receives an announcement indicating that the call cannot be completed to the called party at this time.

(T)

For calls from a line within multi-line hunting the call is blocked only when the main telephone number has been entered in the screening list.

K. Selective Call Ring

Selective Call Ring provides a distinctive ringing pattern to the subscribing customer for specific telephone numbers. The customer creates a screening list of telephone numbers through an interactive dialing sequence. When a call is received from one of the predetermined telephone numbers, the customer is alerted with a distinctive ringing pattern. Calls from telephone numbers not included on the screening list will produce a normal ring.

REC'D MAY 29 2001

I. GENERAL DESCRIPTION (Cont'd)

I. Selective Call Forward

Service Commission

Selective Call Forward allows the customer to transfer selected calls to another telephone number. A screening list of numbers is created by the customer and placed in the network memory via an interactive dialing sequence. This list can only be created from ExpressTouch® Service serving area telephone numbers. Only calls from those telephone numbers in the screening list may be forwarded to the designated telephone number.

For calls from a line within multi-line hunting the call is selectively forwarded only when the main telephone has been entered in the screening list.

***Calls may be forwarded to a number within the subscriber's home exchange, EAS exchanges, or Expanded Local Calling Area or to a long distance message telecommunications point subject to the availability of the necessary facilities in the central office from which the calls are to be transferred. The customer subscribing to this service is responsible for applicable usage charges or toll charges. Due to transmission limitations, it is recommended that calls be transferred only within the customer's local calling area. This feature is available where facilities permit on an individual feature basis or any combination thereof.***

(NR)

(NR)

J. Selective Call Rejection

Selective Call Rejection provides the customer the ability to prevent incoming calls from certain telephone numbers. Through an interactive dialing sequence, the customer creates a screening list of telephone numbers in the ExpressTouch® network. When a call is placed to the customer's number from a number on the screening list, the calling party receives an announcement indicating that the call cannot be completed to the called party at this time.

For calls from a line within multi-line hunting the call is blocked only when the main telephone number has been entered in the screening list.

K. Selective Call Ring

Selective Call Ring provides a distinctive ringing pattern to the subscribing customer for specific telephone numbers. The customer creates a screening list of telephone numbers through an interactive dialing sequence. When a call is received from one of the predetermined telephone numbers, the customer is alerted with a distinctive ringing pattern. Calls from telephone numbers not included on the screening list will produce a normal ring.

For calls from a dial tone line with multi-line hunting, the distinctive signal is only produced when the main telephone number has been entered in the screening list.

K. Selective Call Acceptance

(T)

Selective Call Acceptance - an arrangement that allows a subscriber to selectively accept only calls arriving from a list of up to 31 previously identified directory numbers.

A call will only be accepted when it is received from a telephone number that matches one of up to 31 numbers on the Selective Call Acceptance list. Calls from telephone numbers that do not match one of the 31 numbers on the Selective Call Acceptance list will be routed to an announcement stating that the called party does not wish to receive the call. If the incoming call is from a telephone number in a multi-line hunt group, this feature will not work unless the number is the main telephone number in the group, or each terminal has a unique telephone number associated with it within the group.

The Selective Call Acceptance list is a list created by the Selective Call Acceptance subscriber, through an interactive dialing sequence, and can be altered at the subscriber's discretion.

This feature can be activated or deactivated at the subscriber's discretion.

II. GENERAL REGULATIONS (Cont'd)

6. Call Trace will be billed the activation charge shown in the Rates and Charges section only when the attempt to trace and record the calling telephone number is successful. The results of a successful trace will only be provided to legal authorities with proper authorization. The Telephone Company will not be liable for damages if, for any reason, an attempt is not successful.

7. The liability of the Telephone Company is as specified in the General Regulation section of this tariff. In addition to the provisions of the General Exchange Tariff, the calling party and customer relieves the Company against any and all claims for damages caused or claimed to have been caused, directly or indirectly, by the transmission to a Caller ID customer of a telephone number which the calling party has requested to be omitted from the telephone directory or has requested not to be disclosed to any person.

8. ExpressTouch features will only be offered with one-party service, compatible PBX equipment and Centrex service. ExpressTouch features cannot be activated **for certain** FX lines, Payphone Line Services, ISDN-BRI and ISDN-PRI. (D)

Caller ID is the only feature currently available on PBX equipment.

Selective Call Forward, Selective Call Rejection and Selective Call Ring are not available on Centrex lines or Centrex Service II access lines.

9. ExpressTouch features will only be offered in exchanges which meet the necessary technical specifications. In addition, the Company reserves the right to offer ExpressTouch only where technologically feasible.

10. To ensure customer satisfaction with usage sensitive features, the Company will provide the following credit(s) upon the customer's requests: (1) a one time credit for all usage sensitive charges in a single billing period; (2) a second credit for the difference between the individual service's flat monthly rate and the actual usage sensitive charges for that single billing period. In both instances the Company will recommend the flat monthly rate in lieu of the usage sensitive options.

The Telephone Company will not be liable for damages if, for any reason, an attempt is not successful.
7. The liability of the Telephone Company is as specified in the General Regulation section of this tariff. In addition to the provisions of the General Exchange Tariff, the calling party and customer relieves the Company against any and all claims for damages caused or claimed to have been caused, directly or indirectly, by the transmission to a Caller ID customer of a telephone number which the calling party has requested to be omitted from the telephone directory or has requested not to be disclosed to any person.
8. ExpressTouch® features will only be offered with one-party service, compatible PBX equipment and Centrex service. ExpressTouch® features cannot be activated for multi-party lines, certain FX lines, Payphone Line Services, ISDN-BRI and ISDN-PRI.

Caller ID is the only feature currently available on PBX equipment.

Selective Call Forward, Selective Call Rejection and Selective Call Ring are not available on Centrex lines **or Centrex Service II access lines.**

(CT)

9. ExpressTouch® features will only be offered in exchanges which meet the necessary technical specifications. In addition, the Company reserves the right to offer ExpressTouch® only where technologically feasible.
10. To ensure customer satisfaction with usage sensitive features, the Company will provide the following credit(s) upon the customer's requests: (1) a one time credit for all usage sensitive charges in a single billing period; (2) a second credit for the difference between the individual service's flat monthly rate and the actual usage sensitive charges for that single billing period. In both instances the Company will recommend the flat monthly rate in lieu of the usage sensitive options.
