Such advance payment shall be refunded to the customer after the customer has maintained continuous service at this location for a period of (5) five years. When construction extends beyond (1) one mile, the customer will be charged 80% of the construction and material charges. The amount required in advance for material and construction beyond (1) one mile will be determined by the company. The 80% borne by the customer for construction and material charges required beyond 1 mile will not be refunded and all facilities will be retained and maintained by the Company.

b. More Than One Applicant

Where the Telephone Company constructs facilities to serve more than one applicant, a plant extension project will be established and the applicants considered as a group. In this case, the Company will construct without advance payment by the applicants, route miles of line equal to 1/4 mile times the number of applicants. Advance payment for each applicant for construction in excess of the allowance will be determined by the proportion of each applicant's mileage to the total required to serve all applicants.

Public Service Commission

## EXTENSION STATIONS

1. Extension stations may be provided in connection with all classes of urban exchange service except public telephone service. In connection with semi-public service, extension stations are only furnished when they are essential to the efficient handling of service. When extension stations are installed in semi-public locations, they must be on the same premises. The subscriber assumes full responsibility for control of the usage of the extension station. Where the subscriber operates a business, and lives on the same premises, Combination Main Station rates apply.
2. Extension stations may be furnished in connection with rural line service provided they are located on the same premises as the main station. Extension stations on rural lines are provided only when such stations will not interfere with the satisfactory operation of the line.
3. Separate telephone numbers or other distinctive designations are not assigned to extension stations, and are not listed except as provided in the section entitled "Directory Listings" and no additional free listings are allowed in connection with the main station on account of the extension stations.
4. Extension stations must be so located that their use will be restricted to those entitled to use the subscriber's service, including joint users, as specified in "Subscriber Service" in these General Rules and Regulations.
5. Inter-communication is not contemplated between a main station and an extension station, or between extensions, (except with the use of wiring plans, Key equipment or Key telephone systems).
6. Where either the main or extension station is at a business location, business rates apply at both stations.
7. One bell (ordinary type) is furnished, if desired, with each extension station, and must be located at the extension station. The number of extension stations which may be connected with any main station may be restricted to three, except that one additional extension station may be bridged to either a main station or extension station in connection with individual line service, provided the number of bells to be rung at one time does not exceed four. The number of bells which may be connected for each rural subscriber is dependent on the circumstances in each case.

Payphone Service (Cont'd)

F. Features and Functions

1. Answer Supervision provides signaling on the line notifying the line that the called party has answered. This feature is an additive to the CO Implemented Coin Line.
2. Coin Collection and Return provides an electrical signal on a CO Implemented Line indicating to the payphone equipment to collect coin(s) from or return coin(s) to the calling party. This feature is an additive to the CO Implemented Coin Line.
3. Special Number Assignment is a specific number requested by the customer. This service is available where facilities are accessible and it is technical feasible to provide. This feature is an additive to the CO Implemented Coin Line or to the Instrument Implemented Payphone Service.
4. Selective Class of Call Screening will be provided where such facilities are available at the customer's option. Selective Class of Call Screening treatment enables the customer to restrict outgoing operator-handled calls, placed over the Telephone Company's network, from the service point to only those calls which are charged to a called telephone, a third number or a calling card.
5. Validation may be performed through Originating-Line Screening (OLS). OLS enables operator service providers to determine whether there are billing restrictions on the exchange access line from which a call originates. OLS service delivers codes on operator assisted calls to identify calls originating from privately owned payphones, inmate locations, and hotels/motels, etc. Rates for this service are found in the appropriate interstate access tariff, when facilities and service are available. The customer has the option to request either Selective Class of Call Screening or OLS.

## TRANSFER OF CONTRACTS

1. A subscriber paying standard rates, may, upon written request, transfer his contract to another party at the same location when there is no reason to question the responsibility of the other party, and when the new party willingly assumes all the obligations of the old subscriber and pays the service connection charge, if applicable.
