Electronic Business Sets (Continued)

Optional Features (Continued)

Walkaway/Closed Key: After activating the Not Ready Key, ACD agents must enter a code that specifies the reason for being unavailable. Tracking of these codes in the MIS down-stream processor allows comprehensive management of agent activities by project.

Non-Electronic Sets

Basic Features

Abandoned Call Clearing: Eliminates unnecessarily held connections. Calls are removed and recorded announcements or music stopped if a caller abandons while in an incoming-call queue.

ACD on 2500 sets: Provides both ACD and non-ACD feature interactions for calls terminating on 2500 set ACD positions.

ACD Directory Number: One unique seven-digit number used to receive incoming ACD calls that are not associated with lines. Each ACD group can receive calls from up to three ACD directory numbers and distribute to the ACD agents assigned to the group.

ACD Directory Number Priority: Allows a customer to prioritize calls depending on the ACD directory number dialed. Calls of a higher priority get answered before calls of a lower priority.

Agent Login Enhancement: Provides an agent identification and password option to ensure that only assigned agents are able to login to an ACD group.

Automatic Overflow: Permits a customer to specify both a maximum number of calls that can be queued and a maximum waiting time for queued calls. When either limit is reached, calls can be directed to a customer-specified route instead of being placed in queue.

- (1) Not available to BRI Stations.

#### C. Digital Multiplex System (DMS) Optional Features - (Continued)

##### - Automatic Call Distribution (ACD) (1)(2) (Continued)

Non-Electronic Sets (Continued)

Basic Features (Continued)

**Call Delay Announcement:** One prerecorded announcement provided to the caller in queue advising of the delay in answering.

**Feature Assignment:** Allows 2500-type sets to be assigned and deleted from ACD groups and moved from one ACD group to another.

**Incoming Call Queue (30%):** Reserves queue slots equal to 30% of all agent positions for incoming calls when all agents are busy.

**Login/Logout:** Allows an ACD agent to use a 2500-type set to login to an ACD group by dialing an activation code, identification code and, if required, a password. The agent can also logout of an ACD group by dialing a deactivation code.

**Make Set Busy:** Prevent an agent position from receiving only non-ACD calls to the set. ACD calls continue to be presented.

**Night Treatment:** Provides a night service mode when all agents in an ACD group activate make set busy keys on their sets.

**Ring Threshold:** Provides for the rerouting of a call when an agent does not answer the call within a preprogrammed time. The call is rerouted either to the longest idle agent or the front of the queue if there is no agent available. The agent position that did not answer is logged out of service and must login to put the position back into service.

**Set Distinctive Ringing:** Enables an ACD agent to distinguish an ACD call from other incoming calls. The main function is to provide a method by which ACD agents using 2500 sets will be able to distinguish ACD from non-ACD calls.

Set Not Ready: Allows a 500/2500 set logged into an ACD agent position to use access codes to activate and deactivate ACD Set Not Ready. This feature is typically used when post-call work time is required to complete a transaction.

Supervisor Control of Night Service: Provides the supervisor with control of the initiation of the night service treatment for one or more agent groups within the same customer group.

Three-Way Calling/Call Transfer/Call Chaining to ACD: Allows the agent to transfer to other ACD directory numbers in the same customer group and be included as a member of a three-way call chain.

Optional Features

Additional ACD Directory Number: Unique seven-digit number used to receive incoming ACD calls that are not associated with a line.

Additional ACD Directory Number Priority: Allows a customer to prioritize calls depending on the ACD directory number dialed. Calls of a higher priority get answered before calls of a lower priority.

Additional Incoming Call Queue (10%): Reserves additional queue slots equal to 10% of all agent positions for incoming calls when all agents are busy.

Music on Delay (Queue): With this feature, callers placed in an incoming-call queue will hear customer-provided music instead of silence after the call-delay announcement.

Night Service Recorded Announcement and Forward: Enhances the currently available Night Service capability. Out-of-hour callers can be presented with a specialized recorded announcement before being directed to the specified Night Service treatment.

45.1.2 Feature Array (Continued)

C. Digital Multiplex System (DMS) Optional Features - (Continued)

- Automatic Call Distribution (ACD) (1)(2) (Continued)

Non-Electronic Sets (Continued)

Optional Features (Continued)

Overflow of Enqueued Calls: Enhances the existing call overflow capability by providing for overflow of calls that have been enqueued for excessive amounts of time.

Second and Third Recorded Announcements: This feature enhances the basic announcement capability by allowing customer groups to specify delay periods between announcements and the type of treatment that callers are given during those delays and after the last announcement is given.

2500 Set MIS/Load Management: Allows ACD Load Management and ACD Show commands to be used for ACD groups consisting of 2500 set ACD agents. Load Management commands allow sets to be reassigned from one ACD group to another, and ACDSHOW commands display information about the group's agent position.

- Business Set Interface (1)(2)

Allows customers the capability to activate Business Set functions in a Plexar-II system. Functions have been packaged as follows:

Basic Business Set Interface Package

Add-On Module Software: Allows the business set to be expanded when the customer provides adjunct Customer Premises Equipment (CPE).

Auto Answer Back: Allows any incoming call to the primary directory number of the set to be automatically answered after four seconds of ringing.

Automatic Dial: Allows a business set station user to call a frequently dialed number by depressing the assigned feature key.

Overflow of Enqueued Calls: Enhances the existing call overflow capability by providing for overflow of calls that have been enqueued for excessive amounts of time.

Second and Third Recorded Announcements: This feature enhances the basic announcement capability by allowing customer groups to specify delay periods between announcements and the type of treatment that callers are given during those delays and after the last announcement is given.

2500 Set MIS/Load Management: Allows ACD Load Management and ACD Show commands to be used for ACD groups consisting of 2500 set ACD agents. Load Management commands allow sets to be reassigned from one ACD group to another, and ACDSHOW commands display information about the group's agent position.

(AT) - Business Set Interface (1)(2)

Allows customers the capability to activate Business Set functions in a Plexar-II system. Functions have been packaged as follows:

Basic Business Set Interface Package

Add-On Module Software: Allows the business set to be expanded when the customer provides adjunct Customer Premises Equipment (CPE).

Auto Answer Back: Allows any incoming call to the primary directory number of the set to be automatically answered after four seconds of ringing.

Automatic Dial: Allows a business set station user to call a frequently dialed number by depressing the assigned feature key.

(AT) (1) Not available to BRI Stations.

(AT) (2) Not available on stations associated with Integrated Pathway Service as found in Section 18 of the Digital Link Services Tariff.

Basic Business Set Interface Package (Continued)

Automatic Line: Automatic Line is a directory number feature that may be assigned to individual directory number appearances on a business set station.

Automatic Line and Multiple Appearance Directory Number (MADN): This feature allows a MADN-Single Call Arrangement (SCA)/-Multi-Call Arrangement (MCA) member to be assigned as an Automatic Line. In addition, it makes automatic lines compatible with many features and options that do not require initial dial tone.

Busy Override: Allows a business set user to gain access to a busy station by depressing an appropriate key.

Call Forward: Allows a business set user to have incoming calls to a station automatically forwarded in one of the four variations to a predetermined telephone number.

Call Park: Provides the business set user the capability of parking (holding) a call against its own directory number. The parked call can be retrieved from any station by dialing the feature access code and directory number. Once the call has been parked against a directory number in the system, the user is free to originate and receive calls.

Call Pickup: Allows a station to answer calls incoming to another station within a predetermined call pickup group. A call pickup group is a group of stations with call pickup assigned and linked together using one of the stations as a linking member.

Call Waiting: With this feature, an incoming call encountering a busy business set station received audible ringing, while the called station user receives call waiting notification. The called station user can choose to acknowledge the new caller and place the existing party on hold, to alternate between the callers, or to abandon one of the calls and be recalled by the other.

- (1) Not available to BRI Stations.

Business Set Interface Optional Feature

Individual Business Line: Allows the business set user the appearance of a Basic Local Access line as one of the directory numbers on the set.

Direct Station Selection/Busy Lamp Field: Provides the following two functions on one feature key: Direct Station Select provides direct dialing to a monitored directory number and Busy Lamp Field allows the user to monitor station status of a directory number through the use of the business set lamp status.

- Call Park (1)(2)

Allows a station user to park (hold) a call against its own directory number. The parked call can be retrieved from any station by dialing the feature access code and directory number.

- Last Number Redial

Enables a subscriber to redial the last called number by pressing a single key rather than dialing the entire number.

- Meet-Me Conference (1)

Allows conferees to hold a conference on a six-port conference bridge by dialing a directory number at a specific time.

(MT)

(RT)

(1) Not available to BRI Stations.

(2) Available only to existing customers who have feature. Refer to Optional Features, Call Park, for new customers.

(3) Not available on stations associated with Access Advantage Plus Service as found in Section 18 of the Digital Link Services Tariff.

- Business Set Interface--(Continued)

Basic Business Set Interface Package--(Continued)

**Held Calls:** Allows a business set user to hold an established call on any directory number on the business set. The user may then originate or receive another call on any other idle directory number.

**Intercom:** Allows a customer to directly terminate on a predesignated set by depressing the intercom key.

**Key Short Hunt:** Provides the capability for incoming calls to hunt over a set of directory number appearances on a business set in search of an idle directory number to terminate on. The directory numbers hunted over can be either standard directory numbers or Multiple Appearance Directory Numbers (MADNs).

**Listed on Hold:** Allows a business set user to place a called party on hold and listen through the speaker.

**Make Set Busy:** Allows directory number appearances on a business set to be made busy to incoming calls.

**Multiple Appearance Directory Number (MADN):** A directory number that is assigned to more than one business set is called a Multiple Appearance Directory Number (MADN). The business sets that are assigned this directory number are known as a MADN group.

**Multiple Appearance Directory Number (MADN) and Conference Interaction:** Allows the following types of conference calls to interact with MADN Hold: Three-way Calling, Station Controlled Conference, Preset Conference, and Meet-Me Conference. This feature also allows a conference call to be either answered or established by one party, placed on hold, and picked up by another party.

**Privacy Release:** Allows ~~with~~ Single Call Arrangement (MADN SCA) to establish a conference call among a number of MADN lines and an external party.

Ring Again: With Ring Again, the user can have the business set monitor a busy directory number and be notified when the called station becomes free.

Speed Calling (Personal): Allows a business set user to have their own one-digit and/or two-digit speed call list. The user assigns and changes numbers against these lists and they cannot be allowed access by other stations.

Business Set Display Feature Package

Call Forward/Automatic Dial Display: Displays the previously stored number when programming Call Forwarding or Automatic Dialing on a business set with a display.

Display Called Number: Provides the user of a business set equipped with visual feedback concerning the called number during the origination, termination and programming, and feature activation operations.

Display Calling Number-Closed User Group Only: Provides the business set user receiving an incoming call with visual feedback concerning the calling number.

Enhanced Business Set Reason Display: For business set users with Display, this feature enhances Call Forward Reason Display to provide information on redirected calls. This allows the user to appropriately answer calls that are being redirected by features such as Call Forwarding.

Query Time Key: Provides the current time and date on a business set LCD display when the Query Time and Date Key is depressed.

45.1 GENERAL (Continued)

REC'D OCT 24 2003

45.1.2 Feature Array (Continued)

C. Digital Multiplex System (DMS) Optional Features - (Continued) Service Commission

(AT)

- Simultaneous Ring One Number (1)

Extends the reach of a customer's Plexar-II station number, by causing additional telephone device to ring simultaneously whenever the Plexar-II station number is dialed. Once the call is answered on either of the telephone devices, ringing on the other device will be terminated, and the originating caller will be connected directly to the device which answered the call. The other device will be freed up to initiate or receive new calls, without interfering with the original call.

If the Simultaneous Ring One Number customer answers an incoming call on a device other than the Plexar-II station corresponding with the telephone number that was actually dialed, the customer's Plexar-II telephone bill will be charged usage charges, as if a call was placed from the Plexar-II station to the device on which the call was answered. This usage will be billed by the customer's existing carrier for the type of call in question and will be billed according to the billing arrangement the customer has with that carrier. The simultaneously rung number can be any valid, non zero-plus telephone number (for example, another Plexar-II station, residential telephone line, or cellular phone number).

If the Simultaneous Ring One Number customer does not answer a call on either of the simultaneously rung devices, and either of the simultaneously rung telephone numbers has an associated answering device or voicemail, the first entity to answer the call will receive the message.

To change the telephone number of the device being simultaneously rung or to turn off Simultaneous Ring One Number, the customer must place a service order.

Simultaneous Ring One Number is only available where equipment, features and facilities are available. Other restrictions and limitations may apply.

**PLEXAR®-II SERVICE**

---

**45.2 RULES AND REGULATIONS**

45.2.1 Plexar-II Service will be provided subject to the availability of the necessary switching equipment and outside plant facilities. The provisioning of standard and optional features is limited to the capabilities of the serving central office.

45.2.2 The following terms used in this section shall mean:

Plexar-II Basic Station: Consists of two rate elements, the appropriate basic station rate and basic station line facility rate(1). The combined rate elements comprise all facilities, including intercommunication, outside plant facilities and standard features from the Plexar-II dial switching equipment located on the Company premises.

Off-Premises Station: Consists of two rate elements, the appropriate station rate and applicable private line charges.

Plexar-II BRI Station(2): Consists of the appropriate station rate elements and station line facility rate. This can be a combination of B and D channels with a maximum of 2 B-channels and 1 D-channel per BRI station. B-channels can be used for either Circuit Switched Voice (CSV) or Circuit Switched Data (CSD).

(CT)  
(CT)  
(RT)

ISDN Serving Area: A Company Exchange with one or more ISDN-equipped central offices, plus all other Company exchanges and/or zones included in that ISDN-equipped central office's non-optional local calling area as defined in the Local Exchange Tariff.

Link Extension: Provides the additional interoffice facility and central office hardware required to provide Plexar BRI Service for customers that are not located within the ISDN Serving Area but are within the same LATA.

- (1) Station line facility rates specified in this tariff are not applicable to stations associated with Access Advantage Plus Service as found in Section 18 of the Digital Link Services Tariff.
- (2) Not available on stations associated with Access Advantage Plus Service as found in Section 18 of the Digital Link Services Tariff.

**45.2 RULES AND REGULATIONS**

45.2.1 Plexar-II Service will be provided subject to the availability of the necessary switching equipment and outside plant facilities. The provisioning of standard and optional features is limited to the capabilities of the serving central office.

45.2.2 The following terms used in this section shall mean:

Plexar-II Basic Station: Consists of two rate elements, the appropriate basic station rate and basic station line facility rate(1). The combined rate elements comprise all facilities, including intercommunication, outside plant facilities and standard features from the Plexar-II dial switching equipment located on the Company premises.

Off-Premises Station: Consists of two rate elements, the appropriate station rate and applicable private line charges.

Plexar-II BRI Station(2): Consists of the appropriate station rate elements and station line facility rate. This can be a combination of B and D channels with a maximum of 2 B-channels and 1 D-channel per BRI station. B-channels can be used for either Circuit Switched Voice (CSV), Circuit Switched Data (CSD), or Packet Switched Data(3). D-channels can be used for Packet Switched Data only(3).

ISDN Serving Area: A Company Exchange with one or more ISDN-equipped central offices, plus all other Company exchanges and/or zones included in that ISDN-equipped central office's non-optional local calling area as defined in the Local Exchange Tariff.

Link Extension: Provides the additional interoffice facility and central office hardware required to provide Plexar BRI Service for customers that are not located within the ISDN Serving Area but are within the same LATA.

- (1) Station line facility rates specified in this tariff are not applicable to stations associated with Access Advantage Plus Service as found in Section 18 of the Digital Link Services Tariff.
- (2) Not available on stations associated with Access Advantage Plus Service as found in Section 18 of the Digital Link Services Tariff.
- (3) ISDN BRI Packet Switching is obsolete and only available to existing installations at existing locations for existing customers. This service will be withdrawn on December 15, 2007.

45.2 RULES AND REGULATIONS

45.2.1 Plexar-II Service will be provided subject to the availability of the necessary switching equipment and outside plant facilities. The provisioning of standard and optional features is limited to the capabilities of the serving central office.

45.2.2 The following terms used in this section shall mean:

**Plexar-II Basic Station:** Consists of two rate elements, the appropriate station rate and station line facility rate. The combined rate elements comprise all facilities, including intercommunication, outside plant facilities and standard features from the Plexar-II dial switching equipment located on the Telephone Company premises.

**Plexar-II Non-Working Station:** Consists of two rate elements, the appropriate station rate and station line facility rate, and is used to meet the minimum station line requirement.

**Off-Premises Station:** Consists of two rate elements, the appropriate station rate and applicable private line charges. An Off-Premises station is used: a) when a Plexar-II station is located in a serving central office that does not meet the minimum 10 station line requirement and b) to provide service to customers in multiple central offices when the minimum station line requirement would ordinarily have been met.

45.2.3 A minimum charge for a Plexar-II service arrangement is applicable.

The minimum charge shall be the rates applicable to 10 Plexar-II stations (Basic, Non-Working, or Off-Premises) in each serving central office and their associated station line facility as set forth in Paragraph 45.4.3 and 45.4.4, following.

Additionally, the maximum number of station lines that can be installed with the initial installation of the customer's Plexar-II arrangement is 74 stations within each serving central office. However, during the fixed rate period, subsequent installations of station lines that would bring the total number of station lines beyond 74 within each serving central office are allowed for the remainder of the fixed rate period. The customer may then request a Plexar-Custom serving arrangement as set forth in Paragraph 45.3.7, following or continue with their Plexar-II Service for the duration of the contract.

(MT)

(AT)

Out-WATS Termination: Allows a station user access to Out-WATS services dedicated to a customer group by dialing an access code.

Tie Trunk Terminations: The following connections are available as outlined below:

- Analog Facility: An analog termination used to connect tie trunks or dedicated channels to other telecommunications switching systems.
- Digital Facility: A digital 1.544 MBPS termination used to connect dedicated tie trunks to another telecommunications switching system. The termination can accommodate twenty-four (24) DS0 channels, each dedicated to a specific service.
- Digital Direct Termination: A digital 1.544 MBPS termination used to connect dedicated tie trunks to another telecommunications switching system. The termination can accommodate twenty-three (23) 64 kbps "B" channels for circuit switching and one 64 kbps "D" channel (23B+D) or, in cases of multiple Digital Direct terminations, twenty-four (24) 64 kbps "B" channels where "D" channels can be shared.

Optional Feature –

Backup D-Channel: Provides backup for primary "D" channel under those circumstances where three or more Digital Direct Terminations share a single "D" channel. A predetermined channel on another Digital Direct Termination would automatically take over call control and signaling functions.

(AT)

(MT)

45.2.3 A Plexar-II service arrangement does not have a minimum or maximum station requirement. However, if a system exceeds 74 stations, the customer may request a Plexar-Custom serving arrangement as set forth in Paragraph 45.3.7, following, or continue with their Plexar-II Service for the duration of the contract.

OCT 14 1993

45.2.4 Plexar-II station line facilities are charged in mileage bands as measured in air miles from the station location to the serving central office. The station line facility rates are applicable to all Plexar-II Basic stations, except Off-Premises stations. The station line facility rate applies to Plexar-II stations in excess of the number of Plexar-II access lines.

MISSOURI  
Public Service Commission

45.2.5 Basic Customer Rearrangement Service (CRS) allows customers to request changes as batch (overnight) or priority (same day). Each customer is permitted 20 batch and 3 priority changes per day (per central office served). All normal and emergency central office functions have priority over customer-requested changes. The Telephone Company is not responsible for customer change requests delayed by such central office functions.

Basic CRS includes initial training at the time of CRS installation, one CRS Customer Administrator Guide (per central office served), and access for one simultaneous user per customer.

The customer must obtain and maintain compatible Customer Premises Equipment (CPE) necessary for use with CRS.

(CT)  
|  
(CT)

The customer assumes full responsibility for station information managed by CRS since the Telephone Company does not maintain station specific records once CRS changes have been made. The Telephone Company does maintain a total count of the number of optional features purchased. This count represents the maximum number which can be activated at any one time through CRS and will be used for billing purposes. Activation or deactivation of optional features through CRS does not affect billing. When the customer activates optional station features through CRS, the station feature nonrecurring charges are waived. If the customer requests the Telephone Company to activate optional station features instead of utilizing CRS capability, applicable tariff charges for the activated feature will be applied.

CANCELLED

FEB 26 1998

By *[Signature]*

PLEXAR® -II SERVICE

45.2 RULES AND REGULATIONS (Continued)

45.2.6 A Plexar-II Off-Premises station will be furnished the same service as a Plexar-II Basic station where equipment and facilities are available.

Private line rates and charges, as specified in Section 2 of the Private Line Service tariff, apply to Basic and Off-Premises stations.

45.2.7 The customer may move Plexar-II service within the state, where facilities permit, subject to the appropriate nonrecurring charges and any other charges specified in this tariff resulting from the customer's requirement (i.e., overtime hours, special construction). The contract will not be affected unless the move causes the 35% maximum station fluctuation to be reached as specified in paragraph 45.3.9. If this occurs, termination liability is applicable. Additionally, station line facility rates may change due to the distance charges. Refer to paragraph 45.2.18 for moves associated with Plexar BRI Service.

45.2.8 If Plexar-II service is provided from a serving central office other than their normal serving central office, the rates and charges specified in this tariff are applicable in addition to the rates, charges, terms and conditions, as appropriate, for Foreign Serving Office Service and Foreign Exchange Service, specified in Section 9 of this tariff and Section 2 of the Private Line Service Tariff. Refer to paragraph 45.2.18 for rules and regulations when the customer subscribes to Plexar BRI Service.

45.2.9 When a customer requests a special offering or modification of standard service offering, it will be furnished whenever possible if not detrimental to any of the services or equipment of the Telephone Company. Such special service offerings or modifications of standard service offerings will be furnished at additional charges.

45.2.10 Directory listings will be furnished in accordance with the regulations set forth in Section 6 of this tariff.

45.2.11 The assignment of telephone numbers for Plexar-II shall be in accordance with Section 17 of this tariff. Where facilities allow, transfer of telephone numbers between Plexar-II and other services will be permitted as follows:

- (a) Customers converting between Plexar/Centrex services will be permitted to retain their existing telephone numbers at no charge.
- (b) Business customers changing to Plexar-II service may retain up to ten of their existing telephone numbers, per serving central office, at no charge. For charges applicable to telephone numbers exceeding ten, see Paragraph 45.4.1.
- (c) Plexar-II customers may transfer one or more of their existing telephone numbers for use with other business services. Charges will apply for each number transferred. For applicable charges see Paragraph 45.4.1. Charges do not apply when the customer disconnects the entire system.

45.2 RULES AND REGULATIONS (Continued)

45.2.17 The Southwestern Bell Telephone calling party, whether they subscribe to Caller ID Services or not, may prevent the delivery of calling party name and/or number to the called party by dialing an access code (\*67 on their Touch-Tone pad or 1167 from a rotary telephone) immediately prior to placing a call. The access code will activate per call blocking, which is available at no charge.

If a calling party activates blocking, the calling party name and/or number will not be transmitted across the station line, including calls within and outside the Plexar group. Instead, Caller ID customers will receive an anonymous indicator. The anonymous indicator notifies the Caller ID customer that the calling party has elected to block the delivery of the telephone number or calling party name.

Per line blocking for the delivery of calling name and/or number is available upon request, at no charge, to the following entities and their employees/volunteers: (a) private, non-profit, tax-exempt, domestic violence intervention agencies, and (b) federal, state and local law enforcement agencies. Blocking is provided on lines over which the official business of the agency is conducted, including those at the residence of employees/volunteers, where an executive officer of the agency registers with Southwestern Bell Telephone Company a need for blocking. The calling name and/or number will not be transmitted from a line equipped with this capability.

(CT) The blocking of the CPN will not be provided on calls originated from Payphone Exchange Access Service.

In addition, to the provisions of the General Exchange Tariff, Section 17, Paragraph 17.8, the calling party and customer indemnifies and saves Southwestern Bell Telephone harmless against any and all claims for damages caused or claimed to have been caused, directly or indirectly, by the transmission to a Caller ID customer of a telephone number which the calling party has requested to be omitted from the telephone company directory or has requested not to be disclosed to any person.

45.2 RULES AND REGULATIONS (Continued)

(CT) 45.2.17 Calling party name and/or number service will not be displayed under the following conditions:

- A. If the called party is off-hook (i.e., when the customer is on line).
- B. If the called party answers during the first ring interval.
- C. If the calling party has activated blocking capability.

(CT) Calling party name and/or number service is not available with distinctive ringing services having a silent interval length insufficient for CPN transmission.

Identification of specific stations or extensions served by some CPE is not possible. The main directory number will be displayed.

(CT) Calling party name and/or number service will be transmitted and displayed for calls made from another central office only if it is linked by appropriate facilities.

Caller ID information may not be sold or given to another party without the caller's consent. Caller ID information may only be used for: (a) routing or completion of calls, (b) billing of calls, (C) account management purposes, (d) services directly related to the call or transaction, (e) verification of calling party identity and (f) marketing products or services that are directly related to those previously acquired by the customer from the number delivery services subscriber. This applies if the number delivery service subscriber has an existing relationship with the customer. Caller ID customers failing to comply with any of these conditions will have their service terminated.

(AT) In addition to the provisions of the General Exchange Tariff, the Telephone Company shall not be liable for any claims for damages caused or claimed to have been caused, directly or indirectly, by the transmission to a Caller ID customer of a name and/or telephone number which the calling party has requested to be omitted from the telephone directory or by the disclosing of such name and/or telephone number to any person. The Telephone Company shall not be liable for any claims for damages caused or claimed to have been caused, directly or indirectly, by the transmission to a Caller ID customer of a name and/or telephone number which the calling party or the Caller ID customer finds erroneous, offensive, embarrassing, or misleading for any reason, including but not limited to the way in which the calling party's name has been abbreviated. The Telephone Company shall not be liable for any claims for damages caused by a telecommunications utility's failure to transmit the privacy to the called party when such indicator has been passed to the telecommunications utility by the Telephone Company.

45.2 RULES AND REGULATIONS--(Continued)

MAY 13 1994

45.2.17 Caller ID service will not be displayed under the following conditions: **MISSOURI Public Service Commission**

- A. If the called party is off-hook (i.e., when the customer is on line).
- B. If the called party answers during the first ring interval.
- C. If the calling party has activated blocking capability.

Caller ID Service is not available with distinctive ringing services having a silent interval length insufficient for CPN transmission.

Identification of specific stations or extensions served by some CPE is not possible. The main directory number will be displayed.

Caller ID Service will be transmitted and displayed for calls made from another central office only if it is linked by appropriate facilities.

Caller ID information may not be sold or given to another party without the caller's consent. Caller ID information may only be used for: (a) routing or completion of calls, (b) billing of calls, (c) account management purposes, (d) services directly related to the call or transaction, (e) verification of calling party identity and (f) marketing products or services that are directly related to those previously acquired by the customer from the number delivery services subscriber. This applies if the number delivery service subscriber has an existing relationship with the customer. Caller ID customers failing to comply with any of these conditions will have their service terminated.

PLEXAR® -II SERVICE

45.2 RULES AND REGULATIONS (Continued)

45.2.18 Plexar-II Service with a Basic Rate Interface (BRI) Integrated Services Digital Network (ISDN) requires compatible registered CPE under FCC Part 68.

Upon subscribing to Plexar-II BRI Service, the customer may be required to change existing telephone number(s) if SWBT determines that it is not reasonably feasible for technical or number administration reasons to continue to provide the customer's existing telephone number(s).

The serving central office from which a customer's Plexar BRI Service is provided shall be designated as the customer's Plexar BRI equipped serving office. BRI service will be provided at the rates and charges specified in paragraph 45.4.3 and 45.4.4. The following regulations are associated with the serving arrangement:

- A. If the customer's normal serving office is BRI equipped and is located in an ISDN Service Area, BRI service will be provided from that serving office.
- B. If the customer's normal serving office is not BRI equipped or lacks BRI capacity and is located in an ISDN Service Area, the BRI service may be provided from a BRI equipped office (located in the ISDN Service Area) designated by the Telephone Company. At the customer's request, their basic stations and BRI stations may be served from the BRI serving central office, if capacity is available. When this occurs, Foreign Serving Office charges apply to Basic Stations (non-BRI) as specified in Section 9 of this tariff. If the customer requests BRI service to be provisioned from a BRI equipped serving office (in the exchange) other than the one designated by the Telephone Company and the Telephone Company agrees, the arrangement can be provided. In this case, Foreign Serving Office charges apply per B and D channel in addition to any other charges.

(CT)(AT) If a new central office becomes the designated BRI equipped serving office, their Plexar BRI service will continue to be provided from their original Plexar BRI serving office. Should the customer subsequently request that their Plexar BRI service be provisioned from the new designated serving office, all nonrecurring charges associated with the move will be applicable. The Telephone Company may request that the customer, at the customer's option, have the customer's BRI service provided from the new designated serving office and, in conjunction therewith, will waive move charges. Such a move may require the customer to change telephone numbers.

45.2 RULES AND REGULATIONS (Continued)

**FEB 19 1998**

45.2.18 Plexar-II Service with a Basic Rate Interface (BRI) Integrated Services Digital Network (ISDN) requires compatible registered CPE under FCC Part 68.

**MO. PUBLIC SERVICE COM**

Upon subscribing to Plexar-II BRI Service, the customer may be required to change existing telephone number(s) if SWBT determines that it is not reasonably feasible for technical or number administration reasons to continue to provide the customer's existing telephone number(s).

The serving central office from which a customer's Plexar BRI Service is provided shall be designated as the customer's Plexar BRI equipped serving office. BRI service will be provided at the rates and charges specified in paragraph 45.4.3 and 45.4.4. The following regulations are associated with the serving arrangement:

- A. If the customer's normal serving office is BRI equipped and is located in an ISDN Service Area, BRI service will be provided from that serving office.
- B. If the customer's normal serving office is not BRI equipped or lacks BRI capacity and is located in an ISDN Service Area, the BRI service may be provided from a BRI equipped office (located in the ISDN Service Area) designated by the Telephone Company. At the customer's request, their basic stations and BRI stations may be served from the BRI serving central office, if capacity is available. When this occurs, Foreign Serving Office charges apply to Basic Stations (non-BRI) as specified in Section 9 of this tariff. If the customer requests BRI service to be provisioned from a BRI equipped serving office (in the exchange) other than the one designated by the Telephone Company and the Telephone Company agrees, the arrangement can be provided. In this case, Foreign Serving Office charges apply per B and D channel in addition to any other charges.

(C)

If the customer's normal serving office becomes BRI equipped, their Plexar BRI service will continue to be provided from their original Plexar BRI serving office. Should the customer subsequently request that their Plexar BRI service be provisioned from their normal serving central office, all nonrecurring charges associated with the move will be applicable. The Telephone Company may request that the customer, at the customer's option, have the customer's BRI service provided from the customer's normal serving office and, in conjunction therewith, will waive move charges.

**RECEIVED**

45.2 RULES AND REGULATIONS (Continued)

**FEB 19 1998**

45.2.18 - (Continued)

**MO. PUBLIC SERVICE COMM**

- C. If the customer's normal serving office has a BRI equipped central office switch and is located in an ISDN Service Area, BRI service will be provided from that switch if there is capacity. If capacity is not available, BRI service may be provided from another Telephone Company designated BRI equipped serving office (located in the ISDN Service Area). At the customer's request, basic Plexar and BRI stations may be served from the designated BRI equipped serving office, if capacity is available. In this case, Foreign Serving Office charges specified in Section 9 of this tariff apply to Basic Stations in addition to other applicable charges.
  
- D. If the customer's normal serving office is located outside of an ISDN Service Area, the customer may request Plexar BRI service. In this case, BRI service may be provided from a BRI equipped serving office located in an ISDN serving area (within the LATA), if the Telephone Company agrees. In such cases, the charges for Link Extension specified in Paragraph 45.4.4, will apply. Intercom calling between the BRI stations and basic stations in this situation will not be provided unless they are connected together via a tie trunk arrangement at charges specified in paragraph 45.4.5, following. If the customer requests Plexar BRI service from a serving office other than the Plexar BRI equipped serving office designated by the Telephone Company and the Telephone Company agrees, Link Extension charges will apply. In addition, charges for Foreign Exchange Service, under Section 9 of this tariff will apply per B and D channel.

(C)

If the customer's normal serving office becomes BRI equipped, their Plexar BRI service will be moved from their original Plexar BRI serving central office to the customer's normal serving office. Such a move may require the customer to change telephone number(s); in such a case, the Telephone Company may waive the move charges specified in paragraph 45.2.7 of this tariff. Link Extension charges will no longer apply once the customer has been moved back to the normal serving central office. However, subject to Telephone Company agreement, the customer may request that their service not be moved. In such a case, the Link Extension charges will continue to apply in addition to Foreign Exchange service charges, which apply per B and D channel.

45.3 PAYMENT PLANS

45.3.1 The Plexar-II Payment Plan offers the customer two options for payment. They are as follows:

A. Fixed Monthly Rate Plan

(CT)

Under this plan, the customer pays a fixed monthly rate for a specified contract term. The customer may choose a 12, 24, 36, 48 or 60 month contract. During the course of the contract, fixed rates (recurring and nonrecurring) are not subject to Telephone Company initiated rate increases.

B. Month-to-Month Plan

Under this plan, the customer elects to pay month to month. Month-to-month rates (recurring and nonrecurring) are subject to Telephone Company initiated rate changes.

45.3.2 All one-time (nonrecurring) charges specified within this tariff can be deferred over the length of any fixed term on initial and subsequent installations of service. Annuity factors utilized in deferring these charges are listed in Section 17.6.5 (Rules and Regulations Applying to All Customer's Contracts, Payments for Service) of the General Exchange Tariff.

The customer's contract specifies the discount rate that will be used if a customer terminates service under the conditions specified in Paragraph 45.3.9, following. The discount rate used in initiating a contract listed in Section 17.6.5 remains fixed over the life of the contract term.

PLEXAR-II SERVICE

45.3 PAYMENT PLANS (Continued)

45.3.3 Additions to service under the two plans specified in Paragraph 45.3.1, preceding, can be added to the existing agreement.

Fixed monthly rate plan additions can be coterminous with the original contract or for a shorter term. If more than 90 days remain on the contract, apply rates equivalent to those of the original contract term. If less than 90 days remain, additions must be made only under a month-to-month option.

Additions to service under the Month-to-Month plan can be made at any time.

Additions to the fixed monthly rate plan that exceed the number of stations initially covered under the agreement are subject to the same termination liability charges as the initial stations.

45.3.4 Station rates, station line facility rates, facility terminating arrangements and optional features are covered under the Plexar-II payment plans. All other rates and charges not specifically covered in this section are not included. Plexar-II access lines are not included in these payment plans.

45.3.5 Existing Plexar-I and Centrex Service customers may convert to Plexar-II subject to the payment of the conversion charges specified in Paragraph 45.4.1, following.

45.3.6 With prior Telephone Company agreement, service under these plans may be transferred from one customer to another at the same location for a Supersedure Fee as identified in paragraph 45.4.1, following. The new customer assumes all obligations under the existing contract. Changes and additions to the assumed service can be made after the first day of service has been assumed.

45.3.7 Customers exceeding 74 stations within each serving central office may request a Plexar-Custom serving arrangement prior to the expiration of the existing contract term provided that the requested contract term be at least 12 months longer than the time remaining on the existing contract. Termination liability charges will not apply when the customer continues with an equivalent Plexar service arrangement (i.e., current system size).

(CT)

If there remains deferred non-recurring and installation charges, the present worth of that amount must be paid in full or applied to the new Plexar-Custom contract.

45.3.8 At the conclusion of the fixed term for any contract the customer may renew the service at terms, conditions and rates that exist at the time of renewal, or change to month-to-month rates for all rate elements (standard and optional), or subscribe to the contract extension option.

'Thank You For Renewing' Credit Option

With this option, customers who sign a new Plexar-II term Payment Plan contract for their existing service with a 36-, 48- or 60-month contract term will receive a one-time bill credit of \$50.00 per station (Basic stations, ISDN BRI stations or Off-Premise stations), up to a maximum of \$1,500 per contract. This credit option is only available to existing Plexar-II customers (month-to-month or contract), but is not available to customers with more than twelve months remaining on their existing Plexar-II term Payment Plan contract. Standard Plexar-II termination charges will apply. This credit option is not available to customers covered under a Customer Specific Pricing (CSP) contract.

Contract Extension Option

The contract extension option must be subscribed to during the last twelve months of a Plexar-II term contract. The customer may extend their contract for either an additional 12-month or 24-month period at the same rates provided under the original tariffed contract. Subject to the Company's right to seek to discontinue this option to extend the contract period or to otherwise change the terms and conditions of this option, the customer may exercise this option up to three separate times. Customers who exercise the option to extend the term of the contract are not entitled to a different rate based on the overall term of the contract as extended (e.g., customers who initially have a 36-month contract and extend it by an additional 24 months are not entitled to the rates allowed under a 60-month contract). An extension will begin on the expiration date of the existing contract or extension. Requests to terminate contract extensions will be governed by the terms and conditions found in this same tariff under Payment Plans.

Upon the expiration date, as noted on the Company billing records, of a contract or contract extension option, if the customer does not elect to subscribe to a new contract and does not request discontinuance of the service, service will be continued on a Month-to-Month basis. The Month-to-Month rates currently in effect at the time of expiration of the contract will apply. Once on a Month-to-Month Plan the customer will not have additional service commitment and will no longer be subject to termination charges. The Month-to-Month service rates will be subject to Company-initiated rate changes.

Customers with arrangements exceeding 74 stations in each serving central office may convert the service at terms, conditions and rates set forth in Section 33 of this tariff.

(1) Effective September 1, 2013, the 48 and 60 month Term Payment Plan (TPP) term periods are no longer available for new installations or renewals of Plexar II Service. Plexar II customers currently on a 48 or 60 month TPP term period may continue service at their existing TPP rate until the contract term expires. Upon completion of the current contract term, customers may continue receiving the service at the then-current month-to-month rates. If the customer does not request discontinuance of the service, the month-to-month rates in effect at such time will automatically apply.

45.3.9 - (Continued)

MISSOURI  
Public Service Commission

Termination charges are not applicable to Plexar-II station line facilities when the customer adds Plexar-II access lines with an equivalent reduction in the number of station line facility rate elements.

45.3.10 The customer may, at his option, prior to the expiration of the existing contract term, terminate the contract without incurring termination charges provided a) customer signs a new contract at prevailing rates for a term at least as long as the period remaining in the original contract b) continues with an equivalent service arrangement (i.e., current system size), and c) agrees to pay the deferred installation and nonrecurring charges incurred on the original contract, by present worthing the remaining amount and applying current annuity factors as specified in Section 17 of this tariff. These deferred installation and nonrecurring charges may be paid in full, applied to another Plexar contract payment plan, or deferred over the length of another Plexar contract term.

45.3.11 With the exception of BRI Station and Station Line Facility rates (USOCs, XRB, 1LSDA, 1LSDB and LKX) found in paragraphs 45.4.3 and 45.4.4, regulations and rates applying on a per station or per line basis shall be interpreted to apply per channel when the customer subscribes to Plexar BRI Service.

PLEXAR®-II SERVICE

45.3 PAYMENT PLANS (Continued)

45.3.12 Nonrecurring Charge Waiver Options

(AT)

New Service

Nonrecurring charges associated with the installation of new PLEXAR-II service will be waived for new, winback and win customers. In addition, existing PLEXAR-II subscribers moving their PLEXAR-II service to a new location are eligible. Customers must agree to sign a 24-month or greater term Payment Plan and install a minimum of 8 stations. Nonrecurring charges will be waived for each analog or ISDN BRI Station connected during installation of the PLEXAR-II system.

Additional Lines

Nonrecurring charges associated with the installation of new PLEXAR-II stations will be waived for existing customers who agree to install a minimum of 3 additional stations and add the stations to an existing agreement.

The nonrecurring charges to be waived under these Waiver Options are as follows:

- Service Establishment Charge to Establish a New System (per Central Office)
- Station Rates, Initial Installation, Installation Charge (per station)
- Station Line Facility Rates Installation Charge (based on mileage)

These Waiver Options are not available to customers covered under a Customer Specific Pricing (CSP) contract.

- (1) If a customer chooses a contract term of 12 months or longer and then disconnects the system prior to the expiration of that contract, a termination charge is applicable, except as specified in paragraph 45.3.10. The termination charge is equal to the difference between the BRI only Month-to-Month Service Establishment Charge in effect at the time of the disconnect and the actual Service Establishment Charge paid at the time the system was installed.
- (2) If a Plexar-II customer disconnects service within 60 days after installation, a refund equivalent to the Service Establishment Charge paid at the time service was installed will be refunded on their monthly bill. If a customer has a multi-location system involving more than one BRI only central office, the refund per customer will be equivalent to one Service Establishment Charge. This refund does not apply to Plexar-II service configured only with D-channel packet switching. This refund is not available when Plexar-II systems are provided to transient locations or use, such as trade shows, convention centers and exhibit halls.
- (3) Applies when changes are made that affect the entire system.
- (4) When converting a system in a serving central office that provides only Basic Plexar (non-BRI) to BRI only or when converting a system in a serving central office from Basic Plexar to a combination of Basic and BRI service, there is no conversion charge applicable, but a system subsequent change charge is applicable as specified in paragraph 45.4.1D.
- (5) When converting a system in a serving central office that provides a BRI/Basic Plexar mix to BRI only or Basic Plexar only, there is no conversion charge applicable, but a system subsequent change charge is applicable as specified in paragraph 45.4.1D.
- (6) SWBT will waive the \$400 Service Establishment Charge to new Basic Plexar-II customers upon receipt of a signed 36, 48, or 60-month contract beginning July 6, 1998, through September 30, 1998. Customers already subscribing to this service are not eligible for this promotion.
