6.2 Timing of Calls

Billing for calls placed over the Company's network is based in part on the duration of the call as follows, unless otherwise specified in this tariff:

6.2.1 Timing of each call begins when the called station is answered (i.e. when two-way communications are established). Answer detection is based on standard industry methods, including hardware and software answer detection. For Collect Calls, charges apply only if the called party accepts the responsibility for payment. For Person-to-Person Calls, charges apply only if the calling party is connected with the designated called party or an agreed upon substitute.

6.2.2 Chargeable time for calls ends when one of the parties disconnects from the call.

6.2.3 The Company will not knowingly bill for unanswered calls. When a Customer indicates that he/she was billed for an incomplete call, the Company will reasonably issue credit for the call.

6.2.4 Time-of-day designations may be used in this tariff to indicate rate period boundaries. Rate periods begin at the first time of day designation and continue up to but not including the second time of day designation.

6.2.5 Calls will be billed at the rate in effect during the call, with two rates applied if the call spans over more than one billing rate period.

6.2.6 When a time-of-day designation is used in a price plan, the Time Zone of the subscribing party will be used for time and rate calculations.

6.4.2 BellSouth[®] Toll-Free Service

Toll-Free service is a toll-free number (e.g., 800, 888) service. Calls may originate from any valid exchange and terminate to the Customer's location at no charge to the calling party. With inbound long distance services, the Customer is billed for the call rather than the calling party.

Toll-Free service may terminate to Customer local exchange access lines using Switched Access or Dedicated Access termination. Customers with larger call volumes may have inbound calls routed to Dedicated Access facilities connecting the Customer's premises directly with the Company InterLATA Network.
