Service Commission ER-2012-0166; YE-2013-0269

ADDRESS

MISSOURI SERVICE AREA

## SERVICE CLASSIFICATION NO. 1(M) RESIDENTIAL SERVICE RATE (Cont'd.)

\*True-Up of Energy Efficiency Investment Charge. The Company shall, pursuant to the procedures outlined in the Unanimous Stipulation And Agreement Resolving Ameren Missouri's MEEIA Filing approved in Case No. EO-2012-0142, true-up, as close as reasonably practicable, the application of the Energy Efficiency Investment Charges on customer billings for the following items: a) all actual MEEIA Programs' Costs, b) the Company's Throughput Disincentive-Net Shared Benefits (TD-NSB) Share amounts and c) the Performance Incentive Award. Any difference between the Company's billed and actual MEEIA program costs, and any difference between the billed and 100% of the actual TD-NSB share will be tracked with interest and trued-up for amortization in a future general electric rate case. Should a rider mechanism be in effect for the Energy Efficiency Investment Charge, then the rider will be used to effectuate the true-up.

\*<u>Prudency Review of Energy Efficiency Investment Charge</u>. Commission staff shall perform prudence reviews no less frequently than at twenty-four (24) month intervals in accordance with 4 CSR 240-20.093(10). Any amount the Commission orders refunded as a result of such a prudence review shall be a reduction to the Company's revenue requirement in the first general electric rate proceeding occurring after such Commission order. However, if a rider mechanism is in effect for recovery of Energy Efficiency Investment Charges, then any prudence review refund shall be effectuated through that rider.

\* Indicates Addition.

	MO. P. S. C. SCHEDULE NO. 5 17th Revised SHEET NO. 2
	CANCELLING MO. P.S.C. SCHEDULE NO. 5 16th Revised SHEET NO. 21
PPLYING	MISSOCKI SERVICE AREA ON INCLUSE IN THE COMMENSION
	SERVICE CLASSIFICATION NO. 1(M) JUL 2 1 1995 RESIDENTIAL SERVICE RATE (Cont'd.)
*1.	Public Service Commission Rate Application. This rate is applicable to all normal residential service supplied by the Company to individually metered residence and apartments consisting of one or more rooms for the use of one of more persons as a housekeeping unit with space for eating, living an sleeping, and permanent provisions for cooking and sanitation.
	Additional service which may be provided under the provisions of the rate include any metered combination of residential and general far service, or separately metered service related or incidental thereto and individually metered mobile homes or boat slips intended for normal use by a single family.
	All service referenced above shall be supplied, metered and billed is accordance with the provisions of paragraph (2.) herein. Single metered service to multiple-occupancy residential buildings consisting of two or more apartments as defined above, as well a common building services, shall be available on a limited basis as billed in accordance with paragraph (4.) herein.
2.	<u>Character of Service Supplied</u> . Company will specify and supply or standard single-phase and, for additional residential requirements one three-phase secondary service voltage under this Service Classification, which service will be cumulated for billing purposes Unless otherwise required for Company's engineering or other reasons any additional service requested by customer will be provided subject to the Company's approval, under the provisions of Section III.Q - Special Facilities. Such additional service, if any supplied through facilities installed on and after May 5, 1990, will not be cumulated or otherwise combined for billing purposes with an other service supplied to customer.
3.	<u>Temporary Service</u> . Temporary service requested for residential us will be supplied under the terms and conditions set forth under Rider D.
*4.	<u>Single-Metered Multiple-Occupancy Residential Buildings</u> . This para graph applies only to buildings constructed and served under the provision prior to June 1, 1981. The total monthly bill to each sub building to which service is delivered and metered at one point sha be equal to the total number of dwelling units therein multiplied is the bill per dwelling unit, which bill per dwelling unit shall is calculated by applying the Residential Service Rate to the avera- kilowatthour use per dwelling unit (equal to the total building u divided by the number of dwelling units, rounded to the neare kilowatthour). Electrical use for common building services such hall lights, elevators and laundry areas used exclusively by tenam may be metered and billed through the main building meter. Use for restaurants, arcade shops, retail stores, office space or any oth

	CANCELLING SCHEDULE NO. 5 THIRTEENTH REVISED SHEET NO. 29 (M
	APPLYING TO MISSOURI SERVICE AREA
	SERVICE CLASSIFICATION NO. 1(M) RESIDENTIAL SERVICE RATE AUG 1 8 1980 1. Rate Application. This rate is applicable to all normal residential service supplied directly by Company in Missouri for: MISSOURI
_	a. <u>Residences</u> . A single-family residence dwelling Public Service Commissio
	b. <u>Apartments</u> . A separately metered individual flat or apartment unit used as the home, residence or sleeping place of one or more persons, or, a multiple occupancy building of such units where service is delivered and metered at one point or one at which service is delivered at more than one point for valid engineering reasons. The billing provisions for single metered multiple occupancy residential buildings are as provided in Paragraph 4.
	c. Farm Homes and Estates. Supplying combination home and farm use where supplied through a single meter, and limited to the use of service within the residence on the farm or estate and that re- quired for all general farming and agricultural purposes conducted on the premises served. Where separate meters are required to supply operations incidental thereto but located at such distance that they cannot be connected to the main meter, each such addi- tional meter shall be billed separately under this rate.
	d. <u>Recreation Facilities</u> . Summer cottages, homes, trailers or boat slips where individually metered and intended for use by a single family.
	*2. <u>Character of Service Supplied</u> . Company will specify and supply one standard single phase and, for additional residential requirements, one three phase secondary service voltage under this service classi- fication, which service will be cumulated for billing purposes. Unless otherwise required for Company's engineering or other reasons, any additional service requested by customer will be provided, subject to the Company's approval, under the provisions of Section II.B.7 Special Service Facilities. Such additional service, if any, will be cumulated and billed with all other service provided hereunder.
	3. <u>Temporary Service</u> . <b>Derive Description</b> requested for residential use will be supplied under terms and conditions set forth under Rider D.

#### SERVICE CLASSIFICATIONS NO. 1 AND 2 RESIDENCE RATE

#### \*1. Rate Application.

- a. <u>Service Classification No. 1</u> is applicable in all service areas in Missouri as set forth on Sheets No. 9 through 14, all service areas in Illinois as set forth on Sheet No. 23, and in communities designated as Urban in Iowa as set forth on Sheet No. 26.
- b. <u>Service Classification No. 2</u> is applicable in Iowa to service areas outside of the communities designated as Urban in (a) above, as set forth on Sheet No. 26.
- 2. <u>Applicable to</u> all normal residential service supplied directly by Company when used in
  - e. Residences. A single-family residence dwelling or building.
  - b. <u>Apartments</u>. A separately metered individual flat or apartment unit used as the home, residence or sleeping place of one or more persons, or, a multiple occupancy building of such units where service is delivered and metered at one point or one at which service is delivered at more than one point for valid engineering reasons. The billing provisions for single metered multiple occupancy residential buildings are as provided in Paragraph 7.
- c. Farm Homes and Estates. Supplying combination home and farm use where supplied through a single meter, and limited to the use of service within the residence on the farm or estate and that required for all general farming and agricultural purposes conducted on the premises served. Where separate meters are required to supply operations incidental thereto but located at such distance that they cannot be connected to the ELLEFIN meter, each such additional meter shall be billed sep-

3.	<u>Character of Service Supplied.</u> Company will specify and supply a standard single phase secondary service voltage under this rate schedule. Where Company supplies a standard three phase secondary service voltage for additional resi- dential requirements, such service will be cumulated with the single phase service and billed as though supplied through a single meter. Not more than one single phase and
	one three phase meter will be so cumulated for billing. Any additional services supplied will be billed for separately.
4.	Temporary Suspension of Service. Where a Customer requests temporary disconnection of service and where in Company's opinion such use of service is permanent in character, or where the use of service, such as may be required by summer homes, cottages, etc., for private residential purposes exclusively is seasonal or intermittent in character and disconnection of service is requested when the premises are not in use, Customer will be relieved of minimum bills dur- ing period of temporary suspension of service, but shall pay a charge of \$3.00 to cover cost of disconnection and re- connection of service. Said charge shall be added to the first month's bill for use of service after reconnection.
	dential use will be supplied under the terms and conditions set forth under Rider D. AUG 1 - 1966
6.	Eligibility for Water Heating Credit. PUBLIC SERVICE COMMI
	*a. In order to qualify for the Water Heating Credit provided in Service Classifications Nos. 1 and 2, Customer's elec- tric water heater shall be a 30 gallon or larger, fast recovery water heater with 4500 watt heating elements, suitable for 208 or 240 volt, 2 wire, single phase, alternating current service: the heating elements shall be non-inductive and torsatt for two Educing elements

Custome: of the heating elements up to 4, retain the interlock to prevent of upper and lower heating elements the heater referred to above is rep- ceplaced with one or more of the	eter socket, Service Classi- oly the Water r may increase 500 watts each, simultaneous ments. When placed, it

d. A Customer receiving uncontrolled water heating service prior to the effective date hereof under Service Classification No. 1 or 2 shall be eligible to request the Water Heating Credit, provided the capacity of his water heater tank is 40 gallons or more. Upon receipt of such request and before authorizing the credit, Company shall have the right to inspect the water heating installation to determine that Customer has complied with all applicable rules and regulations. Customer may increase the size of the heating elements up to 4500 watts each, but must retain the interlock to prevent simultaneous operation of upper and lower heating elements. When the water heater referred to above is replaced, it must be replaced with one or more of the standard, fast recovery electric water heaters described in Paragraph (a) above in order for Customer to continue to be eligible for the water usating Credit.

## SERVICE CLASSIFICATION NO. 3(M) LARGE GENERAL SERVICE RATE (Con'd.)

<u>Payments</u>. Bills are due and payable within ten (10) days from date of bill and become delinquent after twenty-one (21) days from date of bill.

 $\underline{\text{Term of Use}}.$  One (1) year, terminable thereafter on three (3) days' notice.

<u>Tax Adjustment</u>. Any license, franchise, gross receipts, occupation or similar charge or tax levied by any taxing authority on the amounts billed hereunder will be so designated and added as a separate item to bills rendered to customers under the jurisdiction of the taxing authority.

\*True-Up of Energy Efficiency Investment Charge. The Company shall, pursuant to the procedures outlined in the Unanimous Stipulation And Agreement Resolving Ameren Missouri's MEEIA Filing approved in Case No. EO-2012-0142, true-up, as close as reasonably practicable, the application of the Energy Efficiency Investment Charges on customer billings for the following items: a) all actual MEEIA Programs' Costs, b) the Company's Throughput Disincentive-Net Shared Benefits (TD-NSB) Share amounts and c) the Performance Incentive Award. Any difference between the Company's billed and actual MEEIA program costs, and any difference between the billed and 100% of the actual TD-NSB share will be tracked with interest and trued-up for amortization in a future general electric rate case. Should a rider mechanism be in effect for the Energy Efficiency Investment Charge, then the rider will be used to effectuate the true-up.

\*<u>Prudency Review of Energy Efficiency Investment Charge</u>. Commission staff shall perform prudence reviews no less frequently than at twenty-four (24) month intervals in accordance with 4 CSR 240-20.093(10). Any amount the Commission orders refunded as a result of such a prudence review shall be a reduction to the Company's revenue requirement in the first general electric rate proceeding occurring after such Commission order. However, if a rider mechanism is in effect for recovery of Energy Efficiency Investment Charges, then any prudence review refund shall be effectuated through that rider.

\* Indicates Addition.

SERVICE CLASSIFICATION NO. 3(M) NOV 1 († 1990) LARGE GENERAL SERVICE RATE

Not State State

- 1. <u>Rate Application</u>. This rate is applicable to all secondary service to (1) any non-residential customer whose billing demand in any summer month exceeds 100 kW, or (2) at customer's request, to any other non-residential customer.
- 2. <u>Character of Service Supplied</u>. Company will specify and provide a standard single- and/or three-phase alternating current secondary service voltage. Direct current is supplied in limited quantities to existing premises in downtown St. Louis, Missouri.
- \*3. Demand
  - A. <u>Billing Demand</u>. The monthly billing demand shall be either the maximum demand measured during the month or, where elected by customer, the billing demand determined in accordance with Rider I, Off-Peak Demand Provisions, but in no event less than 100 kW.
  - B. <u>Energy Billing Demand</u>. Customer's billing demand shall be used to apportion customer's kilowatthours to the kWh per kW energy rate steps for metered demands of 100 kW or greater. Where metered demands are less than 100 kW, the metered demand shall be used as the billing demand for purposes of apportioning kilowatthours only.
  - C. <u>Base Billing Demand</u>. The Base Billing Demand shall be the lesser of a) the customer's billing demand established during the preceding May billing period, or b) October billing period, or c) the maximum billing demand established during the preceding summer billing period, but in no event less than 100 kW.
  - D. <u>Seasonal Billing Demand</u>. The Seasonal Billing Demand shall be the customer's winter billing demand in excess of the customer's Base Billing Demand.
  - E. <u>Base and Seasonal Energy Apportioning</u>. The kilowatthours for each winter billing period shall be apportioned to the Base and Seasonal Energy rate steps in the same proportion as enstower's Base and Seasonal billing demands

#### ELECTRIC SERVICE

P.S.C. MO., ILL. C.C., IA. ST. C.C. SCHEDULE NO.

UNION ELECTRIC COMPANY

APPLYING TO .

FIFTH REVISED 35 (M)

REGEIV

AUG 1 8 **1980** 

FOURTH REVISED

HEET NO. 35 (M)

MISSOURI SERVICE AREA

5

## SERVICE CLASSIFICATION NO. 3(M)

#### LARGE GENERAL SERVICE RATE

- 1. <u>Rate Application</u>. This rate is applicable to all seconda<sup>MJSELWI</sup>ce supplied by the Company in Missouri to (1) any non**Public Gervice**lComm<sup>SSION</sup> tomer whose demand in any summer month exceeds 150 kW, or (2) at customer's request, to any non-residential customer whose demands in all summer months are 150 kW or less.
- 2. <u>Character of Service Supplied</u>. Company will specify and provide a standard single and/or three phase alternating current secondary service voltage. Direct current is supplied in limited quantities to existing premises in downtown St. Louis, Missouri. Where customer requires and Company supplies service at a primary service voltage, customer shall furnish all transformers necessary to transform such service to a secondary service voltage, and in such case, the appropriate adjustments under Rider C will apply.
- 3. Demand.
  - a. <u>Billing Demand</u>. The monthly billing demand shall be either the maximum demand measured during the month, or, where elected by customer, the billing demand determined in accordance with Rider I, Off-Peak Demand Provisions, but in no event less than 150 kW.
  - b. <u>Demand Meters</u>. When normal use of an existing customer or the estimated use of a new customer exceeds 25,000 kWh per month, or Company has reason to believe that customer's demand exceeds 150 kW regardless of his kWh use, Company will install a demand meter and measure customer's demand.

\*4. <u>Cumulation of Services</u>. Service taken through each meter by the same customer on the same premises under this service classification will be cumulated for billing purposes. Unless otherwise required for Company's engineering or other reasons, any additional service requested by customer will be provided, subject to the Company's approval, under the provisions of Section II.B.7. - Special Service Facilities. Such an informal service, if any, will be cumulated and billed with a provision provided hereunder.

## SERVICE CLASSIFICATION NO. 3(M)

- Demand Meters. When normal use of an existing customer or the estimated use of a new customer exceeds 25,000 kWh per month, or Company has reason to believe that customer's demand exceeds 150 kW regardless of his kWh use, Company will install a demand meter and measure customer's demand.
- 4. <u>Cumulation of Services</u>. Service taken through each meter by the same customer on the same premises under this service classification will be cumulated for billing purposes. Unless otherwise required for Company's engineering or other reasons, any additional service requested by customer will be provided, subject to the Company's approval, under the provisions of Section II.B.7. - Special Service Facilities. Such additional service, if any, will be cumulated and billed with all other service provided hereunder.
- \*\*5. Customers Without Prior Summer Use. Customers on this rate who did not establish a demand during at least one of the July, August or September billing periods shall be billed during the succeeding winter billing periods entirely on the base demand charge. After the following July, August and September billing periods are completed, the customer's billing during the preceding winter will be reviewed using the base demand determined from these following July, August and September billing periods and a refund given if appropriate.
  - 6. <u>General Rules and Regulations</u>. In addition to the above specific rules and regulations, all of Company's General Rules and Regulations shall apply to the supply of service under this rate.

### \*\*Indicates addition.

CANCELLING MO.P.S.C. SCHEDULE NO. 5

2nd Revised SHEET NO. 37.1

APPLYING TO MISSOURI SERVICE AREA

| Payments. Bills are due and payable within ten days from date of bill<br>and become delinquent after twenty-one (21) days from date of bill.<br>Term of Use. One (1) year, terminable thereafter on three (3) days'<br>notice. Tax Adjustment. Any license, franchise, gross receipts, occupation or<br>similar charge or tax levied by any taxing authority on the amounts<br>billed hereunder will be so designated and added as a separate item to<br>bills rendered to customers under the jurisdiction of the taxing<br>authority. True-Up of Energy Efficiency Investment Charge. The Company shall,<br>pursuant to the procedures outlined in the Unanimous Stipulation And<br>Agreement Resolving Ameren Missouri's MEEIA Filing approved in Case No.<br>E0-2012-0142, true-up, as close as reasonably practicable, the<br>application of the Energy Efficiency Investment Charges on customer<br>billings for the following items: a) all actual MEEIA Priograms' Costs, b)<br>the Company's Throughput Disincentive-Net Shared Benefits (TD-NSB) Share<br>amounts and c) the Performance Incentive Award. Any difference between<br>the Company's billed and actual MEEIA program costs, and any difference<br>between the billed and 100% of the actual TD-NSB share will be tracked<br>with interest and trued-up for amortization in a future general electric<br>rate case. Should a rider mechanism be in effect for the Energy<br>Efficiency Investment Charge, then the rider will be used to effectuate<br>the true-up. * Prudency Review of Energy Efficiency Investment Charge. Commission staff<br>shall perform prudence reviews no less frequently than at twenty-four<br>(24) month intervals in accordance with 4 CSR 240-20.093(10). Any amount<br>the Commission orders refunded as a result of such a prudence review<br>shall be a reduction to the Company's revenue requirement in the first<br>general electric rate proceeding occurring after such Commission order.<br>However, if a rider mechanism is in effect for recovery of Energy<br>Efficiency Investment Charges, then any prudence review refund shall be<br>effectuated through that rider.< | SI                                                                                                                                                                                                                                                                                          | ALL PRIMARY                                                                                                                                                                       | SERVICE RATE (CON                                                                                                                                                                                                                       | T'D.)                                                                                                                                                                                                                        |                                                                                        |

| <ul> <li>and become delinquent after twenty-one (21) days from date of bill.</li> <li>Term of Use. One (1) year, terminable thereafter on three (3) days' notice.</li> <li>Tax Adjustment. Any license, franchise, gross receipts, occupation or similar charge or tax levied by any taxing authority on the amounts billed hereunder will be so designated and added as a separate item to bills rendered to customers under the jurisdiction of the taxing authority.</li> <li>* True-Up of Energy Efficiency Investment Charge. The Company shall, pursuant to the procedures outlined in the Unanimous Stipulation And Agreement Resolving Ameren Missouri's MEEIA Filing approved in Case No. E0-2012-0142, true-up, as close as reasonably practicable, the application of the Energy Efficiency Investment Charges on customer billings for the following items: a) all actual MEEIA Programs (Costs, b) the Company's Throughput Disincentive-Net Shared Benefits (TD-NS Share amounts and c) the Performance Incentive Award. Any difference between the Company's billed and actual MEEIA program costs, and any difference between the billed and 100's of the actual TD-NS Share will be tracked with interest and trued-up for amortization in a future general electric rate case. Should a rider mechanism be in effect for the Energy Efficiency Investment Charge. Commission staff shall perform prudence reviews no less frequently than at twenty-four (24) month intervals in accordance with 4 CSR 240-20.031(0). Any amount the Commission orders refunded as a result of such a prudence review shall be a reduction to the Company's revenue requirement in the first general electric rate proceeding occurring after such Commission order. However, if a rider mechanism is in effect for recovery of Energy Efficiency Investment Charges, then any prudence review refund shall be effectuated through that rider.</li> </ul>                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                   |                                                                                                                                                                                                                                         |                                                                                                                                                                                                                              |                                                                                        |
| notice. Tax Adjustment. Any license, franchise, gross receipts, occupation or similar charge or tax levied by any taxing authority on the amounts billed hereunder will be so designated and added as a separate item to bills rendered to customers under the jurisdiction of the taxing authority. * <u>True-Up of Energy Efficiency Investment Charge</u> . The Company shall, pursuant to the procedures outlined in the Unanimous Stipulation And Agreement Resolving Ameren Missouri's MEELIA Filing approved in Case No. E0-2012-0142, true-up, as close as reasonably practicable, the application of the Energy Efficiency Investment Charges on customer billings for the following items: a) all actual MEELA Programs' Costs, b) the Company's Throughput Disincentive-Net Shared Benefits (TD-NSB) Share amounts and c) the Performance Incentive Award. Any difference between the billed and 100% of the actual TD-NSB share will be tracked with interest and trued-up for amortization in a future general electric rate case. Should a rider mechanism be in effect for the Energy Efficiency Investment Charge. Commission staff shall perform prudence reviews no less frequently than at twenty-four (24) month intervals in accordance with 4 CSR 240-20.093(10). Any amount the Commission orders refunded as a result of such a prudence review shall be a reduction to the Company's revenue requirement in the first general electric rate proceeding occurring after such Commission order. However, if a rider mechanism is in effect for recovery of Energy Efficiency Investment Charges, then any prudence review refund shall be effectuated through that rider. *Indicates Addition.                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                   |                                                                                                                                                                                                                                         |                                                                                                                                                                                                                              |                                                                                        |
| * Prudency Review of Energy Efficiency Investment Charge. ## SERVICE CLASSIFICATION NO. 3 AND 4 GENERAL SERVICE RATES

#### Rate Application. **\***1.

- Service Classification No. 3 is applicable in all service areas ۸. in Missouri as set forth on Sheets No. 9 through 14, all service
  - areas in Illinois as set forth on Sheet No. 23, and in communities designated as Urban in Iowa as set forth on Sheet No. 26.
- Service Classification No. 4 is applicable in Iowa to service areas Ъ. outside of the communities designated as Urban in (a) above, as set forth on Sheet No. 26.
- 2. Applicable to all secondary service supplied by the Company for general use which does not qualify under any other secondary rate.
- 3. Character of Service Supplied. Company will specify and provide a standard single and/or three phase alternating current secondary service voltage. Direct Current is supplied in limited quantities to existing premises in the downtown underground district of . St. Louis. Mo. Where Customer requires and Company supplies service at a primary service voltage, Customer shall furnish all transformers necessary to transform any part of the service to a secondary service voltage and in such case, the appropriate adjustments under Rider B will apply.

SHEET NO. ...

| CANCELLING SCHEDULE | NO. | · |  |
|---------------------|-----|---|--|

## SECTION D

#### SERVICE CLASSIFICATION NO. 4(M) MOV 1 6 1990 SMALL PRIMARY SERVICE RATE

- Energy Billing Demand. Customer's billing demand shall be used в. to apportion customer's kilowatthours to the kWh per KW energy rate steps for metered demands of 100 kW or greater. Where metered demands are less than 100 kW, the metered demand shall be used as the billing demand for purposes of apportioning kilowatthours only.
- с. Base Billing Demand. The Base Billing Demand shall be the lesser of a) the customer's billing demand established during the preceding May billing period, or b) October billing period, or c) the maximum billing demand established during any preceding summer billing period, but in no event less than 100 kW.
- D. Seasonal Billing Demand. The Seasonal Billing Demand shall be the customer's winter billing demand in excess of the customer's Base Billing Demand.
- Ε. Base and Seasonal Energy Apportioning. The kilowatthours for each winter billing period shall be apportioned to the Base and Seasonal Energy rate steps in the same proportion as customer's Base and Seasonal billing demands.
- F. Customers Without Prior Billing Determinants. Customers on this rate who did not establish a billing demand during preceding billing periods shall have all kilowatthours billed on the Base Energy rate steps during the succeeding winter billing periods. After subsequent billing periods are completed, the customer's billing during the preceding winter will be reviewed using the Base Billing Demand determined from the following May billing period and a refund given if appropriate.

- \*0. Cumulation of Services. Service taken through each meter will be billed separately, except that service taken through not more than one D.C., one single phase and one three phase meter or any combination of such meters by the same customer on the same premises may be cumulated for billing purposes; but the minimum monthly charge shall be the minimum charge per meter stated in the applicable service classification multiplied by the number of meters cumulated or the demand charge based on the arithmetical sum of the individual demands whichever is greater. Any additional services supplied will be billed for separately.
- \*7. <u>General Rules and Regulations</u>. In addition to the above specific rules and regulations, all of Company's General Rules and Regulations shall apply to the supply of service under these rates.

| URBAN AND RURAL SERVICE AREAS  URBAN AND RURAL SERVICE AREAS  SERVICE CLASSIFICATION NOS. 3 AND 4  GENERAL SERVICE RATES - (CONTINUED)  AUSOLUM  (CONTINUED)  *6. Rate Limitation. Where monthly use exceeds 2.5, 000 kilo- watthours, the average rate for all service including all applicable billing adjustments, other than sales or similar taxes, shall not exceed 2.7c per kilowatthour, pro vided, however, that this limitation shall not apply where the minimum monthly charge as set forth in the applicable service classification produces a higher average rate.  *7. Cumulation of Services. Service taken through each meter will be billed separately, except that service taken through not more than one D.C., one single phase and one three phase meter or any combination of such meters by the same customer on the same premises may be cumulated for billing purposes; but the minimum monthly charge shall be the minimum charge per meter stated in the applicable service classification multiplied by the number of meters cumulated or the demad charge based on the arithmetical sum of the individual demands whichever is greater. Any additional services supplied will be billed for separately *8. <u>General Rules and Regulations</u> . In addition to the above specific rules and regulations, all of Company's General Rules and Regulations shall apply to the supply of service under these rates.  *1. Midicates reissue. *1. Addition and regulations are in muary 20, 196 bit. G.
