- B. The customer shall be credited for an interruption that exceeds two hours or major fraction in excess of the initial two hours that the interruption continues.
- C. When an annual minimum usage charge is applicable and the customer fails to meet a usage minimum credit, the outage shall be applied against that minimum equal to 1/360th of the annual minimum charges associated with the portion of service disabled for each period of two hours or major fraction thereof that the interruption continues.
- D. Customers have up to 60 days (commencing 5 days after remittance of the bill) to initiate a dispute over charges or to receive credits.

2.8.2 Cancellation of Credit

Where the Company cancels a service or the provision of equipment and the final service period is less than the monthly billing period, a credit will be issued for any amounts billed in advance, prorated at 1/30th of the monthly recurring charge for each day the service was rendered or the equipment was provided. 3.5 Calculation of Distance

Usage charges for all mileage sensitive products are based on the airline distance between rate centers associated with the originating and terminating points of the call.

The airline mileage between rate centers is determined by applying the formula below to the vertical and horizontal coordinates associated with the rate centers involved. The company uses the rate centers and associated vertical and horizontal coordinates that are produced by Bell Communication Research in their NPA-NXX V&H Coordinate Tape and AT&T Tariff.

Formula:
$$\sqrt{\frac{(V1 - V2)^2 + (H1 - H2)^2}{10}}$$

3.6 Minimum Call Completion Rate

The Company will engineer for a call completion rate of 99% (number of calls completed/number of calls attempted) during peak use periods for Feature Group D services.

3.7 Special Services

A Special Service is deemed to be any service requested by the customer for which there is no prescribed rate in this tariff. Special Services charges will be developed on an individual case basis and filed in this tariff.

Special Service charges will be based on the estimated cost of furnishing such services including cost of operating and maintaining such a service, the cost of equipment and materials used in providing such a service, the cost of installation including engineering, labor supervision, transportation, and the cost of any other specific item associated with the particular Special Service request.
