1.2 Concurrences

The Company concurs in the exchange boundaries adhered to by the incumbent local exchange companies in the state.

With respect to resold services of the facilities-based carriers Southwestern Bell, Verizon, Sprint and Spectra, the Company concurs in the regulations and restrictions pertaining to that resold service found in the underlying carriers' tariffs.

The Company reserves the right to cancel or amend any concurrences by amendment to this tariff whenever the Company deems that doing so would be in the best interest of the Company and its customers.

Service Commission

REC'D JUN 08 2001

Section 1. General (cont'd)

## Service Commission

1.5 Application of Tariff

The Company's services are available on a facilities-based and resale basis, or a combination thereof, when and where available. The Company not may offer all of its services in all areas of the state. Certain services require that the Company have interconnection agreements with incumbent local exchange companies. In areas where no such agreement exists, the Company may not offer all of its services. Certain services require that certain facilities be available to the Company. If facilities are not available, the service may not be available. The Company is not required to deploy facilities to offer services, although it may be willing to do so under the Special Construction section of this tariff if the customer is willing to incur the cost of such deployment.

1.6 Application of Rates

Unless otherwise indicated in this tariff, rates are not useage, time-of-day, day-of-week or distance sensitive. In those rare instances in which rates are so sensitive, the tariff will indicate the nature of the sensitivity and clarify the difference in and application of rates.

1.7 Incompatible Services

Certain services, due to spectrum use and equipment incompatibility, may not be able to be used at a single location at the same time. It is the responsibility of the customer to advise the Company about the other services the customer has through other carriers and the equipment the customer intends to use with the Company's service to minimize the potential of incompatible services. The Company does not warrant that its services can be used together at the same location; in fact, the Company attempts to note, where applicable, such incompatibility in this tariff. Due to the vast array of services and equipment, the Company cannot reasonably assert that it has noted every such incompatibility, and cannot be responsible if customers knowingly order incompatible services from the Company or unwittingly order incompatible services from the Company and another carrier.

Customers who order avdanced services, such as high-speed, dedicated and data services, are presumed to understand the limitations of their equipment, such as computers, switchboards and modems, and whether the services ordered will function with the Company's service. The Company is not liable for services that do not perform as anticipated due to the failure of the customer to connect proper and sufficient customer-premises equipment.

Section 2. Technical Terms and Abbreviations (cont'd)

Missouri Public Service Commission

Local Calling: A completed call or telephonic communication between a calling Station and any other Station within the local service area of the calling Station.

Local Exchange Carrier: A company that furnishes exchange telephone service.

Non-Recurring Charges: The one-time charges for services or facilities, including but not limited to charges for construction, installation, or special fees, for which the Customer becomes liable at the time the service Order is executed.

Presubscription: An arrangement whereby a Customer may select and designate to the Company a Telecommunications Carrier it wishes to use, without an access code, for completing toll Calls. The selected Exchange Carrier is referred to as the End User's Presubscribed Interexchange Carrier (PIC).

Recurring Charges: The monthly charges to the Customer for services, facilities and equipment, which continue for the agreed upon duration of the service.

Regular Business Hours: 8:00 am through 5:00 p.m., Monday through Friday, excluding defined Holidays.

Service Order: The request for local exchange services executed by the Customer and the Company in a format specified by the Company.

Station: Terminal equipment from or to which calls are placed.

Service Commission

Missouri Public

REC'D JUN 08 2001

Section 3. Regulations (cont'd)3.4 Customer Equipment and Channels (cont'd)3.4.4 Inspections

1) At reasonable times, the Company test and inspect equipment located on the Customer's premises to verify that it is maintained and operated according to Company specifications.

2) If protective requirements for Customer-provided equipment are not in place, the Company may take action to protect its facilities, equipment, and personnel.

3) Failure to properly maintain or operate equipment according to Company specifications or to maintain required safety measures may result in the immediate disconnection or removal of company equipment or facilities, without any alteration in the Customer's liability to pay for service.

3.5 Deposits

1) The Company does not take deposits.

2) The Company is not required to extend service to potential customers who do not meet the Company's standards for creditworthiness.

3.6 Payment Arrangements3.6.1 Payments for Service

The Customer is responsible for the payment of all charges for facilities and services furnished by the Company to the Customer.

3.6.2 Taxes

The Customer is responsible for payment of any fees (including franchise and right-of-way fees), charges, universal service charges, surcharges required by law or Commission Order, and taxes imposed by any local, state, or federal government on or based upon the provision, sale or use of network services, excluding taxes on the Company's net income. Fees, charges, and taxes imposed by a city, county, or other political subdivision will be collected only from those Customers receiving service within the boundaries of that subdivision.

3.6.3 Billing and Collection of Charges

The Customer is responsible for payment of all charges incurred by the Customer or other users for services and facilities furnished to the Customer by the Company.

1) Non-recurring charges are due and payable within 21 days after the date of the invoice.

2) The Company shall present invoices for recurring charges monthly to the Customer, in advance of the month in which service is provided, due and payable within 21 days after the date of the invoice. When billing is based upon customer usage, usage charges will be billed monthly for the preceding billing period.

Section 3. Regulations (cont'd)

## Service Commission

3.6 Payment Arrangements (cont'd)3.6.6 Cancellation of Application for Service

1) Applications for service are noncancellable unless the Company otherwise agrees. Where the Company permits Customer to cancel an application for service prior to the start of service or prior to any special construction, no charges will be imposed except for those specified below.

2) Where, prior to cancellation, the Company incurs any expenses in installing the service or in preparing to install the service, a charge equal to all of the costs the Company incurred, less net salvage, shall apply, but this charge shall not exceed the sum of all recurring and nonrecurring charges assessed either for the minimum period of services ordered or the length of the contract for services.

3) Where the Company incurs any expense in connection with special construction, a charge equal to all of the costs incurred, less net salvage, applies.

3.6.7 Changes in Service Requested

If the Customer makes or requests material changes in circuit engineering, equipment specifications, service parameters, premises locations, or otherwise materially modifies any provision of the application for service, the Customer's installation fee shall be adjusted accordingly to recover all costs associated with such change.

3.7 Allowances for Interruptions in Service3.7.1 General

1) A credit allowance will be given when service is interrupted, except as follows. A service is interrupted when it becomes inoperative due to the failure of the Company's facilities or equipment.

2) An interruption period begins when the Customer reports the service outage and, if necessary, releases equipment or facilities for testing and repair.

3) If the Customer reports an outage declines to release equipment or facilities for testing and repair, the service or facility is not considered to be interrupted. No credit allowances will be made.

4) If the Customer elects to use another means of communications during the period of interruption, the Customer must pay the charges for the alternative service used.

Section 3. Regulations (cont'd)3.7 Allowances for Interruptions in Service (cont'd)3.7.2 Limitations of Allowances

No credit allowance will be made for any interruption in service:

- 1) Due to circumstances or causes beyond the control of the Company;
- 2) During any period in which the Company is not given full and free access to its facilities and equipment for the purposes of investigating and correcting interruptions;
- 3) During any period in which the Customer continues to use the service on an impaired basis;
- 4) During any period when the Customer has released service for maintenance or for a Customer ordered change in service;
- 5) That was not reported to the Company within ten (10) days of the date that service was affected.

3.7.3 Application of Credits for Interruptions in Service

1) Credits for interruptions flat-rated service, a credit allowance is applied on a pro rate basis against the rate depends upon the length of the interruption. Only those facilities on the interrupted portion of the circuit will receive a credit.

2) For calculating credit allowances, every month is considered to have thirty (30) days.

3) A credit allowance will be given for interruptions of 15 minutes or more. Multiple interruptions of 15 minutes or more during any one 24-hour period will be aggregated into a single interruption.

4) Interruptions of 24 Hours or Less: If the length of interruption to be credited is 15 minutes or more, but less than 3 hours, 1/10 day credit will be given. If the length is 3 hours or more, but less than 6 hours, 1/5 day credit will be given. If the length is 6 hours or more, but less than 12 hours, 1/2 day credit will be given. If the length of interruption to be credited is 12 hours or more, one day credit will be given.

5) Continuous Interruption Over 24 Hours and Less Than 72 Hours. Interruptions over 24 hours and less than 72 hours will be credited 1/5 day for each three-hour period or fraction thereof that occurs following the expiration of the initial 24-hour period. No more than one full day's credit will be allowed for any period of 24 hours.

6) Interruptions Over 72 Hours. Interruptions over 72 hours will be credited 2 days for each full 24-hour period that occurs following the expiration of the initial 72-hour period. No more than 30 days credit will be allowed for any one month period.

7) For any services charged by the minute and not flat-rate, the Company will provide a credit equal to one minute of applicable service for calls that are interrupted or subject to inadequate transmission. (A)

Service Commission

REC'D JUN 08 2001

Section 3. Regulations (cont'd)

Service Commission

3.7 Allowances for Interruptions in Service (cont'd)3.7.4 Cancellation For Service Interruption

Cancellation or termination for service interruption is permitted only if any circuit experiences a single continuous outage of at least 8 hours or cumulative service credits equaling 16 hours in a continuous 12-month period. The right to cancel applies only to the circuit subject to the outage or cumulative service credits. Customer must make a cancellation request in writing within 30 days of the outage.

3.8 Cancellation of Service/Termination Liability

If a Customer cancels a service order or terminates services before the completion of the term (set either by contract or a minimum billing period), Customer agrees to pay termination liability charges, of all unpaid non-recurring charges, any disconnection, early cancellation or termination charges and all recurring charges for the balance of the term.

3.9 Customer Liability for Unauthorized Use of Service3.9.1 Unauthorized Use of Service

1) Unauthorized use of service occurs when a person or entity that does not have authority to use it, obtains the Company's services, or a person or entity that otherwise has authority to use it, uses or obtains it fraudulently, or uses services that are not authorized.

2) The following activities are examples of fraudulent use:

a) Transmitting a message, locating a person, or otherwise giving or obtaining information by way of the service, without paying for it,

b) Avoiding payment of all or a part of any of the Company's charges by making, rearranging or tampering with connections not authorized by the Company services or by using fraudulent means or devices, tricks, schemes, false or invalid numbers, false credit devices or electronic devices; and

c) Toll Free callers using the service with the intent of gaining access to a Customer's outbound calling capabilities on an unauthorized basis.

3) Customers are advised that use of telecommunications equipment and services, carries a risk of various forms of telecommunications fraud. Customers should take all necessary steps to restrict access to their facilities and equipment to detect and prevent unauthorized use of the equipment and services provided by the Company.

3.11 Transfers and Assignments

The Customer may not assign or transfer its rights or duties in connection with the services and facilities provided by company without the written consent of the Company.

3.12 Notices and Communications

1) The Customer shall provide an address to which the Company shall deliver all notices and other communications except that Customer may also designate a separate address to which the Company's bills for service shall be sent.

2) The Customer may establish either a street address as its mailing address for such notices described above, or may establish an e-mail address as the address to which notices and/or bills are to be sent.

3) Except as otherwise provided in this tariff, all notices or other communications required to be given pursuant to this tariff will be in writing (either hard copy or by e-mail). Materials mailed shall be presumed to have been delivered on the third business day following mailing, materials sent by overnight delivery shall be presumed to have been delivered on the next business day following mailing and materials e-mailed or faxed shall be presumed to have been delivered the next business day following transmission, or when actually received or refused by the addressee, whichever occurs first.

4) The Company or the Customer shall advise the other party of any changes to the addresses designated for notices, other communications or billing.

3.13 Operator Service Requirements

Company provided intrastate operator assisted communications services will observe the following requirements:

1) Company will not bill for incomplete calls where answer supervision is available. Company will not bill for incomplete calls and will remove any charges for incomplete calls upon subscriber notification or Company's knowledge.

2) The caller and billed party, if different from the caller, will be advised that the Company is the operator service provider at the initial contact.

3) Rate quotes will be given upon request, at no charge, including all rate components and any additional charges.

4) Only tariffed rates approved by this Commission for Company shall appear on any local exchange telephone Company (LEC) billings.

5) Company shall be listed on the LEC billing if the LEC has multi-Company billing ability.

6) Company will employ reasonable calling card verification procedures, acceptable to the Telephone Company issuing the calling card.

3.13 Operator Service Requirements (cont'd)

7) Company will route all 0 — or 00 — emergency calls in the quickest possible manner to the appropriate local emergency service provider, at no charge.

8) Upon request, Company will transfer calls to another authorized interexchange Company or to the LEC, if billing can list the caller's actual origination point.

9) Company will refuse operator services to traffic aggregators that block access to other Companies.

10) Company will assure that traffic aggregators will post and display information including: that Company is the operator service provider; detailed complaint procedures; and instructions informing the caller on procedures to reach the LEC operator and other authorized interexchange Companies.

3.14 Rights And Responsibilities Of Missouri Residential Telephone Customers

Pursuant to Missouri Public Service Commission Rule 240-33.060 (3), Socket will provide its residential customers with the following information at the time service is established:

## RIGHTS AND RESPONSIBILITIES OF MISSOURI RESIDENTIAL TELEPHONE CUSTOMERS

This information is provided in accordance with the rules of the Missouri Public Service Commission and explains your rights and responsibilities as a residential telephone customer.

## Your Telephone Bill

Unless you select an alternative billing method, You'll receive a telephone bill from us each month. Socket provides local and long distance telephone service. Payment in full is due within 21 days of the date of the bill. If we do not receive your payment within 21 days, your service is subject to suspension or disconnection. When paying by mail, be sure to allow enough time for your payment to reach us by the due date.

## Payment Arrangements

Payments must be sent to Socket by either mailing your payment, establishing an automatic billing account or by e-mailing in the necessary information to pay your bill. Payment for service may be by credit card, check or cash (do not mail cash). If you are temporarily having difficulty paying your telephone bill, please call Socket immediately at 1-800-762-5383. By doing this, you may avoid having your phone service suspended or disconnected.

Section 3. Regulations (cont'd)3.14 Rights And Responsibilities Of Missouri Residential Telephone Customers (cont'd)

## Disconnection or Suspension of Telephone Service

Your telephone service is subject to disconnection or suspension for any of the reasons listed below. If service is disconnected, a new telephone number may be assigned and you will be required to pay installation charges again. If service is suspended, your telephone number is reserved for 10 days and you will not be charged installation charges again.

1. Nonpayment of an undisputed delinquent account. Your service will not be discontinued for nonpayment of a delinquent charges until five days after a charge has become delinquent. Additionally, Socket will make reasonable efforts to contact you at least 24 hours in advance prior to disconnecting your telephone service.
2. Unauthorized use of telephone utility equipment or network in a manner which creates an unsafe condition or creates the possibility of damage or destruction to such equipment.
3. Refusal after reasonable notice to permit inspection, maintenance, or replacement of telephone utility equipment.
4. Misrepresentation of identity in obtaining telephone utility service.
5. Incurring charges and evidencing an intent not to pay such charges when due.

## Reconnection of Service

After local telephone service has been discontinued, Socket will restore your service when the reason for the discontinuance has been remedied. Before restoring your service, the following will be required:

1. Payment for all undisputed amounts must be received by Socket.
2. Installation charges must be paid again if your service has been disconnected. Installation charges will not be charged if your service has been suspended.
3. An additional deposit or advance payment may be required.

## Procedures for Handling Inquiries and Complaints

Telephone inquiries may be directed to Socket at 1-800-762-5383. Written inquiries may be directed to Socket, 810 Cherry Street, Columbia Missouri, 65201

- If Socket cannot resolve your complaint, you may call the Missouri Public Service Commission, located at Governor's Office Building, 200 Madison St, Jefferson City, Missouri, 65101, toll free at 1-800-392-4211 to file an informal complaint.

- If your complaint cannot be resolved informally, you may file a formal complaint in writing with the Missouri Public Service Commission at their mailing address: P.O. Box 360, Jefferson City, Missouri, 65102.

- Also the Missouri Office of the Public Counsel, representing the public before the Public Service Commission, has an office at the Governor's Office Building, Jefferson City, Missouri 65101. The Public Counsel's telephone number is 1-573-751-4857.

Section 3. Regulations (cont'd)

## Service Commission

3.15 Caller ID

This feature enables the Customer to view on a display unit the Calling Party Directory Name and/or Number (CPN) on incoming telephone calls. When Caller ID is activated on a Customer's line, the CPN of incoming calls are displayed at the called CPE during the first, long silent interval of the ringing cycle.

Per line blocking for blocking of CPN will be available upon request, at no charge, ONLY to the following entities for lines over which the official business of the agency is conducted, including those at the residences of employees/volunteers, where an executive officer of the agency registers a need for blocking and provides the required certification to Applicant: Private, nonprofit, tax exempt, domestic violence intervention agencies, and Federal, state, and local law enforcement agencies.

The CPN will not be transmitted from a line equipped with this capability. Per line blocking is operational on a continuous basis but can be deactivated by the Customer by dialing an access code immediately prior to placing a call. Line blocking Customer can unblock their CPN information on a per call basis, at no charge, by dialing an access code (\*82 on their touch tone pad or 1182 from a rotary phone) immediately prior to placing a call.

A Customer may prevent the delivery of their calling name and/or number to the called party by dialing an access code (\*67 on their touch tone pad or 1167 from a rotary phone) immediately prior to placing a call. The access code will activate per call blocking, which is available at no charge. If the calling party activates blocking, the CPN will not be transmitted across the line to the called party. Instead, Calling Line Identification Customer will receive an anonymous indicator. This anonymous indicator notifies the Caller ID Customer that the calling party has elected to block the delivery of their name and telephone number. The blocking of CPN will not be provided on calls originating from Customer Owned Pay Telephones. If the Caller ID Customer also subscribes to Anonymous Call Rejection, the calling party will be routed to a telephone company recording advising the caller that the called party will not accept calls whose CPN has been blocked.

Any Customer subscribing to Caller ID will be responsible for the provision of a display device which will be located on the Customer's premises. The installation, repair, and technical capability of that equipment to function in conjunction with the feature specified herein will be the responsibility of the Customer. Company assumes no liability and will be held harmless for any incompatibility of this equipment to perform satisfactorily with the network features described herein.

Telephone CPN information transmitted via Caller ID is intended solely for the use of the Caller ID subscriber. Resale of this information is prohibited by this tariff. CPN will not be displayed if the called party is off-hook or if the called party answers during the first ring interval. CPN will be displayed for calls made from another central office only if it is linked by appropriate facilities. CPN will be displayed for calls made from another central office only if it is linked by appropriate facilities. Caller ID is not available on operator-handled calls.

3.16 Call Trace/Anonymous Calls

## For Verizon exchanges:

Company's call trace capability is not available on a per call basis. If a Customer wishes to have this capability, they must presubscribe to Company's Call Tracing Service. A monthly recurring charge applies. A Customer who pre-subscribes to the Company's Call Tracing Service and wishes to attempt a Call trace must immediately after the call press \*57, and hold the line. A recording will inform the Customer if the trace was successful, and how to proceed by contacting 911 and/or Verizon Nuisance Call Bureau. The recording will provide the number of the Nuisance Call Bureau. Under no circumstances will the Customer be provided the calling number. However, the Nuisance Call Bureau will follow up with law enforcement authorities according to Verizon protocol.

## For Sprint Exchanges:

Customers receiving annoying or anonymous calls may request a telephone number change which will be provided at no charge by Socket, or the customer may utilize Call Trace on a per activation basis with an associated charge per use. Call Trace allows the customer to dial \*57 to automatically request that the following information be recorded: a) the originating telephone number b) the date and time of the call and c) the date and time call trace was activated. When Call Trace successfully identifies a calling number, a recording instructs the customer to call a toll free number which will assist the customer. Should the customer decide to prosecute the originating party, the customer should contact Socket for further instructions. Activation of Call Trace never authorizes Socket to provide the called party with the calling party telephone number. Call Trace is a feature which must be activated through contact with company's business office.

## For Southwestern Bell exchanges:

Customers receiving annoying or anonymous calls may request (1) a telephone number change, which will be provided at no charge by company's name or (2) the capability to utilize Call Trace on a per activation basis, as needed. Call Trace allows the customer to dial a code (\*57) to automatically request that the following information be recorded: the originating telephone number; the date and time of the call; and the date and time call trace was activated. When Call Trace successfully identifies a calling number, a recording instructs the customer to call a toll free number, which will activate a Voice Response Script and assist the customer in establishing an open file. Should the customer decided to prosecute the call originating party, the customer should contact Socket for further instructions. Activation of Call Trace never authorizes Socket to provide the called party with the name or telephone number of the calling party. In the event that Call Trace is not available or is unable to resolve the case, it may be necessary to place a manual trap on the customer's telephone line.

REC'D JUN 08 2001

Service Commission

4.4 Digital Subscriber Line Services4.4.1 Description

Digital Subscriber Line Services (xDSL) are non-switched local technologies that allow multiple forms of data, voice and video to be carried over standard twisted pair copper on the local loop between the central office and the customer site. xDSL services are available only where appropriate facilities are in place. xDSL is a generic term encompassing ADSL, SDSL, HDSL, IDSL, VDSL and other forms of DSL as they are developed. xDSL services are offered over dedicated facilities that use the existing copper wires from the Company's central office facilities (including collocations and near locations) to the subscriber premises, that require particular electronic equipment at such central office and the subscriber premises and that send high speed signals up and down those copper wires. xDSL technologies do not use the public switched network, do not have telephone numbers assigned and cannot presently be used to gain access to the public switched network. If these services change so that they may be used to gain access to the public switched network, this tariff will be amended accordingly prior to permitting such access.

Customers may only purchase xDSL services from this tariff if the service is used to transmit data and/or to provide access for long distance services when more than 90% of the long distance usage is within the state. This service may not be used to complete local switched voice calls.

4.4.2 Rates

The Company will provide xDSL services to customers under rates on an individual case basis (ICB). ICB rates will be dependent on the company's cost of providing the service to the customer, including, but not limited to, necessary construction to connect the customer or to condition existing facilities, the customer's equipment needs and contract term. The ICB rates will be structured to recover the company's cost of providing the service and will be made available to customers in a non-discriminatory manner. Terms of specific ICB contracts will be made available to the Commission Staff on a proprietary basis upon request.

4.5 Integrated Services Digital Network4.5.1 Basic Rate Interface ("BRI")4.5.1.1 Description

ISDN-BRI service provides two bearer plus one data signaling channel access to the public switched network for the transmission of circuit switched voice, circuit switched data and packet switched data on an incoming and outgoing basis. BRI lines have two 64Kbps channels. Each channel can have a separate telephone number or the channels can be combined to create a single, higher-bandwidth channel. BRI service does not include the underlying access line.

4.5.1.2 Rates

Standard ISDN-BRI Package:

For Exchanges in the Service Area of:	Monthly rate	Non-Recurring Charge	Restrictions on Use
Sprint	\$70	\$400	
Southwestern Bell	\$200	\$600	
Verizon	\$260	\$100	limited to 100 hours per month*
Spectra	\$260	\$100	limited to 100 hours per month*

\* additional minutes are available for \$0.30 per minute

Section 4. Local Services and Rates (cont'd)4.5 Integrated Services Digital Network (cont'd)4.5.3 Primary Rate Interface Inbound-Only4.5.3.1 Description

ISDN PRI Inbound-Only service provides twenty-four 64 Kbps channel DS1 for telecommunications service to the public switched network for the transmission of circuit switched voice, circuit switched data and packet switched data. The basic channel structure for ISDN PRI Inbound-Only is twenty-three 64 Kpbs "bearer" B-Channels and one 64 Kpbs "control" D-Channel. The customer has the option to activate up to 23 B-Channels on the first ISDN PRI and up to 24 B-Channels on additional ISDN PRI Inbound-Only arrangements. The B-Channels can be used to connect the Customer's CPE to the Public Circuit Switched Network for only inward network access. Calling Number Delivery, Called Number Delivery, and Hunting functionality are inherent to this service. Telephone numbers for use on PRI Service are available. Additional listings can be obtained. ISDN PRI service provides capability for the transmission of digital signals only. Clear Channel Capability and Extended Superframe Format are inherent to the service.

This service does not allow for the origination of phone calls from the CPE. As such it cannot use Operator Assistance, Directory Assistance, or E911 services. The customer must have an alternate means of reaching emergency services, including but not limited to a PRI ISDN circuit that is not ISDN PRI Inbound-Only.

Both Primary Rate Interface and Primary Rate Interface Inbound-Only may be configured with an Out of Calling Scope Option. This is a foreign exchange offering which allows a customer to obtain exchange service from a mandatory local calling area other than the mandatory local calling area where the customer is physically located.

## Service Commission

4.7 Private Line Services4.7.1 Description

Private Line Services are non-switched access line services that allow data, voice or video to be carried between the Company's routing equipment and the customer site. Private line services are available only where appropriate facilities are in place. Private line service is a generic term encompassing all unswitched access line services offered over dedicated facilities.

Customers may only purchase private line services from this tariff if the service is used to transmit data and/or to provide access for long distance services when more than 90% of the long distance usage is within the state. This service may not be used to complete local switched voice calls.

4.4.2 Rates

The Company will provide private line services to customers under rates on an individual case basis (ICB). ICB rates will be dependent on the company's cost of providing the service to the customer, including, but not limited to, necessary construction to connect the customer or to condition existing facilities, the customer's equipment needs and contract term. The ICB rates will be structured to recover the company's cost of providing the service and will be made available to customers in a non-discriminatory manner. Terms of specific ICB contracts will be made available to the Commission Staff on a proprietary basis upon request.

#### **4.8 Socket DS3 Service**

##### **4.8.1 Description**

Socket DS3 Service is a dedicated high capacity channel that provides for the simultaneous two-way transmission at a transmission speed of 44.736 Mbps. The service is available between a customer-designated premises and a Socket Central Office where multiplexing or switching are performed. If the customer purchases the DS3 Port rate element, the customer will have access to and from the public switched telephone network.

Customers may choose to have this service provisioned with an Out of Calling Scope Option. (T)  
(T)

##### **4.8.2 Rate Elements**

DS3 Cross-Connect - Denotes the DS3 connection between two DS 3 channels in the same serving office. This charge applies when it is necessary to connect a DS3 Trunk facility with a DS3 Transport facility in the same service office.

DS3 Port - Denotes the central office switching facility that provides the customers with access to the public switched telephone network.

DS3 Transport - Denotes the 44.736 Mbps. communications path between the service office serving the customer-designated premise and a Socket Central Office. This rate element does not apply if the customer is served directly by a Socket Central Office.

DS3 Trunk - Denotes the 44.736 Mbps communication path between the customer designated premise and the service office for that premise.

## **4.8 Socket DS3 Service**

### **4.8.1 Description**

Socket DS3 Service is a dedicated high capacity channel that provides for the simultaneous two-way transmission at a transmission speed of 44.736 Mbps . The service is available between a customer-designated premises and a Socket Central Office where multiplexing or switching are performed. If the customer purchases the DS3 Port rate element, the customer will have access to and from the public switched telephone network.

This service is only available in exchanges where Southwestern Bell Telephone, L.P. operates as the incumbent local exchange carrier.

### **4.8.2 Rate Elements**

DS3 Cross-Connect - Denotes the DS3 connection between two DS 3 channels in the same serving office. This charge applies when it is necessary to connect a DS3 Trunk facility with a DS3 Transport facility in the same service office.

DS3 Port - Denotes the central office switching facility that provides the customers with access to the public switched telephone network.

DS3 Transport - Denotes the 44.736 Mbps. communications path between the service office serving the customer-designated premise and a Socket Central Office. This rate element does not apply if the customer is served directly by a Socket Central Office.

DS3 Trunk - Denotes the 44.736 Mbps communication path between the customer designated premise and the service office for that premise.

Section 6. Promotional Offerings

Service Commission

6.1 General

The Company may, upon Commission approval, offer specific incentives during specified promotional periods. The Company will provide written notice to the Commission seven days prior to the commencement of a promotional period, specifying the terms of the promotion, the specific service offered, and the location and dates of the promotion period. The written notice will be filed in this Promotional Offerings Section of the Company's Tariff. Any promotions will be offered in a non-discriminatory manner.

Section 7. Access Services and Rates7.1 Access Services

This section applies to intrastate access service supplied to customers for origination and termination of traffic to and from central office codes directly assigned to Socket. This section applies only to services used by a customer to originate or terminate intrastate communications, wherein all points of origination and termination are located within the state.

All restrictions stated in the tariffs referenced in Section 7.2 apply as set forth in those tariffs. (A)

7.2 Access Concurrence

In Southwestern Bell's service territory, the Company concurs in the rates, rules, terms, conditions and regulations, including footnotes thereto, applying to access services as set forth in the presently approved tariffs of Southwestern Bell Telephone Company. The Company reserves the right to cancel the above concurrence, subject to appropriate regulatory approval.

In Sprint's service territory, the Company concurs in the rates, rules, terms, conditions and regulations, including footnotes thereto, applying to access services as set forth in the presently approved tariffs of Sprint Corporation. The Company reserves the right to cancel the above concurrence, subject to appropriate regulatory approval.

In CenturyTel's service territory, the Company concurs in the rates, rules, terms, conditions and regulations, including footnotes thereto, applying to access services as set forth in the presently approved tariffs of CenturyTel of Missouri, LLC. The Company reserves the right to cancel the above concurrence, subject to appropriate regulatory approval. (T)

In Spectra's service territory, the Company concurs in the rates, rules, terms, conditions and regulations, including footnotes thereto, applying to access services as set forth in the presently approved tariffs of Spectra Communications Group, LLC. The Company reserves the right to cancel the above concurrence, subject to appropriate regulatory approval. (T)

Section 10.1 – Remote Call Forwarding (Continued)

C. Rates and Charges

1. The following charges are for the RCF Service only and are in addition to applicable charges for other services.

Remote Call Forwarding per access path                      \$16.95 per month.

2. Usages Charges – The Customer is responsible for any applicable charges between the forwarding location and the answering location.

D. Directory Listings

One listing covering the exchange in which the answering location is located is provided at no charge. Additional Directory Listings may be obtained at the applicable rates for additional Directory Listings.

Section 10.1 – Stand Alone Universal Emergency Services

- A. Consistent with Section 3.1.8 Universal Emergency Telephone Number Service (“E-911”) and subject to the terms and conditions of this tariff, Socket will provide E-911 service separate and apart from other Local Exchange Services, including basic local exchange service. This service will only be provided when customer purchases unregulated information services such as Digital Subscriber Line services from Socket and/or any Socket affiliate.
