GENERAL SERVICES

PUBLIC TELEPHONE SERVICE - PAYSTATIONS

A. A public telephone is an exchange telephone installed at the Company's initiative or at its option, at a location chosen or accepted by the Company as suitable and necessary for furnishing service to the general public, and is not a substitute for business service.

B. Public Telephones are equipped with multi-coin wall type telephones.

C. Public telephones are installed primarily for the use of the general public in making outgoing calls. It is contemplated that the occupants of the premises in which the public telephones are located have subscribed or shall subscribe for such service as is necessary in the judgement of the Telephone Company in the conduct of their business. The public telephones are supplemental to such subscribers' telephones, and their telephone numbers will not be listed in the directory, nor shall the subscriber on whose premises they are located be permitted to advertise public telephone paystation numbers.

D. The Company reserves the right to decide whether to furnish public paystation service on party or private lines, depending upon facilities available, and the needs for the service.

E. In all cases the Company furnishes and displays such of its standard signs as necessary to properly direct customers to the telephones.

F. Rates: Local messages from public telephones - paystations - are charged for at the rate of 10¢ for each local call for approximately each five minutes of fraction thereof. Toll messages are charged for at the established toll rates.

G. Standard booths may be furnished for public telephone service at no charge when, in the judgement of the Company, they are required.

Payphone Service

JAN 15 1997

A. General Regulations

1. Payphone Service includes lines to which coin, coinless, card reader or a combination coin/card reader telephones may be attached.
2. Payphone Service is a two-way or, optionally, one-way originating only business exchange access line composed of the serving central office line equipment, all outside plant facilities needed to connect the serving central office with the customer's premises, and the Network Interface Device at the demarcation point. These facilities are Company-provided and maintained and provide access to and from the telecommunications network for long distance service and local calling.
3. In the case of one-way service, intercept treatment will be provided.
4. A maximum of one customer-provided instrument may be connected to any one Instrument or CO implemented coin line.
5. General Rules and Regulations found in other sections of this tariff are applicable to the provision of Payphone Service.
6. Directory listings may be provided under the regulations governing the furnishing of listings for business subscribers.
7. A Network Interface Device will be installed at a location mutually agreed upon by the Payphone Service Provider and the Company. The Network Interface Device is a company-provided jack or its equivalent. It is the point of connection between the telephone company owned wiring and wiring owned by the Customer.
8. One directory will be distributed to the Payphone Service Provider without charge for each payphone business exchange line.
9. Installation Charges and the appropriate Network Interface Device (NID) material charge are applicable for the installation, move or rearrangement of the NID on the customer's premises to establish or reestablish network access.

Customer-Owned Pay Telephone Service

MISSOURI
Public Service Commission

A. General

1. Customer-Owned Pay Telephone Service is offered for use with a customer-provided instrument-implemented pay telephone. (1) All attachments of Customer-Owned Pay Telephone service to the network must be made pursuant to the rules and regulations set forth in this Tariff.
2. Customer-Owned Pay Telephone Service is a two-way or, optionally, one-way originating only business exchange access line composed of the serving central office line equipment with Selective Class of Call Screening treatment (where available), all outside plant facilities needed to connect the serving central office with the customer's premises and the network interface. These facilities are Telephone Company-provided and maintained and provide access to and from the telecommunications network for long distance service and local calling.
3. Selective Class of Call Screening treatment enables the customer to restrict outgoing operator-handled calls from the service point to only those calls which are charged to a called telephone, a third number or a Calling Card account.
4. In the case of one-way service, intercept treatment will be provided (where available).
5. A maximum of one customer-provided instrument-implemented pay telephone may be connected to any Customer-Owned Pay Telephone Service Access Line.
6. Selective Class of Call Screening must be provided wherever available. Any customer who offers Customer-Owned Pay Telephone Service where Selective Class of Call Screening is not available, nonetheless assumes full and complete responsibility for all calls billed to his line.

APPROVED
APR 15 1997
BY 1st R.S. 5.1

Payphone Service (Cont'd)

JAN 15 1997 +

F. Features and Functions

1. Answer Supervision provides signaling on the line notifying the line that the called party has answered. This feature is an additive to the CO Implemented Coin Line.
2. Coin Collection and Return provides an electrical signal on a CO Implemented Line indicating to the payphone equipment to collect coin(s) from or return coin(s) to the calling party. This feature is an additive to the CO Implemented Coin Line.
3. Special Number Assignment is a specific number requested by the customer. This service is available where facilities are accessible and it is technical feasible to provide. This feature is an additive to the CO Implemented Coin Line or to the Instrument Implemented Payphone Service.
4. Selective Class of Call Screening will be provided where such facilities are available at the customer's option. Selective Class of Call Screening treatment enables the customer to restrict outgoing operator-handled calls, placed over the Telephone Company's network, from the service point to only those calls which are charged to a called telephone, a third number or a calling card.
5. Validation may be performed through Originating-Line Screening (OLS). OLS enables operator service providers to determine whether there are billing restrictions on the exchange access line from which a call originates. OLS service delivers codes on operator assisted calls to identify calls originating from privately owned payphones, inmate locations, and hotels/motels, etc. Rates for this service are found in the appropriate interstate access tariff, when facilities and service are available. The customer has the option to request either Selective Class of Call Screening or OLS.

Custom Calling Service

A. General

1. Custom Calling Service consists of one or more of the following features which provide special kinds of customer-controlled communications features on individual service lines. Custom Calling Service is available only through central offices which, at the Company's option, are appropriately equipped. Operating specifics may vary by central office equipment type but can be described generally as:

a. Call Waiting--Provides a signal to a customer using the telephone that another call is being attempted to his number. The customer can "hold" the original call to answer the incoming call. Cancel Call Waiting allows a subscriber to cancel his/her Call Waiting feature for the duration of a call. Upon release of that call, the Call Waiting feature is again implemented.

+b. Call Forwarding--Permits all calls directed to a customer number to be routed on to another dialable number, predetermined and activated by the customer. (See NOTE)

The Remote Access to Call Forwarding feature allows a user at a remote location to activate/deactivate the Call Forwarding feature. The user gains remote access to the Call Forwarding feature from a touch-tone telephone at a remote location. The Remote Access Call Forwarding feature uses an announcement system to provide interactive voice message prompting, which allows customers to verify the forwarded-to directory number. This verification process eliminates the need for successful completion of a courtesy call.

+c. Call Forwarding Busy—The Call Forwarding Busy Line feature allows all calls to a busy Directory Number to be forwarded to another Directory Number. The Call Forwarding Busy Line feature is active on the base Directory Number once the feature is assigned. When a call is made to a busy Directory Number with this feature, the call is routed to the specific remote station. This applies to calls originating within as well as outside the terminal group. When a call is made to an idle base station with this feature, the call is handled as a normal terminating call.

NOTE: The grade of transmission on calls forwarded and three-way calling may vary upon the distance and routing required to complete such calls; therefore, the normal grade of end-to-end transmission can not be guaranteed on such calls.

+i. Distinctive Ringing (Continued)

rather than installing additional lines. Distinctive ringing is limited to four distinctive ringing/call waiting tone patterns per line. Other possible applications include the following:

- Families with teenagers – This feature allows family members to determine for whom a call is intended. This provides household members with the convenience of avoiding calls not designated for them. The teenagers could also have their own listing in the printed directory.
- Roommates or doctors/lawyers who want separate numbers – Multiple Directory Numbers allow separate numbers and separate directory listings for each person without the expense of an additional line.
- Emergency alerting – By providing an additional number to be used only in urgent situations or only by a select few, a customer can determine the purpose of the call or from whom the call originated.

B. Conditions

1. Custom Calling Service may be provided on individual lines, Private Branch Exchange trunks and key business lines and may not be provided in conjunction with coin telephone services.

C. Special Promotions

The Telephone Company may, during certain promotional periods, waive the non-recurring charge and/or monthly rates for a specific period of time to a customer who wishes to participate.

Any promotional waiver or discounted rate will apply only one time per customer for each service in any given wire center prefix during the course of the promotional period.

The Company will notify the Commission in advance of these promotions and will supply copies of customer notification in order to obtain their approval.

CLASS SERVICE

Custom Local Area Signaling Services (CLASS) are a set of advanced call management features which will not be activated on certain FX lines, COCOT, and Public Coin Telephone Services. CLASS features may be offered in conjunction with Enhanced Business Services (EBS)¹ and consists of one or more of the following features:

- | | |
|---------------------------|-----------------------------|
| Automatic Callback | Selective Distinctive Alert |
| Automatic Recall | Selective Call Acceptance |
| Calling Number Delivery | Selective Call Forwarding |
| Calling Name Delivery | Selective Call Rejection |
| Customer Originated Trace | Unidentified Call Rejection |
| Directory Number Privacy | |

A. CLASS Service Description

1. Calling Number Delivery

Calling Number Delivery allows the subscriber, with the use of a display phone or adjunct device, to view the directory number of an incoming call before answering. Calling party information may indicate the Directory Number of the calling party or may indicate that the number of the calling party is private or unavailable.

+2. Caller Number Delivery on Call Waiting

Caller Number Delivery on Call Waiting allows calling name/number information to display on off-hook analog lines receiving an incoming call. When the subscriber receives a call waiting tone, caller ID data including name and number is displayed on the subscriber's customer premise equipment (CPE). The subscriber may then ignore the waiting call or flash to answer it.

3. Automatic Call Back

This feature enables the user to automatically place a call to the last incoming calling directory number of the terminal. The user dials the Automatic Callback access code

Enhanced Business Service, also known as Centrex Service, is a package of enhanced features offered to business customers with two or more touch tone access lines. Missouri Public Service Commission

3. Automatic Call Back (Continued)

*69 from a Touch Tone phone (1169 rotary dial), an announcement indicating that the Automatic Callback feature has been accessed along with the last incoming call directory number (if not marked Private) is played. After being prompted by an announcement, a user may press "1" to finalize the request or hang up to cancel the request. If the user chooses to invoke Automatic Callback and the call cannot be completed immediately because the called directory number is busy, the Automatic Callback feature enables the calling terminal to camp-on (camp-on is defined as having the network monitor the busy/idle status of the called address) to the last incoming calling directory number. When both lines are available, the calling subscriber is notified by a distinctive ring that the network is ready to place the call. When the subscriber picks up the telephone, the call is automatically placed (*89 to cancel).

4. Automatic Recall

This feature enables a user to automatically place a call to the last outgoing calling directory number associated with the terminal. The last outgoing calling number is defined as the address of the last party called by a user of the calling terminal. If the call cannot be completed because the called directory number is busy, then the Automatic Recall feature enables the calling terminal to camp-on (camp-on is defined as having the network monitor the busy/idle status of the called address) to the last outgoing calling directory number by dialing the access code *66 from a Touch Tone phone and (1166 rotary dial). When both the calling directory number and the last outgoing calling directory number are found to be idle, the calling terminal is given Automatic Recall ringback. If the ringback/notification is answered, then the last outgoing calling directory number is alerted. The calling terminal may cancel Automatic Recall activations at any time during the delayed processing phase by dialing the access code *86 from Touch Tone phone (1186 rotary dial).

5. Calling Name Delivery

The Calling Name Delivery feature delivers the name associated with the calling number (via an external database query) to called subscribers possessing special analog

A. CLASS Service Description (Continued)

2. Automatic Call Back (Continued)

Callback feature enables the calling terminal to camp-on (camp-on is defined as having the network monitor the busy/idle status of the called address) to the last incoming calling directory number. When both lines are available, the calling subscriber is notified by a distinctive ring that the network is ready to place the call. When the subscriber picks up the telephone, the call is automatically placed (*89 to cancel).

3. Automatic Recall

This feature enables a user to automatically place a call to the last outgoing calling directory number associated with the terminal. The last outgoing calling number is defined as the address of the last party called by a user of the calling terminal. If the call cannot be completed because the called directory number is busy, then the Automatic Recall feature enables the calling terminal to camp-on (camp-on is defined as having the network monitor the busy/idle status of the called address) to the last outgoing calling directory number by dialing the access code *66 from a Touch Tone phone and (1166 rotary dial). When both the calling directory number and the last outgoing calling directory number are found to be idle, the calling terminal is given Automatic Recall ringback. If the ringback/notification is answered, then the last outgoing calling directory number is alerted. The calling terminal may cancel Automatic Recall activations at any time during the delayed processing phase by dialing the access code *86 from Touch Tone phone (1186 rotary dial).

4. Calling Name Delivery

The Calling Name Delivery feature delivers the name associated with the calling number (via an external database query) to called subscribers possessing special analog customer premise equipment. The monthly charge for Calling Name Delivery includes 250 name deliveries (external database queries). Additional queries are billed at the rate set forth in Section D.

customer premise equipment. The monthly charge for Calling Name Delivery includes 250 name deliveries (external database queries). Additional queries are billed at the rate set forth in Section D.

6. Customer Originated Trace

This feature allows an end-user to request an automatic trace of the last incoming call. This provides an easy way to trace obscene, threatening, or harassing calls. After hanging up on a nuisance call, a user can invoke Customer Originated Trace by going off-hook, receiving dial tone, and then dialing the Customer Originated Trace access code *57 on Touch Tone phone (1157 rotary dial).

If the incoming line history block contains valid information about the last calling party, the user receives a confirmation announcement including instructions on following up on the trace request. If a call is traced that has been traced before, the user still receives the confirmation announcement. The customer using the feature would be required to contact the local authorities or police for further action. The customer is not provided the traced number. The results of a successful trace will only be provided to legal authorities with proper authorization.

If the customer makes or receives another call before activating the trace, or if the Call Waiting feature is activated prior to activating the trace, the Customer Originated Trace Feature will not record the correct number.

Customer Originated Trace will trace only those calls which are originated from a location served by the CLASS network. A per activation charge applies to each successful activation of this feature.

7. Selective Distinctive Alert

This feature allows residential and business users to pre-select which calls receive distinctive alerting treatment based on the telephone number of the calling party (up to

The results of a successful trace will only be provided to legal authorities with proper authorization.

If the customer makes or receives another call before activating the trace, or if the Call Waiting feature is activated prior to activating the trace, the Customer Originated Trace Feature will not record the correct number.

Customer Originated Trace will trace only those calls which are originated from a location served by the CLASS network. A per activation charge applies to each successful activation of this feature.

6. Selective Distinctive Alert

This feature allows residential and business users to pre-select which calls receive distinctive alerting treatment based on the telephone number of the calling party (up to 10 calling directory numbers). Distinctive Ringing is limited to four Distinctive Ringing/Call Waiting tone patterns per line. To access this feature, a user picks up the telephone and dials the Selective Distinctive Alert access code *61 from a Touch Tone phone (1161 rotary dial) and follows the recorded instructions. If the user is not assigned the feature or cannot access the feature, the user receives reorder or the local exchange carrier standard announcement indicating that the feature cannot be accessed.

calling directory numbers). Distinctive Ringing is limited to four Distinctive Ringing/Call Waiting tone patterns per line. To access this feature, a user picks up the telephone and dials the Selective Distinctive Alert access code *61 from a Touch Tone phone (1161 rotary dial) and follows the recorded instructions. If the user is not assigned the feature or cannot access the feature, the user receives reorder or the local exchange carrier standard announcement indicating that the feature cannot be accessed.

8. Selective Call Acceptance

This feature allows customers to accept incoming voice calls only from certain calling parties (up to 10 calling directory numbers). To access this feature, a user picks up the phone and dials the Selective Call Acceptance access code *64 from a Touch Tone phone (1164 rotary dial) and follows the recorded instructions. If the user is not assigned the feature or cannot access the feature, the user receives reorder or a telephone company standard announcement indicating that the feature cannot be accessed.

9. Selective Call Forwarding

This feature allows users to pre-select calls that will forward based on the telephone number of the calling party (up to 10 directory numbers). To access this feature, a user picks up the telephone and dials the Selective Call Forwarding access code *63 from a Touch Tone phone (1163 rotary dial) and follows the recorded instructions. If the user is not assigned the feature or cannot access the feature, the user receives reorder or a telephone company standard announcement indicating that the feature cannot be accessed.

If the Selective Call Forwarding feature is off, an announcement informs the user to press "3" to turn the feature on. If the user chooses to edit the screening list, the user can add, remove or review the entries currently on the list through interactive announcements.

CLASS SERVICE (Continued)

A. Class Service Description (Continued)

10. Selective Call Rejection

This feature screens terminating calls using user-specified screening list (up to 10 calling directory numbers). To access this feature, a user picks up the telephone and dials the Selective Call Rejection access code *60 from a Touch Tone phone (1160 rotary dial) and follows the recorded instruction. An incoming call from one of those 10 numbers is rerouted to a recorded message and your phone does not ring.

11. Unidentified Call Rejection

Unidentified Call Rejection automatically blocks any unidentified calls without ever ringing at the called party's telephone number. To activate this feature, a user picks up the telephone and dials the Unidentified Call Rejection access code *77 from a Touch Tone phone (1177 rotary dial). The calling party will receive a recorded announcement, the called party does not accept unidentified calls and suggests the calling party unblock delivery of the callers telephone and redial. The user can deactivate this feature by dialing the access code *87 from a Touch Tone phone (1187 rotary dial).

B. General Regulations

1. CLASS features can be provided on a stand alone basis or may be enhanced by use with Custom Calling Service features (Section 4, Sheets 6 - 7).
2. CLASS features are provided from specially equipped Telephone Company Central Offices and enable customers to access various features by dialing specific codes on either a rotary dial or Touch Tone calling basis.
3. The customer of record will be responsible for all rates and charges associated with the CLASS features as described in Rates and Charges. The customer of record will be charged for all features activated on his/her service and charged the applicable monthly subscription rate for each line on which a CLASS feature is provided.

4. CLASS features are available to customers who have rotary or Touch Tone service for calls within the CLASS Calling Service area. Customers with rotary service can access CLASS features by dialing "11" instead of "*".
5. A CLASS customer may employ available CLASS features only under the following conditions:
 - a. When both the CLASS customer and the other party involved in the call are served from the same central office, even if the other party does not subscribe to a CLASS feature.
 - b. When both the CLASS customer and the other party involved in the call are served from different central offices which are linked by facilities that can handle the delivery of the calling number, even if the other party does not subscribe to CLASS.
6. Customer Originated Trace will be billed a per activation charge as shown in the Rates and Charges section only when the attempt to trace and record the calling telephone number is successful. The results of a successful trace will only be provided to legal authorities with proper authorization. The Telephone Company will not be liable for damages if, for any reason an attempt is not successful.
7. The liability of the Telephone Company is as specified in the General Regulations section of this tariff. In addition to the provisions of the General Exchange Tariff, the calling party of customer releases and holds the Company harmless from any and all claims for damages caused or claimed to have been caused, directly or indirectly, by the transmission to a calling number delivery of a telephone number which the calling party has requested to be omitted from the telephone directory or has requested not be disclosed to any person
8. CLASS features will only be offered with one-party service, compatible PBX equipment and EBS. CLASS features cannot be activated for multi-party lines, certain FX lines, COCOT lines, Public and Semi-Public Coin Telephone Service.

CLASS SERVICE (Continued)

B. General Regulations (Continued)

Calling Number Delivery is the only feature currently available on PBX equipment. Selective Call Acceptance and Selective Call Forwarding, Selective Call Rejection, Unidentified Call Rejection and Selective Distinctive Alert are not available on EBS lines.

9. CLASS features will only be offered in exchanges which meet the necessary technical specifications. In addition, the Company reserves the right to offer specific CLASS features only when and where technologically feasible.

C. CLASS Features

+Per Call Privacy will block the delivery of the subscriber's number/name for one call only and may be activated by dialing an activation code *67 from a Touch Tone telephone (1167 rotary dial) immediately prior to placing a call. The activation code will initiate Per Call Privacy, which is available at no charge. If the calling party activates Per Call Privacy, the directory number/name will not be transmitted across the line. Instead, Calling Number/Name Delivery customers will receive an anonymous or private indicator. This anonymous or private indicator notifies the Calling Number/Name Deliver customer that the calling party has elected to block the delivery of the telephone number/name.

Per Line Privacy will automatically block delivery of the subscriber's telephone number/name on all calls. Per Line Privacy for the delivery of the calling number/name is available upon request, at no charge, to the following entities and their employees/volunteers, for lines over which the official business of the agency registers with the Company a need for privacy:

- a. private, nonprofit, tax-exempt, domestic violence enforcement agencies
- b. federal, state and local law enforcement agencies

A. Overview

Today's communications network involves many special networks, physical transmission facilities, and controllers of various types, including computers. ISDN provides integrated access to circuit-switched and packet-switched networks in which all the various needs of the independent networks can be accommodated by a single transport network that handles both voice and data traffic.

Conforming to the International Telecommunication Union-Telecommunication Standardization Sector (ITU-TS) [formerly International Telegraph and Telephone Consultative Committee (CCITT)] recommendations, ISDN is an integrated digital network providing end-to-end connectivity, and supporting a wide range of services. These services include voice and non-voice (that is, data), accessed by users through a set of standard multipurpose user-network interfaces.

Two interfaces defined in the ITU-T (formerly CCITT) recommendations govern the connectivity between switching equipment and customer equipment:

- o Basic Rate Interface (BRI)
- o Primary Rate Interface (PRI).

Both interfaces allow voice and data services simultaneously. Also, both are designed to support both circuit-switched and packet-switched connections.

The idea behind ISDN's single transport network is to provide a single communication interface for the customer so that terminal equipment can be plugged into an outlet as easily as a plain old telephone service (POTS) telephone is plugged in.

Today a business can use many independent networks with little or no interconnection between any of them. For each of these separate networks, there are separate staffs for Operations, Administration, and Maintenance (OA&M). Integrating or combining all these communications systems into one network with ISDN provides the user with economical communications and a network with interconnection and improved service.

ISDN - Integrated Services Digital Network (continued)

MISSOURI
Public Service Commission

B. Definitions and Descriptions

ACO - Additional Call Offering, is a feature that notifies the ISDN user through D channel signaling procedures that there is a circuit-switched voice (CSV) or circuit-switched data (CSD) call waiting. The user can answer the incoming call by putting an existing call on hold or by disconnecting an existing call.

BRI - Basic Rate Interface, The ISDN BRI combines two 64Kbps B channels and one 16Kbps D channel (2B+D) over one Digital Subscriber Line (DSL).

B Channel - Bearer Channel, A 64Kbps channel used to convey user information (voice/data); the BRI has two B channels and the PRI has 23.

BPS - Bits per second, A measure of the speed with which data communications can move over a line. The prefixes K (for thousand) or M (for millions) are used to represent higher speeds.

CA - Call Appearance of an ISDN PDN.

CFV - Call Forwarding Variable, see tariff Section 4 Call Forwarding.

CNI - Calling Number Identification, see tariff Section 4 Calling Number Delivery.

CSD - Circuit Switched Data, Data being sent over the circuit switched network similar to most voice calls.

CSV - Circuit Switched Voice, voice calls being sent over the circuit switched network.

D Channel - Delta Channel, The packet-switched channel on a DSL at 16Kbps, or an PRI at 64Kbps that carries signaling messages and packet-switched user data.

DN - Directory Number, the 10 digit telephone number consisting of the area code plus seven digits.

DS1 - the common terminology for T-carrier that multiplexes 24 channels into a single 1.544 million bits per second bit stream.

ISDN - Integrated Services Digital Network (continued)

REC'D NOV 25 1998

B. Definitions and Descriptions (continued)

DSL - Digital Subscriber Line, see BRI or PRI description.

EKTS - Electronic Key Telephone System, this feature allows a user served by an National Integrated Services Digital Network (ISDN) terminal to have access to multiple directory numbers (DNs). In addition, a DN can be accessed by more than one user (that is, a Shared DN). Directory Numbers (DNs) may be shared on the same ISDN basic rate interface (BRI) and/or on different ISDN BRIs. Two or more users with access to the same DN can be simultaneously bridged onto the same call on that DN.

FCO - Flexible Call Offering, the flexible call offering feature informs the called party that a transferred call is waiting. The called party begins alerting while the attendant is connected. (The attendant hears the alerting.) The attendant can disconnect any time after camp-on is activated, and the switch connects the calling party to ringing, tone, announcements, or silence (determined by the customer at subscription).

CACH - Call Appearance Call Handling, is an EKTS terminal which supports multiple call appearances and multiple DNs. One or more DNs and/or call appearances of the CACH EKTS terminal can be shared with other terminals in an EKTS group.

CSA - Customer Serving Area, the physical point where the customer serving facilities originate, normally the central office or digital subscriber cabinet.

ISDN - Integrated Services Digital Network, An international plan by the CCITT to standardize a public communication network to handle circuit switched digital voice, circuit switched data, and packet switched data.

IXC's - Interexchange Carriers, Long distance common carriers providing intraLATA and interLATA telecommunications services.

+Loudspeaker and Page Access Channel - An analog channel which interfaces digital ISDN service with analog customer CPE for the provision of Loudspeaker or Paging functionality.

B. Definitions and Descriptions (continued)

NFAS - Non Facility Associated Signaling, this feature allows the use of multiple PRI ISDN physical connections to deliver up to 479 B channels to a given location. NFAS is required when using more than one physical link or if an optional backup D channel is needed.

NID - Network Interface Device, The physical Demarcation Point (see Section 5 Demarcation Point) of Company provided outside plant facilities.

NT1 - Network Terminal 1, The CCITT label for ISDN network termination device which terminates the physical layer-1. This device is provided by the customer and is normally associated with the Terminal Adapter.

Packet Switching - A network technique that divides user messages into relatively short blocks and uses geographically distributed switching nodes, to achieve low end-to-end delay for real-time bursty data traffic.

PDN - Primary Directory Number, The number that is the unique identifier of an ISDN terminal.

PVC - Permanent Virtual Circuit, A virtual circuit established for the duration of an agreement between the subscriber and the network authority and is available to send packets in either direction at any time. It has all the features of a virtual call without the call setup and release procedures.

PRI - Primary Rate Interface, The ISDN PRI combines 23 B channels and one 64Kbps D channel on a single line. Also called the Extended Digital Subscriber Line.

RND - Redirecting Number Delivery, this feature provides information associated with call forwarded calls from an ISDN terminal. This display includes the redirecting number, and the reason for redirection. This information is sent to the ISDN terminal where the call is being forwarded.

SDN - Shared Directory Number, Shared directory number of an ISDN terminal.

SPID - Service Profile Identification, a unique number associated with a ISDN terminal device.

B. Definitions and Descriptions (continued)

T1 - T1 facility, a digital transmission standard in North America that carries traffic at the DS1 rate of 1.544 million bits per second.

Terminal Adapter - A device that provides protocol conversion from standard non-ISDN or TE2 interfaces (e.g., X.25, RS-232) to ISDN interfaces.

C. General

ISDN service will be provided where facilities and equipment are available. This tariff section does not obligate Mid-Missouri Telephone Company to construct facilities for the provision of this service. Mid-Missouri Telephone Company only provides ISDN connectivity within its exchanges and makes no warranties as to the interoperability of ISDN when using facilities of IXC's and other connecting carriers.

General Rules and Regulations found in other sections of this tariff are applicable to the provision of ISDN service.

Directory listings may be provided under the regulations governing the furnishing of listings for business and residence subscribers.

A Network Interface Device will be installed at a location determined by the Company. The Network Interface Device (NID) is the Company point of termination. The customer is responsible to provide the NT1 and all wiring beyond the NID.

D. Service Description

ISDN is offered in two different channel structures. The first is Basic Rate Interface (BRI), and the second is Primary Rate Interface (PRI). Both use channels called "B" or Bearer channels and "D" or Delta channel. The B channel provides a transmission path for user information, such as voice and data, while the D channel carries signaling information and packet data.

D. Service Description (continued)

Each B channel is a 64 kilobit per second (Kbps) clear channel connection. The D channel is a 16 Kbps packet channel that is used to send and receive call set-up and signaling messages to the terminal equipment (customer premises equipment), and carry limited packet data.

1. BRI - Basic Rate Interface

The BRI normally includes two B channels and one D channel (2B+D), however it can be configured to only include a D channel, or one D channel and one B channel. The BRI supports the following:

- Simultaneous data and voice communications
- Data channel rates up to 64 Kbps
- Message-based signaling, separate from the voice/data channels
- Reliable packet switched data transmission.

B-Channel

- 64 Kbps per channel
- Voice or data
- Circuit or packet-switched

D-Channel

- 16 Kbps
- Signaling messages and packet data
- Packet-switched
- Defined for customer usage

2. PRI - Primary Rate Interface

The basic PRI includes twenty three B channels and one D channel (23B+D), however it can be configured to include multiple D channels, and up to a maximum of 479 B channels. The PRI supports the following:

D. Service Description (continued)

2. PRI - Primary Rate Interface (continued)

- Non-Facility Associated Signaling (NFAS) - allows multiple DS1 facilities to be controlled by a single PRI D channel.
- PRI D-channel Backup (DCBU) - this capability can only be assigned to a NFAS group and allows a customer access to the network even if the "active" D-channel were to fail. This is accomplished by transferring signaling information to the "standby" D channel.
- Fractional DS1 Switching (N x DS0) Via PRI - allows a multibearer service capability by switching multiple rates of 64Kbps (i.e., N X DS0 - where N is greater than 2 and less than or equal to 24).
- Dedicated - the entire trunk group is dedicated to a specific service (data, 800 service, DID, etc.)
- Call-by-call - different types of service can be included in the same trunk group (IXC access, OUTWATS, DOD, etc.) Any call can be used for any service as long as there are available facilities (both B channels and service type) for the call.

B-Channel

- 64Kbps per channel
- Voice or data
- Circuit-switched
- Up to 479 channels per PRI (using multiple physical connections) defined as required for customer usage and where facilities permit.

D-Channel

- 1 required, 2 if optional back-up selected and more than one physical link is used.
- 64 Kbps per channel
- Control and signaling messages

PRI ISDN is usually provisioned using one or more T-1 facilities. The Facility Charge listed under Rates applies for each additional ¼ cable mile from the serving central office or CSA.

E. Service Configurations

1. Basic Rate Interface

Capability Package A (0B+D), includes basic D-channel packet. No voice capabilities are provided.

Capability Package B (1B), includes circuit-switched data on one B channel. Data capabilities include Calling Number Identification. No voice capabilities are provided.

Capability Package C (1B), includes alternate voice/circuit-switched data on one B channel. Data and voice capabilities include Calling Number Identification.

Capability Package D (1B+D), includes voice on one B channel and basic D-channel packet. Only basic voice capabilities are provided with no features.

Capability Package E (1B+D), includes voice on one B channel and basic D-channel packet. This package provides non-EKTS voice features, including Flexible Calling, Additional Call Offering, and Calling Number Identification.

Capability Package F (1B+D), is equivalent to Capability Package E, with the change that Call Appearance Call Handling (CACH) EKTS service is used for the voice service. (Note that Additional Call Offering functionality is incorporated in the EKTS service).

Capability Package G (2B), includes voice on one B channel and circuit-switched data on the other B channel. This package provides non-EKTS voice features, including Flexible Calling, Additional Call Offering, and Calling Number Identification. Data capabilities include Calling Number Identification.

Capability Package H (2B), is equivalent to Capability Package G, with the change that CACH EKTS service is used for the voice service. (Note that Additional Call Offering functionality is incorporated in the EKTS service).

Capability Package I (2B), includes circuit-switched data on two B channels. Data capabilities include Calling Number Identification. No voice capabilities are provided.

1. Basic Rate Interface (continued)

Capability Package Q (2B+D), is equivalent to Capability Package P with the change that CACH EKTS service is used for the voice service. (Note that Additional Call Offering functionality is incorporated in the EKTS service.)

Capability Package R (2B), includes circuit-switched data on two B channels. Data capabilities include Calling Number Identification. No voice capabilities are provided.²

Capability Package S (2B), includes alternate voice/circuit-switched data on two B channels. Data and voice capabilities include Calling Number Identification.

Capability Package T (2B+D), includes voice on two B channels and basic D-Channel packet. Only basic voice capabilities are provided, with no features.

Capability Package U (2B), includes alternate voice/circuit-switched data on two B channels. This package provides non-EKTS voice features, including Flexible Calling, Call Forwarding Variable, Additional Call Offering, and Calling Number Identification (which includes Redirecting Number Delivery). Data capabilities include Calling Number Identification (which includes Redirecting Number Delivery).

Capability Package V (2B), includes alternate voice/circuit-switched data on two B channels. This package provides non-EKTS voice features, including Flexible Calling, Advanced Call Forwarding (i.e., Call Forwarding Variable, Call Forwarding interface Busy, Call Forwarding Don't Answer, and Message Waiting Indicator), Additional Call Offering, and Calling Number Identification (which includes Redirecting Number Delivery). Data capabilities include Calling Number Identification (which includes Redirecting Number Delivery).

² Capability Packages R and S are closely related to Capability Packages I and M; the main difference is that the Capability Packages R and S consistently assign two Directory Numbers to the interface, whereas the Capability Packages I and M only assign one.

REC'D NOV 25 1998

ROTARY NUMBER SERVICE

A Rotary Number enables a customer to receive incoming calls on more than one line listed under a single number. The feature of this special equipment, installed at the Central Dial Office, is that this equipment will hunt a line that is not busy and ring the customer over it.

The rate for Rotary Number Service, per month, is one and one-half times the one-party rate per month.

TOLL ACCESS RESTRICTION Monthly
\$6.00

The service Connection Charges as set out elsewhere in this tariff also apply.

Toll Access Restriction provides a means of restricting access to the Long Distance Message Telecommunications Network by direct dial access.

The service may be provided to customers in exchanges equipped to program the service without alteration of the central office equipment. Toll access restrictions may be provided on access lines to PBX, ISDN, or Centrex service.

The customer indemnifies and saves harmless the Telephone Company from any and all claims, losses, and damages caused by the restriction to any services.

+Toll Access Restriction is provisioned in three different configurations.

+Basic Restriction - This restriction applies only to 1+ long distance calls; (0 +/- operator calls will be handled as usual and will be billed accordingly). Basic Restriction does not block access to 911 emergency calls in areas that have implemented 911 service.

+Basic Pin Restriction - This restriction is the same as Basic Restriction except the customer has the ability to dial *94 (1194 Rotary) and enter a 4 digit pin code. Once the correct pin code is entered the customer is given a second dial tone temporarily suspending Basic Restriction allowing the customer to direct dial 1+ long distance calls.

+Optional Pin Restriction - This restriction is the same as Basic Pin Restriction except that all 1+ and 0+/- calls are blocked and the customer must enter the correct 4 digit pin code to be able to dial calls using the long distance message network. This restriction is only available in areas where 911 service is available.

FOREIGN EXCHANGE SERVICE

MISSOURI
Public Service Commission

A. General Regulations

1. Foreign exchange service is exchange service furnished to a subscriber from a central office of an exchange other than the one that normally serves the area in which the subscriber is located.
2. For the purpose of this Tariff, the term, "Foreign Exchange", shall mean the exchange from which the foreign exchange service dial tone is furnished. The term, "Normal Exchange", shall mean the exchange normally serving the area in which the subscriber's premise is located.
3. Foreign exchange service does not come within the Telephone Company's general undertaking, nor does the Telephone Company obligate itself to furnish such service generally; but will do so where facilities of such a character are available as will permit satisfactory telephone transmission, and where the service is warranted by the circumstances involved.
4. Foreign exchange service will be furnished to exchanges within the same LATA as the normal exchange.
5. Foreign exchange service may be provided only in connection with private branch exchange trunk lines, and individual line business or residence service. The service will be furnished only at one premises for each channel or circuit.
6. Where the normal exchange is operated by this Telephone Company, foreign exchange service is furnished only on the condition that the applicant is a subscriber to individual line business or residence service, or private branch exchange service, in the normal exchange, and at the same location where such service is proposed to be installed. Under this condition, when a foreign exchange service subscriber discontinues normal

GENERAL SERVICES

FOREIGN EXCHANGE SERVICE

JAN 25 1977

A. General Regulations

1. Foreign exchange service is exchange service furnished to a subscriber from a central office of an exchange other than the one that normally serves the area in which the subscriber is located.
2. The rates and regulations, herein stated, shall not apply to existing services of this type, where existing rates and regulations conflict with the provisions of this section, unless subsequently modified by Commission action.
3. For the purpose of this Tariff, the term "Foreign Exchange" shall mean the exchange from which foreign exchange service is furnished. The term "Normal Exchange" shall mean the exchange normally serving the area in which the subscriber's premises is located. The term "Interexchange Channel" designates that portion of the foreign exchange service circuit which is provided between the toll rate centers of the foreign and normal exchanges.
4. Foreign exchange service does not come within the Telephone Company's general undertaking, nor does the Telephone Company obligate itself to furnish such service generally, but will do so, at its option, where facilities of such a character are available as will permit satisfactory telephone transmission, and where the service is warranted by the circumstances involved.
5. Foreign exchange service will be furnished only when both the normal and foreign exchanges are located within this state.
6. Foreign exchange service may be provided only in connection with private branch exchange trunk lines, and individual line business or residence service. The service will be furnished only at one premises for each channel or circuit.

MILEAGE CHARGES

JAN 23 1977

Excess Mileage Beyond Base Rate Area:

- A. In connection with 1 and 2 party lines circuits extending beyond the base rate area boundary, the following excess mileage charges apply. These charges are in addition to the base rates specified in the Local Exchange Tariff, and construction charges where applicable.

Monthly Rate for 1/4
Mile or Fraction Thereof

Class of Service

- 1. One-party line telephones, private branch exchange trunks, toll terminals, each..... \$.70
- 2. Two-party lines telephones, each..... .40
- B. Shortest air-line measurement from customer's premises to the base rate area boundary is used in computing excess mileage charges. In those cases where the base rate area boundary follows the center line of a street or highway, all dwellings or structures facing or adjoining the street or highway and within 150 feet of the center line of the street or highway shall be considered within the base rate area.
- C. Where a party line customer has the exclusive use of one-half mile or more of a circuit outside the base rate area, and there are no prospects of obtaining additional customers to share the circuit within a reasonable length of time, the customer is charged the one-party line excess mileage rate for the portion of the circuit so used.
- D. Excess mileage charges are payable in the same manner as charges for the associated service.

(1) Automatic Answering and Recording Equipment

MISSOURI
Public Service Commission

A. General

An automatic answering and recording unit provides for the automatic answering of a telephone together with the transmission of a prepared message to the calling party and the subsequent recording of a message from the calling party.

B. Rates

	Monthly Rate	Installation Or Move Charge
--	--------------	-----------------------------

1. Model 1

Recorded announcement from 2 to 30 seconds. Callers messages recorded up to 30 minutes. Message may be monitored while being received. Callers messages are obtained from the unit at the unit's location.

	7.00	15.00
--	------	-------

2. Model 2

Same as Model 1 with the following additional features: Subscriber may play back recorded messages by remote control from any telephone by use of a pocket sized activating device, making it unnecessary to return to the location of the unit in order to receive recorded messages.

	11.00	15.00
--	-------	-------

3. Model 3

Same as Model 1 & 2 with the following additional features: Backspacing feature allows re-hearing of recorded messages from the remote location. The announcement can be changed from a remote location. Accumulate/cancel option allows subscriber to either keep recorded incoming messages on the tape or cancel them after playing back.

	15.00	15.00
--	-------	-------

(1) Limited Availability. See Section 2, paragraph G, 1st Revised Sheet 9.

1. An automatic answering unit provides for the automatic answering of a telephone and the transmission of a prepared message to the calling party.
2. An automatic answering and recording unit provides for the automatic answering of a telephone together with the transmission of a prepared message to the calling party and the subsequent recording of a message from the calling party.
3. Automatic answering and automatic answering and recording equipment owned by the Company may be provided only in conjunction with business or residence individual line, PBX Trunk and PBX station line services. Connection with customer owned equipment of this type will not be permitted.
4. The use of automatic answering services is subject to the following conditions:
 - a. For purposes of identification, customers to telephone service who transmit recorded public announcements over facilities provided by the Company must include in the recorded message the name of the organization or individual responsible for the service and the address at which the service is provided.
 - b. Customers transmitting factual public announcements such as Time, Weather, Stock Market Quotations, Airline schedules and similar information are excluded from the preceding conditions.
 - c. A contract for a minimum of one year will be required by the Telephone Company for the installation of automatic answering and recording equipment.

C. Conditions (Continued)

- 6. Non-publish service is the omission of a customer's listing from both the telephone directory and information records.
 - a. When non-publish service is to be furnished, the customer will hold the Company harmless from any damages which might arise, and will absolve the Company from any responsibility for the failure of the customer to receive calls because of the non-published listing.
 - b. The rate for non-publish service is specified in "B" above.
- 7. The charge for additional alternate, unlisted or non-published listings begins on the day the information records are posted.
- 8. The length of contract period for directory listings, where the listing actually appears in the directory, is the directory period. The directory period is from the day on which the directory is distributed to the customers to the day the succeeding directory is distributed to the customers. Unless the listing no longer serves the customer because of disconnection, removal, etc., of the service, the minimum contract period will be for at least thirty (30) days.

GENERAL SERVICES

SUPPLEMENTAL EQUIPMENT SERVICES (Continued)

Directory Listings (Continued)

C. Conditions (Continued)

2. An additional listing may include the same address and telephone number as the primary listing, except that a different address may be shown for off-premises stations located on other premises occupied solely by the customer.
 - a. Additional listings may be furnished with business or residence service for persons who occupy the same premises at the rates shown above. (See Joint User Service.)
3. An alternate call listing refers a calling party to certain other telephone numbers after business hours or on Sundays or holidays or if there is no answer on the first listed number.
 - a. Where the alternate call number is to be that of another customer, the listing will be furnished only with written approval of the other customer.
4. A foreign or non-subscriber listing may be furnished customers requesting that their listing be included in a directory of an exchange other than that from which service is rendered. The rate for a foreign company listing will be the rate of the company in whose directory the listing appears.
5. Unlisted service is the omission of a customer's listing from the telephone directory only. It may be obtained from the information operator.

GENERAL SERVICES

SUPPLEMENTAL EQUIPMENT SERVICES (Continued)

Directory Listings (Continued)

C. Conditions (Continued)

- 6. Non-publish service is the omission of a customer's listing from both the telephone directory and information records.
 - a. When non-publish service is to be furnished, the customer will hold the Company harmless from any damages which might arise, and will absolve the Company from any responsibility for the failure of the customer to receive calls because of the non-published listing.
 - b. The rate for non-publish service is specified in "B" above.
- 7. The charge for additional alternate, unlisted or non-published listings begins on the day the information records are posted.
- 8. The length of contract period for directory listings, where the listing actually appears in the directory, is the directory period. The directory period is from the day on which the directory is distributed to the customers to the day the succeeding directory is distributed to the customers. Unless the listing no longer serves the customer because of disconnection, removal, etc., of the service, the minimum contract period will be for at least thirty (30) days.

MID-MISSOURI TELEPHONE COMPANY
Pilot Grove, Missouri

No supplement to this tariff will be issued except for the purpose of canceling this tariff.

Section 4
Original Sheet 56

GENERAL SERVICES

SUPPLEMENTAL EQUIPMENT SERVICES (Continued)

School to Home Service (Continued)

C. Conditions

1. School to home service employs channels and station equipment designed for the transmission of speech and is particularly adapted for use in conjunction with the education of handicapped students unable to attend classes in person. It may also be provided in other cases where the service is suitable and where it will meet the customer's requirements.
2. The master station set consists of a combined speaker-microphone and amplifier with volume control and nonlocking "listen-talk" switch. Controller station equipment consists of one or more speaker-microphone sets with volume control and a separate amplifier common to the controlled station equipment. Controlled station speaker-microphone sets are not equipped with "listen-talk" switches. The equipment is arranged for normal transmission from controlled to master station set. Direction of transmission may be reversed by operation of the "listen-talk" switch of the master station set. Each portable set is equipped with a cord and plug to permit its use in connection with jack installations as covered by the schedule.
3. Mileage measurement - channels.
 - a. When the terminals of the channel are located in the same central office area and the channel does not pass through the central office, the air-line mileage is measured between terminals.
 - b. When the terminals are located in the same central office area and the channel passes through the central office, the air-line mileage is determined separately from each station to the central office.

GENERAL SERVICES

SUPPLEMENTAL EQUIPMENT SERVICES (Continued)

School to Home Service (Continued)

C. Conditions (Continued)

3. Mileage measurement - channels (Continued)

- c. When the terminals are located in different central office areas and the channel passes through two or more central offices, the air-line mileage is measured separately between central offices and from each terminal to its serving central office.
- d. When the terminals are located in different exchange areas, the air-line mileage is measured from the terminal to the principal central office where connection is made with interexchange facilities of the connecting company. Interexchange channel rates shown under Rates above apply when the interexchange facilities are provided by the Company. Interexchange facilities provided by another company are furnished at applicable rates of that company.
- 4. The rates and charges for the station equipment contemplate not more than 150 feet of shielded wiring with each controlled station set or jack.
- 5. Connection of a channel, directly or indirectly, to exchange lines, or other wire facilities, not authorized by the Company, is not permitted.
- 6. The customer will not be permitted to create additional channels from the facilities provided by the Company.
- 7. Where commercial power is required for the operation of equipment for use in the provision of this service, it shall be the responsibility of the customer to furnish convenient power outlets and all associated wiring.

Section 4
Original Sheet 64

GENERAL SERVICES

811 SERVICE

A. DESCRIPTION

811 Service is a three-digit abbreviated local dialing arrangement which allows local exchange end-users to reach the providers of Missouri's One Call Notification System (811 Customer). 811 Service is used by the One Call Notification system to provide notice of excavation activities to operators of underground facilities.

811 Service determines the central office serving the calling party, translates the dialed digits to an 811 Customer provided designated toll free telephone number, and routes the call to that number.

B. TERMS AND CONDITIONS

1. The Company and the 811 Customer will negotiate the installation date for the 811 Service.
2. There can be only one 811 Customer for each stand-alone, host, or remote central office NAP-NXX serving area.
3. The Company will route calls based upon the serving central office.
4. The 811 Customer must provide a toll-free number to the Company to ensure that toll charges are not incurred by the end-user. At all times it shall be the obligation of the 811 Customer to test and be aware of any translation errors or other mistakes in routing 811 calls to the customer provided toll free number.
5. 811 Service can only be accessed by end-users that subscribe to the Company's local exchange service. 811 Service will not complete calls dialed using 0 + 811 or 1 + 811. 811 calls are not permitted where local calling is restricted.
6. 811 Service does not include operator-assisted calls, and will only be available to PBX, Centrex, and Key switching systems when those systems have been correctly programmed. The Company does not undertake to perform, nor shall it be responsible, for such programming.

Section 4
Original Sheet 65

811 SERVICE (Continued)

7. 811 Service is provided as a community service. There will be no recurring or non-recurring charges for the service.

C. LIMITATION OF LIABILITY

1. 811 Service is provisioned solely for the benefit of the 811 Customer. The provision of such service shall not be interpreted, construed, or regarded as being for the benefit of or creating any obligation toward, or any right of action on behalf of, any third person or other legal entity, including but not limited to end-users of the Company or any other providers of telecommunications service.
2. The Company will make commercially reasonable efforts to route 811 calls to the toll-free number provided by the 811 Customer, however the Company will not be responsible, or held responsible, for routing mistakes and errors, interruptions of service, or intervening Acts of God or other acts that interfere with telephone service and/or routing. The Company's obligation under this 811 Service applies solely to the transmission of the call to the toll-free number provided, and ends upon translation of an 811 call to the Customer provided toll free number.
3. The Company does not undertake to transmit messages under the terms of 811 service.
4. The Company will have no liability for any damages arising from damages arising out of mistakes, omissions, interruptions, delays or errors or defects in transmission occurring in the course of furnishing 811 service.
5. The Company's failure to provide or maintain service shall be excused by government orders, civil commotions, acts of God and other circumstances beyond the Company's reasonable control.
6. The Company shall not be liable for any act or omission of any entity, and shall not be liable for any accident, injury to person or property, including death, libel, slander, infringement of intellectual property rights, nor shall the Company be responsible for any direct, indirect, incidental, special, consequential, exemplary, or punitive damages.
7. The 811 Customer shall defend the Company at the 811 Customer's expense, indemnify, and hold the Company harmless against any and all loss, claims, suits, or other action, or any liability whatsoever, whether suffered, made, instituted or asserted against the Company as directly or indirectly arising from the provision of 811Service.

GENERAL SERVICES

211 SERVICE

A. DESCRIPTION

211 Service allows the calling party to reach the 211 provider (211 Service Customer) by dialing an abbreviated telephone number, two-one-one (211).

211 Service is a routing service that determines the central office serving the calling party, converts the 211 dialed digits to a Customer-designated Routing Telephone Number (RTN) and routes the call over the telephone network to the RTN.

211 Service may only be purchased by information and referral providers authorized by the Missouri Public Service Commission in accordance with 4 CSR 240-32.200 of the Code of State Regulations.

211 Service is offered subject to the availability of facilities.

B. TERMS AND CONDITIONS

1. The 211 Service Customer must provide a copy of the order granting its authority as a Missouri Information and Referral Provider in the service area of the Company.
2. Unless otherwise authorized by the Missouri Public Service Commission, and technically feasible of implementation by the Company, there shall be no more than one 211 Service Customer for each stand-alone, host, or remote central office serving area. This assures that 211 calls from a calling party located within a 211 service area can be routed to the Information and Referral Provider certified for that service area. The Company will route calls based upon the serving central office. If a central office serves one or more remote offices or multiple states, the Company will route 211 calls based on the originating NPA-NXX. The Company will default route calls to one of the 211 Service Customer's routing Telephone Numbers if the Company is unable to route based on the serving central office or the originating NPA-NXX.
3. Only 211 calls originating within an operational 211 service area will be routed to a call center. End users dialing 211 outside operational 211 service areas will receive a recorded message that the call cannot be completed as dialed.
4. By subscribing to 211 Service under this tariff, the 211 Service Customer agrees to comply with all applicable federal and state laws and regulations.

211 SERVICE (Continued)

5. The 211 Service Customer may designate only one Routing Telephone Number per 211 service area, but may designate different Routing Telephone Numbers for different service areas as set forth below. The Routing Telephone Number must be a toll-free 8XX telephone number for central offices outside of the 211 call center's local service area.
 - a. if the 211 Service Customer utilizes more than one 211 Routing Telephone Number, it must designate the specific stand-alone, host, or remote central office(s) to be served by each Routing Telephone Number.
 - b. Normally only one Routing Telephone Number can serve a stand-alone, host, or remote central office serving area.
 - c. 211 calls are not permitted where local calling is restricted, e.g., prisons.
6. The Company will route 211 calls originating from calling parties on the Company's local exchange network, whether the calling party is served by the Company or by another local exchange company reselling the Company's service. 211 Service will not complete calls dialed using 0 + 211 or 1 + 211. 211 Service does not include operator-assisted calls, and will only be available to PBX, Centrex, and Key switching systems when those systems have been correctly programmed. The Company does not undertake to perform, nor shall it be responsible, for such programming.
7. The Company will make commercially reasonable efforts to route 211 calls to the appropriate calling center. The Company will not be held responsible for routing mistakes or errors. The Company's obligation under 211 Service ends upon call completion to the Routing Telephone Number(s) designated by the 211 Service Customer(s). At all times it shall be the obligation of the 211 Service Customer to test and be aware of any translation errors or other mistakes in routing 211 calls to the appropriate calling center.
8. The Company does not undertake to transmit messages under the terms of 211 service.
9. 211 Service is provided as a community service. There will be no recurring or non-recurring charges for the service.

211 SERVICE (Continued)

C. LIMITATION OF LIABILITY

1. 211 Service is provided solely for the benefit of the 211 Service Customer. The provision of 211 Service shall not be interpreted, construed, or regarded as being for the benefit of, or creating any obligation toward, or any right of action on behalf of, any third person or legal entity, including but not limited to end-users of the Company or any other providers of telecommunications service.
2. The Company will make commercially reasonable efforts to route 211 calls to the toll-free number provided by the 211 Customer, however the Company will not be responsible, or held responsible, for routing mistakes and errors, interruptions of service, or intervening Acts of God or other acts that interfere with telephone service and/or routing. The Company's obligation under this 211 Service applies solely to the transmission of the call to the toll-free number provided, and ends upon translation of a 211 call to the Customer provided toll free number.
3. The Company will have no liability for any damages arising from damages arising out of mistakes, omissions, interruptions, delays or errors or defects in transmission occurring in the course of furnishing 211 service.
4. The Company's failure to provide or maintain service shall be excused by government orders, civil commotions, acts of God and other circumstances beyond the Company's reasonable control.
5. The Company shall not be liable for any act or omission of any entity, and shall not be liable for any accident, injury to person or property, including death, libel, slander, infringement of intellectual property rights, nor shall the Company be responsible for any direct, indirect, incidental, special, consequential, exemplary, or punitive damages.
6. The 211 Service Customer shall defend the Company at the 211 Customer's expense, indemnify, and hold the Company harmless against any and all loss, claims, suits, or other action, or any liability whatsoever, whether suffered, made, instituted or asserted against the Company as directly or indirectly arising from the provision of 211 Service.
