## F. BILLING AND PAYMENT

1. The Company will render a bill during each billing cycle or monthly recurring charges in advance and usage charges in arrears.
2. The customer is responsible for all charges in conjunction with the services furnished him.
3. The Company will render bills on a cyclical basis whereby the customer receives his bill on or about the same day of each month. Billing cycles may be altered by sending an insert or other written notice explaining the alteration not less than 30 days prior to the effective date of the alteration. This notification is not required when the customer disconnects and reconnects service or transfers service from one premises to another, or requests a cycle change, which may affect the Customer's billing cycle.
4. Bills are due as specified on the bill and may be paid at any business office of the Company or at any agency authorized to receive such payments.
5. The customer shall have at least 21 days from the rendition of a bill to pay the charges stated. If usage charges remain unpaid for 10 days from rendition of written notification or a mutually established late payment arrangement date or 21 days from rendition of the bill, such charges will be deemed delinquent.
6. For billing purposes, each month is presumed to have 30 days.
7. Retroactive billing adjustments may be made for a period not to exceed one year.
8. Any disputed charge must be brought to the Company's attention by notification in writing within forty days of customer's receipt of the bill upon which the disputed charge appears.

#### H. MINIMUM CONTRACT PERIODS

MISSOURI

Public Service Commission

1. Except as specified elsewhere in this Tariff, the minimum contract period is one month from the date service or additions to service are established and the minimum charge is the authorized rate for one month. For purposes of rate administration, each month is considered to have 30 days.
2. The Company may require a contract period longer than one month at the same location in connection with special types or arrangements of service.

#### I. TERMINATION OF SERVICE

1. Contracts for service may be terminated prior to the expiration of the contract period provided advance written notice is given to the Company and upon agreement to pay all charges due for the service furnished, plus any termination charges which might be applicable.
2. No minimum or termination charge will apply (unless otherwise stated specifically in this Tariff) where a new customer takes over the service of the former customer, provided the service is to be furnished at the same location without interruption and that the new customer assumes all unpaid charges on the original contract. Minimum and termination charges will apply for any service furnished under the original contract which is not retained by the new customer.
3. Where a contract for service with a one-month minimum period is cancelled before establishment of the service is completed, a charge not to exceed the service charge specified is applied if all or a portion of the service has been installed.

LONG DISTANCE RATES

APR 6 1987

Long distance rates are determined as follows:

MISSOURI  
Public Service Commission

1. The distance between the Company's switch and destination point is calculated by using the "V" and "H" coordinates of NECA FCC Tariff No. 2 in the following manner:
  - a. Obtain the "V" and "H" coordinates for each called from number utilizing equal access or phone number on customer's master file when using authorization codes and the destination point.
  - b. Obtain the difference between the "V" coordinates for each of the areas. Obtain the difference between the "H" coordinates.
  - c. Square each difference obtained in Step b.
  - d. Add the squares of the "V" difference and "H" difference obtained in Step c.
  - e. Divide the sum of the squares obtained in Step d by ten (10). Round to the next higher whole number, if any fraction is obtained.
  - f. Obtain the square root of the whole number obtained in Step e. Round to the next higher whole number, if any fraction is obtained. This is the distance between the areas.
