3.1 Service Offerings

Applicant offers DS1, DS3, and xDSL access services.

xDSL are non-switched, local exchange technologies that allow multiple forms of data and video to be carried over standard twisted pair copper, or UNEs, on the local loop between the central office and consumer site.

Services offered by Covad do not include access to/from the Public Switched Network. Covad provides data connections only and does not assign or otherwise route traffic by the use of telephone numbers, i.e. NPA-NXX-XXXX.

In the event Covad begins to provide service to/from the Public Switched Network, Covad will file tariffs reflecting the rates, terms and conditions for such services.

3.2 Rates

Rates for Dedicated Access and Private Line services will be determined on an Individual Case Basis (ICB). ICB rates will be structured to recover the Company's cost of providing the services and will be made available to customers in a non-discriminatory manner. Terms of specific ICB contracts will be made available to the Missouri Public Service Commission Staff upon request on a proprietary basis. ICB will not be used for switched services.
