(CT) 1.2 RATES (cont'd)

(CT) 1.2.2 Main Service (cont'd)

(CT) G. Service and Equipment Charge (cont'd)

FOOTNOTES:

- (1) Class of service denotes the use of the service, i.e., business or residence service.
- (2) See Paragraph E.5., and Paragraph F.1., preceding for the exception to this charge as it applies to Lifeline Service and Link-Up Service, respectively.
- (3) See Paragraph E.6., preceding for the exception to this charge as it applies to Lifeline Service.
- (4) Payphone Exchange Access Service.
- (5) Also applicable to the installation of Digital Loop Exchange Access PBX Service, per each non-additive local exchange usage component specified in Section 38 of the General Exchange Tariff.
- (6) No Service and Equipment Charge applies when customers convert between Reserve Line Service and one of the business main services listed in 1.7.2 A.
- (7) This charge does not apply when a customer converts a line to or from Reserve Line Service to or from one of the business main services listed in 1.7.2 A.
- (8) This charge is applicable when a mechanized change order process is utilized to convert an end-user customer's existing residence or business single line or multiline service from another Competitive Local Exchange Carrier (CLEC) reselling SBC Missouri provided service to SBC Missouri service at the same service location. This charge is applied per service order. Additional features may be added at the existing tariffed rates. This \$5.00 charge is an Interim Rate pending appeal of the Commission's decision in Case No. TO-97-40. To the extent that the rate established in TO-97-40 is eliminated or modified by subsequent judicial or regulatory action, then this tariff provision shall be eliminated or modified to the same extent subject to SBC Missouri filing a conforming tariff.
- (9) This charge is waived, if applicable, if the customer subscribes to Custom BizSaver and is coming to SBC Missouri from another carrier.
- (10) This charge is waived, if applicable, if the customer subscribes to Custom BizSaver and this hunting feature is required to establish a Multiline bundle or establish an Additional Line (Option 2) and the customer is coming to SBC Missouri from another carrier.
- (11) This charge is waived, if applicable, if the customer subscribes to Flat Rate, Message and Measured Access lines, Flat, Message, Measured and/or DID Analog Trunks and is coming to SBC Missouri from another carrier and commits to a minimum of a one year term plan.

- (6) No Service and Equipment Charge applies when customers convert between Reserve Line Service and one of the business main services listed in 1.7.2 A.
- (7) This charge does not apply when a customer converts a line to or from Reserve Line Service to or from one of the business main services listed in 1.7.2 A.
- (8) This charge is applicable when a mechanized change order process is utilized to convert an end-user customer's existing residence or business single line or multiline service from another Competitive Local Exchange Carrier (CLEC) reselling Southwestern Bell provided service to Southwestern Bell service at the same service location. This charge is applied per service order. Additional features may be added at the existing tariffed rates. This \$5.00 charge is an Interim Rate pending appeal of the Commission's decision in Case No. TO-97-40. To the extent that the rate established in TO-97-40 is eliminated or modified by subsequent judicial or regulatory action, then this tariff provision shall be eliminated or modified to the same extent subject to Southwestern Bell filing a conforming tariff.
- (9) This charge is waived, if applicable, if the customer subscribes to Custom BizSaver and is coming to SBC-Missouri from another carrier.
- (10) This charge is waived, if applicable, if the customer subscribes to Custom BizSaver and this hunting feature is required to establish a Multiline bundle or establish an Additional Line (Option 2) and the customer is coming to SBC-Missouri from another carrier.

(FC) 1.2.3 Party Line Service Customer Premises Equipment Compatibility

A. Description

In order to insure billing accuracy, proper signal/ringing and proper functioning of Customer Premises Equipment (CPE) in connection with party line service, all CPE connected to party line service must be wired in a manner compatible with the customer's party line placement, or a party line instrument adapter must be connected to the exchange access line. For new party line service or for moves and changes of existing party line customers, before service can be established, service compatibility must be provided by installing a party line instrument adapter or by rewiring the instrument. For the purpose of this description, new service means a new connection of service or the outside move of existing service.

MO. PUBLIC SERVICE COMM.

B. Regulations

1. There are two options for providing party line service compatibility.
 - a. A party line instrument adapter may be installed. This device is an electronic unit which will isolate the ringing circuit of a party line station for all ringing signals, except the proper one assigned that station and provide Telephone company network and billing function compatibility with CPE. This option is required in all applications, except for that covered in Paragraph 1.2.3, B.1.b., following.
 - b. A party line customer who has a modifiable instrument has the option of having that instrument rewired to be compatible with their party line service. For the purposes of this Tariff, a modifiable instrument is only a Western Electric-manufactured, Bell-provided instrument that can be properly connected to party line service.
2. In those instances where the Telephone Company makes a repair visit to the customer's premises and the service difficulty or trouble results from the customer connecting an instrument or instruments to their party line local exchange access line and have not had the instrument rewired, if applicable, or have not had an instrument adapter installed, and billing errors, improper ringing and/or network trouble results, the customer is subject to Maintenance of Service Charges in addition to the applicable charges for installing a party line instrument adapter.
3. The Telephone Company assumes no responsibility for customer instruments, which are modified under the conditions of this Tariff by Company technicians at the customer's request, that subsequently malfunction.

(FC) 1.2.4 Connections with Data Transmitting and Receiving Equipment that Process Data and/or Perform Calculations-Information Terminal Service(1)

A. General

1. Data transmitting and receiving equipment that processes data and/or performs calculations and which requires line conditioning on the access line in order to operate effectively, will be connected to the exchange network of the Telephone Company through the provisions of Information Terminal Service. Business customers not needing Information Terminal Service for successful transmission of data may subscribe to an appropriate business rate offering when their use of the service is within the parameters of that described under the application of business rates in the General Exchange Tariff, Section 17, Paragraph 17.3.1. Examples of data transmitting and receiving equipment would include computers, associated buffering devices and/or concentrating devices with store and forward capabilities located on the same premises and shall include equipment used in the provision of Composite Data Service. Teletypewriter machines and similar input terminal devices are not within the provisions of this service.
2. Information Terminal Service working in conjunction with an appropriate modem is the communications link between the data transmitting and receiving equipment and the Telephone Company central office. Information Terminal Service is a business exchange service and, as such, is assigned a telephone number and has incoming and outgoing call capabilities.

(1) Information Terminal Service is not a residential class of service. Residential customers using data transmitting and receiving equipment as described above may subscribe to a residential class of service for this purpose when their use of the service is within the parameters of that described under the application of residence rates in the General Exchange Tariff, Section 17, Paragraph 17.3.
