Local Phone Service

NuVox will change the way you look at local calling.

When choosing a communications provider, your business is looking for more than local service. We know that. But local call quality is critical. At NuVox, we'll make sure every call is crisp and clear.

With NuVox local service, local gets bigger. In each of our markets, we've extended what is traditionally considered local. So more of your calls are "local" and not long distance calls.

NuVox provides a complete and affordable selection of voice services to meet the needs of your business:

- Business Line Service with Caller ID, Call Transfer Disconnect, Call Waiting, Hunting, Speed Dialing, Three-Way Calling, and various Call Forwarding features
- Trunk Services for DID, DOD, or two-way analog transmissions
- ISDN PRI with dynamic channel allocation and calling name and number delivery
- Interstate, intrastate, local toll, and 8XX long distance
- International calling with access to over 300 countries worldwide
- Account codes that allow you to track long distance usage
- **Voicemail** with a broad range of messaging features to enhance your business' communications capabilities
- Remote Call Forwarding provides callers with a local number that may be forwarded to your business' location

Make it Better with a Bundle

VoxIP uses Voice Over Internet Protocol (VoIP) technology to expand your broadband solution through the dynamic exchange of voice and Internet. While conventional telecommunications require separate channels for voice and Internet, VoxIP enables the channels on your T1(s) to switch between voice and Internet as your call volume needs dictate.

Coverage Legend

Coverage last updated on: March 31, 2007. Map depicts an approximation of coverage.

Important Information About the Coverage Map

Map may include areas served by unaffiliated carriers, and may depict their licensed area rather than an approximation of the coverage there. Actual coverage area may differ substantially from map graphics, and coverage may be affected by such things as terrain, weather, foliage, buildings and other construction, signal strength, customer equipment and other factors. Cingular does not guarantee coverage. Charges will be based on the location of the site receiving and transmitting the call, not the location of the subscriber.

This map predicts and approximates our wireless coverage area outdoors, which may vary from location to location and may change without notice. It may include locations with limited or no coverage. Our maps do not guarantee service availability. Even within a coverage area, there are several factors, such as: network changes, traffic volume, service outages, technical limitations, signal strength, your equipment, terrain, structures, foliage, weather, and other conditions that may interfere with actual service, quality, and availability, including the ability to make, receive, and maintain calls. Multi-band (850/1900 MHz) GSM/GPRS handset required for access to 850 Roaming Coverage. Ask a T-Mobile sales representative or visit www.t-mobile.com/morecoverage for more information regarding handset requirements and T-Mobile 850 MHz coverage. 850 MHz roaming is offered through our roaming partners; some features (e.g. picture messaging, mobile to mobile) may not be available while roaming.
