The fact that a deposit has been made, or a guaranty provided, shall in no way relieve the applicant or customer from complying with the Company's regulations as to advance payments and payment for service, nor constitute a waiver or modification of the regulations pertaining to the discontinuance of service for nonpayment of any charges due the Company for services rendered. The Company may discontinue service to any customer failing to pay undisputed delinquent charges without regard to the fact that such customer has made a deposit with the Company to secure payment of such charges or has furnished the Company with a guarantee in writing of such charges.

SERVICE CONNECTION CHARGES

MO. PUBLIC SERVICE COMM

A. General

The term "Service Connection Charges" is used to define the non-refundable charges made for the establishment of a class of telephone service or subsequent additions, moves, or changes to that service.

Service Connection Charges are in addition to any other scheduled rates and charges normally applying under the tariffs. They apply in addition to and not in lieu of Mileage Charges, Installation Charges, or Construction Charges made because of unusual costs in establishing service.

Service Connection Charges are payable at the time application is made for the particular service or facility, and prior to the establishment of service, or upon presentation of a bill. Service may be established in advance of payment in the case of Service Connection Charges for additions to the service of existing subscribers or for Departments, Administrations, and Agencies of the Federal, State, County, Township, or Municipal Governments.

B. Multi Element Charge Plan

Elements Covered:

1. SERVICE ORDER CHARGE

Covers all work associated with creation and processing of service order, including initial interview with subscriber, work done as to application for service and other permanent records, typing service orders, distribution of service order copies and completion of all other records originating from service orders.

2. CENTRAL OFFICE ACCESS CHARGE

Covers all work (i.e. central office wiring, programming, or outside wiring) involving the access line extending from the Company's Central Office to the protector and or demarcation point on the subscriber's premises. One charge will apply for each access line. This charge does not anticipate "construction" which is covered in other parts of these tariffs.

3. RESTORAL OF SERVICE CHARGE

Where service has been discontinued for nonpayment of any charges due or for failure of the subscriber to establish credit in accordance with regulations, the following charges apply for reconnecting all services and facilities being provided a subscriber at one location.

Call Waiting - By means of a tone signal a customer who is using his telephone is alerted when another caller is trying to reach that station. This permits putting the first call on hold so that a second call can be answered.

Call Forwarding - Permits a customer to transfer all incoming calls to another dialable telephone number. The customer pre-selects a second telephone number to which he wants all incoming calls to be automatically transferred. Calls may be transferred to a long distance message telecommunications point subject to the availability of the necessary facilities in the central office from which the calls are to be transferred. Customers utilizing Call Forwarding service are responsible for the payment of charges for each toll call between the telephone to which the call was transferred.

Three Way Calling - Enables a customer to add a third party to an existing call without operator assistance, thereby establishing a three-way conversation. The transmission may vary depending on the distance and routing necessary; therefore, transmission may not meet normal standards.

Speed Calling - Enables a customer to place calls to other telephone numbers by dialing a one or two digit code rather than the complete telephone number. Customer may subscribe to only one of either the 8 Code capacity or 30 Code capacity on the same line.

Custom Calling Services will be provided in connection with residence and business service.

4. The Company includes nonrecurring (one-time) charges for specific work activity, (i.e., installation of service or change to an existing service). The types of nonrecurring charges that apply for Special Access Service are listed below.

a. Special Access Ordering Charges are associated with the work performed by the Company in connection with the receiving, recording and processing of customer service requests. There are two types of service ordering charges.

1) Initial Ordering Charge - Special Access, applies on a per Access Service Request (ASR) basis, including those requests to add additional termination to an existing service.

A design change is any change to a pending ASR for Special Access Service which requires engineering review. Design changes include such things as the addition or deletion of supplemental features or changes in the terminating options. Design changes do not include a change of Interexchange Customer Designated Location (CDL) or end user premises when its serving wire center changes or Special Access service type (e.g., 2-wire to 4-wire Voiceband or Voiceband to Program Audio, etc.). Changes to this nature will require the issuance of a new ASR and the cancellation of the original ASR.

The Design Change Charge will apply on a per ASR per occurrence basis, for each ASR requiring a design change.

Initial end user and agent selection of a PIC by ballot or appearing on an IC list will not incur a charge. A change of PIC selection prior to the end office conversion will not incur a charge. Notification of a change in a PIC may be coordinated by the end user or agent with either the IC selected or the Company.

Should an end user or agent dispute authorization of the change in PIC assignment and if the IC cannot produce a letter of agency or confirmation from the end user or agent, the IC will be billed one PIC change charge for restoring the end user's or agent's prior IC assignment. If the IC produces the letter of agency or confirmation of choice within 15 days of the Company request, the end user or agent will be billed two PIC charges in lieu of charges to the IC. Charges are only applicable if a change in an end user's or agent's IC selection has actually been implemented in the switch.

The Company reserves the right to implement practices and/or procedures that require written notification and/or verification from the end user subscriber before a PIC change service order will be initiated.
