DIGILINE SERVICE

(RT)

3.5 REGULATIONS (cont'd)

3.5.6 (cont'd)

- D. In case B., preceding, when a central office is equipped so that the customer's normal serving office becomes part of a DigiLine Service Area, the customer's DigiLine Service may be moved from their original DigiLine serving office to the customer's new designated DigiLine serving office. Such a move may require the customer to change telephone number(s), and in conjunction therewith, the Company will waive the provisions and charges for moves specified in Paragraph 3.9 of this tariff. The Link Extension Equipment and Link Extension Facility charges will no longer apply once the customer's DigiLine Service is moved. However, if agreed to by the Company, the customer may request that their DigiLine Service not be moved to the new designated serving office. In such case, the Link Extension Equipment and Link Extension Facility charges will continue to apply.
- E. If a customer requests DigiLine Service to be provisioned from an office in their exchange other than the DigiLine serving office designated by the Company, and if agreed to by the Company, the DigiLine Link Extension Equipment charge found in Paragraph 3.13 of this tariff will apply in addition to the charges for Foreign Serving Office Service as described in that section of the General Exchange Tariff. Foreign Serving Office charges will apply per D-Channel configured for Packet Switched Data(1) and per B-Channel.
- F. If a customer requests DigiLine Service to be provisioned from an office outside their exchange other than the DigiLine serving office designated by the Company, and if agreed to by the Company, the DigiLine Link Extension Equipment charge found in Paragraph 3.13 of this tariff will apply in addition to the charges for Foreign Exchange Service, as defined in the General Exchange Tariff: Foreign Exchange Service charges shall apply per D-Channel configured for Packet Switched Data(1) and per B-Channel.
- G. Ancillary services compatible with DigiLine Service will be furnished under the business or residence rates and regulations of the respective tariffs based on the classification of the DigiLine customer's account (as defined by Section 17 of the General Exchange Tariff). A business or residence listing will be provided in the directory for the DigiLine service office according to the regulations provided in Section 6 of the General Exchange Tariff: Customers may combine an analog local exchange access service at residential or business rates with DigiLine Service arrangement. Since DigiLine Service provides ISDN signaling, Touch-Tone Calling Service charges are not applicable.

- (1) DigiLine Packet Switching is obsolete and only available to existing installations at existing locations for existing customers, with the exception of B-Channel Packet that does not connect to the DPN Packet Switch. This service will be withdrawn on December 15, 2007.

3.5 Regulations-(Continued)

MO. PUBLIC SERVICE COMMISSION

(FC) 3.5.6 (Continued)

- 5. If a customer requests DigiLine Service to be provisioned from an office in their exchange other than the DigiLine serving office designated by the Company, and if agreed to by the Company, the DigiLine Link Extension Equipment charge found in paragraph 3.13 of this tariff will apply in addition to the charges for Foreign Serving Office Service as described in that section of the General Exchange Tariff. Foreign Serving Office charges will apply per D channel configured for packet switched data and per B channel.
- 6. If a customer requests DigiLine Service to be provisioned from an office outside their exchange other than the DigiLine serving office designated by the Company, and if agreed to by the Company, the DigiLine Link Extension Equipment charge found in paragraph 3.13 of this tariff will apply in addition to the charges for Foreign Exchange Service, as defined in the General Exchange Tariff. Foreign Exchange Service charges shall apply per D channel configured for packet switched data and per B channel.
- 7. Ancillary services compatible with DigiLine Service will be furnished under the business or residence rates and regulations of the respective tariffs based on the classification of the DigiLine customer's account (as defined by Section 17 of the General Exchange Tariff). A business or residence listing will be provided in the directory for the DigiLine service office according to the regulations provided in Section 6 of the General Exchange Tariff. Customers may combine an analog local exchange access service at residential or business rates with DigiLine Service arrangement. Since DigiLine Service provides ISDN signaling, Touch-Tone Calling Service charges are not applicable.

(FC) 3.5.7 Caller ID

- A. Caller ID is offered on a subscription basis, which requires the customer to order the service. Where Caller ID is available, any calling party, whether they subscribe to Caller ID or not, has per call blocking capability.

The Southwestern Bell Telephone calling party may prevent the delivery of their calling name and/or number to the called party by dialing an access code (*67 on their Touch-tone pad or 1167 from a rotary telephone) immediately prior to placing a call. The access code will activate per call blocking, which is available at no charge.

If the calling party activates blocking, the name and/or number will not be transmitted across the line. Instead, Caller ID customers will receive an anonymous indicator. This anonymous indicator indicates to the Caller ID customer that the calling party has elected to block delivery of the telephone number.

The blocking of the calling name and/or number will not be provided on calls originating from Customer-Owned Pay Telephone Services.

(CT) B. In addition to the provisions of the General Exchange Tariff, Section 17, Paragraph 17.8, the calling party and customer indemnifies and saves Southwestern Bell harmless against any and all claims for damages caused or claimed to have been caused, directly or indirectly, by the transmission to a Caller ID customer or a telephone number which the calling party has requested to be omitted from the telephone directory or has requested not to be disclosed to any person.

(CT) C. Caller ID information may not be sold or given to another party without the caller's written permission.
(CT) Caller ID information may only be used for: (a) routing or completion of calls, (b) billing of calls, (c) account management purposes, (d) services directly related to the call or transaction, (e) verification of calling party identity and (f) marketing products or services that are directly related to those previously acquired by the customer from the name and number delivery services subscriber. This applies if the name and number delivery service subscriber has an existing relationship with the customer. Caller ID customers failing to comply with any of these conditions will have their service terminated.

3.5.9 The regulations specified in General Exchange Tariff, Paragraph 17.5.1, Paralleling Service, shall not apply when DigiLine Service and Local Exchange Services are furnished at the same premises.

DIGILINE SERVICE

3.5 REGULATIONS-(Continued)

3.5.8 Calling Number Delivery (CND) (Continued)

MO. PUBLIC SERVICE COMM

A. -(Continued)

PBX customers are responsible for providing per line blocking on their own PBX. Southwestern Bell will transmit the anonymous indicator received from the PBX customer.

(RT) The blocking of the CPN will not be provided on calls originating from Customer-Owned Pay Telephone Service.

B. In addition to the provisions of the General Exchange Tariff, Section 17, Paragraph 17.8, the calling party and customer indemnifies and saves Southwestern Bell harmless against any and all claims for damages caused or claimed to have been caused, directly or indirectly, by the transmission to a CND customer or a telephone number which the calling party has requested to be omitted from the telephone directory or has requested not to be disclosed to any person.

C. CND information may not be sold or given to another party without the caller's written permission. CND information may only be used for: (a) routing or completion of calls, (b) billing of calls, (c) account management purposes, (d) services directly related to the call or transaction, (e) verification of calling party identity and (f) marketing products or services that are directly related to those previously acquired by the customer from the CND services subscriber. This applies if the CND service subscriber has an existing relationship with the customer. CND customers failing to comply with any of these conditions will have their service terminated.

3.5.9 The regulations specified in General Exchange Tariff, Paragraph 17.5.1, Paralleling Service, shall not apply when DigiLine Service and Local Exchange Services are furnished at the same premises.

3.7 Service Terms

(CT) 3.7.1 Minimum Service Term: All DigiLine Service components have a minimum service term of one month.

(CT) 3.7.2 Basic Rate Interface Installation Charge Service Term Agreements: Term pricing options are available for the Installation Charge associated with the Basic Rate Interface. These options are in addition to the typical month-to-month payment option for the Basic Rate Interface. If a customer commits to retain this service component at one location for a specific term, the customer will not be charged the full Installation Charge for the Basic Rate Interface. Options include a 12 or 24 month term. If a customer chooses a service term and then disconnects the Basic Rate Interface prior to the expiration of that term, a charge will be due. This termination charge is equal to the difference between the normal month-to-month Installation Charge in effect at the time the service was installed and the actual amount paid for the installation.

DIGILINE SERVICE

(RT)

3.7 SERVICE TERMS

- 3.7.1 Minimum Service Term: All DigiLine Service components have a minimum service term of one month.
- 3.7.2 Basic Rate Interface Service Term Agreements: Term pricing options are available with the Basic Rate Interface. These options are in addition to the typical month-to-month payment option for the Basic Rate Interface. If a customer commits to retain this service component at one location for a specific term, the customer will not be charged the full Installation Charge for the Basic Rate Interface. Additionally, the monthly rate will not increase during the term of an agreement. If tariff changes become effective lowering the rate for a DigiLine Basic Rate Interface for a particular service term agreement pricing option, the Company will also lower this rate for any customer with an unexpired service term agreement. Coterminous additions are not permitted for the service term options. Customers may opt to convert from the original service term to a longer service term prior to the expiration of the original term. Options include a 12- or 24-month term. If a customer chooses a service term and then disconnects the Basic Rate Interface prior to the expiration of that term, a termination charge will be due. Payment of the termination charge does not release the customer from other previous amounts owed to the Company.

For Service Term Agreements which become effective on or after September 15, 2004:

- In addition to any unpaid Special Construction or Nonrecurring Charges (excluding waived charges), customer termination liability for cancellation of DigiLine Service shall be equal to fifty percent (50%) of all recurring charges for the remaining months of the customer's Service Term

For Service Term Agreements in effect prior to September 15, 2004:

- The termination charge is equal to the difference between the normal month-to-month Installation Charge in effect at the time the service was installed and the actual amount paid for the installation.
- 3.7.3 If a customer chooses to disconnect DigiLine Service in order to convert to another Company digital service of equal or greater speed the Company will waive the termination charge associated with the term agreement if (1) the customer has had DigiLine Service for at least six months, and (2) the customer enters into a new service term agreement for a comparable quantity of service for a period greater than or equal to the number of months remaining on the DigiLine agreement.

Options include a 12 or 24 month term. If a customer chooses a service term and then disconnects the Basic Rate Interface prior to the expiration of that term, a charge will be due. This termination charge is equal to the difference between the normal month-to-month Installation Charge in effect at the time the service was installed and the actual amount paid for the installation.

(CT)
|
(CT)

3.7.3 If a customer chooses to disconnect DigiLine Service in order to convert to another Telephone Company digital service of equal or greater speed the Telephone Company will waive the termination charge associated with the term agreement if (1) the customer has had DigiLine Service for at least six months, and (2) the customer enters into a new service term agreement for a comparable quantity of service for a period greater than or equal to the number of months remaining on the DigiLine agreement.

3.8 Moves

3.8.1 A Move Charge, as specified in this tariff, will apply when a customer moves his DigiLine Service from one location to another within SWBT's jurisdiction in Missouri, except as described in the following paragraphs. If the customer is moving the service prior to the expiration of an Installation Charge service term agreement, the move will not be considered a disconnect for the purpose of calculating a termination charge if: (1) the service at the new location is ordered at the same time the customer requests the disconnect at the current location, and (2) the customer agrees to complete the unexpired term at the new location.

3.8.2 If there are no existing Basic Rate Interface Installation Charge service term agreements associated with the service, the customer may choose a 12 or 24 month service term agreement at the new location and the Move Charge will not apply. The customer will be charged the installation charge associated with the 12 or 24 month service term agreement and the Move Charge.

Division of the Public Service Commission

DIGILINE® SERVICE

DEC 16 1997

(MT) 3.7 Service Terms

3.7.1 Minimum Service Term: All DigiLine Service components have a minimum service term of one month. MISSOURI PUBLIC SERVICE COMMISSION

3.7.2 Basic Rate Interface Installation Charge Service Term Agreements: Term pricing options are available for the Installation Charge associated with the Basic Rate Interface. These options are in addition to the typical month-to-month payment option for the Basic Rate Interface. If a customer commits to retain this service component at one location for a specific term, the customer will not be charged the full Installation Charge for the Basic Rate Interface. Options include a 12 or 24 month term. If a customer chooses a service term and then disconnects the Basic Rate Interface prior to the expiration of that term, a charge will be due. This termination charge is equal to the difference between the normal month-to-month Installation Charge in effect at the time the service was installed and the actual amount paid for the installation.

(MT)

(AT) 3.7.3 If a customer chooses to disconnect DigiLine Service in order to convert to another Telephone company Basic Rate Interface service, the Telephone Company will waive the termination charge associated with the term agreement if (1) the customer enters into a new service term agreement for a quantity of BRIs equal to or greater than the existing agreement; and (2) the new term period is greater than or equal to the number of months remaining on the DigiLine agreement.

(AT)

(FC) 3.8 Moves

(FC) 3.8.1 A Move Charge, as specified in this tariff, will apply when a customer moves his DigiLine Service from one location to another within SWBT's jurisdiction in Missouri, except as described in the following paragraphs. If the customer is moving the service prior to the expiration of an Installation Charge service term agreement, the move will not be considered a disconnect for the purpose of calculating a termination charge if: (1) the service at the new location is ordered at the same time the customer requests the disconnect at the current location, and (2) the customer agrees to complete the unexpired term at the new location. AUG 16 1999 MISSOURI PUBLIC SERVICE COMMISSION

(FC) 3.8.2 If there are no existing Basic Rate Interface Installation Charge service term agreements associated with the service, the customer may choose a 12 or 24 month service term agreement at the new location and the Move Charge will not apply. The customer will be charged the installation charge associated with the 12 or 24 month service term agreement in lieu of the Move Charge.

(FC) 3.8.3 If the customer requests a move prior to the expiration of a Basic Rate Interface Installation Charge service term agreement and the customer elects to move the same quantity of Basic Rate Interfaces to another location in Missouri served by SWBT, the customer may

3.9 Moves

JAN - 9 1997

(CT) 3.9.1 A Move Charge, as specified in this tariff, will apply when a customer moves his DigiLine Service from one location to another within SWBT's jurisdiction in Missouri, except as described in the following paragraphs. If the customer is moving the service prior to the expiration of an Installation Charge service term agreement, the move will not be considered a disconnect for the purpose of calculating a termination charge if: (1) the service at the new location is ordered at the same time the customer requests the disconnect at the current location, and (2) the customer agrees to complete the unexpired term at the new location.

(AT) 3.9.2 If there are no existing Basic Rate Interface Installation Charge service term agreements associated with the service, the customer may choose a 12 or 24 month service term agreement at the new location and the Move Charge will not apply. The customer will be charged the installation charge associated with the 12 or 24 month service term agreement in lieu of the Move Charge.

(MT)(CT) 3.9.3 If the customer requests a move prior to the expiration of a Basic Rate Interface Installation Charge service term agreement and the customer elects to move the same quantity of Basic Rate Interfaces to another location in Missouri served by SWBT, the customer may complete the remainder of the original service term at the new location. The Move Charge will apply unless the customer chooses to request an additional 12 or 24 month service term agreement for the Basic Rate Interfaces at the new location. If the customer selects an additional 12 or 24 month service term agreement, the installation charge associated with that agreement will apply in lieu of the Move Charge. The additional service term period will begin on the day following expiration of the remainder of the original service term. Only one additional service term agreement is permitted per BRI. If a customer with an additional service term disconnects, termination charges will apply for any unexpired original and/or additional service term agreements in accordance with the termination charge calculation described in paragraph 3.7.2 preceding.

3.8 Special DigiLine Service Requests

MAY 30 1995

- 3.8.1 DigiLine Service will be furnished at the rates contained in this tariff section, provided facilities are available. Where facilities are not available or unusual expenditures are involved in making them available, the customer may be required to pay additional charges (under Section 5 of the General Exchange Tariff) to cover the unusual expenditure, or to contract for services beyond the service term or both.
- 3.8.2 If a customer requests DigiLine Service to be provisioned from an office in their exchange other than the DigiLine serving office designated by SWBT, and if agreed to by SWBT, the DigiLine Extension Equipment charge found in Paragraph 3.12 of this tariff will apply in addition to the charges for Foreign Serving Office Service, under Section 2 of the Private Line Service Tariff. Foreign Serving Office Service charges shall apply on a per Channel basis.
- 3.8.3 If a customer requests DigiLine Service to be provisioned from an office outside of their exchange other than the DigiLine serving office designated by SWBT, and if agreed to by SWBT, the DigiLine Extension Equipment charge found in Paragraph 3.12 of this tariff will apply in addition to the charges for Foreign Exchange Service, under Section 2 of the Private Line Service Tariff. Foreign Exchange Service charges shall apply on a per Channel basis.

3.9 Moves

(CT)

A Move Charge, as specified in this tariff, will apply when a customer moves his DigiLine Service from one location to another within SWBT's jurisdiction in Missouri. If the customer is moving the service prior to the expiration of a service term, the move will not be considered a disconnect for the purpose of calculating a termination charge if (1) the service at the new location is ordered at the same time the customer requests the disconnect at the current location, and (2) the customer agrees to complete the unexpired term at the new location.

(CT)

3.10 Supersedures

DigiLine Service may be transferred to a new customer at the same premises upon written concurrence of SWBT. The customer to whom service is transferred must accept all past indebtedness, liabilities, minimum term provisions and equipment configurations in effect for the previous customer at the time of the transfer.

MO. PUBLIC SERVICE COMM.

3.10 Suspension of Service - Initiated by the Customer (Vacation Service)

Vacation Service (Section 22 of the General Exchange Tariff) is not offered for DigiLine Service.

3.12. Rate Application

3.12.1 General

1. If the customer cancels an order for service before installation of the equipment and facilities is complete, the customer agrees to pay all expenses incurred by SWBT before receipt of notice of cancellation. This charge shall not exceed all charges which would have applied had the service been installed.
2. DigiLine customers may elect to spread the payment of all installation and nonrecurring charges through a series of equal monthly payments not to exceed a period of 12 months. An amount of five dollars (\$5.00) will be applied to the first monthly payment for each installment billing arrangement. This charge will only apply once when multiple orders are issued for one customer, at one location, with one due date.

3.12.2 Integrated Services Digital CSV/CSD Transport Option - Usage Options

1. DigiLine Service provides for usage of the PSTN on either a flat rate or usage sensitive basis per BRI. The flat rate usage charge applies per B-channel activated for CSV/CSD. Customers opting for the usage sensitive option must select a usage package which applies on a per BRI basis. Customers may not combine a flat rate option with a usage sensitive option on the same BRI.
2. The customer may opt to switch usage options or usage packages upon notification to SWBT. Billing under the newly selected usage option or usage package will commence with the beginning of the customer's next billing period. The Change a Network Rate Element charge will apply for customers switching usage options or usage packages.

3.12.1 General

1. If the customer cancels an order for service before installation of the equipment and facilities is complete, the customer agrees to pay all expenses incurred by the Company before receipt of notice of cancellation. This charge shall not exceed all charges which would have applied had the service been installed.
2. DigiLine customers may elect to spread the payment of all installation and nonrecurring charges through a series of equal monthly payments not to exceed a period of 12 months. An amount of five dollars (\$5.00) will be applied to the first monthly payment for each installment billing arrangement. This charge will only apply once when multiple orders are issued for one customer, at one location, with one due date.

3.12.2 Integrated Services Digital CSV/CSD Transport Option - Usage Options

1. DigiLine Service provides for usage of the PSTN on either a Flat Rate or Usage Sensitive basis per BRI. The Flat Rate Usage charge applies per B-Channel activated for CSV/CSD. Customers opting for the Usage Sensitive Option must select a usage package which applies on a per BRI basis. Customers may not combine a Flat Rate Option with a Usage Sensitive Option on the same BRI. (Note that the customer's choice of a Flat or Measured CSV/CSD Option does not restrict the choice of PSD options.)(1)

(1) DigiLine Packet Switching is obsolete and only available to existing installations at existing locations for existing customers, with the exception of B-Channel Packet that does not connect to the DPN Packet Switch. This service will be withdrawn on December 15, 2006.

REC'D MAR 09 2001

(FC) 3.15 Stakeholder Panels

The Telephone Company reserves the right to periodically provide DigiLine services without charge to customers in return for their participation on stakeholder panels. The panels will be established for the purpose of gathering market research. The Service and Equipment Charges, installation charge, recurring monthly rates and any other associated charges will be waived only for the DigiLine services designated by the Telephone Company as pertinent to the research and only for the duration of the stakeholder panels and the customer's participation on the panel. As a condition to participate on stakeholder panels, customers will be obligated to provide specific feedback (e.g., respond to surveys, participate in focus groups, etc.) concerning the services to the Telephone Company. Panel participants will be selected by the Company to represent a cross section of Missouri customer stakeholder groups. This service will be provided for a maximum of twelve months after installation. All panels will be disbanded before June 1, 1998.

4.1.2 Definitions

Detailed Report - Provides a printout of information associated with each session including, but not limited to, call set-ups, connect time and kilosegments transmitted and received by customer account.

Kilosegment - A segment is a means of measuring the volume of transmitted information. The segment size is the number of octets of call user data contained in a packet segment. The standard Company segment size is 64 octets. The number of segments in a packet is determined by dividing the number of octets of call user data in a packet by 64 and rounding up. A Kilosegment is one thousand segments.

Packet Directory Number - This is the "E-164 address" associated with packet capability on the customer ISDN-based service. The number identifies customers originating calls on the Packet Switching Network.

Packet Switching Network - Consists of the packet switches and interswitch facilities within a LATA.

(1) Packet Switching is obsolete and only available to existing installations at existing locations for existing customers, with the exception of B-Channel Packet that does not connect to the DPN Packet Switch. This service will be withdrawn on December 15, 2007.

MISCELLANEOUS SERVICES

4.2 DIGITAL CUSTOMER ALERTING SERVICE (1)

4.1.1 This service provides the capability of activating and deactivating an alerting tone on subscriber lines served from suitably equipped end offices. The alerting tone is provided in the form of a stutter dial tone and serves as notification that some type of action is warranted (i.e., a message is waiting for retrieval). This service is limited to customers who have purchased a Packet Switched Data option for the Company's Basic Rate Interface (BRI) Integrated Services Digital Network (ISDN) based service. Digital Customer Alerting Service is not available on a stand alone basis.

4.1.2 Rules and Regulations

The following rules and regulations are in addition to the rules, regulations, and rates in other Tariffs:

- A. This service is subject to the availability and operational limitations of the equipment and facilities.
- B. Temporary suspension of service is not available.
- C. The Company reserves the right to determine the facilities used to provide service and to modify or change such equipment and facilities.

4.2.3 Rates and Charges

	USOC	Per Minute Rate (2)	Service Charge (3)
Customer Alerting Connect Time, per minute.	ACW	\$0.15	\$224.00

- (1) Packet Switching, which is a required component of Digital Customer Alerting Service is obsolete and only available to existing installations at existing locations for existing customers, with the exception of B-Channel Packet that does not connect to the DPN Packet Switch. This service will be withdrawn on December 15, 2007.
- (2) For the purpose of billing, a minimum connect time of 1/30 of a minute is billed on all calls. When the actual duration is longer than 1/30 of a minute, fractional minutes of use will be rounded to the next 1/60 of a minute. The connect time is for activation/deactivation of the message waiting indicator on subscribers' lines.
- (3) This charge applies per Customer Alerting customer.

SERVICE COMMISSION**

- (1) This service is not available until after December 1, 1996.
- (2) For the purpose of billing, a minimum connect time of 1/30 of a minute is billed on all calls. When the actual duration is longer than 1/30 of a minute, fractional minutes of use will be rounded to the next 1/60 of a minute. The connect time is for activation/deactivation of the message waiting indicator on subscribers' lines.
- (3) This charge applies per Customer Alerting customer.

PRIMARY RATE ISDN: SelectData

(RT)

5.1 GENERAL

5.1.1 Service Description

Primary Rate ISDN is an intraLATA dial-up multi-rate switched digital data service. Primary Rate ISDN will provide digital connections ranging from 64 Kbps to 1536 Kbps (synchronous) in 64 Kbps increments of bandwidth via the public switched network. Network access to Primary Rate ISDN is via fully configured ISDN primary rate interfaces (PRI).

SelectData is an inbound-calling-only service, which provides ISDN PRI functionality for digital data transport and/or analog modem calls (voice grade), on a single channel basis. Individual calls may be received at transmission speeds up to 64 Kbps. Outbound calls may not be placed with SelectData service.

(RT)

(RT)

5.2 SERVICE COMPONENTS

5.2.1 Primary Rate ISDN Arrangement: provides the communication path capable of bandwidth aggregation from the customer's premises to the Primary Rate ISDN serving office. A Primary Rate ISDN arrangement may consist of Control Links and Communication Links. A minimum of one Control Link is required per Primary Rate ISDN arrangement. For SelectData, the minimum configuration provides digital connections of up to 64 KBPS only.

Issued: November 15, 2006

Effective: December 15, 2006

5.2 SERVICE COMPONENTS (cont'd)

5.2.1 Primary Rate ISDN Arrangement: (cont'd)

5.2.1.1 Primary Rate ISDN Interface Control Link: an ISDN PRI termination and a digital multichannel transmission path between the central office and the customer's premises, which is configured with one D Channel or a back-up D Channel and 23 B Channels.

5.2.1.2 Primary Rate ISDN Interface Communication Link: an ISDN PRI termination and a digital multichannel transmission path between the central office and the customer's premises, which is configured with 24 B Channels.

5.2.1.3 Primary Rate ISDN Port Control Link: an ISDN PRI connection that does not include the facility between the customer's premises and the Primary Rate ISDN Serving Office, which is configured with one D Channel or a back-up D Channel and 23 B Channels. The connection is made using a Company provided facility purchased separately. This facility must be at a minimum of DS1 level and must conform to technical specifications listed in Paragraph 2.5, Section 2 of the P.S.C. Mo.-No. 41 Integrated Services Tariff. The same customer of record is required for both the Primary Rate ISDN Port Control Link and the associated Company provided facility. Sharing of common transport or Primary Rate ISDN arrangements between multiple customers is not permitted.

PRIMARY RATE ISDN: SelectData®

5.2 SERVICE COMPONENTS (cont'd)

5.2.3 Optional Features

5.2.3.1 The following optional features are available with the SelectData service:

5.2.3.1.1 Back-Up D Channel (BD-C): Allows enhanced survivability of the Primary Rate ISDN arrangement by providing automatic takeover for a failed D-Channel.

5.2.3.1.2 Additional Telephone Numbers (Direct Inward Dialing Service): Provides additional telephone numbers to the Primary Rate ISDN user.

(AT) 5.2.3.1.3 Calling Line Identification (CLID): Allows the number and name (where technically capable) of the calling party to be delivered to the called party as part of the called party set-up message.
|
(AT)

5.2.3.1.4 Loop Protection: Provides automatic restoration of the Primary Rate ISDN service Control Link or Communication Link facility and physical route redundancy from the demarcation point at the customer's premises to the customer's normal serving office in the event of a transmission failure caused by a single facility break or a single electronics failure. The automatic restoration capabilities are provided through the use of intelligent components, which are capable of sensing transmission failures. The primary and secondary transmission paths are separately routed in geographically and physically separate fiber optic cables up to the nearest point to the customer's premises that route redundancy can be achieved. In the event of a transmission failure, the intelligent components will automatically switch the Primary Rate ISDN service from the primary to the secondary transmission path within 2.0 seconds.

5.2.3.1.5 Trunk Group Overflow: Provides the ability to direct incoming calls to another Primary Rate ISDN service arrangement when all B Channels are in use. Each overflow arrangement consists of 2 to 10 spans as selected by the customer.

5.2.3.1.6 Additional Call Handling Groups: Provides the capability of grouping B channels by utilizing simulated facility groups.

5.3 REGULATIONS

(CT) 5.3.1 The following regulations are in addition to other regulations as stated in this and other Company tariffs.

5.3.2 SelectData will support data mode calls, as well as analog modem (voice grade) calls.

(CT) 5.3.3 Primary Rate ISDN requires the use of customer provided equipment (CPE) which must be compatible with the Company's equipment and facilities, and is subject to the interface specifications in TR-NWT-000776 (Network Interface Description for ISDN Customer Access) and TR-NWT-001203 (Generic Requirements for the Switched DS1/Switched Fractional DS1 Service Capability from an ISDN Interface). These documents may be obtained from:

(CT) | Telcordia Technologies, Inc.
(CT) | 8 Corporate Place, PYA 3A-184
Piscataway, NJ 08854-4156
Telephone: 1-800-521-2673

5.3.4 Compatible CPE must be provided at both the originating and terminating locations to successfully complete a Primary Rate ISDN call.

5.3.5 Primary Rate ISDN service, when furnished at the same premises in combination with other local exchange service, shall not be considered to be in conflict with the rules of paralleling service.

5.3.6 Primary Rate ISDN service shall not be shared or jointly used except under Section 37 (Shared Tenant Service) of the General Exchange Tariff. Resale is prohibited under Section 17 (Rules and Regulations Applying to All Customers' Contracts) of the General Exchange Tariff.

5.3.7 Temporary suspension of service at the request of the customer, either partial or complete is not applicable for this offering.

5.3 REGULATIONS (cont'd)

5.3.8 Alternate billing is not available for Primary Rate ISDN service.

5.3.9 Service Terms

5.3.9.1 All Primary Rate ISDN service components have a minimum service term of one month.

(AT)
(AT)

5.3.9.2 SelectData customers shall select a service term for each Control Link and Communication Link of either a Month-to-Month, 12-, 24-, 36-, 48-, or 60-month term agreement. Customers selecting a 12-, 24-, 36-, 48-, or 60-month term agreement will be required to sign a contract per order. When a Link Extension is required, it will be provided under the same service term as the associated Control Link / Communication Link.

(AT)
(AT)

5.3.9.3 Customers selecting the Month-to-Month service term may convert to a 12-, 24-, 36-, 48-, or 60-month term agreement at current tariff rates. Customers converting from a Month-to-Month service term within 60 days from the date their Primary Rate ISDN service is established, will receive a credit equal to the difference in installation charges associated with the Month-to-Month term agreement and the newly selected service term.

(AT)

5.3.9.4 Customers selecting the 12-, 24-, 36-, 48-, or 60-month term agreement may convert to a service term of greater length at current tariff rates. Customers converting to a new service term will be required to sign a new contract.

(AT)

5.3.10 Upon expiration of the 12-, 24-, 36-, 48-, or 60-month term agreement, the customer may:

- (A) Continue service at the current Month-to-Month service term rate. That rate will be subject to any future changes.
- (B) Continue service by selecting a new term agreement for the Control Link and/or Communication Link at the then current rates. The rates for the Control Link and/or Communication Link and any associated Link Extensions will not be subject to rate increases for the duration of the term agreement selected by the customer. The customer will be required to sign a new contract.
- (C) Disconnect the service.

Subject to this responsibility, SWBT shall not be responsible for the through-transmission of signals generated by customer-provided equipment or systems or for the quality of, or defects in, such transmission or the reception of signals by such equipment or systems. SWBT shall not be responsible for installation, operation or maintenance of any terminal equipment, data unit or communications systems provided by a customer or user. SWBT is not responsible for adapting Primary Rate ISDN service to the technological requirements of any specific customer equipment.
- 5.5.2 SWBT shall not be responsible to the customer or user, if changes in any of the equipment, operations, or procedures of SWBT used in the provision of Primary Rate ISDN service render any facilities provided by a customer or user obsolete or require modifications or alteration of such equipment or system or otherwise affect its use or performance, provided SWBT has met any applicable information disclosure requirements.

PRIMARY RATE ISDN: SelectData®

5.6 SERVICE AVAILABILITY

5.6.1. The Company will designate the SelectData-equipped central office(s) used to physically provision SelectData service to customers in each exchange. In many cases, a customer's designated SelectData serving central office will be different from the normal serving office designated for basic local exchange service.

(RT) 5.6.2 If the customer's normal serving office is within the non-optional local calling scope of the designated SelectData serving office, Link Extension, charges will not apply.

If the customer's normal serving office is not within the non-optional local calling scope of a SelectData-equipped central office, the customer will be provided with SelectData service from the designated SelectData equipped central office and the rates and charges for Link Extension, as specified in this tariff, will apply.

In both cases preceding, when there is a change in the central office designated as the SelectData serving office for a customer's location, the customer's SelectData service will continue to be provided from the original SelectData serving office, if possible. Should the customer subsequently request that their SelectData service be provisioned from the new designated serving office, the provisions and charges specified in this Tariff for moves and disconnects will apply. The Company may request that the customer, at the customer's option, have the customer's SelectData service provided from the new designated serving office and, in conjunction therewith, may offer to waive move and/or disconnect charges.

(CP) 5.6.3 If a customer requests SelectData service to be provisioned from an office other than the SelectData serving office designated by the Company, and if agreed to by the Company, SelectData service may be extended to Company central offices within the same Local Access Transport Area (LATA) through the application of Primary Rate ISDN Port Communication and/or Control Links, and MegaLink 1.5 (DS1) Service, DS3 Service, or other suitable Company services.

5.6.4 All rates, charges, terms and conditions set forth herein provide for the furnishing of service where suitable facilities and equipment are available and do not create an obligation for the Company to construct such facilities or equipment especially for the provision of this service.

5.7 APPLICATION OF RATES AND CHARGES

5.7.1 A minimum of one Control Link is required per Primary Rate ISDN arrangement. SelectData provides digital connections of 56/64 Kbps only. A Primary Rate ISDN arrangement can consist of any combination of Control Links and Communication Links.

Issued: April 18, 2005

PRIMARY RATE ISDN: SelectData®

(MT) 5.7 APPLICATION OF RATES AND CHARGES (cont'd)

5.7.2 Where applicable, a Link Extension is charged in addition to the monthly rate for the associated Control Link or Communication Link. The Access Link Extension must be associated with and ordered at the same time as the Control Link or Communication Link.

5.7.3 The Primary Rate ISDN Control Link, Communication Link, and Link Extension rates will not be subject to rate increases for the duration of the 12-, 24-, 36-, 48-, or 60-month term agreement signed by the customer.

5.7.4 Optional Deferred Payment of installation Charges and/or Special Construction Charges is available only for customers selecting a 12-, 24-, 36-, 48-, or 60-month term agreement.

5.7.4.1 Before Service is established, the customer may request to spread all the installation charges (including the installation charges associated with optional features) and/or Special Construction Charges over a payment period of either 12, 24, 36, 48, or 60 months but not to exceed the length of the 12-, 24-, 36-, 48-, or 60-month term agreement. The customer cannot change the deferred payment term. The deferred monthly charge will equal the installation charges and/or special construction charges multiplied by the appropriate annuity factor as specified in Section 17 of the General Exchange Tariff.

5.7.4.2 This optional deferred payment is not offered for customers selecting the Month-to-Month service term.

(MT) 5.7.5 Disconnection of Service Prior to the Expiration of the Service Term.

(MT) 5.7.5.1 If the customer disconnects a Primary Rate ISDN Control Link or Communication Link
(AT) prior to the expiration of the 12-, 24-, 36-, 48-, or 60-month term agreement, a termination charge will be due. Payment of the termination charge does not release the customer from other previous amounts owed to the Company.

For Service Term Agreements which become effective on or after September 15, 2004:

- In addition to any unpaid Special Construction or Nonrecurring Charges (excluding waived charges), customer termination liability for cancellation of Primary Rate ISDN SelectData service shall be equal to fifty percent (50%) of all recurring charges for the remaining months of the customer's Service Term

5.7 APPLICATION OF RATES AND CHARGES (cont'd)

5.7.5 Disconnection of Service Prior to the Expiration of the Service Term (cont'd)

5.7.5.1 (cont'd)

For Service Term Agreements in effect prior to September 15, 2004:

- The customer shall pay a charge equal to the Control Link or Communication Link rate in effect on the date of the contract times the number of months remaining on the term agreement for each Control Link or Communication Link disconnected. See Item 5.7.5.3 below for exceptions to this provision. Additional charges will not be applied for any Link Extensions disconnected prior to the expiration of the service term.

5.7.5.2 If the customer disconnects a Primary Rate ISDN Control Link or Communication Link prior to the expiration of the 12-, 24-, 36-, 48-, or 60-month term agreement and the installation charges and/or special construction charge were deferred at the time service was established (Pursuant to Paragraph 5.7.4.1 above), the customer shall pay a charge equal to the remaining principal on the deferred payment term for each Control Link or Communication Link disconnected.

5.7.5.3 The provisions of Paragraph 5.7.5.1, above do not apply in the following circumstances:

(RT)

(FC)

(RT)

(RT)

(FC)

1. When the customer with an existing contract converts to another Company provided digital service under a contract term which is equal to or greater than the number of months remaining on the Primary Rate ISDN Service contract being terminated.

2. If the disconnection of service is the result of a customer move which required the Primary Rate ISDN Service to be provided from a different central office.

In each of the above circumstances, deferred installation charges will become due as specified in Paragraph 5.7.5.2, above.

5.8 RATES AND CHARGES (cont'd)

Footnotes

- (1) Applies to the first unit ordered per request, per customer premises, per installation date.
- (2) The installation charge for customer moves within the same Primary Rate ISDN serving office, as described in 5.3.11.2 preceding, will be equal to the installation charge associated with the SelectVideo 36 month service term.
- (3) Applies to all other units ordered in addition to the initial unit per request, per premises, per installation date.
- (4) For Additional Telephone Number Rates (Direct Inward Dialing Service), please see General Exchange Tariff Section 13, Paragraph 13.7.1 B.
- (5) Loop Protection will be provided where fiber optic facilities are available. Where fiber optic facilities are not available, but could technically be provided, special construction charges may apply.
- (6) An Overflow Arrangement consists of 2 to 10 spans as specified by the customer.
- (7) Charge applies on a per Link basis but all Links within the same Arrangement must be equipped.
- (8) Business customers who currently have service with another carrier and now establish Primary Rate ISDN SelectData with the Company will receive a waiver of all Installation Charges, Service Connection Charges, and Conversion Charges associated with this rate element. To be eligible, the customer must not currently have any past due bills for regulated service owed to the Company, except in those cases where the customer and the Company have established mutually acceptable payment arrangements for collection of past due amounts. This offer cannot be combined with any other non-recurring and/or conversion charge credits or waiver offers.

5.9 PROMOTIONAL RATES

A. SelectData Non-Recurring Charge Waiver

1. A promotional period will begin on October 1, 2003 and end on September 30, 2004 for eligible business customers who order SelectData service and who commit to a 12-month service term. This promotion is available to customers who currently have service with another carrier and who now establish SelectData Service with the Company. Business customers will receive a waiver of all Installation Charges, Service Connection Charges, and Conversion Charges associated with the following rate elements:

<u>Description</u>	<u>USOC</u>
SelectData Primary Rate ISDN Interface Control Link	ZVPS2
SelectData Primary Rate ISDN Port Control Link	ZPOS2
SelectData Primary Rate ISDN Interface Communication Link	ZVPS1
SelectData Primary Rate ISDN Port Communication Link	ZPOS1

2. To be eligible for this promotion, the business customer must not currently have any past due bills for regulated service owed to the Company, except in those cases where the customer and the Company have established mutually acceptable payment arrangements for collection of past due amounts. Termination liability charges as specified in this Tariff Section will apply in the event of early termination of contract.
3. This offer cannot be combined with any other non-recurring and/or conversion charge credits or waiver offers.
4. Service must be installed on or before November 30, 2004.
