TARIFF FORMAT

REC'D MAR 11 2004

- A. Sheet Numbering - Sheet numbers appear in the upper right corner of the page. Sheets are numbered sequentially. However, new sheets are occasionally added to the tariff. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 14 and 15 would be 14.1.
- B. Sheet Revision Numbers - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current sheet version on file with the Commission. For example, the 4th revised Sheet 14 cancels the 3rd revised Sheet 14. Because of various suspension periods, deferrals, etc. the Commission follows in their tariff approval process, the most current sheet number on file with the Commission is not always the tariff page in effect.
- C. Paragraph Numbering Sequence - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:
- 2.
 - 2.1.
 - 2.1.1.
 - 2.1.1.A.
 - 2.1.1.A.1.
 - 2.1.1.A.1.(a).
 - 2.1.1.A.1.(a).I.
 - 2.1.1.A.1.(a).I.(i).
 - 2.1.1.A.1.(a).I.(i).(1).
- D. Check Sheets - When a tariff filing is made with the Commission, an updated check sheet accompanies the tariff filing. The check sheet lists the sheets contained in the tariff, with a cross reference to the current revision number. When new pages are added, the check sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on the check sheet if these are the only changes made to it (i.e., the format, etc. remains the same, just revised revision levels on some pages). The tariff user should refer to the latest check sheet to find out if a particular sheet is the most current on file with the Commission.

2.12 Allowance for Interruptions

Service Commission

2.12.1 For all Services for which charges are specified on time-sensitive basis, and which there may be interruption of an individual call, due to a condition in Teleglobe's facilities or in access or termination facilities provided by other carriers, which may be remedied by re-dialing the call, the Customer will receive a credit allowance as follows:

- A. A credit allowance will be made for that portion of a call which is interrupted due to poor transmission (e.g. noisy circuit), one-way transmission (one party is unable to hear the other), or involuntary disconnection caused by deficiencies in Service. Customer may also be granted credit for reaching a wrong number. To receive a credit, Customer must notify a Teleglobe customer service representative and furnish information, including the called number, the Service subscribed to, the difficulty experienced, and the approximate time the call was placed.
- B. Credit allowance will not be made for (1) interruptions not reported to Teleglobe, or (2) interruptions that are due to the failure of power, equipment, systems or services not provided by Teleglobe. If Customer elects to use another means of communications after one of the above interruptions, or during a period when Customer is unable to place a call over Teleglobe facilities, the Customer must pay the charges for the alternative Service used.

2.12.2 When a call has been disconnected, the Customer will be given a credit allowance equivalent to the charge for the initial minute of the call made to reestablish communications with the other party. Where a call has been interrupted due to poor transmission or one-way transmission, the Customer will be given a credit allowance up to an amount equivalent to the charge for the last three minutes of the interrupted call, or for an entire call if it lasted less than three minutes. Customer who has reached a wrong number will be given a credit allowance up to an amount equivalent to the charge for the initial minute of the call to the wrong number if the Customer reports the situation promptly to a Teleglobe customer service representative.
