MOVEMENT OF EXCHANGES
BETWEEN RATE GROUPS

DEC 19 1975

1. The term "Rate Group" refers to applicable codes and main station limitations for all exchanges as shown on 3rd revised sheet of this tariff section.
2. An exchange is placed in a Rate Group on the basis of the number of main stations in that exchange. Two or more exchanges are so placed when Extended Area Service between such exchanges provides toll free calling between them. In the foregoing the exchange area is also the "Local Calling Area" and in the case of Extended Area Service, the areas included would be referred to as an "Extended Calling Area."
3. When the number of main stations in either a local or extended calling area changes by growth or loss of main stations so that the aggregate numbers of main stations exceeds the maximum or falls below the minimum number of main stations allowed in the rate group for that exchange by as many as ten (10) main stations, and such station count position is maintained for four (4) consecutive months, then the exchange thus affected will be moved to the appropriate rate group, provided that notification of such change be given to all affected customers and such notification be also given to the Missouri Public Service Commission by letter, explaining the changes to be made, including applicable revised tariff sheets.
4. The new-local service rates as set forth in the revised tariff sheet referred to in paragraph #3 above will be made effective on the 1st billing date after acceptance of the filing by the Missouri Public Service Commission.
