INTEGRATED SERVICES DIGITAL NETWORK (ISDN)

I. BASIC RATE INTERFACE (BRI) ⁽¹⁾ (C)

A. General

1. Integrated Services Digital Network - Basic Rate Interface (ISDN-BRI) is a local exchange telecommunications service that provides integrated voice and data communications capability. ISDN-BRI service supports the simultaneous transmission of voice and data over a single exchange access line.

ISDN-BRI provides a customer two B-channels with transmission speeds up to 64 Kbps each and one 16 Kbps D-channel. The service provides switched communication paths providing end user access to a variety of network services and features including data, voice and video, which conforms to internationally developed, published and recognized standards generated by the International Telecommunications Union.

2. Service Capabilities

- a. ISDN-BRI consists of three distinct channels delivered to the customer's premise: two B (bearer) channels and one D (delta) channel. This is also known as 2B+D. ISDN-BRI is not available in other channel configurations of 1B+D or 0B+D.
- b. The B-channel carries voice and/or data communications at speeds up to 64 Kbps, from the customer's premise, over the loop facility, to the central office. Packet data services are not available over the B-channel.
- c. The D-channel carries administrative signaling at 16 Kbps for call-control for either a voice or data B-channel call on the ISDN-BRI line. The D-channel does not have voice capability. Packet data services are not available on the D-channel.
- d. Customers subscribing to ISDN-BRI must comply with ISDN Basic Rate Network Interface specifications as specified by the Company. The ISDN Basic Rate Interface is comprised of a limited set of standard user-network interfaces. The BRI customer premises equipment (CPE) located at the customer premises must be compatible with the network interface. This interface is defined as follows:

PUBLIC TELEPHONES

MISSOURI
PUBLIC SERVICE COMMISSION

- I. A public telephone is an exchange station installed at the Company's initiative or at its option, at a location chosen or accepted by the Company as suitable and necessary for furnishing service to the general public.
- II. Public telephones are ordinarily coin operated, except in some cases where the public telephone is in the charge of a Telephone Company attendant or the service is coinless.
- III. Public telephones are installed primarily for the use of the general public in making outgoing calls. It is contemplated that the occupants of the premises in which the public telephones are located have subscribed or shall subscribe for such service as is necessary in the judgement of the telephone company, in the conduct of their business. The public telephones are supplemental to such customer's telephones, and their telephone numbers will not be listed in the directory nor shall the agent on whose premises they are located be permitted to advertise their numbers.
- IV. Public telephones are installed without a deposit or guarantee. Each local message is charged to the public at twenty-five cents (\$0.25) and toll messages are charged for at the established toll rates of the company responsible for carrying the call. Additionally, an operator services charge or its equivalent may also be applicable.
- V. Extension stations on public telephones will not be permitted.
- VI. In all cases the Company furnishes and displays such of its standard signs as are necessary to properly direct customers to the station.
- VII. The Telephone Company may furnish public telephones without coin collecting equipment in selected locations for the purpose of satisfying demand for optional billing services on an originating basis only. In the normal mode, Coinless Public Telephone service affords customers the option of selecting a preferred billing arrangement for outgoing messages: charging to a third number or to a Telephone Company credit card account, or placing calls collect. In certain locations, however, calls may be billed on a collect basis only.

d. (Cont'd)

A two-wire interface is the physical interface between a central office switch equipped with ISDN and the customer premises equipment which is necessary for terminating a telephone circuit or facility at the customer premises.

3. Standard Features

a. Closed User Group – allows the user to establish subnetworks within which the members of the Closed User Group can communicate. Each data terminal in a Closed User Group can be arranged in one of the following modes:

- (1) Outgoing Access – The data terminal originates outgoing calls only.
- (2) Incoming Access – The data terminal receives incoming calls only.
- (3) Incoming Calls Barred – The data terminal originates outgoing calls only to the data terminals in the Closed User Group with which it is associated.
- (4) Outgoing Calls Barred – The data terminal receives incoming calls only from the data terminals in the Closed User Group with which it is associated.
- (5) Unrestricted Access – The data terminal receives and originates both incoming and outgoing calls.

b. Configuration Group – Associates a button or buttons of an ISDN-CPE station to a feature or group of features. Each different telephone set button arrangement requires that a different Configuration Group be assigned.

(11) Feature Package 1 - This package includes:
Calling Number ID/Calling Name ID
Call Forwarding
Flexible Calling
Automatic Callback
Additional Call Offering

(12) Loop Extension – ISDN-BRI is available only where the customer's service location is within the provisioning limitations as determined prior to installation of the service. This limitation is a cable plant distance of approximately 18,000 feet. The actual distance is dependent on decibel (db) loss and not just physical loop length. Should the customer's service location exceed said limitations, service will be provided where the Company has compatible facilities available, or where existing facilities can be made compatible by the addition of special equipment. This service, which carries an additional charge, is called Individual Line Loop Extension and will extend the loop to approximately 36,000 feet.

B. Regulations

1. This service is offered only where facilities and appropriate technology exist.
2. Local voice and data calls will be billed on a flat-rate basis, as shown in Section 23.I.C. Toll charges shall apply when data or voice calls are made outside of the customer's designated local calling area. When two simultaneous B-channels are combined for a maximum data speed of 128 Kbps, the toll call will be billed as if two calls were dialed by the originating customer.

⁽¹⁾ **Limited to existing residence customers at existing locations as of July 30, 2008.** (N)

5. Optional Services and Features* (Cont'd)

a. (Cont'd)

- (11) Feature Package 1 - This package includes:
 Calling Number ID/Calling Name ID
 Call Forwarding
 Flexible Calling
 Automatic Callback
 Additional Call Offering

- (12) Loop Extension - ISDN-BRI is available only where the customer's service location is within the provisioning limitations as determined prior to installation of the service. This limitation is a cable plant distance of approximately 18,000 feet. The actual distance is dependent on decibel (db) loss and not just physical loop length. Should the customer's service location exceed said limitations, service will be provided where the Company has compatible facilities available, or where existing facilities can be made compatible by the addition of special equipment. This service, which carries an additional charge, is called Individual Line Loop Extension and will extend the loop to approximately 36,000 feet.

B. Regulations

- 1. This service is offered only where facilities and appropriate technology exist.
- 2. **Local voice** and data calls will be billed on a flat-rate basis, as shown in Section 23.I.C. Toll charges shall apply **when data** or voice calls are made outside of the customer's designated local calling area. When two simultaneous B-channels are combined for a maximum data speed of 128 Kbps, the toll call will be billed as if two calls were dialed by the originating customer. (CT)

* ISDN terminal equipment is the responsibility of the customer and must support the configuration, optional services, and features chosen by the customer.

B. Regulations (Cont'd)

3. In exchanges where IntraLATA Presubscription has been implemented, only one InterLATA and one IntraLATA Carrier may be selected for all B-channels associated with the same ISDN-BRI Service. Access via 101XXXX to other Interexchange Carriers is available.
4. A minimum service period of three months is required.
5. The Company shall terminate ISDN-BRI Services at the Company Network Interface Device (NID) located at the customer's premises.
6. Two Primary Directory Numbers will be included with an ISDN-BRI Service, one for each B-Channel. If Additional Directory Numbers are required on either channel, an additional charge, as specified in Section 23.I.D., will apply for each additional number.
7. ISDN-compatible customer premises terminal equipment is required for proper operation. It is the customer's responsibility to provide necessary power and obtain such equipment.
8. The provisions for temporary suspension of service, as defined in Section 34 of this tariff, do not apply to ISDN-BRI Service.
9. This service is available only from central offices, which have the necessary facilities to provide ISDN-BRI on the standard network platform. In the event a customer is provided service from a non-ISDN compatible central office, the Company will provide ISDN-BRI Service from an alternative serving central office. This provision is accomplished by utilizing a 'hubbing' architecture and the subscriber may be required to accept a unique NXX.

When a unique NXX is required, charges for Foreign Exchange Service, specified in the Company Private Line Tariff, P.S.C. MO.-No. 24, will apply in addition to the rates and charges included in this section. Due to the nature of the 'hubbing' architecture and the use of a unique NXX, the local calling area (e.g., Extended Area Service) may change.

9. (Cont'd)

Emergency 911 calls placed over ISDN-BRI lines provisioned via this arrangement will be identified as the alternative service central office NXX and not the non-ISDN compatible central office NXX. The Company shall not be liable for any loss or damages arising from emergency calls placed from ISDN-BRI lines provisioned via an alternative serving central office.

10. One directory listing will be provided with ISDN-BRI. Additional listings are available as specified in the Company's General Exchange Tariff.

11. ISDN-BRI Service will be assessed the appropriate interstate charges (e.g. End User Common Line and Presubscribed Interexchange Carrier Charge), as defined in the Company's Interstate Tariff - F.C.C. No. 1.

12. ISDN-BRI does not provide for the transmission of packet data on either the D-channel or one of the B-channels.

13. ISDN-compatible terminal equipment is a requirement for operation and is the customer's responsibility. ISDN customer-premise equipment is dependent upon commercial power and not power from the Company central office. For their safety and well-being, all ISDN customers are encouraged to maintain a non-ISDN access line on the premises for emergency calls in the event of a loss of commercial electrical power. In the event a subscriber elects to disconnect or not maintain a non-ISDN access line, the customer assumes full responsibility for telephone service in the event of an emergency.

14. ISDN-BRI Service is available with single line residence⁽¹⁾ and business service. (C)

15. ISDN-BRI lines may be purchased out of this tariff to be associated with Centrex Service, as defined in Section 44 of this tariff. Terms and conditions for Centrex Service will apply to these ISDN-BRI lines except as otherwise stated in this section. Optional features compatible with ISDN-BRI may be purchased from the Centrex Optional Features Section of the tariff as well as features unique to ISDN lines from the Optional Features in this section.

4. The Non-Recurring Charge for ISDN Service Capability Package installation will be discounted 50% when a customer commits to a 12-month service period or 100% when a customer commits to a 24-month service period. If termination of service prior to the end of the commitment occurs, the customer is responsible for payment of the remainder of the Non-Recurring Charge.
5. ISDN-BRI provides for one Configuration Group to be established at the initial implementation of service. Subsequent additions of Configuration Groups or in excess of one group on the initial establishment of service will be charged an installation charge per Configuration Group.
6. A Change Charge will apply for a database change subsequent to the installation of an ISDN-BRI Service. This includes changing, adding, or deleting features or feature packages, directory numbers, or number appearances.
7. However, this termination requirement will not apply when the customer converts to a next generation service offering of a separately tariffed service, provided that:
 - (a) The service period for the new service offering is a minimum period equal to or exceeding the remaining service period of the disconnected arrangement, whichever is greater; and
 - (b) The service orders to install the new service and disconnect the old service are related together, and there is no lapse in service between installation of the new service and disconnection of the existing service; and
 - (c) The service orders are for the same customer at the same location.

Integrated Services Digital Network (ISDN) to Frame Relay Service (FRS) is an example of a next generation service offering.

INTEGRATED SERVICES DIGITAL NETWORK (ISDN)

REC'D JUN 19 2002

II. PRIMARY RATE INTERFACE (PRI)

These rates and regulations are applicable to Integrated Services Digital Network Primary Rate Interface (ISDN-PRI) Service established prior to June 4, 2001. These rates will remain in effect until all contracts containing these rates have expired or until all applicable customers have converted to ISDN-PRI Service Terms and Conditions set forth in Section 23.III. of this tariff.

A. General

1. Integrated Services Digital Network (ISDN) - Primary Rate Interface (PRI) Service is an intraLATA group of offerings supported by the ISDN architecture.
2. ISDN-PRI Service provides a method of access to the telephone network called Primary Rate Access. Primary Rate Access is an ISDN based, DS1 access link to the telecommunications network and provides integration of multiple voice and data transmission channels on the same line. The service will initially provide connectivity between an ISDN-PBX or other ISDN-compatible CPE and a serving central office. The basic channel structure for Primary Rate Access is twenty-three 64 Kbps B-Channels and one 64 Kbps D-Channel. Options are available for plus or minus 23 B-channels. These channels may be used to connect the customer's CPE to the **Public Network** (i.e., outward, inward, and two-way trunks, and WATS/800/888 Service access lines).
3. ISDN-PRI is a service for the transmission of digital signals only. Clear Channel Capability and Extended Superframe Format are inherent to the service.
4. Unless specified, the regulations for ISDN-PRI Service apply in addition to the regulations set forth in Section 25 of this tariff.
5. ISDN-PRI Service is provided within a LATA from central offices where appropriate ISDN facilities are available as determined by the Company. Service inquiries will be necessary to determine availability. Special construction charges may apply as specified in Section 8 of this tariff.

(CT)

B. Regulations

1. Customer Premises Equipment (CPE) that is compatible with ISDN-PRI Service is the responsibility of the customer for provisioning.

5. ISDN-PRI Service is provided within a LATA from central offices where appropriate ISDN facilities are available as determined by the Company. Service inquiries will be necessary to determine availability. Special construction charges may apply as specified in Section 8 of this tariff.

B. Regulations

1. Customer Premises Equipment (CPE) that is compatible with ISDN-PRI Service is the responsibility of the customer for provisioning.

II. PRIMARY RATE INTERFACE (PRI) (Cont'd)

B. Regulations (Cont'd)

2. The Company shall not be responsible if changes in any of the equipment, operations or procedures of the Company utilized in the provisioning of ISDN-PRI Service render any facilities provided by the customer obsolete or require modification or alteration of such equipment or system or otherwise affect its use or performance.
3. Digital transmission rates at speeds less than those indicated may be accomplished as a function of the particular CPE furnished by the user.
4. Temporary suspension of service, as defined in Section 34 of this tariff, does not apply to ISDN-PRI Service.
5. Service Order Charges specified in Section 30 apply in addition to rates and charges following.
6. The minimum service period for ISDN-PRI Service is six months.
7. Verification and Emergency Interrupt service is not available for ISDN-PRI Service.
8. Telephone numbers transmitted via the Optional Incoming Call Identification feature are intended solely for the use of the ISDN-PRI Service Subscriber. Resale of this call identification information is prohibited by this tariff.
9. WATS/800/888 Services utilizing ISDN-PRI Service are available in the Company Intrastate Wide Area Telecommunications Tariff P.S.C. MO. No. 25.
10. Non-facility Associated Signaling (NFAS) provides the capability to serve multiple DS1's over a single D-Channel (NB+D). This feature can be ordered where switch capabilities exist as stipulated in the vendor technical documentation. When NFAS is selected, the customer will order one ISDN-PRI Service arrangement with 23 B-Channels and 1 D-Channel. Additional ISDN-PRI Services arrangements are ordered with 24 B-Channels at rates and charges provided in Section 23.II.F. The D-Channel activated on the initial arrangement serves the additional ISDN-PRI arrangements. If a customer desires, the customer may also request a back-up D-Channel with the NFAS option (NB+2D). It is recommended that D-Channels be provisioned in separate ISDN-PRI Service arrangements.

INTEGRATED SERVICES DIGITAL NETWORK (ISDN)

II. PRIMARY RATE INTERFACE (PRI) (Cont'd)

B. Regulations (Cont'd)

11. This service is available only from central offices, which have the necessary facilities to provide ISDN-PRI on the standard network platform. In the event a customer is provided service from a non-ISDN compatible central office, the Company will provide ISDN-PRI Service from an alternative serving central office. This provision is accomplished by utilizing a 'hubbing' architecture and the subscriber may be required to accept a unique NXX.

When a unique NXX is required, mileage charges for intraLATA 1.544 Mbps channels as defined in the Telephone Company Intrastate Access Service Tariff will apply in addition to the rates and charges included in this section. Due to the nature of the 'hubbing' architecture and the use of a unique NXX, the local calling area (e.g., Extended Area Service) may change.

12. Voice service is limited to customers served by offices which have the necessary facilities to provide ISDN-PRI on the standard network platform. Customers served by non-ISDN compatible offices will be limited to the transmission of data only.

13. This service is available only where the customer's service location is within the provisioning limitations as determined prior to installation of the service. Should the customer's service location exceed said limitations, service will be provided where the Company has electrically compatible facilities available, or where existing facilities can be made electrically compatible when regenerated or extension service is provisioned.

C. Definitions

B-Channel - A bidirectional synchronous channel capable of supporting 64 Kbps of digital transmission.

D-Channel - A 64 Kbps digital signaling only channel for call establishment when used with Primary Rate Access.

64 Kbps Clear Channel Capacity (CCC) - A B-Channel connection that provides end-to-end digital connection in which all 64 Kbps of bandwidth are available for customer use.

INTEGRATED SERVICES DIGITAL NETWORK (ISDN)

II. PRIMARY RATE INTERFACE (PRI) (Cont'd)

D. APPLICATION OF RATES

1. ISDN-PRI Service Primary Rate Access Lines furnished between a serving central office and the customer designated premises will be charged at rates per each Primary Rate Access Line.
2. Nonrecurring charges will not be applicable for the Primary Rate Access Line or interoffice channel facilities when upgrading an existing TransLink Service to an ISDN-PRI Service.
3. ISDN-PRI Primary Rate Access Line rates, including interoffice channels if applicable, apply in addition to Primary Rate Interface and Primary Rate Channel charges.

E. SERVICE COMPONENTS

1. The customer may choose any number of channels up to twenty-three (twenty-four with NFAS) per Primary Rate Access (facility) to be active with a corresponding number of services (i.e., inward/outward trunks, WATS Lines, 800/888 Service) selected. The customer may also choose to have more services selected than channels available for specific applications. The total number of communication paths may not exceed the number of channels subscribed.
2. The components for ISDN-PRI Service will be as follows:
 - Primary Rate Access Line
 - Primary Interface
 - Primary Rate Channels
 - Incoming Call Identification
 - a. Primary Rate Access Line - Will provide a four-wire access loop from the customer premises to the serving central office. The transmission of this loop supports Clear Channel Capability.
 - b. Primary Rate Interface - Provides the multiplexing to support up to twenty-three (23) B-channels at 64 Kbps and one (1) D-channel for signaling also at 64 Kbps. When NFAS is ordered, the Primary Rate Interface can provide up to twenty-four B-Channels at 64 Kbps.

INTEGRATED SERVICES DIGITAL NETWORK (ISDN)

II. PRIMARY RATE INTERFACE (PRI) (Cont'd)

REC'D JUN 19 2002

E. SERVICE COMPONENTS (Cont'd)

Service Commission

2. The components for ISDN-PRI Service will be as follows: (Cont'd)

c. Primary Rate Channels - Will provide an unlimited usage of rated channel that will allow either voice or data transmission up to 64 Kbps.

(1) Voice calls may be completed to both ISDN and non-ISDN lines.

(2) Data Transmission on the B-Channels will be at 64 Kbps within the switch and between ISDN compatible central offices. ISDN interconnection to non-ISDN equipped central offices may be potentially subjected to analog transmission or sub-rated to 56 Kbps. (CT)

(3) The customer may choose to subscribe to additional non-exchange based services. Initial choices for these services will be WATS and 800/888 Service. The subscription to these services is in addition to the charges for ISDN PRI Service.

d. Incoming Call Identification - This optional feature provides the customer with the telephone number or telephone number and name of the calling party. Incoming call identification is provided via the D-Channel associated with incoming calls on a B-Channel to a PBX. Caller ID Blocking is available as stipulated in Section 43 of this tariff.

e. D-Channel Backup - Provides backup for the D-channel for a customer with multiple PRI lines by automatically switching signaling capability over to another D-Channel if service to the primary D-channel is interrupted.

3. Call-by-Call/Integrated Service Access Feature Capability - This feature will allow the customer to dynamically allocate the use of channels for ISDN-PRI Service. The customer may also choose voice or data transmission on a per call basis. In addition, the customer may also choose to subscribe to more services than channels and dynamically change the services in use.

F. RATES AND CHARGES (Cont'd)

5. Move Charge

A move charge, per ISDN-PRI Primary Rate Access line, applies for each Primary Rate Access line moved to a new location in the same building. This move charge is equal to the sum of the Primary Rate Access line nonrecurring charge, Service Change Charge - Inside Moves and Premises Visit Charge specified in Section 23.II.F.6.

6. Service Connection Charges

- a. Service Establishment Charges are applicable for each ISDN-PRI Primary Rate access line ordered, for receiving and recording information and/or taking action in connection with a customer's request, and processing the necessary data. These charges include engineering design, common centralized testing and coordination. The non-recurring charges associated with service establishment are found in Section 23.II.F.1,2,3a and 3b.
- b. Service Change Charges are applicable for receiving and recording information and/or taking action in connection with a customer's termination change at the same premises or transfer of service responsibility request, for processing the necessary data on an existing Primary Rate Access line. A Service Change Charge is applicable for each Primary Rate Access line associated with the customer request (in lieu of a Service Establishment Charge).
- c. Premises Visit Charges are applicable per Primary Rate Access Line, for the termination of a channel at a customer's premises or for termination change at the same premises. Only one Premises Visit Charge applies when more than one channel service of the same type is terminated or moved at the same premises at the same time.

d. Charges

| | <u>Non-Recurring Charge</u> |
|---|---------------------------------|
| (1) Service Change Charge per Primary Rate Access Line | |
| (a) For termination change at the same premises, physical, per PRI interface | \$165.00 |
| (b) For termination change at the same premises, programming, per PRI interface | \$ 35.00 |
| (2) Premises Visit Charge per Primary Rate Access Line or for an inside move | \$125.00 |

7. Termination Liability Charges

If a customer chooses to disconnect all or a portion of the Term Discount Plan (TDP) period, Termination Liability Charges will apply to those circuits that are disconnected. If a customer disconnects any portion of the TDP service prior to the end of month six, the customer will be liable for 100% of the payments remaining for the first six months and 50% of the payments remaining for the rest of the Plan. If a customer disconnects any portion of the TDP Service after the end of the sixth month, the customer will be liable for 50% of the payments remaining for the rest of the plan.

INTEGRATED SERVICES DIGITAL NETWORK (ISDN)

REC'D JUN 19 2002

III. PRIMARY RATE INTERFACE (PRI) II

Service Commission

A. General

1. Integrated Services Digital Network - Primary Rate Interface (ISDN-PRI) Service is a local exchange offering supported by the ISDN architecture.
2. ISDN-PRI Service provides a method of access to the telephone network called Primary Rate Access. Primary Rate Access is an ISDN based, DS1 access link to the telecommunications network and provides integration of multiple voice and data transmission channels on the same line. The service provides connectivity between an ISDN-PBX or other ISDN-compatible CPE and a serving central office. The basic channel structure for Primary Rate Access is twenty-three 64 Kbps B-Channels and one 64 Kbps D-Channel. After purchasing the original 23 B-Channel plus one D-Channel configuration, the customer may purchase another Primary Rate Access Line and another Primary Rate Interface as well as additional B-Channels in increments of 12.

These channels may be used to connect the customer's CPE to the **Public Network** (i.e., outward, inward, and two-way trunks, WATS and 800/866/877/888 Service access lines). (CT)

3. ISDN-PRI Service provides **network** communication paths providing the end user with access to a variety of **network** services and features including data, voice and video which conforms to internationally developed, published, and recognized standards generated by the International Telecommunications Union (ITU). (CT)
4. Unless specified, the regulations for ISDN-PRI Service apply in addition to the General Regulations set forth in this tariff. (CT)
5. ISDN-PRI Service and its optional features and functions are provided within a LATA from central offices where appropriate ISDN facilities are available as determined by the Company. Service inquiries will be necessary to determine availability. Special construction charges may apply as specified in Section 8 of this tariff.

B. Regulations

1. The customer is responsible for providing Customer Premises Equipment (CPE) that is compatible with ISDN-PRI Service.

INTEGRATED SERVICES DIGITAL NETWORK (ISDN)

REC'D FEB 11 2002

III. PRIMARY RATE INTERFACE (PRI) II

Service Commission

A. General

- 1. Integrated Services Digital Network - Primary Rate Interface (ISDN-PRI) Service is a local exchange offering supported by the ISDN architecture.
- 2. ISDN-PRI Service provides a method of access to the telephone network called Primary Rate Access. Primary Rate Access is an ISDN based, DS1 access link to the telecommunications network and provides integration of multiple voice and data transmission channels on the same line. The service provides connectivity between an ISDN-PBX or other ISDN-compatible CPE and a serving central office. The basic channel structure for Primary Rate Access is twenty-three 64 Kbps B-Channels and one 64 Kbps D-Channel. After purchasing the original 23 B-Channel plus one D-Channel configuration, the customer may purchase another Primary Rate Access Line and another Primary Rate Interface as well as additional B-Channels in increments of 12.

These channels may be used to connect the customer's CPE to the Public Circuit-Switched Network (i.e., outward, inward, and two-way trunks, WATS *and* 800/866/877/888 Service access lines).

(CT)
(CT)

- 3. ISDN-PRI Service provides circuit-switched communication paths providing the end user with access to a variety of circuit-switched services and features including data, voice and video which conforms to internationally developed, published, and recognized standards generated by the International Telecommunications Union (ITU).
- 4. Unless specified, the regulations for ISDN-PRI Service apply in addition to the **General** Regulations set forth in this tariff.
- 5. ISDN-PRI Service *and its optional features and functions are* provided *within a LATA* from central offices where appropriate ISDN facilities are available as determined by the Company. Service inquiries will be necessary to determine availability. Special construction charges may apply as specified in Section 8 of this tariff.

2. The Company shall not be responsible if changes in any of the equipment, operations or procedures of the Company utilized in the provisioning of ISDN-PRI Service render any facilities provided by the customer obsolete or require modification or alteration of such equipment or system or otherwise affect its use or performance.
3. Digital transmission rates at speeds less than those indicated may be accomplished as a function of the particular CPE furnished by the user.
4. Suspension of service at the customer's request, as defined in Section 34 of this tariff, does not apply to ISDN-PRI Service.
5. Service Order Charges in Section 30 of this tariff apply unless specific Service Connection Charges are otherwise stated in Section 23.III.G.7. (CT)
6. The minimum service period for ISDN-PRI Service is six months.
7. The customer is responsible for payment of a Trouble Isolation Charge, as set forth in Section 18 of this tariff, for visits by the Company to the customer's premises when a service difficulty resulting in a trouble report is caused by the use of equipment or facilities provided by the customer.
8. Telephone numbers transmitted via the Optional or Standard Incoming Call Identification feature are intended solely for the use of the ISDN-PRI Service subscriber. Resale of this call identification information is prohibited by this tariff.
9. WATS and 800/866/877/888 Services utilizing ISDN-PRI Service are available in the Company Intrastate Wide Area Telecommunications Tariff P.S.C. MO. No. 25.
10. Non-Facility Associated Signaling (NFAS) provides the capability to serve multiple DS1's via a single D-Channel. This feature can be ordered where switch capabilities exist as determined by the Company. When NFAS is selected, the customer will order one ISDN-PRI Service arrangement with 23 B-Channels and 1 D-Channel. Additional ISDN-PRI Services arrangements are ordered with 24 B-Channels as specified in Section 23.II.F. The D-Channel activated on the initial arrangement serves the additional ISDN-PRI arrangements.

INTEGRATED SERVICES DIGITAL NETWORK (ISDN)

III. PRIMARY RATE INTERFACE (PRI) II (Cont'd)

B. **Regulations** (Cont'd)

(CT)

10. Non-Facility Associated Signaling (NFAS)... (Cont'd)

After the first 23B + D PRI is purchased, a customer can purchase additional B-Channels in increments of 12. Additional Primary Rate Access Lines may be ordered in a 24B **configuration**. **The** Company recommends that the quantity of Primary Rate Access Lines supported by one (1) D-Channel not exceed four (4). The Company recommends the use of a backup D-Channel for the support of signaling beyond four (4) facilities.

(D)

11. This service is available only from central offices, which have the necessary facilities to provide ISDN-PRI Service on the standard network platform. In the event a customer is provided service from a non-ISDN compatible central office, the Company will provide ISDN-PRI Service from an alternative serving central office, as designated by the Company. This provision is accomplished by utilizing a 'hubbing' architecture and the subscriber may be required to accept a foreign NXX. When a foreign NXX is required, mileage charges applicable to High Capacity Service, as defined in the Company's Access Service Tariff, apply in addition to the rates and charges included in this section. Due to the nature of the 'hubbing' architecture and the use of a foreign NXX, the local calling area (e.g., Extended Area Service) may change.

When ISDN functionality becomes available from the central office that normally serves this subscriber, ISDN-PRI Service will be provided from that office and the subscriber may be required to accept a different NXX. If the subscriber chooses to continue ISDN-PRI Service from the alternative serving central office, all charges applicable to High Capacity Service, as defined in the Company's Access Service Tariff, will apply in addition to the rates and charges included in this section.

Similarly, if a subscriber requests ISDN-PRI Service from an alternative serving central office other than that designated by the Company, all charges applicable to High Capacity Service, as defined in the Company's Access Service Tariff, will apply in addition to the rates and charges included in this section.

Emergency 911 calls placed over ISDN-PRI Primary Rate Access Lines provisioned via this arrangement will be identified as the alternative serving central office NXX and not the non-ISDN compatible central office NXX. The Company shall not be liable for any loss or damages arising from the emergency calls placed from ISDN-PRI Primary Rate Access Lines provisioned via an alternative serving central office.

14. ISDN-PRI Service is not offered in conjunction with Local Measured Service. (T)
15. In order to maintain the quality of ISDN-PRI Service, the Company reserves the right to perform preventative maintenance and software updates to the network. The Company has classified this maintenance as indicated below:

Scheduled Maintenance

Scheduled Maintenance is used to perform such functions as hardware and software upgrades and network optimization. The Company will perform these tasks in a maintenance window that is anticipated to minimize disruption of customer service and activity. The Company will provide advance notice of all scheduled maintenance.

Demand Maintenance

Demand Maintenance may occur as a result of unexpected events and is used when ISDN-PRI network elements are in jeopardy. The Company will perform this type of maintenance at its discretion. Due to the nature of demand maintenance prior notification may not be possible, however, the customer will be informed when the maintenance has been completed.

16. The customer is responsible for payment of a maintenance of service charge, as set forth in Section 7 of this tariff, for visits by the Company to the customer's premises when a service difficulty resulting in a trouble report is caused by the use of equipment or facilities provided by the customer.
17. One Directory Listing will be provided per D-Channel. Additional Directory Listings are available as specified in Section 9 of this tariff.

INTEGRATED SERVICES DIGITAL NETWORK (ISDN)

REC'D JUN 19 2002

III. PRIMARY RATE INTERFACE (PRI) II (Cont'd)

Service Commission

C. Definitions

B-Channel – A bi-directional synchronous channel capable of supporting 64 Kbps of digital transmission.

D-Channel – A 64 Kbps digital signaling only channel for call establishment when used with Primary Rate Access.

D. Features

1. Standard Features

Dynamic Allocation of Bandwidth

Allows **the voice** and data services to share B-Channels and arrange them as a single trunk group. This allows incoming and **outgoing voice** and data calls to utilize B-Channels on a call by call basis. Without this capability, each service will have a dedicated B-Channel.

(CT)
(CT)

Incoming Call Identification (Caller ID)

Provides the customer with the telephone number of the calling party. Incoming call identification is provided via the D-Channel associated with the incoming calls on a B-Channel to a PBX.

Clear Channel Capability

The B-Channels on ISDN-PRI are clear, since all signaling and control functions are handled by the D-Channel. This allows all 64 Kbps on each B-Channel to be used for customer information.

D-Channel Control of Multiple ISDN Lines

Provides capability for a single D-Channel to provide signaling and control for one or more ISDN-PRI connections. After the original 23 B-Channel plus one D-Channel, the 24th channel on subsequent ISDN-PRI lines is then made available for customer use. The Company recommends the purchase of a backup D-Channel after the fourth ISDN-PRI line is purchased.

Digital Voice Transmission

All voice calls are transmitted using digital signaling.

III. PRIMARY RATE INTERFACE (PRI) II (Cont'd)

REC'D MAY 04 2001

C. Definitions

B-Channel – A bi-directional synchronous channel capable of supporting 64 Kbps of digital transmission.

D-Channel – A 64 Kbps digital signaling only channel for call establishment when used with Primary Rate Access.

CANCELLED

D. Features

1. Standard Features

Dynamic Allocation of Bandwidth

Allows the circuit-switched voice and data services to share B-Channels and arrange them as a single trunk group. This allows incoming and outgoing circuit-switched voice and data calls to utilize B-Channels on a call by call basis. Without this capability, each service will have a dedicated B-Channel.

JUL 19 2002
By *SR29*
Public Service Commission
MISSOURI

Incoming Call Identification (Caller ID)

Provides the customer with the telephone number of the calling party. Incoming call identification is provided via the D-Channel associated with the incoming calls on a B-Channel to a PBX.

Clear Channel Capability

The B-Channels on ISDN-PRI are clear, since all signaling and control functions are handled by the D-Channel. This allows all 64 Kbps on each B-Channel to be used for customer information.

D-Channel Control of Multiple ISDN Lines

Provides capability for a single D-Channel to provide signaling and control for one or more ISDN-PRI connections. After the original 23 B-Channel plus one D-Channel, the 24th channel on subsequent ISDN-PRI lines is then made available for customer use. The Company recommends the purchase of a backup D-Channel after the fourth ISDN-PRI line is purchased.

INTEGRATED SERVICES DIGITAL NETWORK (ISDN)

III. PRIMARY RATE INTERFACE (PRI) II (Cont'd)

D. Features (Cont'd)

1. Standard Features (Cont'd)

Direct Inward Dialing (DID) Signaling

Permits incoming dialed calls from the exchange network to reach a specific number served by customer premises equipment (CPE) without the assistance of an attendant. It also provides for the unique identification of the call based on digits sent to the CPE by the central office. The central office will output digits to the CPE that can further process the calls as desired. The rates and charges for DID telephone numbers are in addition to the ISDN-PRI charges and are provided in Section 18 of this tariff.

PBX Station ID Capability

Allows the station users number (calling party) to be transmitted over the ISDN-PRI D-Channel from Direct Inward Dialing equipped CPE PBXs that use ISDN-PRI. This number is provided by the originating station and must have an associated Direct Inward Dialing telephone number working in the central office.

2. Optional Features

D-Channel Backup

Provides backup for the D-Channel for a customer with multiple PRI lines by automatically switching signaling capability over to another D-Channel if service to the primary D-Channel is interrupted.

Network Ring Again

Enables the customer to complete calls to a busy station without continually redialing. Certain equipment restrictions may apply.

Call-by-Call/Integrated Service Access Feature Capability

Allows the customer to dynamically allocate the use of channels for ISDN-PRI Service. The customer may also choose voice or data transmission on a per call basis. In addition, the customer may also choose to subscribe to more services than channels. The Customer Premises Equipment signals the local central office as to which type of service (inward/outward trunk, WATS Lines, 800/**866/877/888** Service) to access for each call. (CT)

Incoming Call Identification (Caller ID Name and Number)

Provides the customer with the telephone number and name of the calling party. Incoming call identification is provided via the D-Channel associated with incoming calls on a B-Channel to a PBX. **The customer's equipment must be compatible with this service.** (N)

D. Features (Cont'd)

2. Optional Features (Cont'd)

2 B-Channel Transfer

If a call terminates at a given location, but is then forwarded to another location, two trunks between the Central Office and the original device are typically employed for the duration of the forwarded call. 2 B-Channel Transfer allows the central office switch to establish the call directly to the final destination and release the trunks going in and out of the forwarding device. This saves the customer PRI facilities and provides for more efficient use of the network. A common use of 2 B-Channel Transfer is illustrated below.

INTEGRATED SERVICES DIGITAL NETWORK (ISDN)

III. PRIMARY RATE INTERFACE (PRI) II (Cont'd)

D. Features (Cont'd)

2. Optional Features (Cont'd)

Circular Hunt

Circular Hunt provides the most efficient hunting sequence available, plus allows for much larger trunk groups than the standard ISDN-PRI packages. With circular hunt, an incoming call is completed to the next available trunk (bearer) in sequence starting from the last trunk selected. This can occur across multiple PRI facilities. The feature can support up to 220 Primary Rate Interfaces in a single hunting configuration. The standard limit is 50.

National ISDN-2 Protocol

National ISDN-2 Protocol is a communication protocol that governs interactions between the customer's equipment and the telephone network. This protocol is more advanced than the standard ISDN-PRI protocol. Most CPE is capable of using the ISDN-2 Protocol.

E911 Call Screening

E911 Call Screening provides for the transmission of PBX or Key System station information via the ISDN-PRI facility to local emergency services authorities. This provides for the possible identification of the specific location on a customer's premises where a 911 call originated. This option is available only in communities where local emergency authorities support the service in conjunction with the Company's Private Switch Automatic Location Identification (PSALI) Service, associated with E911 Service. This service is only available in conjunction with National ISDN-2 Protocol.

III. PRIMARY RATE INTERFACE (PRI) II (Cont'd)

REC'D JUN 19 2002

E. Service Components

Service Commission

1. The components for ISDN-PRI Service will be as follows:

- Primary Rate Access Line
- Primary Rate Interface
- Primary Rate Channels

(a) Primary Rate Access Line - Will provide a four-wire access loop from the customer premises to the serving central office. The transmission via this loop supports Clear Channel Capability.

(b) Primary Rate Interface - Provides the multiplexing to support up to twenty-three (23) B-Channels at 64 Kbps and one (1) D-Channel for signaling also at 64 Kbps. When NFAS is ordered, the Primary Rate Interface can provide up to twenty-four B-Channels at 64 Kbps.

(c) Primary Rate Channels - Will provide unlimited usage of channel that will allow either voice or data transmission up to 64 Kbps.

(1) Voice calls may be completed to both ISDN and non-ISDN lines.

(2) Data Transmission on the B-Channels will **be at** 64 Kbps within the switch and between ISDN-PRI compatible central offices. ISDN-PRI interconnection to non-ISDN equipped central offices may be potentially subjected to analog transmission or sub-rated to 56 Kbps.

(CT)

(3) The customer may choose to subscribe to additional non-exchange based services. Initial choices for these services will be WATS and 800/866/877/888 Service. The subscription to these services is in addition to the charges for ISDN-PRI Service.

2. With the first ISDN-PRI Primary Rate Access Line the customer is required to purchase 23 B-Channels and an initial D-Channel.

After the initial 23B + D configuration, the customer may choose channels in increments of 12 up to twenty-three B + D or twenty-four B with NFAS, per ISDN-PRI Primary Rate Access Line (facility) to be active with a corresponding number of services (i.e., inward/outward trunks, WATS Lines, 800/866/877/888 Service) selected. The customer may also choose to subscribe to more services than channels. The Customer Premises Equipment signals the local central office as to which type of service (inward/outward trunk, WATS Lines, 800/866/877/888 Service) to access for each call.

Public Service Commission
MISSOURI

F. Application of Rates

1. ISDN-PRI Primary Rate Access Lines furnished between a serving central office and the customer-designated premises will be charged at rates per each Primary Rate Access Line.
2. Nonrecurring charges will not be applicable for the Primary Rate Access Line or interoffice channel facilities when upgrading an existing High Capacity Service to an ISDN-PRI Service.
3. ISDN-PRI Primary Rate Access Line rates, including interoffice channels if applicable, apply in addition to Primary Rate Interface and Primary Rate Channel charges.
4. If the customer chooses to purchase additional channels after purchasing the original 23B + D configuration, the customer must purchase another Primary Rate Access Line and another Primary Rate Interface as well as the additional channels. Additional channels can be purchased in increments of 12.
5. Rates and charges for optional features and functions are applied to each Primary Rate Interface for which the option is ordered.

G. Rates and Charges

1. ISDN-PRI Primary Rate Access Line

Primary Rate Access Line is furnished between a serving central office and the customer's designated premises. Primary Rate Access Line charges apply per point of termination.

III. PRIMARY RATE INTERFACE (PRI) II (Cont'd)

REC'D MAY 04 2001

G. Rates and Charges (Cont'd)

6. Service Establishment Charges

- (a) Service Establishment Charges are applicable for each ISDN-PRI Primary Rate Access Line ordered, for receiving and recording information and/or taking action in connection with a customer's request, and processing the necessary data. These charges include engineering design, common centralized testing and coordination. The nonrecurring charges associated with service establishment are found in Section 23.III.G.1,2 and 3.
- (b) Service Change Charges are applicable for receiving and recording information and/or taking action in connection with a customer's termination change at the same premises or transfer of service responsibility request, for processing the necessary data on an existing Primary Rate Access Line. A Service Change Charge is applicable for each Primary Rate Access Line associated with the customer request (in lieu of a Service Establishment Charge).
- (c) Premises Visit Charges are applicable per Primary Rate Access Line, for the termination of a channel at a customer's premises or for termination change at the same premises. Only one Premises Visit Charge applies when more than one channel service of the same type is terminated or moved at the same premises at the same time.
- (d) Charges

Nonrecurring
Charges

| | |
|--|----------|
| (1) Service Change Charge per Primary Rate Access Line | |
| (i) For termination change at the same premises, physical, per PRI interface | \$165.00 |
| (ii) For termination change at the same premises, programming, per PRI interface | \$ 35.00 |
| (2) Premises Visit Charge per Primary Rate Access Line or for an inside move | \$125.00 |

G. Rates and Charges (Cont'd)

Service Commission

7. Termination Liability Charges

- (a) If a customer chooses to disconnect all or a portion of the Term Discount Plan (TDP) period, Termination Liability Charges will apply to those circuits that are disconnected. If a customer disconnects any portion of the TDP service prior to the end of month six, the customer will be liable for 100% of the payments remaining for the first six months and 50% of the payments remaining for the rest of the Plan. If a customer disconnects any portion of the TDP Service after the end of the sixth month, the customer will be liable for 50% of the payments remaining for the rest of the plan.
- (b) Rate increases or decreases will automatically be applied to the monthly term plan rates for the remaining term of the TDP. If a Company initiated rate increase causes a customer's rates to exceed the original rates in effect at the beginning of the TDP, the customer may cancel the TDP without incurring termination liability charges.
- (c) The customer can extend TDP commitment periods at any time during the term of the plan, up to a maximum of 84 months. The number of months accrued in the current plan will apply toward the new plan selected.
- (d) At the end of the TDP service commitment period, the customer may subscribe to a new TDP at the prevailing rates. If the customer does not select a new TDP, the rates will convert to the prevailing month-to-month rates.
- (e) When a service or rate element under a Term Discount Plan (TDP) arrangement is disconnected prior to the expiration of a selected service period as a result of a change of tariff jurisdiction and/or a customer requested change to a Next Generation Service Offering of a separately tariff service, Termination Charges will not apply when:
 - (1) The service period of the new Term Discount Plan arrangement for the new service offering is a minimum period equal to or exceeding the remaining service period of the disconnected arrangement, whichever is greater, and
 - (2) The service orders to install the new service and disconnect the old service are related together, and there is no lapse in service between installation of the new service and disconnection of the existing service, and
 - (3) The service orders are for the same customer at the same location.

Integrated Services Digital Network - Primary Rate Interface (ISDN-PRI) to **Enhanced** Frame Relay Service (**EFRS**) or Asynchronous Transfer Mode (ATM) are a few examples of a Next Generation Service Offering. (CT)

RULES AND REGULATIONS APPLYING TO ALL CUSTOMER'S CONTRACTS

V. USE OF SERVICE AND FACILITIES

- A. OWNERSHIP AND USE OF EQUIPMENT -- Equipment, instruments, and lines (excluding inside wire) on customer's premises, furnished by the Telephone Company, shall be and remain the property of the Telephone Company whose agents and employees have the right to enter said premises at any reasonable hour for the purpose of installing, inspecting, or repairing the instruments and lines or for the purpose of making collections from coin boxes, and upon termination of the service, for the purpose of removing such instruments and lines. Such equipment is not to be used for performing any part of the work of transmitting, delivering or collecting any telephone message where any toll or consideration has been or is to be paid any party other than the Telephone Company, without the written consent of the Telephone Company.
- B. No equipment, apparatus, circuit, or device not furnished by the Telephone Company shall be attached to or connected with the facilities furnished by the Telephone Company, whether physically, by induction or otherwise, except as provided in this tariff. In case such unauthorized attachment or connection is made, the Telephone Company shall have the right to remove or disconnect the same, or to suspend the service during the continuance of said attachments or connections, or to terminate the service.

Nothing in this paragraph shall prohibit a customer from using devices which in the opinion of the Company would not endanger the safety of Telephone Company employees or the public; damage, require change in or alteration of, or involve direct electrical connection to (except as provided for elsewhere in this tariff) the equipment or other facilities of the Telephone Company; or interfere with the proper functioning of such equipment or facilities; or impair the operation of the telephone system or otherwise injure the public in its use of the Telephone Company's services.

V. USE OF SERVICE AND FACILITIES (Cont'd)

C. CONNECTION WITH CERTAIN FACILITIES OF CUSTOMER - Customer-provided terminal equipment may be used and customer-provided customer premise inside wire or communications systems may be connected with the facilities furnished by the Telephone Company for telecommunications services as provided in the "Connections with Equipment or Facilities Provided by Customers" section of this tariff.

Violation of the FCC Rules and Regulations pertaining to connection of FCC registered terminal equipment and inside wire may cause a temporary discontinuance of service until the violation is corrected.

D. Devices provided by the customer to obtain quietness or privacy may be used in conjunction with the telephone instrument furnished to the customer by the Telephone Company, provided any such device does not involve direct electrical connection to the Telephone Company except as provided for in "Connection with Equipment or Facilities Provided by Customers" section of this tariff.

E. USE OF CUSTOMER SERVICE - Customer telephone service, as distinguished from Payphone Line Service, is furnished only for use by the customer, his family, employees or business associates, or persons who are a part of the customer's household, except as the use of the service may be extended to joint users. The Telephone Company has the right to refuse to install customer service or to permit such service to remain on the premises of the Payphone Line Service when the instrument is so located that the public in general or patrons of the customer may make use of the service. At such locations, however, customer service may be installed, provided the instrument is so located that it is not accessible for public use.

Except for Payphone Line Service, the payment for local messages by means of a coin collecting device, paid to any party other than the Telephone Company, is prohibited.

RULES AND REGULATIONS APPLYING TO ALL CUSTOMER'S CONTRACTS

VI. PAYMENT FOR SERVICE (Cont'd)

C. Residence

- 1. The customer shall receive a bill during each billing period except when the bill has a zero balance. Failure to receive a bill does not relieve the customer of the responsibility for payment for telephone service.

The customer bill shall clearly show:

- The number of access lines for which charges are stated
- The beginning or ending dates of the billing period for which charges are stated
- A statement of the date the bill becomes delinquent if not paid
- Penalty fees and advance payments, if any
- The unpaid balance, if any
- The amount due for basic service
- An itemization of the amount due for all other regulated or non-regulated services, including date and duration (in minutes) of each toll call
- The amount due for other regulated or non-regulated service offered at a packaged rate and an itemization of each service included in the package
- A list of charges due for taxes, franchise fees and other fees and/or surcharges
- Total amount due
- A toll free telephone number a customer may call concerning billing inquiries and billing disputes
- The amount of any deposit, advance payments and/or interest accrued on a deposit which has been credited to the charges stated
- Any other credits or charges applied to the account during the current billing period

Residential customers shall have at least twenty-one days from the rendition of the bill to pay the charges stated thereon. Payment shall be made at the office of the Telephone Company, an authorized collection agency, or by mail.

- 2. **Residential customers may take advantage of an optional, condensed or summary bill format at any time by contacting the Company's Customer Service toll free number found on their current bill and indicating a preference to receive the condensed, optional bill format. Under this summary bill option, customers will still be able to access their full, detailed billing information on the Company's website, or receive a paper copy of their detailed bill, at no charge, by contacting the Company. Customers who have opted to receive the summary bill format may de-select that option at anytime by contacting a Customer Service representative.**

C. Residence (Cont'd)

3. The customer is required to pay, promptly, all charges for exchange service and equipment and for all toll messages including charges for messenger service. The customer is held responsible for all charges for telephone service rendered at his station, both exchange and toll, including charges for toll messages on which the charges have been reversed. In the event of an abandonment of the telephone, the non-payment of any sum due, the use of foul or profane language, the impersonation of another with fraudulent intent, or of any other violation of the lawful regulations of the Telephone Company, the Telephone Company may either temporarily deny service or terminate the contract.

D. Delinquent Account Charge

A delinquent account charge of **2% of the balance or \$5.00, whichever is greater**, will be assessed to all customer payments received after the due date. This charge will apply to the current total amount due, less any disputed charges, for all services to compensate the company for the additional expense associated with delinquent accounts. (1)

E. Disputes by Residence Customers

1. The customer shall notify the Telephone Company when all or part of a charge on the customer's bill is in dispute by written notice, in person or by a telephone message directed to the Telephone Company during normal business hours. A dispute must be registered with the Telephone Company prior to the due date of the bill in order for the customer to avoid discontinuance of service.
2. When the Telephone Company becomes aware of a dispute, a record of the date, time and place of the inquiry will be made. A dispute will be investigated promptly and thoroughly. An attempt will be made to settle the dispute in a manner satisfactory to both the customer and the Telephone Company.
3. If the customer fails to cooperate with the Telephone Company in efforts to resolve a dispute, the customer's rights to continuance of service will be waived.

E. Disputes by Residence Customers

1. The customer shall notify the Telephone Company when all or part of a charge on the customer's bill is in dispute by written notice, in person or by a telephone message directed to the Telephone Company during normal business hours. A dispute must be registered with the Telephone Company prior to the due date of the bill in order for the customer to avoid discontinuance of service.
2. When the Telephone Company becomes aware of a dispute, a record of the date, time and place of the inquiry will be made. A dispute will be investigated promptly and thoroughly. An attempt will be made to settle the dispute in a manner satisfactory to both the customer and the Telephone Company.
3. If the customer fails to cooperate with the Telephone Company in efforts to resolve a dispute, the customer's rights to continuance of service will be waived.

VI. PAYMENT FOR SERVICE (Cont'd)

C. Residence (Cont'd)

2. The customer is required to pay, promptly, all charges for exchange service and equipment and for all toll messages including charges for messenger service. The customer is held responsible for all charges for telephone service rendered at his station, both exchange and toll, including charges for toll messages on which the charges have been reversed. In the event of an abandonment of the telephone, the non-payment of any sum due, the use of foul or profane language, the impersonation of another with fraudulent intent, or of any other violation of the lawful regulations of the Telephone Company, the Telephone Company may either temporarily deny service or terminate the contract.

D. Delinquent Account Charge

A delinquent account charge of **\$2.10** will be assessed to all customer payments received after the due date. This charge will apply to the current total amount due, less any disputed charges, for all services to compensate the company for the additional expense associated with delinquent accounts. (l)

RULES AND REGULATIONS APPLYING TO ALL CUSTOMER'S CONTRACTS

VI. PAYMENT FOR SERVICE (Cont'd)

E. Disputes by Residence Customers (Cont'd)

4. The customer shall pay an amount equal to that portion of the total bill not in dispute. This portion will be mutually determined by the customer and the Telephone Company. The customer's previous usage, the nature of the dispute and other pertinent factors shall be considered when determining the disputed amount. The Telephone Company will not discontinue service for nonpayment of charges in dispute while the dispute is pending.
5. If the Telephone Company and the customer cannot agree on the undisputed amount to be paid, the customer must pay, at the Telephone Company's option, an amount not to exceed fifty (50) percent of the disputed charge or an amount based on the usage during a like period, under similar conditions.
6. Failure by the customer to pay the undisputed amount within four (4) working days from the date the dispute is registered or by the due date of the disputed bill, whichever is later, shall constitute a waiver of the customer's right to the continuance of service.
7. If the dispute is resolved in favor of the customer in whole or in part, the Telephone Company will promptly refund any excess monies paid by the customer.
8. If the dispute cannot be resolved in favor of the customer, the Telephone Company shall notify the customer of their right and the Telephone Company's right to make an informal complaint with the Missouri Public Service Commission (Commission). The Telephone Company will provide the customer with the address and telephone number where the complaint may be filed. If the customer files an informal complaint but does not notify the Telephone Company that part or all of any charge on the customer's bill is in dispute, the Commission will notify the customer of the payment required in paragraphs 5 and 6 preceding.
9. After resolution of a complaint, the Telephone Company may treat a second complaint based on the same facts as already determined and is not required to comply with Missouri Public Service Commission rules set forth in 4 CSR 240-33.080.

RULES AND REGULATIONS APPLYING TO ALL CUSTOMER'S CONTRACTS

- XI. TRANSMITTING MESSAGES - The Telephone Company does not transmit messages but offers the use of its facilities when available for communications between parties.
- XII. USE OF LINES OF OTHER COMPANIES - When suitable arrangements can be made, lines of other telephone companies may be used in establishing wire connections to points not reached by the Telephone Company's lines. In establishing connections with the lines of other companies, the Telephone Company is not responsible or liable for any action or default of the Connecting Company.
- XIII. **CUSTOMER SPECIFIC PRICING PLAN SERVICES**

Customer Specific Pricing Plan Services are available for the provision of:

- A. Dedicated, non-switched, private line and special access services;**
- B. Central office-based switching systems which substitute for customer premise, private branch exchange (PBX) services; and**
- C. Any business service offered in an exchange in which basic local telecommunications service offered by the incumbent local exchange telecommunications company has been declared competitive under Section 392.245 RSMo., and any retail business service offered to an end-user in a noncompetitive exchange.**

Unless otherwise provided in the customer contract, the rules and regulations applying to all customers' contracts found in this and other sections of this tariff apply to all Customer Specific Pricing Plan Services.

Customer Specific Pricing Plan Services arrangements will be provided to the Commission on a proprietary basis upon request.

RULES AND REGULATIONS APPLYING TO ALL CUSTOMER'S CONTRACTS

- XI. TRANSMITTING MESSAGES - The Telephone Company does not transmit messages but offers the use of its facilities when available for communications between parties.
- XII. USE OF LINES OF OTHER COMPANIES - When suitable arrangements can be made, lines of other telephone companies may be used in establishing wire connections to points not reached by the Telephone Company's lines. In establishing connections with the lines of other companies, the Telephone Company is not responsible or liable for any action or default of the Connecting Company.
- XIII. SPECIAL SERVICES AND FACILITIES
- A. Special services and facilities, not otherwise mentioned in, provided for or contemplated by the tariff schedules of the telephone company, may be furnished or leased pursuant to special contract for such special service or facility for such period as may be agreed upon, provided such special service or facility or the use made thereof is not unlawful and does not interfere with the telephone service furnished by the Telephone Company. All contracts which may be entered into pursuant to this tariff provision shall be submitted to the Public Service Commission for its approval. No such contract shall be effective until approved by the Commission.
- B. In the event any such special service or facility or the use made thereof interferes with the furnishing of telephone service by the Telephone Company, the Telephone Company may terminate such contract and cease to furnish such special service or facility after thirty days written notice to the customer and provided further that the commission may terminate such contract whenever, in its opinion, public interest requires such termination.

RULES AND REGULATIONS APPLYING TO ALL CUSTOMERS' CONTRACTS

XIV. OBSERVANCE OF RULES AND REGULATIONS - Failure on the part of customers to observe the rules and regulations of the company automatically gives the company the right to cancel the contract and discontinue the furnishing of service.

XV. TELECOMMUNICATIONS SERVICE PRIORITY SYSTEM

The priority provisioning and restoration of services offered under this tariff relative to the National Security Emergency Preparedness (NSEP) Telecommunications Service Priority (TSP) System shall be pursuant to the regulations and rates as defined in P.S.C. MO.-No. 26 Access Services Tariff, Section 13.3 Miscellaneous Services.

For application in this tariff, such regulations, rates and charges shall be interpreted to apply on a "per request, per line/trunk" basis.

XVI. Telephone Company-provided terminal equipment or protective circuitry will be directly connected in accordance with the FCC Rules and Regulations.

XVII. When local exchange service, toll service, and/or extended area service of other customers is and/or will be degraded by the telephone service of one customer, e.g. answering devices (customer or company owned), time and temperature, etc., the Telephone Company may: (1) refuse to allow such service, (2) require Traffic Load Protection Equipment (where Traffic Load Protection (TLP) is required, the customer will bear the expense), (3) require the customer to lease an adequate amount of access lines, or (4) develop alternate arrangements to properly protect the network.

XVIII. The Telephone Company will make reasonable efforts to cure any material failure to provide service caused solely by year 2000 defects in Telephone Company hardware, software or systems. Due to the interdependence among telecommunications providers and the interrelationship with non-Telephone Company processes, equipment and systems, the Telephone Company is not responsible for failures caused by circumstances beyond its control, including, but not limited to, failures caused by: 1) the Customer; 2) other telecommunications companies as defined by Missouri statute; or 3) customer premises equipment. In addition, the Telephone Company does not ensure compatibility between Telephone Company and non-Telephone Company services used by the Customer.
