

APPLYING TO MISSOURI SERVICE AREA

SERVICE CLASSIFICATION NO. 5(M)
STREET AND OUTDOOR AREA LIGHTING - COMPANY-OWNED (Cont'd.)

G. Former Subsidiary Company lighting units provided under contracts initiated prior to April 9, 1986, which facilities will only be maintained by Company so long as parts are available in Company's present stock:

<u>Lamp and Fixture</u>	<u>*Per Unit Monthly Rate</u>
11,000 Lumens, Mercury Vapor, Post-Top	\$21.85
11,000 Lumens, Mercury Vapor, Open Bottom	10.43
11,000 Lumens, Mercury Vapor, Horizontal Enclosed	11.79
42,000 Lumens, Mercury Vapor, Horizontal Enclosed	30.38
16,000 Lumens, H.P. Sodium, Horizontal Enclosed	11.79
34,200 Lumens, H.P. Sodium, Directional(2)	21.63
140,000 Lumens, H.P. Sodium, Directional	68.38
20,000 Lumens, Metal Halide, Directional	21.63

(2) This lamp represents a mercury vapor fixture with H.P. Sodium lamp.

Term of Contract. Minimum term of three (3) years where only standard facilities are installed; ten (10) years where post-top luminaires are installed.

Discount for Franchised Municipal Customers. A 10% discount will be applied to bills rendered for lighting facilities served under the above rates and currently contracted for by municipalities with whom the Company has an ordinance granted electric franchise as of September 27, 1988. The above discount shall only apply for the duration of said franchise. Thereafter, the above discount shall apply only when the following two conditions are met: 1) any initial or subsequent ordinance granted electric franchise must be for a minimum term of twenty (20) years and 2) Company must have a contract for all lighting facilities for municipal lighting service provided by Company in effect.

Tax Adjustment. Any license, franchise, gross receipts, occupation or similar charge or tax levied by any taxing authority on the amounts billed hereunder will be so designated and added as a separate item to bills rendered to customers under the jurisdiction of the taxing authority.

*Indicates Change.

100,000 Lumens, Metal Halide, Directional	47.54

(9) Limited to lamps and fixtures served under contracts prior to April 9, 1986. Company will continue to maintain these lamps and fixtures so long as parts are available in Company's present stock. Upon depletion of Company's present stock Company will install standard H.P. Sodium or Mercury Vapor lamps and fixtures at the applicable rate.

(10) This lamp represents a mercury vapor fixture with H.P. Sodium lamp.

Term of Contract. Three (3) years where only standard facilities are installed, or where any special facilities installed are paid for in advance; ten (10) years where wood poles or post-top luminaires are installed. If customer requests a termination of contract prior to the term of contract, customer shall pay to Company the cost of removal of facilities plus the remaining life value of Company facilities less salvage, if any.

In case of destruction or damage of customer's property hereunder due to highway accidents, storm damage or other similar causes or where replacement of equipment other than as provided above is required, Company upon receipt of either written or verbal instructions from customer, may at its option, effect the necessary repairs or replacement of the damaged equipment to place it in normal operating condition. Such repairs will be made with parts supplied by customer or where applicable, with suitable standard items carried in Company stores. Customer shall reimburse Company for such work at the Company's current Productive Manhour rate including applicable overhead for all labor expended and 1.2 times all direct costs or charges incurred by Company for all materials and any related items. All charges and payments hereunder shall be in addition to the monthly charge for normal maintenance as provided above.

*Special or Non-Standard Facilities. Whenever customer requests Company to install additional, special or non-standard facilities hereunder, and there is no engineering, construction, safety, legal or practical reason which would, in Company's judgment, make such installation inadvisable, Company will make such installation provided customer pays to Company the cost of such non-standard facilities, in accordance with the provisions of Section II.B.7. - Special Facilities.

Payments. Bills are due and payable within ten days from date of bill.

(1) In any summer billing period, the kwhr use normally billed on this heating rate may be cumulated with Customer's base use if the total use equals or exceeds 25,000 kwhr, and such total use will be billed on the rate applicable to Customer's base use. Company will install a demand meter on the heating rate use, and the total billing demand on the base use rate will be the arithmetic sum of the base use and heating rate use kw demands. Customer must request such rate application in writing, and such application shall apply during the entire summer season, but may be cancelled for the following summer season.

SERVICE CLASSIFICATION NO. 5(M) AUG 1 1988
STREET AND OUTDOOR AREA LIGHTING - COMPANY-OWNED (Cont'd.)

1. Rate Application. Available for lighting streets, alleys, walkways and other thoroughfares, or for outdoor lighting of public or private areas for security or similar purposes when such lighting facilities are operated and maintained as an extension of Company's distribution system.
- *2. Character of Service Supplied. Company shall inventory, furnish, install, maintain and deliver electric service to automatically-controlled lighting fixtures currently offered as standard facilities by Company. Customer shall select the type and size of lamps and fixtures from the standard equipment inventoried and offered by the Company and shall specify the location of said fixtures. Other than service to Company's post-top fixtures, the service provided hereunder shall be supplied by lines or cables through fixtures supported by standard upsweep brackets attached to existing poles; however, certain non-standard facilities may be installed hereunder in accordance with the terms and conditions stated in the following paragraph 3.
- *3. Non-Standard Facilities. Whenever customer requires Company to install non-standard facilities hereunder (such as longer upsweep brackets, switches, protective barriers, etc.) and there is no engineering, construction, safety, legal or practical reason which would, in Company's judgment, make such non-standard installation inadvisable, Company will make such installation provided customer pays in advance to Company all costs in connection therewith. Subsequent replacements of said facilities will be provided by the Company.
- *4. Conversion or Modification of Lamps. Where customer requests a conversion or modification of the size or type of lamp currently installed, and Company would not otherwise be converting such lights, Company will make the requested changes provided, however, that customer pays in advance to the Company \$100.00 per lamp for both the removal cost and loss of the remaining life of such lamps and, additionally, signs a new contract at the time when 20 percent or more of the customer's total lamps then installed are so converted or modified. Billing for the revised lamps will begin as of the next regular billing date after such modifications have been completed.

MUNICIPAL STREET LIGHTING - MERCURY VAPOR & H.P. SODIUM

1. Rate Application: Available for lighting streets, alleys, walkways and other thoroughfares, or for outdoor lighting of public or private areas for security or similar purposes where public or private facilities are operated and maintained as an extension of Company's distribution system.
2. Character of Service Supplied. Company shall furnish, install, maintain and deliver electric service to automatically-controlled lighting fixtures conforming to Company's standards. Customer shall select the type and size of lamps and fixtures from the standard equipment offered by the Company and shall specify the location of said fixtures. Other than service to Company's post-top fixtures, the service provided hereunder shall be supplied by overhead lines through fixtures supported by standard upsweep brackets attached to wood poles; however, certain special facilities may be installed hereunder in accordance with the terms and conditions stated in the following paragraph 3.
3. Special Facilities. Whenever customer requires Company to install special facilities hereunder (such as underground conduit and/or cable, longer upsweep brackets, shields, switches, protective barriers, line extensions, etc.) and there is no engineering, construction, safety, legal or practical reason which would, in Company's judgment, make such non-standard installation inadvisable, Company will make such installation subject to the provisions of Section II.B.7.-Special Facilities.
4. Change or Relocation
 - a. Where customer requests a change in the size or type of lamp currently installed, Company will make the changes requested provided, however, that customer pays in advance to Company all removal costs associated therewith and, additionally, signs a new contract at the time when 20 percent or more of customer's total lamps then installed are so changed. In addition, if such change or relocation is requested during the initial contract term, customer shall also pay to Company the remaining life value of the facilities to be removed, less any applicable salvage value. Billing for the revised lamps will begin as of the next regular billing date after such changes have been completed.

- 5. Change or Relocation. Upon receipt of written request and authorization from customer, Company will, insofar as it may be practical and permissible, make any other change in or relocation of its facilities used in rendering service hereunder, provided customer pays in advance Company's estimated costs in connection therewith.
- 6. Additional Installations. Customer may obtain the installation of additional lamps and the supply of service thereto under the existing contract for the remainder of the term thereof upon written application to the Company, provided, however, that if at any time during the term of the contract customer requires such additional lamps so as to cause the total number of lamps in service to exceed by 20% the lamps originally contracted for and then installed, the parties shall execute a new contract.
- 7. Termination. If customer requests in writing the termination of all or a portion of any lighting service, not paid for in advance, within three years of the installation of the lamps being terminated, or within ten years of the installation of post top luminaires, wood poles or cable being terminated, customer shall pay in advance to Company \$100.00 per lamp for both the removal costs associated therewith and the loss of the remaining life value of such facilities. If said request for termination of lighting service is made after the above three and ten year in-service periods, as applicable, and customer requests a new lighting installation within twelve months after the removal of the prior terminated lighting facilities, customer shall pay the amount specified earlier in this paragraph for all facilities previously removed prior to Company making any new lighting installation.
- *8. General Provisions. Customer shall furnish to Company without cost to Company and on forms suitable to it, or customer shall reimburse Company for all costs incurred in obtaining all rights, permits and easements necessary to permit the installation and maintenance of Company's facilities on, over, under and across both public and private property where and as needed by Company in providing service hereunder. In addition, customer shall pay all costs incurred by Company in extending its distribution system, including transformers, to provide energy to said lighting facilities supplied hereunder, in accordance with the provisions of Section III.Q - Special Facilities.

4. Change or Relocation (Cont'd.)

b. Upon receipt of written request and authorization from customer, Company will, insofar as it is permissible, make any other changes in or relocation of its facilities used in rendering service hereunder, provided customer pays to Company at the time such change or relocation is made all costs incurred by Company in connection therewith.

5. Additional Installations. Customer may obtain the installation of additional lamps and the supply of service thereto under the existing contract for the remainder of the term thereof upon written application to the Company, provided, however, that if at any time during the term of the contract customer requires such additional lamps so as to cause the total number of lamps in service to exceed by 20% the lamps originally contracted for and then installed, the parties shall execute a new contract.

6. Termination. If during the initial contract term customer requests in writing the termination of all or a portion of its street or outdoor area lighting, customer shall a) pay in advance to Company all removal costs associated therewith and b) also pay to Company the remaining life value of the facilities to be removed, less applicable salvage value.

7. General Provisions. Customer shall furnish to Company without cost to Company and on forms suitable to it, or customer shall reimburse Company for all costs incurred in obtaining all rights, permits and easements necessary to permit the installation and maintenance of Company's facilities on, over, under and across both public and private property where and as needed by Company in providing service hereunder. In addition, customer shall pay all costs incurred by Company in extending its distribution system to provide energy to said lighting facilities supplied hereunder, in accordance with the provisions of Section II.B.-Special Facilities.

8. General Rules and Regulations. In addition to the above specific rules and regulations, all of Company's General Rules and Regulations shall apply to service supplied under this Service Classification.

MUNICIPAL STREET LIGHTING - MERCURY VAPOR & H.P. SODIUM 3 1981

1. Rate Application. Available to municipalities and other governmental agencies having appropriate contractual authority for the lighting of public streets and roads, public parks and other outdoor locations open to and reserved for general public use.
2. Character of Service Supplied. Service supplied will normally be by multiple lamps supplied by overhead circuit on existing wood poles where there is adequate space. In any other case, additional charges will be made as provided hereunder.
3. Change or Relocation.
 - *a. Where customer requests a change in the size or type of lamp currently contracted for, Company will make the changes requested provided, however, that customer pays in advance to Company all removal and installation costs associated therewith and, additionally, signs a new ten-year contract at the time when 20 percent or more of the total lamps included in the current lighting contract are so changed. Billing for the revised lamps will begin as of the next regular billing date after such changes have been completed.
 - b. Upon receipt of written request and authorization from customer, Company will, insofar as it may be practical and permissible, make any other change in or relocation of its facilities used in rendering service hereunder provided customer pays to Company at the time such change or relocation is made all costs incurred by Company in connection therewith.

4. Additional Installations.

Customer may obtain the installation of additional lamps and the supply of service thereto under the existing contract for the remainder of the term thereof upon written application to the Company, provided, however, that if at any time during the term of the contract customer requires such additional lamps so as to cause the total number of lamps

in service to exceed by 20% the lamps ~~provided under the contract~~ originally executed, the parties shall execute a new ten-year contract.

5. General Provisions.

- a. Company will submit to customer cuts of standards of fixtures available for installation under this service classification and customer may select from these the type ~~to be installed~~ installed. All facilities installed by Company shall remain the property of Company and may be removed by Company if service is discontinued.
- b. Customer shall furnish to Company, without cost to Company and on forms suitable to it, or customer shall reimburse Company for all costs incurred in obtaining all rights, permits and easements necessary to permit the installation and maintenance of Company's facilities on, over, under and across both public and private property where and as needed by Company in providing service hereunder.
- c. Company will control each installation to provide lighting service from dusk to dawn each night, or approximately 4,000 burning hours per year. Upon receipt of notice from customer of failure of light to operate as provided, Company shall be allowed a reasonable period of time in which to make repairs during regular working hours.
- *d. Late Payment Charge. Any portion of any bill remaining unpaid after the due date indicated thereon will have a late payment charge of 1.5% of the gross unpaid amount added and the entire amount due, including the late payment charge, will be shown as "arrear" on the next bill. Any portion of the "arrear" remaining unpaid after the due date of the bill on which such "arrear" appear will also have a late payment charge of 1.5% added thereto. When a customer's payment is received by mail not more than two business days after the due date it shall be deemed a timely payment. Failure to pay any late payment charge shall be grounds for disconnection of service in accordance with Section IX of these Rules and Regulations.

6. General Rules and Regulations. In addition to the above specific rules and regulations, all of Company's General Rules and Regulations shall apply to service supplied under this Service Classification.

*c. No single family buildings, whose electric service for general purposes is purchased under the provisions of Service Classification No. 1 or 2, except for the heating requirements of said buildings during their initial construction and display periods prior to being occupied for residence purposes.

*d. To individually metered customers, residing within a multiple occupancy building served under the provisions of Service Classification No. 1 or No. 2, except for the heating requirements of common building areas where said service is separately contracted for.

**2. Uncontrolled water heating and space heating service will normally be supplied through a separate main meter specified by Company. Subject to Company approval and where otherwise required for valid engineering reasons, such service may be series metered. Where it is impracticable or uneconomical to measure such service through a separate main or series meter, subject to Company approval, one or more additional meters may be installed. For each such additional meter (including any special meter or meter equipment) so installed, Customer shall pay Company's applicable current charges for such equipment indicated in Section III. B. and III. C., MEASUREMENT OF ELECTRIC SERVICE, of Company's General Rules & Regulations.

UNCONTROLLED WATER HEATING AND SPACE HEATING RATE - (CONT'D)

III. B. Space Heating

In order to qualify for service under this rate, Customer's electric space heating equipment shall be a type approved by Company, shall be permanently installed on Customer's premises in a manner which will permit metering as provided for under Paragraph C-2 hereof.

C. General

1. The Uncontrolled Water Heating and Space Heating Rate shall not be applicable:

*a. As a separate connection to supply energy for water heating and/or space heating purposes, except where otherwise approved by Company for valid engineering reasons.

*b. For electric water heaters or space heating equipment used in conjunction with any other type of water heating or space heating equipment, such as an oil or gas fired water or space heater, furnace or range coils, or another electric water heater served under 4th R. S. 444 any other Service Classification.

2. Uncontrolled water heating and space heating service will be supplied either through a submeter to Customer's main meter or through a separate main meter, as specified by Company. When a submeter is specified, Company will furnish, install and maintain said submeter upon completion of necessary wiring by Customer.

SERVICE CLASSIFICATION NO. 6(M)
STREET AND OUTDOOR AREA LIGHTING - CUSTOMER-OWNED April 1, 1985

1. Rate Application. Available for lighting where customer furnishes, installs, owns and maintains all street and outdoor lighting facilities, and receives metered service, unmetered service and limited maintenance provided by the Company, or unmetered service and energy only as provided for in this Service Classification.
2. Character of Service Supplied. Company will specify and provide a standard single- and/or three-phase alternating current secondary service voltage. Where customer requires and Company supplies service at a primary service voltage, customer shall furnish all transformers necessary to transform such service to a secondary service voltage.
3. General Provisions
 - a. Customer shall pay all costs incurred by Company in constructing any line extensions required in providing said lighting service to the point or points of delivery designated by Company, in accordance with the provisions of Section II.B.7-Special Facilities.
 - b. In all instances, customer shall install suitable switching and protective equipment and, where required, a meter loop and space and mounting facilities for Company metering devices.
 - c. All equipment owned and installed by customer shall be of a type acceptable to Company and shall be maintained by customer in a condition satisfactory to and approved by the appropriate electrical inspection authority.
 - d. Where required for connection to customer's lighting system, customer shall provide, without cost to Company, wire of sufficient length to reach a point specified by Company on Company's secondary distribution system and Company will make the required connection. Such wire may be removed by Company at any time after termination of service hereunder.

III. C. General

1. The Uncontrolled Water Heating and Space Heating Rate shall not be applicable:
 - a. As a separate connection to supply energy for water heating and/or space heating purposes only except where otherwise approved by Company for valid engineering reasons.
 - b. For electric water heaters or space heating equipment used in conjunction with any other type of water heating or space heating equipment, such as an oil or gas fired water or space heater, furnace or range coils, or another electric water heater served under Service Classification No. 15 or 16.
2. Uncontrolled water heating and space heating service will be supplied either through a submeter to Customer's main meter or through a separate main meter, as specified by Company. When a submeter is specified, Company will furnish, install and maintain said submeter upon completion of necessary wiring by Customer.
3. No other electric appliance or equipment shall be attached or connected to the wiring serving the electric water heater and/or space heating equipment, except that separate electrically driven air conditioning equipment exclusively serving the electrically heated space and installations for snow melting of sidewalks or driveways or similar types of electrical equipment for prevention of freezing may be included under the provisions of this rate.

water heating installation as described in Paragraph 3 or as permitted subject to the provisions of Paragraph 5 following, in order for Customer to continue to be eligible for service under this rate.

3. A Customer may receive service under this rate for an electric water heating installation consisting of a storage tank other than the standard installation specified in Paragraph 1, the capacity of which is 120 gallons or more, and single or multiple heating elements, the combined wattage of which does not exceed 60 watts per gallon of tank capacity, providing such installation conforms to good engineering practice acceptable to Company.

*4. Where Customer installs an additional qualifying electric water heater on his premises, and the service to such additional water heater may best be served through an additional submeter, Company will furnish an additional submeter when required provided the location of the additional submeter is approved by Company, and all kilowatthours used by the electric water heaters at such premises will be cumulated for billing. For such additional submeter so installed, Company will make an additional charge of 50 cents per month.

3. General Provisions (Cont'd.)

- e. Customer shall furnish to Company, without cost to Company and on forms suitable to it, or customer shall reimburse Company for all costs incurred in obtaining all rights, permits and easements necessary to permit the installation and maintenance of Company's facilities on, over, under and across both public and private property where and as needed by Company in providing service hereunder.
- f. Customer shall notify Company immediately if any changes are made in customer's installation.
- g. Company may refuse to make the initial connection or may discontinue service to any installation if there is any engineering, construction, safety, legal or practical reason for doing so.
- h. In case of destruction or damage of customer's property hereunder due to highway accidents, storm damage or other similar causes or where replacement of equipment other than as provided above is required, Company, upon receipt of either written or verbal instructions from customer, may at its option, effect the necessary repairs or replacement of the damaged equipment to place it in normal operating condition. Such repairs will be made with parts supplied by customer or, where applicable, with suitable standard items carried in Company stores. Customer shall reimburse Company for such work at the Company's current Productive manhour rate including applicable overhead for all labor expended and 1.2 times all direct costs or charges incurred by Company for all materials and any related items. All charges and payments hereunder shall be in addition to the monthly charge for normal maintenance.

4. General Rules and Regulations. In addition to the above specific rules and regulations, all of Company's General Rules and Regulations shall apply to service supplied under this Service Classification.

<u>Pole</u>	Standard 30-40 foot wood pole required, per pole	\$ 8.50
<u>Wire</u>	Standard 2-conductor wire, per span	\$ 2.15

- (1) Limited to lamps served under contracts effective prior to Sept. 30, 1963. Maintenance of standards, brackets, fixtures and lamps will not be performed by Company after June 30, 1981.
- (2) Standard side mounted hood with open bottom glassware.
- (3) Horizontal burning, enclosed luminaire.
- (4) Post-top mounted, enclosed luminaire, including standard post; limited to installations taken under 10 year contracts only.
- (5) Pole-mounted, directional flood luminaire; limited to installation on existing wood pole accessible to Company basket truck and provided that capacitors, sectionalizers, regulators, cable terminations or 34.5 kV switches are not mounted on such pole.

Tax Adjustment. Any license, franchise, gross receipts, occupation or similar charge or tax levied by any taxing authority on the amounts billed hereunder will be so designated and added as a separate item to bills rendered to customers under the jurisdiction of the taxing authority.

Payments. Bills are due and payable within ten days from date of bill. Bills for residential customers become delinquent after twenty-one days from date of bill. Bills for non-residential customers become delinquent after ten days from date of bill.

*Term of Contract. One year, terminable thereafter on three days' notice, where only standard facilities are installed, or where any nonstandard facilities installed are paid for in advance; ten years, terminable thereafter on three days' notice, where wood poles or post-top luminaires are installed, or where a charge of 1.75% or 2.00% per month is made for any non-standard facilities installed.

*Indicates Change.

UNCONTROLLED WATER HEATING AND SPACE HEATING RATES - (CONT.)

III. Eligibility - (Continued)

A. Water Heating - (Continued)

*5. In the case of premises exclusively heated electrically but having limited requirements for hot water, such as doctors' offices, small shops and stores, etc., Company may, in individual cases, waive the tank size and wattage limitations set forth in the preceding paragraphs. Such approvals must be in writing covering each individual application.

*B. Space Heating

In order to qualify for service under this rate, Customer's electric space heating equipment shall be a type approved by Company, shall be permanently installed on the Customer's premises in a manner which will permit submetering as provided for under Paragraph C-2 hereof.

C. General

1. The Uncontrolled Water Heating and Space Heating Rates shall not be applicable:

*i. As a separate connection to supply energy for water heating and/or space heating purposes only except where otherwise approved by Company for valid engineering reasons.

ii. For electric water heaters or space heating equipment used in conjunction with any other type of water heating or space heating equipment, such as an oil or gas fired water or

1. Rate Application. Available for lighting private streets, alleys, walkways and other private thoroughfares, or for lighting of public or private areas for security or similar purposes when, except as provided in Section 6 hereof, such lighting facilities are operated as an extension of Company's distribution system.
2. Character of Service Supplied. Company shall furnish, install, maintain and deliver electric service to automatically-controlled lighting fixtures conforming to Company's standards. Customer shall select the type and size of lamps and fixtures from the standard equipment offered by Company and shall specify the location of said fixtures. Normally, the service provided hereunder shall be supplied by overhead lines through fixtures supported by standard upsweep brackets attached to wood poles; however, certain non-standard facilities may be installed hereunder in accordance with the terms and conditions stated in the following Paragraph 3.
- *3. Special Facilities. Whenever customer requests Company to install non-standard facilities hereunder (such as concrete or other ornamental posts, underground conduit and/or cable, longer upsweep brackets, shields, switches, etc.) and there is no engineering, construction, safety, legal or practical reason which would, in Company's judgment, make such non-standard installation inadvisable, Company will make such installation provided customer pays to Company the cost of such non-standard facilities, in accordance with the provisions of Section 11.B.7. - Special Facilities.
4. Change or Relocation.
 - a. Where customer requests a change in the size or type of lamp currently contracted for, Company will make the changes requested provided, however, that customer pays in advance to Company all removal and installation costs associated therewith and, additionally, signs a new ten-year contract at the time when 20 percent or more of the total lamps included in the current lighting contract are replaced. Billing for the revised lamps will begin as of the regular billing date after such changes have been completed.

space heater, furnace or range coils, or another electric water heater served under Service Classification No. 15 or 16.

2. Uncontrolled water heating and space heating service will be supplied through a submeter to the main meter which measures the total electric requirements of Customer's premises. Company will, upon completion of necessary wiring by Customer, at its own expense, install and maintain on Customer's premises a submeter of suitable size to measure the electric energy used for water and/or space heating.

*3. No other electric appliance or equipment shall be attached or connected to the wiring serving the electric water heater and/or space heating equipment, except that separate electrically driven air conditioning equipment exclusively serving the electrically heated space and installations for snow melting of sidewalks or driveways or similar types of electrical equipment for prevention of freezing may be included under the provisions of this rate.

UNCONTROLLED WATER HEATING AND SPACE HEATING RATES: Servi (CONT.)

III. Eligibility - (Continued)

C. The Uncontrolled Water Heating and Space Heating Rates shall not be applicable:

- i. As a separate connection to supply energy for water heating and/or space heating purposes only.
- ii. For electric water heaters or space heating equipment used in conjunction with any other type of water heating or space heating equipment, such as an oil or gas fired water or space heater, furnace or range coils, or another electric water heater served under Service Classification No. 15 or 16.

FEB 20 1960
BY RES N-47
PUBLIC SERVICE COMM.
OF MO.

Uncontrolled water heating and space heating service will be supplied through a submeter to the main meter which measures the total electric requirements of Customer's premises. Company will, upon completion of necessary wiring by Customer, at its own expense, install and maintain on Customer's premises a submeter of suitable size to measure the electric energy used for water and/or space heating.

E. Where Customer installs an additional electric water heater on his premises, and the service to such additional water heater may best be served through an additional submeter, Company will furnish an additional submeter when required provided the location of the additional submeter is approved by Company, and all kilowatthours used by the electric water heaters at such premises will be cumulated for billing. For such additional submeter so installed, Company will make an additional charge of 50 cents per month.

APPLYING TO ILLINOIS SERVICE AREAS*

SERVICE CLASSIFICATION NO. 6
LARGE INDUSTRIAL CUSTOMER RATE

- *1. Rate Application. Available only in Illinois Service Areas.
- 2. Applicable to customers contracting for not less than 75,000 kW.
- 3. Character of Service Supplied. Company will specify and supply a three phase alternating current service at a voltage most appropriate for the particular customer. The determination of the most appropriate supply voltage shall be based on the Customer's requirements, the type and capacity of Company facilities already constructed and applicable engineering, construction, operating, safety and economic factors. Where Company supplies service at a higher than standard primary service voltage, Customer shall furnish all transformers necessary to transform the service to Customer's utilization voltage(s) and in such case, the appropriate adjustments set forth in Rider B will apply.
- 4. Demand Meters. Company will install demand meters for the measurement of demands.
- 5. Billing Demand. The billing demand in any month shall be the highest demand established during the current month or 90% of the highest demand established during the preceding 11 months, whichever is higher, but in no event less than 75,000 kW.
- 6. Cumulation of Services. Service shall be delivered and metered at one point, except in cases where for engineering, operating, construction, safety or economic reasons, Company determines that additional points of delivery and meters are required, in which case all meter readings will be cumulated and service will be billed as if taken through one meter. In all cases Company will specify the point or points of delivery.
- 7. General Rules and Regulations. In addition to the above specific rules and regulations, all of Company's General Rules and Regulations shall apply to the supply of service under this rate.

b. Company will furnish unmetered electric energy (only) at the following monthly charges per lamp:

3,300 Lumens, 100 Watts	\$1.07
6,800 Lumens, 175 Watts	1.74
20,000 Lumens, 400 Watts	3.83
54,000 Lumens, 1000 Watts	9.08

c. The equipment shall be of a type acceptable to Company and shall be installed and maintained in a condition satisfactory to and approved by the appropriate electrical inspection authority. Customer shall provide wire of sufficient length to reach a point specified by Company on Company's secondary distribution system and Company will make the required connection. Such wire shall be and remain the property of Company and may be removed by Company at any time after termination of service hereunder. Customer shall furnish to Company, without cost to Company and on forms suitable to it, or customer shall reimburse Company for all costs incurred in obtaining all rights, permits and easements necessary to permit the installation and maintenance of Company's facilities on, over, under and across both public and private property where and as needed by Company in providing service hereunder. Customer shall notify Company immediately if any changes are made in customer's installation. Company may refuse to make the initial connection or may discontinue service to any installation if there is any engineering, construction, safety, legal or practical reason for doing so.

7. General Rules and Regulations. In addition to the above specific rules and regulations, all of Company's General Rules and Regulations shall apply to service supplied under this Service Classification.

	Incandescent				
	1,000	2,500	4,000	6,000	10,000
	Lumen	Lumen	Lumen	Lumen	Lumen
Wood Pole Rates	\$3.31	\$5.05	\$6.89	\$9.15	\$12.52

Ornamental Pole. Add \$5.46 per month per pole to above Wood Pole charges.

Circuit Charge per Month

Underground, in and under dirt, per ft. 6.89¢
 Underground, all other, per ft. 13.11¢

(In lieu of a monthly circuit charge, customer may elect to pay to Company at the time of installation the estimated excess installed cost of underground over overhead circuit.)

*Customer-Owned Street Lighting Facilities. Where customer furnishes, installs and owns all street lighting facilities, service will be supplied as follows:

For Metered Service:

- Customer Charge per Meter \$11.39 per month
- 1) Secondary Service 3.31¢ per kWh
- 2) Primary Service - Rider C shall be applied.

Customer shall install suitable switching and protective equipment, meter loop, space and mounting facilities for Company metering devices.

Tax Adjustment. Any license, franchise, gross receipts, occupation or similar charge or tax levied by any taxing authority on the amounts billed hereunder will be so designated and added as a separate item to bills rendered to customers under the jurisdiction of the taxing authority.

Payments. Bills are due and payable within ten (10) days from date of bill.

Term of Contract. Ten (10) years. Customer, if not legally authorized to contract for all of an initial or succeeding ten-year contract term at one time, may sign an agreement for the maximum period for which it is legally authorized to contract. If no agreement will continue in force thereafter for successive one-year periods unless terminated by either party by written notice given not less than sixty (60) days prior to any annual termination date.

*Indicates Change.

*1. Rate Application. Available to municipalities and other governmental agencies having appropriate contractual authority for installations having an aggregate rating of at least 10,000 lumens for the lighting of public streets and roads; public parks and other outdoor locations open to and reserved for general public use. No new installations will be made after the effective date hereof.

2. Character of Service Supplied. Service supplied hereunder shall be by series incandescent lamps supplied by overhead circuit, subject to the following exceptions:

a. Where Company determines that it is not desirable to connect lamps to series lighting circuits, Company may, at its option, install multiple lamps. The multiple lamps used in such cases shall have approximately the same lumen rating as comparable series lamps.

b. Where customer elects to have service supplied hereunder by underground circuit, additional charges shall be made as shown on Sheet No. 50(M).

*c. Wherever practical, Company may elect to substitute overhead circuits when major repair or replacement of substantial lengths of existing underground cable circuits becomes necessary, in which case appropriate adjustment in the circuit charge applicable to the replaced facilities will be made.

*3. Determination of Applicable Rate.

Wood Pole rates shall apply to service by lamps mounted on standard distribution-type wood poles.

Ornamental rates shall apply to service supplied by lamps mounted on ornamental columns.

*4. Contract Renewals. At the option of customer, a ten-year contract may be signed and may become effective any time after the expiration of the first eight years of the existing contract term.

SERVICE CLASSIFICATION NO. 7 AND 8
OPTIONAL RATES FOR CHURCHES AND SCHOOLS

***1. Rate Application.**

- a. Service Classification No. 7 is applicable in all service areas in Missouri as set forth on Sheets No. 9 through 14, all service areas in Illinois as set forth on Sheet No. 23, and in communities designated as Urban in Iowa as set forth on Sheet No. 26.
- b. Service Classification No. 8 is applicable in Iowa to service areas outside of the communities designated as Urban in (a) above, as set forth on Sheet No. 26.

2. Applicable only to:

- a. Churches, rectories, monasteries, convents, non-commercial public and parochial schools of elementary and high school rank and facilities auxiliary to any of them.
- b. Customers' premises served under this rate prior to the effective date hereof.

3. Character of Service Supplied. Company will specify and supply a standard single and/or three phase alternating current secondary service voltage. Where Customer requires and Company supplies service at a primary service voltage, Customer shall furnish all transformers necessary to transform any part of the service to a secondary service voltage and in such case, the appropriate adjustments under Rider B will apply.

5. Larger Lamps.

At any time during any contract term, customer may upon written request obtain the replacement by larger lamps of any or all lamps then being served under the existing contract, in accordance with the following terms and conditions:

- a. If the lamp replacement does not require a change in existing standards or fixtures, such replacement shall be made without cost to customer, and customer shall, from the date of such replacement, be billed for service thereto at the rate applicable to the larger lamps under the schedule applicable to the replaced smaller lamps.
- b. If the lamp replacement requires, or customer requests, a change in existing standards or fixtures, customer shall pay in advance, without right of refund, Company's estimated cost of making such changes, and customer shall, from the date of such replacement, be billed for service thereto at the rate applicable to the larger lamps under the schedule applicable to the replaced smaller lamps.

6. General Provisions.

- a. Company will submit to customer cuts of standards or fixtures available for installation under this service classification, and customer may select from these the type to be installed. Wood pole service hereunder provides for the installation on wood poles of lamps on brackets, suspension or mast arm supports. Ornamental service hereunder provides for the installation on ornamental columns of lamps on brackets, canopies or similar mountings.
- b. All standards, brackets, fixtures, lamps, wires, cables, conduits, and other necessary equipment furnished, owned, installed and maintained by Company, will remain the property of Company, and may be removed by Company if service is discontinued. Maintenance of standards, brackets, fixtures and lamps will not be performed by Company after June 30, 1981.

3. Determination of Applicable Rate.

Schedule "A" shall apply to service delivered to a new installation during the initial contract term.

Schedule "B" shall apply to service delivered during any contract term to installations served under Schedule "A" during the immediately preceding contract term.

Schedule "C" shall apply to service delivered during any contract term to installations served under Schedule "B" or Schedule "C" during the immediately preceding contract term.

Wood Pole rates shall apply to service by lamps mounted on standard distribution-type wood poles.

Ornamental rates shall apply to service supplied by lamps mounted on ornamental columns.

4. Contract Renewals. At the option of Customer, a ten-year renewal contract may be signed and may become effective any time after the expiration of the first eight years of the existing contract term, but until such renewal contract has been signed, the schedule of rates theretofore applicable to the service shall continue.

5. Additional Installations. Subject to the restriction set forth in Paragraph 1 of this Service Classification, Customer may obtain the installation of additional lamps and the supply of service thereto. Such additional lamps shall be billed on Schedule "A" initially and continue as outlined in Paragraph 3 hereof.

in lieu of their purchasing service under appropriate Residence or General Service Rates.

AUG 5 1959

CASE NO 14,038
PUBLIC SERVICE COMMISSION

3. Character of Service Supplied Company will specify and supply a standard single and/or three phase alternating current secondary service voltage. Where Customer requires and Company supplies service at a primary service voltage, Customer shall furnish all transformers necessary to transform any part of the service to a secondary service voltage and in such case, the appropriate adjustments under Rider B will apply.

4. Cumulation of Services. Service taken through each main meter will be billed separately, except that service taken through not more than one single and one three phase meter by the same customer on the same premises may be cumulated for billing purposes, but the minimum monthly charge for such cumulation will be not less than the minimum charge per meter under the applicable service classification applied to each such meter cumulated. Any additional services supplied will be billed for separately.

5. Rate Not Applicable. Where any part of the service measured by the meter is used for commercial purposes.

6. General Rules and Regulations. In addition to the above specific rules and regulations, all of Company's General Rules and Regulations shall apply to service supplied under these rates.

6. (Continued)

c. Upon receipt of written request and authorization from customer, Company will relocate any of its facilities used in rendering service hereunder, providing customer pays to Company at the time such change is made all costs incurred by Company in connection therewith.

d. Company will control the turning on and turning off of the street lighting service to provide approximately 4,000 burning hours per year.

e. Customer shall furnish to Company, without cost to Company and on forms suitable to it, or customer shall reimburse Company for all costs incurred in obtaining all rights, permits and easements necessary to permit the installation and maintenance of Company's facilities on, over, under and across both public and private property where and as needed by Company in providing service hereunder.

*f. Late Payment Charge. Any portion of any bill remaining unpaid after the due date indicated thereon will have a late payment charge of 1.5% of the gross unpaid amount added and the entire amount due, including the late payment charge, will be shown as "arrears" on the next bill. Any portion of the "arrears" remaining unpaid after the due date of the bill on which such "arrears" appear will also have a late payment charge of 1.5% added thereto. When a customer's payment is received by mail not more than two (2) business days after the due date, it shall be deemed a timely payment. Failure to pay any late payment charge shall be grounds for disconnection of service in accordance with Section VII of these Rules and Regulations.

7. General Rules and Regulations. In addition to the above specific rules and regulations, all of Company's General Rules and Regulations shall apply to service supplied under this Service Classification.

*Indicates Change.

- *b. All standards, brackets, fixtures, lamps, wires, cables, conduits, and other necessary equipment furnished, owned, installed and maintained by Company, will remain the property of Company, and may be removed by Company if service is discontinued. Maintenance of standards, brackets, fixtures and lamps will not be performed by Company after June 30, 1981.
- c. Upon receipt of written request and authorization from customer, Company will relocate any of its facilities used in rendering service hereunder, providing customer pays to Company at the time such change is made all costs incurred by Company, in connection therewith.
- d. Company will control the turning on and turning off of the street lighting service to provide approximately 1,000 burning hours per year.
- e. Customer shall furnish to Company, without cost to Company and on forms suitable to it, or customer shall reimburse Company for all costs incurred in obtaining all rights, permits and easements necessary to permit the installation and maintenance of Company's facilities on, over, under and across both public and private property where and as needed by Company in providing service hereunder.
- f. If any bill for service delivered hereunder is not paid within ten days from the date of bill, it shall become delinquent and shall bear interest at the rate of 6% per annum from the date of the bill. Twenty days after a bill becomes delinquent, Company may suspend delivery of service hereunder. Suspension of service shall in no way affect customer's obligation to continue to pay the applicable charges. No failure or delay by Company in enforcing any of its rights hereunder shall be deemed a waiver of such rights, nor shall the failure of Company to exercise its rights in case of delinquency bar the Company from exercising its rights in case of subsequent delinquency.

PRIMARY SERVICE RATE

RECEIVED

OCT 23 1973

1. Rate Application. Available in all Urban and Rural Service Areas.
2. Applicable to service supplied at a standard three phase primary service voltage.
3. Character of Service Supplied. Company will specify and supply a standard three phase alternating current primary service voltage. Direct current service is supplied in limited quantities to existing premises in the downtown underground district of St. Louis, Mo.
4. Cumulation of Services. Service taken through each meter will be billed separately except that the service taken through not more than one D.C. meter and one three phase primary A.C. meter by the same customer on the same premises may be cumulated and billed as if taken through one meter. When additional services are supplied, they will be billed for separately.
5. Demand Meters. Company will install demand meters for the measurement of demands.
- *6. Billing Demand. The billing demand in any month will be the highest demand established during peak hours or 50% of the highest demand established during off-peak hours, whichever is higher during the month, or, for a qualifying all-electric customer, the billing demand determined in accordance with Rider O, All-Electric Customers, but in no event less than 150 kW.

Peak hours and off-peak hours are defined as follows:

Peak hours - - - 8:00 A.M. to 8 P.M., Monday through Friday,

Off-peak hours - 8:00 P.M. (of Monday through Thursday) to 8:00 A.M. of following day, and from 8:00 P.M. Friday to 8:00 A.M. Monday.

2. Applicable to service supplied at a standard three phase primary service voltage.
3. Character of Service Supplied. Company will specify and supply a standard three phase alternating current primary service voltage. Direct current service is supplied in limited quantities to existing premises in the downtown underground district of St. Louis, Mo.
4. Surcharge for 120/240 Volt Direct Current Service. For that portion of service supplied at D.C. the energy charges based on the rate set forth on Sheet No. 53 shall be increased by 0.25¢ per kilowatthour.
5. Cumulation of Services. Service taken through each meter will be billed separately except that the service taken through not more than one D.C. meter and one three phase primary A.C. meter by the same customer on the same premises may be cumulated and billed as if taken through one meter. When additional services are supplied, they will be billed for separately.
6. Demand Meters. Company will install demand meters for the measurement of demands.
7. Billing Demand. The billing demand used in determining the demand and energy charges for the month will be determined as follows:

CANCELLED

BY DEC 21 1964
PUBLIC SERVICE

The highest demand established during the peak hours or 50% of the highest demand established during off-peak hours, whichever is higher during the month, but in no event less than 150 kw.

PRIVATE ORNAMENTAL STREET LIGHTING RATES
RATE OF LIMITED APPLICATION

JUL 13 1981

1. Rate Application. Available to customers for the lighting of private streets or parkways in the City of St. Louis and ~~Public St. Louis County~~ by not less than 5 lamps, having an aggregate rating of not less than 10,000 Lumens, mounted on ornamental columns.
2. Character of Service Supplied. Service supplied hereunder shall be by series incandescent lamps supplied by overhead circuit. Where customer elects to have service supplied by underground circuit, additional monthly charges shall be made as shown on Sheet No. 55 (M).
3. Larger Lamps. At any time during any contract term, customer may, upon written request, obtain the replacement by larger lamps of any or all lamps then being served under the existing contract, in accordance with the following terms and conditions:
 - a. If the lamp replacement does not require a change in existing standards or fixtures, such replacement shall be made without cost to customer, and customer shall, from the date of such replacement, be billed for service thereto at the rate applicable to the larger lamps under the schedule applicable to the replaced smaller lamps.
 - b. If the lamp replacement requires or customer requests a change in existing standards or fixtures, customer shall pay in advance, without right of refund, Company's estimated cost of making such changes, and customer shall, from the date of such replacement, be billed for service thereto at the rate applicable to the larger lamps under the schedule applicable to the replaced smaller lamps.
4. General Provisions.
 - a. Company will submit to customer cuts of standards or fixtures available for installation under this service classification, and customer may select from these the type to be installed. Ornamental service hereunder provides for the installation on ornamental columns of lamps on brackets, canopies or similar mountings.

INTERRUPTIBLE POWER

RATE OF LIMITED APPLICATION*

1. General. The application of this Service Classification shall be limited to the Customer served hereunder prior to the effective date hereof. Interruptible Power, not exceeding 6,600 kilowatts, is available, subject to the conditions of this Service Classification, for the exclusive supply of the present load, whose power requirements exceeds 1,000 kilowatts, and whose operating characteristics permit immediate interruption of the supply of service for indefinite periods of time.

*The amount in kilowatts of Interruptible Power contracted for by Customer is hereinafter referred to as Contract Demand. Company shall be under no obligation to furnish Interruptible Power except from generating facilities on its own system.

*Where Customer's operation requires a small amount of power during periods of curtailment of Interruptible Power for use in safeguarding its plant, Customer may specify an amount of power in kilowatts to be known as Assurance Power not to exceed 10% of the Contract Demand, which amount shall be proportionately reduced if the Contract Demand is reduced.

Service will be furnished in the form of three phase, 60 cycle alternating current at a pressure of approximately 13,800 volts, to be delivered and metered at a point selected by the Company, which will be at the Cahokia Power Plant, unless Company and Customer agree upon another location, all subject to the provisions hereinafter specified.

The amount in kilowatts of Interruptible Power contracted for by any customer, or as subsequently reduced as provided in Paragraph 7 hereof, is hereinafter referred to as Contract Demand. Company shall be under no obligation to furnish Interruptible Power except from generating facilities on its own system.

Where Customer's operation requires a small amount of power during periods of curtailment of Interruptible Power for use in safe-guarding its plant, Customer may specify an amount of power in kilowatts to be known as Assurance Power not to exceed 10% of the Contract Demand, which amount shall be proportionately reduced if the Contract Demand is reduced as provided in Paragraph 7 hereof.

Service will be furnished in the form of three phase, 60 cycle alternating current at a pressure of approximately 13,800 volts, to be delivered and metered at a point selected by the Company, which will be at the Cahokia Power Plant, unless Company and Customer agree upon another location, all subject to the provisions hereinafter specified.

5. Larger Lamps. At any time during any contract term, customer may, upon written request, obtain the replacement by larger lamps of any or all lamps then being served under the existing contract, in accordance with the following terms and conditions:

- a. If the lamp replacement does not require a change in existing standards or fixtures, such replacement shall be made without cost to customer, and customer shall, from the date of such replacement, be billed for service thereto at the rate applicable to the larger lamps under the schedule applicable to the replaced smaller lamps.
- b. If the lamp replacement requires or customer requests a change in existing standards or fixtures, customer shall pay in advance, without right of refund, Company's estimated cost of making such changes, and customer shall, from the date of such replacement, be billed for service thereto at the rate applicable to the larger lamps under the schedule applicable to the replaced smaller lamps.

6. General Provisions.

- a. Company will submit to customer cuts of standards fixtures available for installation under this service classification, and customer may select from these the type to be installed. Ornamental service hereunder provides for the installation on ornamental columns of lamps on brackets, canopies or similar mountings.
- *b. All standards, brackets, fixtures, lamps, wires, cables, conduits, and other necessary equipment furnished, owned, installed and maintained by Company, will remain the property of Company, and may be removed by Company if service is discontinued. 2. Transmission Line, Equipment, Etc. Customer will pay the total cost installed of transmission circuit utilized, including cost of easements, rights-of-way and other expenditures incident to the delivery of Interruptible Power service from within the Cahokia Power Plant to Customer's premises. It will also pay the taxes and maintenance (cost of labor and material plus 10% engineering and supervision) of such line as incurred and billed for by the Company from time to time. Ownership of such line, including easements and rights-of-way, will be vested permanently in the Company. If circuits utilized have capacity in excess of that necessary to supply Customer's initial contract requirements, Company may utilize the excess capacity for other purposes and in such event the cost and charges specified above shall be prorated.

Customer will, at its own expense, install and maintain, on its own premises, all line, substation and utilization equipment for the proper use and control of the electric service supplied by the Company and will also, at its own expense, provide suitable relays and signal system on its premises to operate the circuit breakers on the circuits supplying the Interruptible Power, such relays and signals to be arranged for automatic or remote control by Company's Load Dispatcher. Company will supply the control circuits to Customer's premises to effect energizing of the relay system. Equipment installed for this purpose by Customer shall be approved by Company's engineers and Company shall at all reasonable times be permitted free access to Customer's premises for inspection of equipment and checking its operation.

APPLYING TO AREA ADJACENT TO COMPANY'S CAHOKIA PLANT, MONSANTO, ILLINOIS

SERVICE CLASSIFICATION NO. 10
INTERRUPTIBLE POWER - (CONTINUED)
RATE OF LIMITED APPLICATION

3. Rate.

*A. A base rate of 1.04¢ per kilowatthour for all service used, other than service supplied under paragraph 9 hereof, subject to each of the following independent adjustments:

- (1) Power Factor Adjustment. The base rate of 1.04¢ per kilowatthour is available for loads having an average monthly power factor of not less than .9. When the average monthly power factor falls below .9, the base rate of 1.04¢ per kilowatthour will be multiplied by the factor determined by dividing .9 by the average monthly power factor.
- (2) Fuel Rider. Applicable to all metered kilowatthours as set forth on Rider A.

*B. Additional Monthly Charge for Assurance Power.

For the first	200 kilowatts	\$2.64	per kw
For the next	800 kilowatts	\$2.02	per kw
For all over	1,000 kilowatts	\$1.71	per kw

The amount of capacity to which these charges shall apply shall be:

- (1) The amount of Assurance Power specified in the contract, or
- (2) In event such capacity is exceeded during periods when Company has notified Customer to curtail his load, and Company agrees to such increased amount, the maximum demand in kilowatts during such periods, but
- (3) Not more than 10% of the Contract Demand in effect at the time.

- 4. Billing Demand. The highest demand established during the demand period, but not less than 1,000 kilowatts.
- 5. Demand Period. Demand period is the period during which a billing demand is effective. The demand established in one month will remain in effect for that month and the next following eleven months, unless during such period a higher demand is established, whereupon the month in which such higher demand is established will be the first month of a new demand period. A demand having remained in effect for a period of twelve months, the next following month will become the first month of a new demand period and the demand established in this month will become effective, subject to provisions set forth in "Guarantee" below.
- 6. Guarantee. Customer guarantees usage during any demand period of 6,000 kilowatthours per kilowatt of billing demand per year or such pro-rated amount in the event of a demand period of less than a year. Customer shall pay each month for the actual kilowatthours used and, in addition thereto, for any deficiency below 1/12th of the guaranteed usage. At the end of each demand period, Company will retain the amount of Customer's deficiency payments required to cover the deficiency of actual usage below guaranteed usage for such period, and will refund to Customer the excess of such deficiency payments, if any such excess exists. Deficiency payments and refunds will be computed at the base rate.

*8. (This paragraph withdrawn.)

9. Curtailement of Service. Interruptible Power may be curtailed or interrupted whenever, in Company's sole judgment, such power is required to supply firm power to customers of Company and its affiliates or to meet obligations to deliver power to other utilities under agreements to which Company or any of its affiliates are parties, or to maintain lake levels at system hydro plants consistent with system requirements and to prevent jeopardizing system capacity.

Company may curtail or interrupt service in either of two ways:

- (a) Where an emergency occurs in the operation of Company's system which requires immediate disconnection of Interruptible Power to meet its obligations to others, Company will effect such disconnection by initiating operation of automatic signals and relays referred to in paragraph 2 hereof, or by telephone notice, or
- (b) Where the need for curtailment of Interruptible Power may be anticipated in advance, Company will notify customers of the time such curtailment shall be effected.

7. Reservation of Capacity. From the aggregate capacity which Company determines it has available from time to time for the supply of Interruptible Power, Company shall reserve for Customer's use the amount of the Contract Demand specified. If, however, during any period of 12 consecutive months, the highest Billing Demand effective during such period shall have been less than 90% of the Contract Demand in effect during such period,

- a) the Contract Demand shall thereafter be reduced to 110% of the Billing Demand effective during the next succeeding month, unless
- b) Customer elects to retain a higher Contract Demand by paying, in addition to other charges provided for hereunder, a monthly reservation charge of 25¢ per kilowatt for the excess of the Contract Demand specified over 110% of the Billing Demands thereafter effective.

Such reservation payments shall continue until Customer's Billing Demand reaches or exceeds 90% of the Contract Demand so specified, or Customer requests a reduction in the Contract Demand to such figure as will eliminate such charge. SERVICE CLASSIFICATION NO. 9(M)*
LIMITED RESIDENTIAL TIME-OF-DAY RATE

APR 28 1980

MISSOURI

Public Service Commission

1. Rate Applicable to all residential service to which Service Classification No. 1(M) would normally apply but for customer's request for this rate (Service Classification No. 9(M)). This rate shall be applicable to a maximum of 100 customers at any time. To the extent that additional customers request the rate they shall be granted preference in the order that their initial applications for the rate are received by Company. In order to maintain any such preference, a customer must accept the rate in writing, accompanied by the \$35 refundable deposit specified, within one month from the time he is notified by Company that such rate is available to him. If a customer cancels service under the time-of-day rate, he may not thereafter resume such service for one year.

2. Access to Premises. This rate shall not be available to customers with meters located inside the enclosed living area or where any circumstance exists that would make monthly meter readings unusually difficult to obtain.

3. Two Wire Services. This rate will not be available to customers with 120 volt 2 wire services.

4. Peak hours and off-peak hours are defined as follows:

Peak hours - - - 10:00 A.M. to 10:00 P.M., Monday through Friday

Off-peak hours - 10:00 P.M. of Monday through Thursday to 10:00 A.M. of the following day, and from 10:00 P.M. Friday to 10:00 A.M. Monday.

- The entire 24 hours of the following days:

- | | |
|------------------|---------------------|
| New Year's Day | Thanksgiving Day |
| Good Friday | Thanksgiving Friday |
| Memorial Day | Christmas Eve Day |
| Independence Day | Christmas Day |
| Labor Day | |

All times stated above apply to the local effective time.

5. General Rules and Regulations. In addition to the above specific rules and regulations, all of Company's General Rules and Regulations shall apply to the supply of service under this rate.

P. S. C. MO., ILL. C. C., IA. ST. C. C. SCHEDULE NO. 5 FIRST REVISED SHEET NO. 61CANCELLING SCHEDULE NO. 5 ORIGINAL SHEET NO. 61APPLYING TO AREA ADJACENT TO COMPANY'S CAHOKIA PLANT, MONSANTO, ILLINOIS

SERVICE CLASSIFICATION NO. 10
INTERRUPTIBLE POWER - (CONTINUED)
RATE OF LIMITED APPLICATION*

9. Curtailment of Service - (Continued)

Where in Company's judgment the period of curtailment of Interruptible Power may exceed one week, Company will, upon request of Customer, endeavor to obtain from other sources temporary power equivalent in capacity to the amount of Interruptible Power curtailed. If such temporary power is obtainable, Company will advise Customer of the cost thereof and the terms and conditions under which it will be supplied. If such offer is acceptable to Customer, Company will permit Customer to resume use of power under such terms and conditions in lieu of the rate for Interruptible Power provided in paragraph 3-A hereof. Company will determine in its sole judgment when use of Interruptible Power at the rate provided in Paragraph 3-A hereof may be resumed.

Assurance Power shall be exempt from Customer's obligation to curtail or completely interrupt operations.

10. Reduction in Guarantee. When the supply of Interruptible Power service has been curtailed, the monthly installment of the guaranteed usage will be reduced for the month in which such curtailment occurs, as set forth below:

The reduction to be made will be in the ratio that the number of equivalent hours of curtailment bears to the total number of hours in the month.

"Equivalent hours of curtailment" is defined as the result obtained by multiplying kilowatts restricted from use below Customer's demand by the number of hours during which such restriction is in effect, and dividing the product thus obtained by the demand.

11. Resale of Service. Customer will not sell or otherwise dispose of all or any part of the electric service supplied.
