H. Foreign Exchange and Foreign Exchange Centrex (with switching equipment located on Telephone Company premises) Station Service.

1. This service is furnished to a maximum of two exchanges (in addition to the exchange in which the Exchange service is furnished). The Exchange service connection is provided from one exchange only.
2. Service is furnished on the condition that additional costs to the Telephone Company may be necessary to provide a type of signaling suitable for operation with the exchange from which service is furnished, or to provide, at the customer's request, a type of signaling other than the type the Telephone Company would elect to furnish. In such cases, additional charges shall apply.
3. Customers, for the exchange portion of the service, are subject to exchange charges, rules and regulations; and for the private line portion of the service, are subject to the private line charges, rules and regulations in this Tariff.

In addition to the general regulations and definitions applicable to Private Line Services as set forth in Section 1 of this Tariff, the regulations hereinafter set forth apply to TELPAK channels and services. Except as otherwise provided herein, the regulations applicable to derive channels and services are as set forth for channels and services of the same type and furnished for the same purposes under Paragraphs 2.2.2 and 2.2.3, preceding.

A. Description of Channels and Classifications

(CT)

1. TELPAK service provides communications paths of various widths (TELPAK channels) which are capable of transmitting various forms of electrical communications. The Telephone Company will terminate the entire TELPAK channel for use as a broadband transmission medium or will provide channelizing equipment to subdivide TELPAK channels into channels of lesser width (derive channels). These channels may be furnished by such physical service component arrangements appropriate for the forms of communications specified as the Telephone Company may elect for efficient utilization of available physical service components, whether or not in the form of a single carrier spectrum assignment and whether or not the entire TELPAK channel or all derived channels are on the same physical service component.

TELPAK channels as described in Paragraph 2.2.4, A.2., following, are furnished between specified locations for telephone, teletypewriter, remote metering, supervisory control, miscellaneous signaling and for other purposes for which channel terminals are provided under Paragraph 2.2.4, A.3., following.

(CP)

The Telephone Company will provide TELPAK Service only when the originating service point(s) and terminating service point(s) of the entire TELPAK channel, including derived channels, are within the LATA.

D. Intrastate - Interstate Services and Channels

If a customer has a TELPAK channel connecting two or more exchanges with derived services or channels, some of which carry interstate traffic and some of which carry only intrastate traffic, the TELPAK channel charge for the intrastate portion is determined by multiplying the charge computed in accordance with Paragraph 2.2.4F following, by the ratio of the number of equivalent telephone-derived intrastate channels divided by the total number of equivalent telephone-derived channels in use. Each two-point section is separately computed.

For other items associated with such intrastate-derived services and channels, the rates specified in Paragraphs 2.2.4F.3, 2.2.4F.4, 2.2.4F.5 and 2.2.4F.6 apply.

Interoffice channels and interoffice channel terminals, when applicable, will be provided at the rate for interexchange service.
