NAME OF OFFICER TITLE ADDRESS

APPLYING TO MISSOURI SERVICE AREA

SERVICE CLASSIFICATION NO. 10 (Mo. **Missouri Public Service Commission**)  
INTERRUPTIBLE POWER RATE

\*RATE OF LIMITED APPLICATION (See Note) **REC'D MAR 23 2000**

1. General. Interruptible Power is available, subject to the conditions of this Service Classification, for the exclusive supply of customers whose curtailable loads equal or exceed 10,000 kilowatts of interruptible power and have operating characteristics which permit, without delay, interruption of the supply of service for indefinite periods of time. Customers who were served under an Interruptible Rate on and after December 28, 1983, by a former Union Electric Company subsidiary and customers served under a combination of interruptible Riders O and S as of August 21, 1994 may receive service under this Service Classification irrespective of their level of curtailable kilowatts. Company shall have the right to limit the aggregate amount of Interruptible Power available to an amount appropriate to its operating requirements. This limitation is currently 100,000 kilowatts in Missouri.

Where customer's operation requires an amount of power during periods of curtailment of Interruptible Power, customer may contract for an amount of power in kilowatts to be known as Assurance Power. Service will be furnished in the form of three-phase, 60 Hz power, to be metered at a suitable point near the boundary of customer's property.

2. Supply Facilities. Customer shall pay the total installed cost of any transmission or distribution facilities initially utilized for the delivery of electric service to said customer and any subsequent replacements required thereof. Such costs shall include the entire circuit and related facilities from the metering point back to the point on Company's system where adequate capacity exists to provide for customer's requirements. The total installed cost of such facilities shall include labor, materials, easements, rights-of-way and other expenditures incident to the installation of facilities for the delivery of electric service to customer's premises including any applicable overheads. Customer shall also pay each month an amount equal to 0.4% of the total installed cost of such lines for maintenance of such facilities. Ownership, including easements and rights-of-way, will be vested permanently in the Company. If these facilities utilized have capacity in excess of that necessary to supply customer's initial contract requirements, Company may utilize the excess capacity for other purposes and in such event the cost and charges specified above shall be prorated. Such costs will also be reduced in proportion to the amount of Assurance Power to the customer's total requirements.

\*Indicates Addition

(NOTE: The applicability of this Service Classification is limited to those interruptible accounts receiving service under **Missouri Public Service Commission** herein, as of 11/30/99.)

SERVICE CLASSIFICATION NO. 10

INTERRUPTIBLE POWER - (CONTINUED)

RECEIVED  
JUL 31 1959  
MISSOURI  
Public Service Comm.

9. Curtailment of Service - (Continued)

and conditions in lieu of the rate for Interruptible Power provided in paragraph 3-A hereof. Company will determine in its sole judgment when use of Interruptible Power at the rate provided in Paragraph 3-A hereof may be resumed.

Assurance Power shall be exempt from Customer's obligation to curtail or completely interrupt operations.

10. Reduction in Guarantee. When the supply of Interruptible Power service has been curtailed, the monthly installment of the guaranteed usage will be reduced for the month in which such curtailment occurs, as set forth below:

The reduction to be made will be in the ratio that the number of equivalent hours of curtailment bears to the total number of hours in the month.

*Cancelled 11-1-72  
By Let R.S.#62*

"Equivalent hours of curtailment" is defined as the result obtained by multiplying kilowatts restricted from use below Customer's demand by the number of hours during which such restriction is in effect, and dividing the product thus obtained by the demand.

11. Resale of Service. Customer will not sell or otherwise dispose of all or any part of the electric service supplied.

12. Relief of Liability. Customer will assume responsibility for, and will save Company harmless from all actions, causes of action, suits, claims and demands whatsoever in law or equity, for injuries to persons (including employees of Customer), damages to property, or losses, directly or indirectly caused or claimed to be caused by the acts of negligence of Customer, its licensees, invitees, agents,

P.S.C. MO., ILL. C.C., IA. ST. C.C. SCHEDULE NO. 5 THIRD REVISED SHEET NO. 63

CANCELLING SCHEDULE NO. 5 SECOND REVISED SHEET NO. 63

APPLYING TO ILLINOIS SERVICE AREAS

SERVICE CLASSIFICATION NO. 10A\*

PEAK SHAVING AND INTERRUPTIBLE POWER RATE

1. General. Interruptible Power is available, subject to the conditions of this Service Classification, for the exclusive supply of loads whose individual power requirements exceed 25,000 kilowatts and have operating characteristics which permit, without delay, interruption of the supply of service for indefinite periods of time. Company shall have the right to limit the aggregate amount of Interruptible Power available to an amount consistent with operating experience. Initially this limitation is 100,000 kW.

The amount in kilowatts equal to the sum of Interruptible Power and Assurance Power as hereinafter defined contracted for by any customer is hereinafter referred to as Contract Demand.

Where Customer's operation requires an amount of power during periods of curtailment of Interruptible Power, Customer may specify an amount of power in kilowatts to be known as Assurance Power.

Service will be furnished in the form of three phase, 60 cycle alternating current, to be delivered and metered at a suitable point near the boundary of Customer's property.

2. Transmission Line, Equipment, Etc. Customer shall pay the total cost installed of any transmission or distribution circuits utilized for the delivery of electric service to said customer. In the case of distribution circuits such cost shall include the entire circuit from the point of delivery back to its substation source (either 34 kV or 14 kV) on Company's system. In the case of transmission circuits such cost shall include the entire circuit from the point of delivery back to its point of connection to Company's interconnected transmission grid. In any event the total cost installed of such circuits shall include labor, materials, easements, rights-of-way and other expenditures incident to the installation of facilities for the delivery of electric service to Customer's premises. Customer shall also pay each month an amount equal to 0.4% of the total installed cost of such lines to cover property taxes and operating and maintenance expenses. Ownership of such line, including easements and rights-of-way, will be vested permanently in the Company. If circuits utilized have capacity in excess of that necessary to supply Customer's initial contract requirements, Company may utilize the excess capacity for other purposes and in such event the cost and charges specified above shall be prorated.

\*Indicates Addition.

servants, or others, or by the use, interruption or imperfection of electric service supplied by Company, or by the curtailment or disconnection of electric service or by any mistake in judgment or act or omission by Company, or from any other cause, occurring or sustained on property owned or controlled by Customer.

13. Term of Contract. Initial term of 5 years with subsequent extensions of one year each, subject to cancellation by either party by advance notice given six months prior to the end of the initial term or any extension thereof.

\*14. Purchase of Additional Power in Excess of Interruptible Power Rate Limitation. Subject to approval by Company, Customer may take additional power through the facilities specified in Paragraph 2 hereof and such additional "Excess Interruptible" power will be billed incrementally as outlined below:

- a. Company will meter Customer's total kilowatt demand and energy use. That portion of the total demand up to the Interruptible Power limitation will be considered Interruptible Power demand and any excess will be considered Excess Interruptible demand. The Demand Period provisions set forth in Paragraph 5 hereof will apply to each of the aforesaid demands.
- b. Total monthly energy use will be prorated to Interruptible Power and Excess Interruptible in proportion to the respective demands determined in accordance with subparagraph 14-a above, thus assuming equal load factors for each service.

INTERRUPTIBLE POWER RATE (Cont'd.)

DEC 21 1990

MISSOURI

3. Rate Based on Monthly Meter Readings (Cont'd.) Public Service Commission

(4) The kilowatts to be billed as Interruptible Power in any month will be (a) the highest demand established during peak hours minus the Assurance Power Demand or (b) 50% of the difference between the highest demand established during off-peak hours and the Assurance Power Demand, whichever is greater. The Interruptible Power demand charge will be calculated at the appropriate demand step after the initial billing of the kilowatts of Assurance Power.

On-peak hours - - - 10:00 A.M. to 10:00 P.M., Monday through Friday.

Off-peak hours - - All other hours including the entire 24 hours of the following days:

- |                |                  |                     |
|----------------|------------------|---------------------|
| New Year's Day | Independence Day | Thanksgiving Friday |
| Good Friday    | Labor Day        | Christmas Eve Day   |
| Memorial Day   | Thanksgiving Day | Christmas Day       |

All times stated above apply to the local effective time.

Where Company supplies service at 34.5 kV or higher the appropriate adjustments under Rider B will apply to the energy and Assurance Power Demand.

\*(5) The reactive kilovars to be billed in any month shall be the kilovars by which the customer's average metered kilovars exceed the customer's kilovars at an average power factor of 90% lagging during the billing period. Such average kilovar billing units shall be determined in accordance with the following formula:

$$kVar = \frac{(kVarh}{kWh} - 0.4843)(kW)$$

- where:
- kVar = kilovar billing units
  - kVarh = metered kilovarhours
  - kWh = metered kilowatt hours
  - kW = metered kilowatts
  - 0.4843 = kilovar requirement

at 90% lagging power factor

Missouri Public Service Commission

REC'D MAR 23 2000

(5) (cont'd.) following formula:

kVar = (kVarh - 0.4843) (kW) / kWh

- where: kVar = kilovar billing units, kVarh = metered kilovarhours, kWh = metered kilowatt hours, kW = metered kilowatts, 0.4843 = kilovar requirement at 90% lagging power factor

(6) On-peak and off-peak hours applicable herein shall be as specified within this service classification.

4. Optional Time-of-Day (TOD) Service. Applicable at customer's option for all Interruptible Service usage, subject to the following provisions:

- A. Customer will be transferred to this TOD rate option effective with TOD meter installation and transferred from this TOD rate option to the applicable non-TOD rate after the meter is removed.
B. Customer electing this TOD option, shall remain on said option for a minimum period of twelve (12) months, provided however, that customer may discontinue this option within the first ninety (90) days thereunder subject to the continued payment of the TOD customer charge, in lieu of any other customer charge, for the full twelve (12) month term of this option.
C. Any customer canceling this TOD option cannot thereafter resume billing under said option for a period of one year following the last billing period on the TOD option.

5. Minimum Monthly Charge. The minimum monthly charge hereunder will be sum of the Customer Charge, the applicable Energy Charge for all kilowatthours consumed, the Assurance Power Demand Charge, the Interruptible Power Demand Charge and any supply facility charges referred to in paragraph (2.) above.

6. Curtailment of Service. Interruptible Power may be curtailed or interrupted when it is anticipated that the Company's annual system peak will be established or whenever in Company's judgment, such

SERVICE CLASSIFICATION NO. 10(M)  
INTERRUPTIBLE POWER RATE - (CONTINUED) OCT 28 1983

4. Minimum Monthly Charge. The minimum monthly charge hereon will be sum of the Customer Charge, the applicable Energy Charge for all kilowatt-hours consumed, the Assurance Power Demand Charge, the Interruptible Power Demand Charge, and any supply facility charges referred to in Paragraph (2) above.
5. Curtailement of Service. Interruptible Power may be curtailed or interrupted when it is anticipated that the Company's annual system peak will be established or whenever in Company's judgment, such power is required to a) maintain a firm power supply to the Company's non-interruptible customers; b) meet contractual obligations for the delivery of firm power to other utilities; c) maintain water elevation levels at Company's hydro plants consistent with the preservation of desired system reliability levels and applicable regulatory operating requirements, or d) prevent jeopardizing the Company's interconnected generation and transmission system.

Company may curtail or interrupt service in either of two ways:

- a) Where the need for curtailment of Interruptible Power may be anticipated in advance, Company will notify customers by telephone, and at the same time such curtailment shall be effected. Company shall endeavor to give customer as much advance notice as is practical under the circumstances.
- b) Where an emergency occurs in the operation of Company's system which requires immediate disconnection of Interruptible Power to meet its obligations to others, Company may effect such disconnection by telephone notice, or by initiating operation of automatic signals and relays referred to in paragraph 2 hereof.

Where in Company's judgment the period of curtailment of Interruptible Power may exceed one week Company will, upon request of customer, endeavor to obtain from other sources temporary power equivalent in capacity to the amount of Interruptible Power curtailed. Where curtailments are expected to last less than one week, Company will likewise seek temporary power to the extent that operating conditions permit. If such temporary power is obtainable, Company will advise customer of the cost and conditions under which it will be supplied. If such offer is acceptable to customer, Company will permit customer to continue or resume use of power under such costs and conditions in lieu of the rate for Interruptible Power provided in paragraph 3. Company will determine and notify customer when use of Interruptible Power at the rate provided in Paragraph 3 may be resumed.

Assurance Power shall be exempt from customer's requirement to curtail or completely interrupt operations.

JUL 31 1959

MUNICIPAL RATE FOR WATER AND SEWAGE PUMPING MISSOURI Service Comm.

1. Rate Application. Available in all Urban and Rural Service Areas.
2. Applicable to Municipalities and Authorized Sanitary Sewage Districts contracting for their entire requirements for service to be used exclusively for the pumping of water for municipal water supply systems and/or the entire requirements for the pumping of sanitary sewage disposal plants, including incidental lighting in pumping stations.
3. Character of Service. Company will specify and supply alternating current at a standard secondary service voltage.
4. Cumulation of Services. Where more than one meter measures the service supplied to a municipality or sanitary sewage district for pumping purposes and incidental lighting in the pumping stations, all meter readings may be cumulated and billed as if taken through one meter.
5. Rate Not Available for Supplementary Service or for emergency pumping loads such as storm and flood water disposal, or loads intermittent in character.
6. General Rules and Regulations. In addition to the above specific rules and regulations, all of Company's General Rules and Regulations shall apply to the supply of service under this rate.

REC'D AUG 06 1998

- 9. Term. Initial term of five (5) years, extending thereafter until terminated by twelve (12) months' advance notice given by either party.
- \*10. Limited Availability Replacement Energy Pilot Program. This Replacement Energy Pilot Program is available to customers served under the provisions of Service Classification 10 (M) on or before July 1, 1998 and which sign a contract for a term of one (1) year. In addition, customer's Assurance Power level during the term of this pilot shall not be less than such level at July 1, 1998.

When the Company has requested curtailment, Company will, based on system operating conditions and upon request of customer, endeavor to obtain from other sources temporary replacement energy equivalent to the amount of the requested Interruptible Power curtailment rounded up to the nearest ten (10) megawatts, at 100 % load factor for the duration of the requested curtailment period. If system operating conditions permit the obtaining of such replacement energy and customer accepts, Company will permit customer to continue or resume use of energy at a rate equal to the greater of a) ten cents per kilowatt-hour (10¢/kwh) or, b) 110 percent of the Company's actual hourly incremental cost of replacement energy during the period of curtailment, in lieu of the applicable energy rates provided in paragraph 3. herein for Interruptible Power during the same period of curtailment. Assurance Power Levels and associated assurance power kilowatt-hours will not be affected (i.e., reduced) by the application of the ten megawatt rounding provision. Upon notification by Company, the customer must discontinue the use of this replacement energy within ten (10) minutes of such notification. If customer does not discontinue use, a revised Assurance Power level will be established as provided in paragraph 3. herein and, in addition, customer shall be fully liable for any monetary penalties imposed on the Company by the interconnected power system. Company will determine when use of Interruptible Power at the rate provided in paragraph 3. herein may be resumed and notify customer of same. The contract shall have an initial term of one year, extending thereafter until terminated by ninety (90) days' written advance notice given by either the Company or customer.

- 11. General Rules and Regulations. Except as provided by the above specific rules and regulations, all of Company's General Rules and Regulations shall apply to service supplied under this rate.

APPLYING TO MISSOURI URBAN AND RURAL SERVICE AREAS RECEIVED

SERVICE CLASSIFICATION NO. 12 (M)  
MUNICIPAL STREET LIGHTING - MERCURY VAPOR - (CONTINUED) MAR 29 1968

Customer Owned Street Lighting Facilities. Where Customer Comm. furnishes, installs and owns all street lighting facilities, service will be supplied as follows:

- a. For metered service, where Customer maintains all facilities, at 1.710¢ per kwhr if supplied and metered at standard primary service voltage, or 2.185¢ per kwhr if supplied and metered at standard secondary service voltage. Customer shall install suitable switching and protective equipment, meter loop, space and mounting facilities for Company metering devices.
- b. For unmetered service, at the following monthly charges per lamp:

3,300 Lumens,	100 Watts, Standard	\$ 1.66
6,800 Lumens,	175 Watts, Standard	1.90
*11,000 Lumens,	250 Watts, Standard	2.14 *
20,000 Lumens,	400 Watts, Standard	2.56
54,000 Lumens,	1000 Watts, Standard	5.22

Company will furnish electric energy, furnish and replace lamps, wash lamps and luminaires, and adjust and replace control mechanisms as required.

Electric service will be supplied at primary voltage, except that upon request by Customer, service will be supplied at secondary voltage provided Customer pays, in advance and without right of refund, all costs incurred by Company in providing said secondary service. Customer shall pay to Company the installed cost of (a) any underground extension or (b) that portion of any overhead extension in excess of two new pole settings or the installation on existing poles of more than four spans of wire, if required to supply service to Customer hereunder at the point of points of delivery, which shall be designated by Company.

MUNICIPAL STREET LIGHTING RATES

MISSOURI  
Public Service Comm.

- \*1. Rate Application. Available to municipalities and other governmental agencies having appropriate contractual authority for installations having an aggregate rating of at least 10,000 lumens for the lighting of public streets and roads, public parks and other outdoor locations open to and reserved for general public use.
- \*2. Character of Service Supplied. Service supplied hereunder shall be by series incandescent, mercury and fluorescent lamps supplied by overhead circuit, subject to the following exceptions:
  - a. Where Company determines that it is not desirable to connect lamps to series lighting circuits, Company may, at its option, install multiple lamps. The multiple lamps used in such cases shall have approximately the same lumen rating as comparable series lamps.
  - b. Where Customer elects to have service supplied hereunder by underground circuit, additional charges shall be made in accordance with the provisions of paragraph 5.
- 3. Determination of Applicable Rate.

Schedule "A" shall apply to (a) service delivered to a new installation during the initial contract term, and (b) service delivered during any contract term to additional installations other than those additional installations for which Customer, in accordance with the provisions of paragraph 6, shall have paid to Company the costs installed.

Schedule "B" shall apply to (a) service delivered during any contract term to installations served under Schedule "A" during the first eight years of the immediately preceding contract term, and (b) service delivered to additional installations made during the term of the existing contract for which Customer, in accordance with the provisions of paragraph 6, shall have paid to Company the costs installed.

ISSUED BY William E. Cornelius Chairman St. Louis, Missouri

NAME OF OFFICER TITLE ADDRESS

APPLYING TO MISSOURI SERVICE AREA

SERVICE CLASSIFICATION NO. 11(M)  
LARGE PRIMARY SERVICE RATE (CONT'D.)

1. Rate Application. The rate shall be applicable, at customer's request, to all service at a primary voltage or higher, provided customer agrees to a minimum monthly billing demand of 5000 kilowatts.
2. Character of Service Supplied. Company will specify and supply a standard three-phase alternating current primary service voltage. Where Company supplies service at 34.5 kV or higher, the appropriate adjustments under Rider B will apply.
3. Cumulation of Services. Service provided through multiple meters to the same customer on the same premises and cumulated for billing purposes under this Service Classification, prior to May 5, 1990, may continue to receive such billing. Unless otherwise required for Company's engineering or other reasons, any additional services installed at customer's request and agreed to by Company on and after May 5, 1990, will not be cumulated or otherwise combined for billing purposes with any other service supplied to customer.
4. Demand Meters. Company will install demand meters for the measurement of demands.
5. Billing Demand. The billing demand in any month will be the highest demand established during peak hours or 50% of the highest demand established during off-peak hours, whichever is highest during the month, but in no event less than 5000 kW.

Peak hours and off-peak hours are defined as follows:

Peak hours: 10:00 A.M. to 10:00 P.M., Monday thru Friday.

Off-Peak hours: All other hours including the entire 24 hours of the following days:

New Year's Day	Independence Day	Thanksgiving Friday
Good Friday	Labor Day	Christmas Eve Day
Memorial Day	Thanksgiving Day	Christmas Day

All times stated above apply to the local effective time.

- \*6. Reactive Charge. The charge specified in this rate shall be applicable to the kilovars by which the customer's average metered kilovars exceed the customer's kilovars at an average power factor of 90% lagging during the billing period. Such average kilovar billing units shall be determined in accordance with the following formula:

$$kVar = \left( \frac{kVarh}{kWh} - 0.4843 \right) (kW)$$

where:

- kVar = kilovar billing units
- kVarh = metered kilovarhours
- kWh = metered kilowatthours
- kW = metered kilowatts
- 0.4843 = kilovar requirement at 90% lagging power factor.

Where in the Company's judgement application of the above forumula would not be appropriate to full or partial self-generation customers, an alternative agreement, between Company and customers, for the payment of reactive supply facilities may be substituted for said formula.

\*Indicates Reissue.

Public Service Commission

1. Rate Application. The rate shall be applicable, at customer's request, to all service at a primary voltage or higher, provided customer agrees to a minimum monthly billing demand of 5000 kilowatts.
2. Character of Service Supplied. Company will specify and supply a standard three-phase alternating current primary service voltage. Direct current is supplied in limited quantities to existing premises in downtown St. Louis, Missouri. Where Company supplies service at 34.5 kV or higher, the appropriate adjustments under Rider B will apply.
3. Cumulation of Services. Service taken through each meter by the same customer on the same premises under this Service Classification will be cumulated for billing purposes. Unless otherwise required for Company's engineering or other reasons, any additional service requested by customer will be provided, subject to the Company's approval, under the provisions of Section III.Q - Special Facilities. Such additional service, if any, supplied through facilities installed on and after May 5, 1990, will not be cumulated or otherwise combined for billing purposes with any other service supplied to customer.
4. Demand Meters. Company will install demand meters for the measurement of demands.
5. Billing Demand. The billing demand in any month will be the highest demand established during peak hours or 50% of the highest demand established during off-peak hours, whichever is highest during the month, but in no event less than 5000 kW.

Peak hours and off-peak hours are defined as follows:

Peak hours: 10:00 A.M. to 10:00 P.M., Monday thru Friday.

Off-peak hours: All other hours including the entire 24 hours of the following days:

New Year's Day	Independence Day	Thanksgiving Friday
Good Friday	Labor Day	Christmas Eve Day
Memorial Day	Thanksgiving Day	Christmas Day

All times stated above apply to the local effective time.

SERVICE CLASSIFICATION NO. 11(M)  
LARGE PRIMARY SERVICE RATE (Cont'd.)

- 7. Optional Time-of-Day (TOD) Service. Applicable at customer's option for all Large Primary Service usage, subject to the following provisions:
  - A. Customer will be transferred to this TOD rate option effective with TOD meter installation and transferred from this TOD rate option to the applicable non-TOD rate after the meter is removed.
  - B. Customer electing this TOD option, shall remain on said option for a minimum period of twelve (12) months, provided however, that customer may discontinue this option within the first ninety (90) days thereunder subject to the continued payment of the TOD customer charge, in lieu of any other customer charge, for the full twelve (12) month term of this option.
  - C. Any customer canceling this TOD option cannot thereafter resume billing under said option for a period of one year following the last billing period on the TOD option.
- \*8. True-Up of Energy Efficiency Investment Charge. The Company shall, pursuant to the procedures outlined in the *Unanimous Stipulation And Agreement Resolving Ameren Missouri's MEEIA Filing approved in Case No. EO-2012-0142*, true-up, as close as reasonably practicable, the application of the Energy Efficiency Investment Charges on customer billings for the following items: a) all actual MEEIA Programs' Costs, b) the Company's Throughput Disincentive-Net Shared Benefits (TD-NSB) Share amounts and c) the Performance Incentive Award. Any difference between the Company's billed and actual MEEIA program costs, and any difference between the billed and 100% of the actual TD-NSB share will be tracked with interest and trued-up for amortization in a future general electric rate case. Should a rider mechanism be in effect for the Energy Efficiency Investment Charge, then the rider will be used to effectuate the true-up.
- \*9. Prudency Review of Energy Efficiency Investment Charge. Commission staff shall perform prudence reviews no less frequently than at twenty-four (24) month intervals in accordance with 4 CSR 240-20.093(10). Any amount the Commission orders refunded as a result of such a prudence review shall be a reduction to the Company's revenue requirement in the first general electric rate proceeding occurring after such Commission order. However, if a rider mechanism is in effect for recovery of Energy Efficiency Investment Charges, then any prudence review refund shall be effectuated through that rider.
- \*\*10. General Rules and Regulations. In addition to the above specific rules and regulations, all of the Company's General Rules and Regulations shall apply to the supply of service under this rate.

\*Indicates Addition.

LARGE PRIMARY SERVICE RATE (Cont'd.)

MISSOURI  
Public Service Commission

- 6. Reactive Charge. The charge specified in this rate is applicable to the kilovars by which the customer's average metered kilovars exceed the customer's kilovars at an average power factor of 90% lagging during the billing period. Such average kilovar billing units shall be determined in accordance with the following formula:

$$kVar = \left( \frac{kVarh}{kwh} - 0.4843 \right) (kW)$$

where:

- kVar = kilovar billing units
- kVarh = metered kilovarhours
- kwh = metered kilowatthours
- kW = metered kilowatts
- 0.4843 = kilovar requirement at 90% lagging power factor.

Where in the Company's judgement application of the above formula would not be appropriate to full or partial self-generation customers, an alternative agreement, between Company and customers, for the payment of reactive supply facilities may be substituted for said formula.

- \*7. Optional Time-of-Day (TOD) Service. Applicable at customer's option for all Large Primary Service usage, subject to the following provisions:

- A. Customer will be transferred to this TOD rate option effective with TOD meter installation and transferred from this TOD rate option to the applicable non-TOD rate after the meter is removed.
- B. Customer electing this TOD option, shall remain on said option for a minimum period of twelve (12) months, provided however, that customer may discontinue this option within the first ninety (90) days thereunder subject to the continued payment of the TOD customer charge, in lieu of any other customer charge, for the full twelve (12) month term of this option.
- C. Any customer canceling this TOD option cannot thereafter resume billing under said option for a period of one year following the last billing period on the TOD option.

- 8. General Rules and Regulations. In addition to the above specific rules and regulations, all of Company's General Rules and Regulations shall apply to the supply of service under this rate.

right of refund, all costs incurred by Company in providing said secondary service. Customer shall pay to Company the installed cost of (a) any underground extension or (b) that portion of any overhead extension in excess of two new pole settings or the installation on existing poles of more than four spans of wire, if required to supply service to Customer hereunder at the point or points of delivery, which shall be designated by Company.

In case of destruction or damage of Customer's property hereunder due to highway accidents, storm damage or other similar causes or where replacement of equipment other than as provided above is required, Company, upon receipt of either written or verbal instructions from Customer, may at its option effect the necessary repairs or replacement of the damaged equipment to place it in normal operating condition. Such repairs will be made with parts supplied by Customer or where applicable, with suitable standard items carried in Company stores. Customer shall reimburse Company for such work at the Company's current Productive Manhour Rate for all labor expended and 1.2 times all direct costs or charges incurred by Company for all materials and any related items. All charges and payments hereunder shall be in addition to the monthly charge for normal maintenance as provided above.

Special or Non-Standard Facilities. Whenever Customer requests Company to install additional, special or non-standard facilities hereunder, and there is no engineering, construction, safety, legal or practical reason which would, in Company's judgment, make such installation inadvisable, Company will make such installation provided Customer pays to Company, in advance and without right of refund, the installed cost of such facilities. In lieu of such lump sum payment, and subject to approval by Company, Customer may elect to pay to Company a monthly charge equal to 1.50% of the installed cost of such facilities.

Payments. Bills are due and payable within ten days from date of bill.

MUNICIPAL STREET LIGHTING RATES - (CONTINUED)

3. Determination of Applicable Rate - (Continued)

Schedule "C" shall apply to service delivered during any contract term to installations served under Schedule "B" or Schedule "C" during the immediately preceding contract term.

Wood Pole rates shall apply to service supplied by lamps mounted on standard distribution-type wood poles, or to service supplied in accordance with the provisions of paragraph 8-b-1.

Ornamental rates shall apply to service supplied by lamps mounted on ornamental columns.

\*Post-Top rates shall apply to service supplied by post-top luminaires mounted on standard aluminum posts or other mountings acceptable to Company, or (for the additional monthly charge indicated by the footnote on Sheet No. 66) on special concrete posts.

4. Contract Renewals. At the option of Customer, a ten-year renewal contract may be signed and may become effective at any time after the expiration of the first eight years of the existing contract term, but until such renewal contract has been signed, the schedule of rates theretofore applicable to the service shall continue.

5. Circuit Charge.

a. In the event overhead circuit installed by Company exceeds an average length of 500 feet per lamp, a monthly circuit charge of 0.245¢ per foot shall be made for each foot of such excess circuit length.

b. For all footage of underground circuit being billed for as of the effective date hereof and for each foot of all new underground circuit installed by Company after the effective date hereof, monthly charge shall be made as follows:

3. Determination of Applicable Rate - (Continued)

Schedule "C" shall apply to service delivered during any contract term to installations served under Schedule "B" or Schedule "C" during the immediately preceding contract term.

\*Wood Pole rates shall apply to service supplied by lamps mounted on standard distribution-type wood poles, or to service supplied in accordance with the provisions of paragraph 8-b-i.

Ornamental rates shall apply to service supplied by lamps mounted on ornamental columns.

4. Contract Renewals. At the option of Customer, a ten-year renewal contract may be signed and may become effective at any time after the expiration of the first eight years of the existing contract term, but until such renewal contract has been signed, the schedule of rates theretofore applicable to the service shall continue.

5. Circuit Charge.

\*a. In the event overhead circuit installed by Company exceeds an average length of 500 feet per lamp, a monthly circuit charge of 0.245¢ per foot shall be made for each foot of such excess circuit length.

\*b. For all footage of underground circuit being billed for as of the effective date hereof and for each foot of all new underground circuit installed by Company after the effective date hereof, a monthly charge shall be made as follows:

**LARGE TRANSMISSION SERVICE RATE (cont'd)**

**Energy Line Loss Rate.** Compensation for Customer's energy line losses from use of the transmission system(s) outside Company's control area shall be in the form of energy solely supplied by Company to the transmission owner(s) and compensated by payment at a monthly rate of \$0.0325 per kWh after appropriate Rider C adjustment of meter readings.

**Annual Contribution Factor.** Customer shall pay an Annual Contribution Factor to Company, calculated as follows:

The Annual Contribution Factor (ACF) shall be calculated as of the date of the completion of each successive 12-month billing period, commencing with the first annual anniversary date of service to Customer under the rate. In the event the ACF is eliminated or discontinued prior to the said anniversary date, no Customer payment is required.

The ACF shall be calculated so as to provide Company an annual net bundled kilowatt-hour realization to Company of not less than \$0.0325/kWh, after appropriate Rider C adjustments to Customer's monthly kilowatt-hour and kilowatt meter readings. All energy and compensation due as a result of the Energy Line Loss and Reactive Charge provisions herein, if any, shall be excluded in the calculation of the ACF.

1. **Transmission Service Requirements.** Company's obligation to provide service under this rate is conditioned upon receipt of approval from the appropriate Regional Transmission Organization ("RTO") to incorporate Customer's load within Company's Network Integration Transmission Service agreement without the obligation or requirement that Company construct, upgrade, or improve any existing or new transmission plant or facilities.

**SERVICE CLASSIFICATION NO. 12 (M)**  
**LARGE TRANSMISSION SERVICE RATE (cont'd)**

Customer shall be responsible for securing firm transmission service throughout the Contract Term outside of Company's control area at no cost or charge to Company (except for Energy Line Losses), if necessary, and Customer agrees to indemnify and hold Company harmless from all such costs or charges imposed or billed. In any event, Customer shall be responsible for all costs and charges imposed or billed to Company from an RTO that are based on the fact that Customer's load is not directly connected to Company's system (e.g. Through and Out rates imposed by the Midwest Independent System Operator, Inc.)

2. **Credit Requirements.** A Customer taking service under this rate shall agree to the following special credit terms and conditions, in addition to those that may be required pursuant to Company's rules, regulations, rates or tariffs: Company, upon request and in its sole discretion, may demand of Customer a security deposit in the form of cash, letter of credit or surety bond, equal to two times (2x) the highest monthly utility bill from the prior 12-month period, upon the occurrence of any of the following:
- a. an assignment to Customer or Customer's parent of a long-term public debt rating by Moody's that falls below the rating of Baa3;
  - b. an assignment to Customer or Customer's parent of a long-term public debt rating by Standard & Poor's that falls below the rating of BBB-;
  - c. a significant change in ownership, as determined by Company, including but not limited to a change in ownership or possession of the assets of Customer;
  - d. the assessment of two (2) late payment charges within any 12 month rolling period; or
  - e. Customer makes an assignment for the benefit of creditors, or otherwise becomes bankrupt or insolvent (however evidenced), in which case Company may pursue other remedies available in law or equity, including a declaration that the agreement is in default.

**SERVICE CLASSIFICATION NO. 12 (M)**  
**LARGE TRANSMISSION SERVICE RATE (cont'd)**

- 7. **Character of Service Supplied.** Company will supply a standard three-phase alternating current transmission service voltage. The appropriate adjustments under Rider C will apply; however, there will be no adjustments under Rider B.
- 8. **Demand Meters.** Company will be responsible for the demand meters which have been installed for the measurement of demands.
- 9. **Billing Demand.** The billing demand in any month will be the highest demand established during peak hours or 50% of the highest demand established during off-peak hours, whichever is highest during the month, but in no event less than 5,000 kilowatts.

Peak hours and off-peak hours are defined as follows:

Peak hours: 10:00 A.M. to 10:00 P.M., Monday through Friday.

Off-peak hours: All other hours including the entire 24 hours of the following days: New Year's Day, Independence Day, Thanksgiving Friday, Good Friday, Labor Day, Christmas Eve Day, Memorial Day, Thanksgiving Day, Christmas Day.

All times stated above apply to the local effective time.

- 10. **Reactive Charge.** The kVar charge specified in this rate shall be applicable to the kilovars by which the Customer's average metered kilovars exceed the Customer's kilovars at an average power factor of 90% lagging during the billing period. Such average kilovar billing units shall be determined in accordance with the following formula:

$$kVar = \left( \frac{kVarh}{kWh} - 0.4843 \right) (kW)$$

**SERVICE CLASSIFICATION NO. 12 (M)**  
**LARGE TRANSMISSION SERVICE RATE (cont'd)**

where:

kVar = kilovar billing units

kVarh = metered kilovarhours

kWh = metered kilowatthours

kW = metered kilowatts

0.4843 = kilovar requirement at 90% lagging power factor.

Where in Company's sole judgment application of the above formula would not be appropriate to a Customer, an agreement between Company and Customer for the costs or charges associated with reactive supply facilities may be substituted for said formula.

11. **Optional Time of Day ("TOD") Service.** Applicable at Customer's option for all Large Transmission Service usage, subject to the following provisions:
- a. Customer will be transferred to this TOD rate option effective with TOD meter installation and transferred from this TOD rate option to the applicable non-TOD rate after the meter is removed.
  - b. A Customer electing this TOD option shall remain on the option for a minimum period of 12 months *provided however*, that Customer may discontinue this option within the first 90 days following election subject to the continued payment of the TOD Customer Charge, in lieu of any other customer charge, for the full 12-month term of this option.
  - c. Any Customer canceling this TOD option may not thereafter resume billing under said option for a period of one year following the last billing period on the TOD option.

APPLYING TO Former Missouri Power & Light Company Service Area

Rider MPL-1

Rider for Charges and Refunds Under

Electric Rate Schedules

JAN 17 1984

Applicable: Customers of the former Missouri Power & Light Company or subsequent Union Electric Company customers who are currently or were formerly served under the provisions of one or more of the following former Missouri Power & Light Electric rate classifications:

- Residence Rates
- General Service Rates
- Irrigation Service
- Commercial Seasonal Demand Rate
- Controlled Water Heating Rate
- Commercial Cooking and Heating Rate
- Large Governmental Use - State of Missouri
- Industrial Power Rate - Primary Voltage - ISF
- Industrial Power Rate - Primary Voltage - IS
- Supplementary Service Schedule
- Rate for Additional Capacity or Extra Facilities
- Highway Intersection Lighting Rate (HIL)

Terms and Conditions of this Schedule: The revenues collected under the rates for service of the rate classifications listed above include additional revenues to offset increased purchased power costs from Kansas City Power & Light Company which became effective on January 6, 1981, under bond and subject to refund, dependent upon the Federal Energy Regulatory Commission's final determination in Docket Nos. ER80-315 and ER80-450.

The Company will adjust the above-mentioned rates when the final Federal Energy Regulatory Commission's decision is made or upon receipt of an order of the Missouri Public Service Commission, and will refund to its customers any amounts received as a refund under the final order of the Federal Energy Regulatory Commission.

APPLYING TO Former Missouri Power & Light Company Service Area

Rider MPL-2

Rider for Refunds under Electric Rate Schedules

JAN 17 1984

Applicable: Customers of the former Missouri Power & Light Company or subsequent Union Electric Company customers who are currently or were formerly served under the provisions of one or more of the following former Missouri Power & Light Electric rate classifications:

- Residence Rates
- General Service Rates
- Irrigation Service
- Commercial Seasonal Demand Rate
- Controlled Water Heating Rate
- Commercial Cooking and Heating Rate
- Large Governmental Use - State of Missouri
- Industrial Power Rate - Primary Voltage - ISF
- Industrial Power Rate - Primary Voltage - IS
- Time-of-Day Industrial Service Rate - TDIS
- Supplementary Service Schedule
- Flood Lighting Rate
- Rate for Additional Capacity or Extra Facilities
- Private Street and Outdoor Area Lighting
- Highway Intersection Lighting Rate (HIL)
- Municipal Service Schedule
- Municipal Street Lighting

Terms and Conditions of this Schedule: In accordance with Commission's Report and Order in Case No. ER-82-180, .143 cents per kilowatt hour (\$0.00143/KWH) is subject to refund pending an audit of the actual weighted annual average versus forecasted fuel costs incurred by Missouri Power & Light Company from Kansas City Power & Light Company and Union Electric Company for the period November 8, 1982 through November 7, 1983. If incurred costs are less than forecasted and recognized by this provision, refunds will be made according to terms of the Report and Order. If incurred costs are greater, no refunds will be made.

MISSOURI  
Public Service Comm.

1. Rate Application. Available to municipalities and other governmental agencies having appropriate contractual authority for the lighting of public streets and roads, public parks and other outdoor locations open to and reserved for general public use.
2. Character of Service Supplied. Service supplied will normally be by multiple mercury vapor lamps supplied by overhead circuit on existing wood poles where there is adequate space. In any other case, additional charges will be made as provided hereunder.
3. Change or Relocation.
  - a. Where Customer requests an increase in lamp size, Company will make whatever changes are necessary to provide the larger lamp without additional charge, provided that if 20% or more of the total number of Customer's lamps are replaced, Customer signs a new ten-year contract. Billing on the rate for the larger lamp will begin as of the next regular billing date after installation of said lamp. Where Customer requests a change to a smaller lamp size, Company will make whatever changes are necessary to provide the smaller lamp, provided Customer pays to Company all costs incurred by Company in connection therewith. Billing on the rate for the smaller lamp will begin as of the next regular billing date after installation of said lamp.
  - b. Upon receipt of written request and authorization from Customer, Company will, in so far as it may be practical and permissible, make any other change in or relocation of its facilities used in rendering service hereunder provided Customer pays to Company at the time such change or relocation is made all costs incurred by Company in connection therewith.

Electric Rate Schedules

Public Service Commission

Applicable: Customers of the former Missouri Power & Light Company or subsequent Union Electric Company customers who are currently or were formerly served under the provisions of one or more of the following former Missouri Power & Light Electric rate classifications:

GARBELLE  
JAN 10 1984  
BY 5th RST  
PUBLIC SERVICE COMMISSION OF MISSOURI

- Residence Rates
- General Service Rates
- Irrigation Service
- Commercial Seasonal Demand Rate
- Controlled Water Heating Rate
- Commercial Cooking and Heating Rate
- Large Governmental Use - State of Missouri
- Industrial Power Rate - Primary Voltage - ISF
- Industrial Power Rate - Primary Voltage - IS
- Time-of-Day Industrial Service Rate - TDIS
- Supplementary Service Schedule
- Flood Lighting Rate
- Rates for Additional Capacity or Extra Facilities
- Private Street and Outdoor Area Lighting
- Highway Intersection Lighting Rate (HIL)
- Municipal Service Schedule
- Municipal Street Lighting

Terms and Conditions of this Schedule: The revenues collected under the rates for service of the rate classifications listed above include additional revenues to offset increased purchased power costs from Union Electric Company to Missouri Power & Light Company which became effective on July 9, 1981, under bond and subject to refund, dependent upon the Federal Energy Regulatory Commission's final determination in Docket ER81-450-000. These interim rates were made effective July 10, 1981, in Case No. ER-82-9.

The Company will adjust the above-mentioned rates when the final Federal Energy Regulatory Commission's decision is made or upon receipt of an order of the Missouri Public Service Commission, and will refund to its customers any amounts received as a refund under the final order of the Federal Energy Regulatory Commission.

Additional Investment Charge

The Company shall be reimbursed for all additional cost regarding investment to serve customer by either of the following two methods:

- a. Cash contribution for all additional investment.
- b. Monthly charge of 1.50 percent of additional investment to service customer.

If no additional investment is required after the initial ten-year period of the contract, the additional investment charge will be waived.

Determination of Billing Demand: Shall be made by measurement with any instrument or method of measurement suitable to obtain the average load in kilovolt amperes required in any period of fifteen consecutive minutes during the interval between regular monthly meter readings.

On-Peak: Hours of the day between 2:00 p.m. and 6:00 p.m. excluding Saturdays, Sundays, and holidays during the months of May through September.

Hours of the day between 8:00 a.m. and 12 noon excluding Saturdays, Sundays, and holidays during the months of October through April.

5. General Provisions - (Cont'd.)

d. If any bill for service delivered hereunder is not paid within ten days from date of bill, it shall become delinquent and shall bear interest at the rate of 6% per annum from the date of the bill. Twenty days after a bill becomes delinquent, Company may suspend delivery of service hereunder. Suspension of service shall in no way affect Customer's obligation to continue to pay the applicable charges. No failure or delay by Company in enforcing any of its rights hereunder shall be deemed a waiver of such rights, nor shall the failure of Company to exercise its rights in case of delinquency bar the Company from exercising its rights in case of subsequent delinquency.

\*e. In Illinois and Iowa, in lieu of a circuit charge, where underground street lighting circuit is installed in a residential subdivision where underground service is generally provided in accordance with Paragraph G-3 on Sheets No. 168.1(I-IA) through 168.3(I-IA), the cost of said underground street lighting circuit, if installed coincidentally with the general underground distribution system, may be included in the estimated total underground extension cost to said subdivision.

Applicable: To any customer in the Company's service area for private street lighting, for outdoor area lighting and for directional lighting when such lighting facilities are operated as an extension of Company's distribution system.

Company shall furnish, install, maintain, and deliver electric service to automatically controlled lighting fixtures conforming to Company's standards. Customer shall select the type and size of lamps and fixtures from the standard equipment offered by Company and shall specify the desired location of such fixture. Normally, the service provided hereunder for overhead service shall be supplied through fixtures supported by Company-approved brackets attached to existing distribution poles of Company and billed at the monthly rate for such lamps and fixtures as provided in this schedule. The service provided hereunder for underground service normally shall be supplied through lamps and fixtures as specified by Company which will become part of an existing total underground electric distribution system and shall be billed at the monthly rate for such lamp(s), fixture(s) and length of service, as provided in this schedule. Additional facilities, when required, installed and utilized for the exclusive purpose of rendering service hereunder, shall be billed at the monthly rate for additional facilities as provided herein.

- (1) Limited to lamps served under contracts effective prior to September 30, 1963. No new contracts for incandescent lamps will be taken from and after September 30, 1963.
- (2) Standard side mounted, mercury vapor hood with open bottom glassware.
- (3) Horizontal burning, enclosed, mercury vapor luminaire.
- (4) Post-top mounted, enclosed, mercury vapor luminaire, including aluminum post.
- (5) Pole-mounted, directional, mercury vapor luminaire; limited to installation on existing wood pole accessible to Company basket truck, and provided that capacitors, sectionalizers, regulators, cable terminations or 34.5 kV switches are not mounted on such pole.

Tax Adjustment. Any license, franchise, gross receipts, occupation or similar charge or tax levied by any taxing authority on the amounts billed hereunder will be so designated and added as a separate item to bills rendered to customers under the jurisdiction of the taxing authority.

Payments. Bills are due and payable within ten days from date of bill.

Term of Contract. One year, terminable thereafter on three days' notice, where only standard facilities are installed, or where any non-standard facilities installed are paid for in advance; ten years, terminable thereafter on three days' notice, where a charge of 1.5% per month is made for any non-standard facilities installed.

NOV 7 1969

MISSOURI

Public Service Commission

- \*1. Rate Application. Available for lighting private streets, alleys, walkways and other private thoroughfares, or for outdoor lighting of public or private areas for security or similar purposes when, except as provided in Section 6 hereof, such lighting facilities are operated as an extension of Company's distribution system.
- 2. Character of Service Supplied. Company shall furnish, install, maintain and deliver electric service to automatically-controlled lighting fixtures conforming to Company's standards. Customer shall select the type and size of lamps and fixtures from the standard equipment offered by Company and shall specify the location of said fixtures. Normally, the service provided hereunder shall be supplied by overhead lines through fixtures supported by standard upsweep brackets attached to wood poles; however, certain non-standard facilities may be installed hereunder in accordance with the terms and conditions stated in the following Paragraph 3.
- 3. Special Facilities. Whenever Customer requests Company to install non-standard facilities hereunder (such as concrete or other ornamental posts, underground conduit and/or cable, longer upsweep brackets, shields, switches, etc.) and there is no engineering, construction, safety, legal or practical reason which would, in Company's judgment, make such non-standard installation inadvisable, Company will make such installation provided Customer pays to Company, in advance and without right of refund, the installed cost of such non-standard facilities. In lieu of such lump sum payment, and subject to approval by Company, Customer may elect to contract for service hereunder for a term of ten years and to pay to Company a monthly charge equal to 1.5% of the installed cost of such non-standard facilities.
- 4. Change or Relocation.
  - a. Where Customer requests an increase in lamp size, Company will make whatever changes are necessary to provide a larger lamp without additional charge, provided Customer signs a new one-year or ten-year contract, as appropriate. Billing on the rate for the larger lamp will begin as of the next regular billing date after installation of said lamp. Where Customer requests a change to a smaller lamp size, Company will make whatever changes are necessary to provide the smaller lamp, provided Customer pays to Company all costs incurred by Company in connection therewith. Billing on the rate for the smaller lamp will begin as of the next regular billing date after installation of said lamp.

RATE OF LIMITED APPLICATION\*

- 3. Company will furnish and install lamp supports, fixtures, and lamps, and maintain all equipment. Company will also supply electric current for the operation of the lamps and control the lighting and extinguishing of the lamps under a burning schedule of approximately 4000 hours per year.
- 4. When a contract has expired and the same or another party desires to enter into a contract for all or a part of the same lamps, provided no change in equipment or location of equipment is required, the contract may be renewed or extended for periods of one or more years. The rates to be charged during such period of extension shall be those given above for a term of years nearest in length to the sum of the original and the renewal periods.
- 5. Customer may contract at any time during any contract term for the replacement of any or all lamps in use by larger lamps, provided the change of lamps does not require the installation of new fixtures. Company will bill customer, from date of such change under the rates applicable to the larger lamps under the same term of contract as previously applied to the smaller lamps.

Whenever the change in lamp sizes also requires a change in fixtures, or when a change in fixtures is desired by customer, and Company agrees to make such change, such change in equipment will be considered equivalent to a new installation, and the rates will be those applicable to a new installation. Customer will be required to sign a new contract. In lieu of a change in the billing schedule, Customer may pay to Company, prior to change in equipment, the estimated cost of making the change desired. Payments so made are not subject to cancellation.

Service Classification No. 72(M)

Private Street and Outdoor Area Lighting (Cont'd)

Company to the customer, or a charge or tax imposed upon the Company by local, state, or Federal taxing authorities, whether levied as a flat rate, a percentage, or any other basis on the gross receipts, net receipts, the price of service, or revenues from sales by the Company:

Special Facilities: Whenever, at the request of customer, Company installs non-standard facilities hereunder (such as longer upsweep brackets, concrete or ornamental posts, underground conduit and cable, shields, switches, etc.), customer shall pay to Company in advance the estimated installed cost of such special facilities. Such payment shall not be subject to refund.

Relocation or Change:

- (a) Upon receipt of written request and authorization from customer, Company will, in so far as it may be practical and permissible, relocate or change any of its facilities used in rendering service hereunder providing customer pays to Company at the time such change is made all costs incurred by Company in connection therewith.
- (b) Where customer requests an increase in lamp size, Company will make whatever changes are necessary to provide the larger lamp without additional charge, provided customer signs a new one-year or three-year contract, as appropriate. Billing on the rate for the larger lamp will begin as of the next regular billing date after installation of said lamp. Where customer requests a change to a smaller lamp size, Company will make whatever changes are necessary to provide the smaller lamp, provided customer pays to Company all costs incurred by Company in connection therewith and customer signs a new one-year or three-year contract, as appropriate. Billing on the rate for the smaller lamp will begin as of the next regular billing date after installation of said lamp.

General Provisions:

- (a) Underground service will be provided only where the existing electric service is underground and suitable open terrain is available for cable burial.
- (b) Customer shall furnish to Company, without cost to Company and on forms suitable to it, all rights, permits and easements necessary to permit the installation and maintenance of Company's facilities on, over, under and across private property where and as needed by Company in providing service hereunder.

4. (Continued)

b. Upon receipt of written request and authorization from Customer, Company will, insofar as it may be practical and permissible, make any other change in or relocation of its facilities used in rendering service hereunder provided Customer pays to Company at the time such change or relocation is made all costs incurred by Company in connection therewith.

5. General Provisions.

a. Customer shall furnish to Company, without cost to Company and on forms suitable to it, or Customer shall reimburse Company for all costs incurred in obtaining all rights, permits and easements necessary to permit the installation and maintenance of Company's facilities on, over, under and across both public and private property where and as needed by Company in providing service hereunder.

b. Company shall adjust the automatic control on each installation to provide lighting service from dusk to dawn each night. Upon receipt of notice from Customer of failure of light to operate as provided, Company shall be allowed a reasonable period of time in which to make repairs during regular working hours.

c. The facilities installed by Company shall remain the property of Company and may be removed by Company if service is discontinued.

CANCELLING SCHEDULE NO. 5

ORIGINAL

SHEET NO. 77

APPLYING TO ALL URBAN AND RURAL SERVICE AREAS IN THE STATE OF MISSOURI

SERVICE CLASSIFICATION NO. 13

PRIVATE STREET LIGHTING FROM OVERHEAD CIRCUITS - (CONTINUED)

RATE OF LIMITED APPLICATION\*

- 6. After the combined length of service under the original contract term and any renewal term totals ten years, and providing the same equipment is used, the following rates will apply.

Rate per Lamp per Annum  
Candle Power Rating of Lamp

60	100	250	400	600	1000	Mercury 1800-2100
\$20.76	\$23.28	\$32.40	\$45.24	\$56.76	\$71.52	\$99.36

- 7. To protect Company against losses, due to non-payment of bills by Customer, Company may require surety from any Customer in the form of a cash deposit. Under initial contracts where installation of equipment must be made to supply service, Company may require a deposit in an amount equal to Company's estimated cost of installing and removing the equipment plus sixty days' revenue but which total shall in no event exceed one years' revenue. Under renewal contracts, the amount of such deposit shall not exceed sixty days' revenue.

Interest at the rate of six per cent per annum, payable annually, or upon the return of the deposit, covering the time of deposit, will be paid by the Company to the customer upon every cash deposit so required.

Company will refund to Customer the amount of deposit with accrued interest thereon, or any balance thereof not applied to delinquent bills, at the expiration of the contract period, or prior thereto if Company so elects.

If bills for service are not paid within thirty days from date of bill, Company shall have the right to disconnect service and remove equipment and in this event any deposits made by Customer shall be deducted and retained by Company.

APPLYING TO Former Missouri Power & Light Company Service Area

Service Classification No. 72(M)  
Private Street and Outdoor Area Lighting (Cont'd)

- (c) Company shall adjust the automatic control on each installation to provide lighting service from dusk to dawn each night. Upon receipt of notice from customer of failure of light to operate as provided, Company shall be allowed a reasonable period of time in which to make repairs during regular working hours.
- (d) The facilities installed by Company shall remain the property of Company and may be removed by Company if service is discontinued.
- (e) Customers served under contracts which are in effect on the effective date hereof and which provide for the furnishing of private street and outdoor area lighting under this schedule, shall be billed at the lower of (i) the monthly rates as provided herein or (ii) the monthly rates stated in such contracts. All other terms and provisions stated in the contracts shall continue in effect until such contract is terminated or until a change is made in the facility maintained or the service rendered thereunder.

Terms: Bills will be distributed at monthly intervals and will be due and payable on or before due date shown on bill.

Term of Contract: One year where lamps and fixtures only are required; three years where additional or special facilities are required.

General Rules and Regulations: In addition to the above specific rules and regulations, all of Company's General Rules and Regulations shall apply to service supplied under this Service Classification.

SERVICE CLASSIFICATION NO. 13

PRIVATE STREET LIGHTING FROM OVERHEAD CIRCUITS - (CONTINUED)

RATE OF LIMITED APPLICATION\*

- 8. For the purpose of this schedule, candle power rating of lamps is equal to one-tenth of the manufacturer's rating of lamps in initial lumens.
- 9. For street lighting installations, where in the opinion of Company it is not desirable to connect lamps to series street lighting circuits, Company may, at its option, install multiple incandescent lamps. The multiple lamps used in such cases shall have approximately the same candle power rating as specified above.

Where street lights are operated from multiple circuits, customers will be required to pay, without refund, for a suitable time switch to turn such lamps on and off.

10. Limited Application \*

The application of this rate shall be limited to service now being supplied under the provisions hereof, but shall not be available for any private street lighting service contracted for after the effective date hereof.

APPLYING TO Former Missouri Power & Light Company Service Area

Service Classification No. 73(M)  
Highway Intersection Lighting Rate (Cont'd)

JAN 17 1984

Excess Investment Charge: The Company shall be reimbursed for all excess cost regarding investment to serve customer by either of the following two methods:

- a. Cash contribution for all excess investment.
- b. Monthly charge of 1.50 percent of additional investment to service customer.

Tax Adjustment: Under this rate schedule, there shall be added to the monthly bills of the customer, as separate items, a charge equal to the proportionate part of any existing, new or increased license, occupation, gross receipts, or other similar charge or tax applicable to service by the Company to the customer or a charge or tax imposed upon the Company by local, state or Federal taxing authorities, whether levied as a flat rate, a percentage, or any other basis on the gross receipts, net receipts, the price of service, or revenues from sales by the Company.

Terms: Bills will be distributed at monthly intervals and will be due and payable on or before due date shown on bill. The Company shall have the right to inspect any facilities served under this rate schedule. The Missouri State Highway and Transportation Department shall notify Company of any changes in burning schedules or placement of facilities.

1. Rate Application. Available to customers for the lighting of private streets or parkways in the City of St. Louis and in the Urban Service Area of St. Louis County by not less than 5 lamps, having an aggregate rating of not less than 1,000 candle power, mounted on ornamental columns.
2. Character of Service Supplied. Service supplied hereunder shall be by series incandescent lamps supplied by overhead circuit, subject to the following exceptions:
  - a. Where Company determines that it is not desirable to connect lamps to series lighting circuits, Company may, at its option, install multiple lamps. The multiple lamps used in such cases shall have approximately the same candle power rating as comparable series lamps. Where street lights are operated from multiple circuits Customer shall be required to pay, without right of refund, for suitable time switches to turn such lamps on or off.
  - b. Where Customer elects to have service supplied hereunder by underground circuit, additional charges shall be made in accordance with the provisions of paragraph 5.

3. Determination of Applicable Rate.

Schedule "A" shall apply to service delivered during an initial ten year contract term.

Schedule "B" shall apply to (a) service delivered during any contract term to installations served under Schedule "A" during the immediately preceding contract term, and (b) service delivered during the initial term of a twenty year contract entered into prior to ~~September~~ <sup>August 5, 1959</sup> 16, 1954.

MUNICIPAL SERVICE SCHEDULE

APR - 5 1985

MISSOURI

Public Service Commission

Availability. This schedule is available for public municipal electric usage to any municipality in the former Missouri Power & Light Company service area which has granted the Company a franchise. The following are examples of electric usage which may be included under this rate: ballfield lighting, sewer pumping, water pumping, fire station total electric requirements and city hall total electric requirements.

The rate is not intended to apply to electric usage at locations owned by the municipality but leased to another party.

\*Net Rate Based on Monthly Meter Readings

All kWh @ .4.772¢

Tax Rider. Bills computed under this rate schedule are subject to increase by the proportionate part of any existing, new or increased rate of taxes directly related to gross revenue incurred by the Company in serving customer. Any such tax will be shown as a separate item on the bill.

Payments. Customers' monthly bills will be computed at the net rates. Customer agrees to pay in full at the office of the Company within ten (10) days of date of bill.

Terms and Conditions. Service will be furnished under the Company's Rules and Regulations.

Service Classification No. 75(M)  
Municipal Street Lighting Service

Available: This schedule is available to all municipalities, incorporated villages, and other governmental agencies in the former Missouri Power & Light Company service area having appropriate authority for the lighting of public streets and roads, public parks and other outdoor public areas open to and reserved for general public use.

APR 10 1985  
MISSOURI  
Public Service Commission

This schedule is also available to associations or groups in unincorporated areas having authority to provide lighting of public areas when the association or group requests the installation of at least five lamps and fixtures with billing for this particular service to be made to a single customer.

Character of Service Supplied: The standard lighting fixture will be multiple mercury vapor or high pressure sodium lamps supplied by overhead circuit on existing wood poles where there is adequate space. The rate includes the cost of fixtures and related bracket, including installation; maintenance, cleaning and replacement of bulbs; and the cost of energy used by the lamp. Additional charges will be made for other type installations as hereinunder provided. Existing incandescent systems will be maintained but no new installations will be made.

\* Rate Per Unit Per Month:

1. <u>INCANDESCENT</u>	Kwh Usage	Monthly Rate
<u>Lamp and Fixture</u>	<u>Per Month</u>

This schedule is also available to associations or groups in unincorporated areas having authority to provide lighting of public areas when the association or group requests the installation of at least five lamps and fixtures with billing for this particular service to be made to a single customer.

Character of Service Supplied: The standard lighting fixture will be multiple mercury vapor or high pressure sodium lamps supplied by overhead circuit on existing wood poles where there is adequate space. The rate includes the cost of fixtures and related bracket, including installation; maintenance, cleaning and replacement of bulbs; and the cost of energy used by the lamp. Additional charges will be made for other type installations as hereinunder provided. Existing incandescent systems will be maintained but no new installations will be made.

PRIVATE ORNAMENTAL STREET LIGHTING RATES - (Cont'd)  
RATE OF LIMITED APPLICATION

\*6. General Provisions - (Cont'd)

\*\*c. Company will control the turning on and turning off of the street lighting service to provide approximately 4,000 burning hours per year.

d. Customer shall furnish to Company, without cost to Company and on forms suitable to it, or Customer shall reimburse Company for all costs incurred in obtaining all rights, permits and easements necessary to permit the installation and maintenance of Company's facilities on, over, under and across both public and private property where and as needed by Company in providing service hereunder.

e. To protect Company against losses due to non-payment of bills by Customer, Company may require surety from Customer in the form of a cash deposit which may equal Company's estimated cost of installing and removing its facilities plus sixty days' revenue in the case of an initial contract, or one year's revenue in the case of a renewal contract.

Interest at the rate of 6% per annua, payable annually or upon return of the deposit, covering the time of the deposit, will be paid by Company to Customer upon every cash deposit so required.

Company will refund to Customer the amount of deposit plus accrued interest, or any balance thereof not applied to delinquent bills, at the expiration of the contract period, or prior thereto, if Company so elects.

If bills for service are not paid within twenty days from date of bill, Company shall have the right to disconnect service and remove its equipment, and in such event any deposit made by Customer shall be forfeited and retained by Company.

\*Indicates reissue.

5. Circuit Charge - (Continued)

c. Footage of circuit installed shall be determined, in the case of overhead circuit, by measuring along the wire from the point of beginning back to the starting point excluding wire or cable used on or within the supporting standard, and, in the case of underground circuit, along the cable trench or conduit.

In case a street lighting installation consists of more than one, or parts of more than one circuit, the footage of such installation shall be the sum of the length of the circuits or parts of circuits determined in accordance with the preceding paragraph. However, footage of overhead circuit and footage of underground circuit shall be determined independently, and shall not be added together to determine a total footage for any purposes hereunder.

*Ind RS #82*

d. In lieu of a circuit charge, Customer shall have the option of paying Company, at the time of installation, the installed cost of that portion of the overhead circuit which is in excess of an average length of 500 feet per lamp, or in the case of underground circuit, the amount by which the estimated cost of underground circuit exceeds the estimated installed cost of overhead circuit. Payments so made shall not be subject to refund.

6. Larger Lamps. At any time during any contract term, Customer may, upon written request, obtain the replacement by larger lamps of any or all lamps then being served under the existing contract, in accordance with the following terms and conditions:

- Municipal Service Schedule
- Traffic, Flasher and Signal Light Service
- Private Street and Outdoor Area Lighting

CANCELLED

MAY 16 1984

1st RS 85.1

BY PUBLIC SERVICE COMMISSION OF MISSOURI

Terms and Conditions of this Schedule: The revenues collected under the rates for service of the rate classifications listed above include additional revenues to offset increased purchased power costs from Union Electric Company to Missouri Edison Company which became effective on July 9, 1981, under bond and subject to refund, dependent upon the Federal Energy Regulatory Commission's final determination in Docket ER81-450-000. These interim rates were made effective July 10, 1981, in Case No. ER-82-10.

The Company will adjust the above-mentioned rates when the final Federal Energy Regulatory Commission's decision is made or upon receipt of an order of the Missouri Public Service Commission, and will refund to its customers any amounts received as a refund under the final order of the Federal Energy Regulatory Commission.

Issued on 10 days' notice under order of Mo. P.S.C., 12/28/83, in Case No. BM-83-

IRRIGATION SERVICE

APR - 5 1985

Available: In all areas formerly served by Missouri Edison Company

Applicable: Service under this schedule is limited to installations which the customer has signed a ten-year contract for service to a single irrigation pumping site. The rates applicable to this service herein approved are subject to subsequent adjustment by action of the Missouri Public Service Commission.

MISSOURI  
Public Service Commission

Net Rate Based on Monthly Readings:

The monthly charge will be the sum of the following:

- (1) 5.578¢ per Kwh for all Kwh used per month.
- (2) Per meter customer charge of \$9.75
- (3) Monthly charge for facility additions (if applicable).
- (4) Demand charge of \$5.95 per Kw of the greater of the maximum on-peak demand established during the month or 80 percent of the highest on-peak demand established during June, July, August and September of the preceding eleven-month period.

Additional Investment Charge:

The Company shall be reimbursed for all additional cost regarding investment to serve customer by either of the following two methods:

- (a) Cash contribution for all additional investment.
- (b) Monthly charge of 1.66 percent of additional investment to service customer.

If no additional investment is required after the initial ten-year period of the contract, the additional investment charge will be waived.

On-Peak: Hours of the day between 2:00 p.m. and 6:00 p.m. excluding Saturdays, Sundays, and holidays.

Off-Peak: Hours of the day between 6:00 p.m. and 2:00 p.m. for all days of the week.

Gross Receipts Rider: Bills computed under this rate schedule are subject to increase by the proportionate part of any existing, new, or increased gross receipts tax or other similar taxes levied by a municipality or other

Each kWh 1.65¢

\*Minimum Monthly Charge. \$3.25 per water heater customer.

Fuel Rider (Rider A). Applicable to all metered kWh.

Payments. Bills are due and payable within ten days from date of bill.

Term of Use. Initial period one year, terminable thereafter on three days' notice.

Limited Application. The application of this rate shall be limited to premises served under this rate prior to October 1, 1957, or where a Customer, in good faith, had made a commitment prior to October 1, 1957 for the installation and operation of a water heater under the provisions of this rate. This rate shall not be available to any water heater served under any other Service Classification on or after October 1, 1957. Customer may transfer at any time to uncontrolled electric water heating service, as provided under applicable Service Classifications.

Tax Adjustment. Any license, franchise, gross receipts, occupation or similar charge or tax levied by any taxing authority on the amounts billed hereunder will be so designated and added as a separate item to bills rendered to customers under the jurisdiction of the taxing authority.
