TARIFF FORMAT

NOV 13 1997

- A. Page Numbering** - Page numbers appear in the upper right corner of the page. Pages are numbered sequentially. However, new pages are occasionally added to the tariff. When a new page is added between pages already in effect, a decimal is added. For example, a new page added between pages 14 and 15 would be 14.1.
- B. Page Revision Numbers** - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current page version on file with the Commission. For example, the 4th revised Page 14 cancels the 3rd revised Page 14. Because of the various suspension periods and deferrals the Commission follows in its tariff approval process, the most current page number on file with the Commission is not always the tariff page in effect. Consult the check sheet for the page currently in effect.
- C. Paragraph Numberings Sequence** - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:
- 2
 - 2.1
 - 2.1.1
 - 2.1.1.A
 - 2.1.1.A.1
 - 2.1.1.A.1. (a)

FOOTNOTES

MISSOURI

- (1) The Maximum Service and Equipment Charge per line is \$7.75 and \$14.50 for residential and business respectively, except when the Simultaneous Call Forwarding service is established.
- (2) This rate is inclusive of the Cancel Call Waiting option where available.
- (3) Speed Calling 8 (business) and Speed Calling 30 (residence) are available only to existing customers at existing locations.
- (4) If Personalized Ring is ordered at the same time as another EasyOptionssm service(s), the higher Service and Equipment Charge is applied.
- (5) Only one Service and Equipment Charge applies when more than one dependent DN is ordered or changed simultaneously.
- (6) Applies in addition to the Service and Equipment Charge for other EasyOptionssm services.
- (7) Not used
- (8) In addition, a Service Establishment Charge of \$2.00 applies.
- (9) Caller ID (Calling Number and Name delivery). This feature enables the customer to view on a display unit the Calling Party Directory Name and/or Number (CPN) on incoming telephone calls.

When Caller ID is activated on a customer's line, the CPN of incoming calls are displayed on the called CPE during the first long silent interval of the ringing cycle.

Per line blocking for the blocking of CPN will be available upon request, at no charge, to the following entities for lines over which the official business of the agency is conducted, including those at the residences of employees/volunteers, where an executive officer of the agency registers a need for blocking and provides the required certification to carrier

- a) private, nonprofit, tax exempt, domestic violence intervention agencies and
- b) federal, state, and local law enforcement agencies.

The CPN will not be transmitted from a line equipped with this capability. Per line blocking is operational on a continuous basis but can be deactivated by the customer by dialing an access code immediately prior to placing a call.

Line blocking customers can unblock their CPN information on a per call basis, at no charge by dialing an access code (*82 on their Touch Tone pad or 1182 from a rotary phone) immediately prior to placing a call.

A customer may prevent the delivery of their calling name and or number to the called party by dialing an access code (#67 on their Touch Tone pad or 1167 from a rotary phone) immediately prior to placing a call. The access code will activate per call blocking, which is available at no charge. If the calling party activates blocking, the CPN will not be transmitted across the line to the called party. Instead, Calling Line Identification customers will receive an anonymous indicator. This anonymous indicator notifies the caller ID customer that the calling party has elected to block the delivery of their name and telephone number. The blocking of CPN will not be provided on calls originating from Customer-Owned Pay Telephone Service. If the Caller ID customer also subscribes to Anonymous call Rejection, the calling party will be routed to a telephone company recording advising the caller that the called party will not accept calls whose CPN has been blocked.
