Rates:

Monthly Fee: 7.50

Per Minute Usage Rates: .10 for all time of day rate periods for US outbound and inbound calls.

Calling Card Rate: \$0.14 Per Minute

A surcharge of .75 per call will apply to all calls billed to a calling card.

Features: Directory Assistance as described in Section R and Operator Services as described in Teleconnect's, Missouri Tariff No. 2 will be available to those customers who pre-subscribe to SMARTminutes Buy Down Plan.

Options: Unverified accounting codes of two, three, or four digits are available to customers who access outbound service by: (1) designating the Company as its PIC; or, (2) using a calling card access telephone number and personal identification number (PIN). Unverified accounting codes allow the customer to input customer-defined combinations of digits which are not verified by the Company.

All SMARTminutes Buy Down calls are subject to a 30 second initial increment with additional 6 second increments.

SMARTminutes Buy Down is an outbound Commercial Service that allows customers to originate calls via local exchange carrier access facilities. A customer may access outbound service by: (1) designating the Company as its Primary Interexchange Carrier (PIC); (2) dialing a company carrier identification code (CIC).

Rates:

Monthly Fee: 7.50

Per Minute Usage Rates: .10 for all time of day rate periods for US outbound and inbound calls.

Calling Card Rate: \$0.14 Per Minute

A surcharge of .75 per call will apply to all calls billed to a calling card.

Features: Directory Assistance as described in Section R and Operator Services as described in Teleconnect's, Missouri Tariff No. 2 will be available to those customers who pre-subscribe to SMARTminutes Buy Down Plan.

Options: Unverified accounting codes of two, three, or four digits are available to customers who access outbound service by: (1) designating the Company as its PIC; or, (2) using a calling card access telephone number and personal identification number (PIN). Unverified accounting codes allow the customer to input customer-defined combinations of digits which are not verified by the Company.

All SMARTminutes Buy Down calls are subject to a 30 second initial increment with additional 6 second increments.

1. ACCOUNT CODES

a. Description.

01. General. An Account Code Package is a service providing the customer with control, within prescribed limits, over the format of the bill. Account Codes can vary in length between two and four digits are used by the customer to identify charge-back accounts and/or individuals.

02. Variable Length Account Codes. The customer can choose between three Account Code package sizes. If this service is ordered the the customer must enter a valid Account Code at the end of the normal dialing sequence to complete a call.

When codes are ordered without the screened function, any digit meeting the package's parameters can be entered and will be registered as valid. Teleconnect is not responsible for invalid assignment of usage to a valid code.

03. SECURE-CALL Codes.

(a) General. In addition to subscribing to a variable-length Account Code package, the customer may request that the codes be "screened." The process of screening account codes is referred to as SECURE-CALL Service. SECURE-CALL Service

packages have certain specific codes which the parameters of the package invalidated. If one of these invalidated Account Codes is used in an attempt to place a call, the call will not be completed. Again, Teleconnect is not responsible for invalid assignment of usage to a valid code. However, the possibility of improper assignment has been greatly diminished by the use of screened codes.

Charges for screened accounts codes are in addition to charges for the initial account code package.

(b) Packaging. Predetermined packages of randomly selected 2, 3 and 4 digit account codes are available. Valid Codes can range from 25 to 1,000 codes for screened accounts.

04. Customized Screened Account Codes. Instead of using a predetermined package, customers are allowed to have specific account codes validated or invalidated according to their unique needs or wants. In this case the special packages of account codes are called Customized Screened Account Codes.

The customer must first subscribe to Account Codes and pay the premiums for SECURE-CALL Codes in order to receive Customized Screened Account Codes.

b. Availability. Account Codes are available to all customers except

8. ADDITIONAL AND CONTRACTUAL VOLUME DISCOUNTS

AUG 11 1989

(N)

- a. Description. At the customer's request, the customer may contract to receive additional volume discounts for the customer's Teleconnect long distance services. The customer may contract on a month-to-month basis or on a long term basis for these discounts. The discount levels will be determined by using the aggregate net dollar volume (after applying existing discounts) of all Teleconnect services, both intra-state and interstate, used by the customer, but the discount will be applied only to those Teleconnect services which are tariffed to receive High Volume Discounts. These discounts will be applied after and in addition to the tariffed High Volume Discounts for each service. For the Contractual Volume Discount, the discount will vary with the length and year of the contract, as stated in P.8.d.
- b. Availability. Additional and contractual volume discounts are available to all Teleconnect customers who subscribe to a long distance plan which is subject to high volume discounts.
- c. Rates and Charges. Additional and contractual volume discounts are subject to the following monthly and nonrecurring charges:

<u>Monthly</u>	<u>Nonrecurring</u>
\$0.00	\$50.00

9. DIALED NUMBER IDENTIFICATION SERVICE (DNIS)

(N)

- a. Description. DNIS permits a customer with multiple 800 numbers in the same routing arrangement to identify the specific 800 number which was dialed by the calling party.

MISSOURI
Public Service Commission

Identification is accomplished by outpulsing a set of digits unique to the dialed 800 number. Between one (1) and five (5) digits are outpulsed to the customer premises. The outpulsed number can be (but is not required to be) the last four (4) digits of the 800 number.

- b. Availability. DNIS is available to Teleconnect customers who subscribe to a DAL or a T-1 service and when the following conditions are met:

.01 The customer is responsible for providing equipment capable of receiving the outpulsed digits so the 800 number can be identified.

.02 All access lines within the same routing arrangement must be equipped for DNIS.

- c. Rates and Charges. Dialed Number Identification Service is subject to the following monthly and nonrecurring charges:

<u>Monthly</u>	<u>Nonrecurring</u>	<u>Change Charge</u>
\$0.00	\$500.00	\$50.00/request

(T)

1. Description
 - a. Nature of Service- Operator Services is a Telecommunications (end users) to originate calls by placing calls to a Teleconnect operator who completes the call, or by using a valid credit card number.
 - b. Dialing Procedure. Operator Services may be accessed by any customer/end user utilizing FGD, WAL, or DAL, access who dials one of the following sequences:
 - .01 0 + (NPA) + NXX-XXXX
 - .02 00 + (NPA) + NXX-XXXX
 - .03 00 + (NPA) + NXX-XXXX + credit card number
 - .04 00 + (NPA) + NXX-XXXX + credit card number
 - .05 00
2. Availability
Operator Services is available in all areas Teleconnect currently does business.
3. Classification of Calls
In this section the following classifications of calls are addressed:
 - (a) calls made from Teleconnect pre-subscribed payphones or institutional phones and which are completed with the assistance of Teleconnect operator,
 - (b) Calls made from payphones or institutional phones which are not pre-subscribed to Teleconnect carrier identification code and which are completed with the assistance of a Teleconnect operator;
 - (c) Calls made from private residential or business phones presubscribed to Teleconnect and which are completed with the assistance of a Teleconnect operator;

¹ Effective November 12, 2011, Commercial credit card billing for operator assisted calls will no longer be available where payment is made via an automated or live operator.

1. Directory Assistance

.01 Description

Directory Assistance (DA) service is defined as furnishing aid in obtaining telephone numbers. The Directory Assistance charges specified in this tariff apply when a customer within the state of Missouri requests the telephone number of other customers within the state of Missouri. One request may be made on each Directory Assistance call. The Directory Assistance call applies to each call whether or not the Directory Assistance operator is able to furnish the requested telephone number.

Directory Assistance Call Completion, customers may request the Directory Assistance operator to complete a call to the last number requested on that particular Directory Assistance call. The customer will be charged a usage rate in accordance with the company Local Exchange Service to which the customer is presubscribed for completed calls.
