TARIFF FORMAT

- A. Page Numbering** - Page numbers appear in the upper right corner of the page. Pages are numbered sequentially. However, new pages are occasionally added to the tariff. When a new page is added between pages already in effect, a decimal is added. For example, a new page added between pages 14 and 15 would be 14.1.
- B. Page Revision Numbers** - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current page version on file with the Commission. For example, the 4th revised Page 14 cancels the 3rd revised Page 14. Because of the various suspension periods and deferrals the Commission follows in its tariff approval process, the most current page number on file with the Commission is not always the tariff page in effect. Consult the check page for the page currently in effect.
- C. Paragraph Numbering Sequence** - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:
- 2
 - 2.1
 - 2.1.1
 - 2.1.1.A
 - 2.1.1.A.1
 - 2.1.1.A.1.(a)
 - 2.1.1.A.1.(a).I
 - 2.1.1.A.1.(a).I.(i)
 - 2.1.1.A.1.(a).I.(i).(1)
- D. Check Sheets** - When a tariff filing is made with the Commission an updated check sheet accompanies the filing. The check sheet lists the pages contained in the tariff, with a cross reference to the current revision number. When new pages are added, the check sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There shall be no other symbols used on this page if these are the only changes made to it. The tariff user should refer to the latest check sheet to find out if a particular page is the most current on file with the Commission.

Issued: July 6, 2000

Effective: August 6, 2000

2.14 Interruption of Service

2.14.1 It shall be the obligation of Customer to notify Carrier of any interruption of Service. Before giving such notice, Customer shall ascertain that the trouble is not being caused by any action or omission of Customer or is not in wiring or equipment connected to the terminal of Carrier. Carrier liability for service interruption is limited according to the provisions of Section 2.3 hereof.

2.14.2 When Service is interrupted for two (2) hours or more, credit is allowed on demand to Carrier, computed as set forth below, provided such interruption is not shown by Carrier to have been caused by the negligence or willful action of Customer, or any other person at the Customer's terminal location, or is not caused by the failure of Customer's equipment or power supply.

2.14.3 Credit is computed by multiplying the monthly rate for Service by the ratio that the number of hours in the period of interruption bears to 720 hours. For the purpose of this computation, each month shall be considered to have seven hundred twenty (720) hours. The credit shall be based upon the non-usage charges for the month during which the interruption occurred, excluding equipment and access line charges.

2.14.4 An interruption is measured from the time Carrier detects trouble or the Customer notifies Carrier of the interruption by an expeditious means, until the trouble is cleared. Each interruption is considered separately for the purposes of establishing credit allowance. No credit shall be given for an interruption of Service of less than two (2) hours. The credit for a billing period shall not exceed the monthly rate.

2.14.5 For purposes of credit computation, every month shall be considered to have 30 days and every day 24 hours. For all Company services no credit shall be allowed for an interruption of continuous duration of less than twenty-four hours. For services billed on a usage basis, credits will be limited to, at maximum, the price of the call that was in progress at the time of the service interruption.

SECTION 3 - DESCRIPTION OF SERVICE AND RATES, (Cont'd.)

3.2 Calculation of Distance

Usage charges for all mileage sensitive services are based on the airline distance between the rate center locations associated with the originating and terminating points of the call.

The distance between the originating and terminating points is calculated by using the "V" and "H" coordinates of the applicable rate centers as defined by Telecordia Technologies (formerly known as BellCore) and on file with the FCC in NECA Tariff FCC No. 4, in the following manner:

Step 1 - Obtain the "V" and "H" coordinates for the rate center of the originating and the destination points.

Step 2 - Obtain the difference between the "V" coordinates of each of the rate centers. Obtain the difference between the "H" coordinates.

Step 3 - Square the differences obtained in Step 2.

Step 4 - Add the squares of the "V" difference and "H" difference obtained in Step 3.

Step 5 - Divide the sum of the square obtained in Step 4 by ten (10). Round to the next higher whole number if any fraction results from the division.

Step 6 - Obtain the square root of the whole number obtained in Step 5. Round to the next higher whole number if any fraction is obtained. This is the distance between the originating and terminating rate centers of the call.

Formula:
$$\sqrt{\frac{(v_1 - v_2)^2 + (h_1 - h_2)^2}{10}}$$

Issued: July 6, 2000

Effective: August 6, 2000

SECTION 3 - DESCRIPTION OF SERVICE AND RATES, (Cont'd.)

3.3 Timing of Calls

Billing for calls placed over the network is based in part on the duration of the call.

- 3.3.1** Timing for all calls begins when the called party answers the call (i.e. when two way communications are established). Answer detection is based on standard industry answer detection methods, including hardware and software answer detection.
- 3.3.2** Chargeable time for all calls ends when either party disconnects from the call, except in cases where the switching facility is unable to detect called party disconnect. In such cases, the calling party controls the termination of the call.
- 3.3.3** Minimum call duration for billing purposes is one minute unless otherwise specified in the individual rate schedules of this tariff.
- 3.3.4** Calls are measured and billed in one minute increments on a per call basis, unless otherwise indicated in this tariff. Fractional billing increments are rounded to the full billing increment as stated in the product description.
- 3.3.5** No charges apply to incomplete calls. An incomplete call is a station call in which the called station does not answer, or a person to person call in which the station does not answer or the requested person is unavailable, or a collect call for which the called party refuses to accept the charges.
- 3.3.6** Usage charges are computed on a per call basis. When computation of call charges result in fractional cents, the resulting charge is rounded to the nearest penny.

The early termination charge will not apply when the customer replaces the term commitment with a longer term.

The Customer may decrease the Monthly Usage Guarantee level, one level at a time, once in a billing cycle. The Customer will also have a 60 day grace period during which he or she will be allowed to terminate a minimum usage commitment, whether reverting to the month-to-month option or discontinuing the Company's service, without incurring a penalty. Once the Customer has reached the lowest Minimum Usage Guarantee level of Plan D, they may move to Plan C without incurring a penalty. The Customer must move to the same term commitment they subscribed to on Plan D.

At the expiration of the term commitment, the Customer will continue at the same commitment and usage rate unless they choose to make a change, either to a different term commitment/minimum usage guarantee or to a different plan. If the Customer continues without changing, they will still be liable for the minimum usage guarantee they were subscribed to under Plan C.

When the Customer terminates service under this plan prior to the expiration of the Customer's selected term commitment, a termination charge will be assessed. The termination charge is calculated by multiplying 35 percent (35%) of the Customer's Minimum Spend Level times the number of months remaining in the term. (T)
(T)

The early termination charge will apply under the following circumstances:

1. When the Customer disconnects its entire account; or
2. When the Customer selects a shorter term.

The early termination charge will not apply under the following circumstances:

1. When the Customer's physical location changes, but the term plan is continued at the new location;
2. When the Customer negotiates the term plan for a longer term;
3. When the Customer moves to a jurisdiction where the Company is prohibited from offering service;
4. When the Customer changes plan prior to 60 days of service;

6. When the Customer moves from a one or three year term on FirmRate Plus Plan to either a one or three year term on FirmRate Advantage Plan, FlexDistance Plan or Simple Options Plan.

At the expiration of the term commitment, the Customer will continue at the same commitment and usage rate unless they choose to make a change, either to a different term commitment/minimum usage guarantee or to a different plan. If the Customer continues without changing, they will still be liable for the minimum usage guarantee to which they were originally subscribed.
