C. Message Charges

The message charges applicable to remotely forwarded calls shall be comprised of two separate charges: (1) a charge for that portion of the call from the originating station to the call-forwarding location, and (2) a charge for that portion of the call from the call-forwarding location to the terminating station. The respective charge for each portion shall be as follows:

1. Between the originating station and call-forwarding location. The charge for this portion of a remotely forwarded call shall be the charge specified in this tariff, or any other applicable tariff, for the type of call involved.
2. Between the call-forwarding location and the terminating station. The **TeleBranch** customer is responsible for the applicable local message unit charge specified in the Local Exchange Tariff and customer-dialed station-to-station charges or interstate and intrastate charges specified in the Long Distance Message Telecommunications Service or Wide Area Telecommunications Service Tariffs. The aforementioned charges apply to all calls answered at the terminating station, including person-to-person and collect calls, even though such calls might not be accepted at the answering location.

MISCELLANEOUS SERVICE OFFERINGS

13.17 TOLL DIVERSION - BATTERY REVERSAL

13.17.1 Regulations

- A. Toll Diversion using Central Office Battery Reversal provides the means to deny access to the Long Distance Telecommunications Network as well as operator services. This service may be provided on an individual- line or PBX-trunk basis. It is available only where facilities permit and when the lines or trunks are served out of the same central office as the customer premises equipment.
- B. Equipment located at the customer premises is required in conjunction with Central Office Battery Reversal. This equipment, when activated by the Central Office Battery Reversal, diverts or disposes of the toll-call attempt, usually by diverting the call to the attendant. The customer premises equipment may be either Telephone Company- or customer-provided.
- C. This service is subject to equipment regulations as defined in this and other sections of the General Exchange Tariff. It prevents a station from dialing the Long Distance Network for all purposes, including emergencies and Directory Assistance. These attempts will be diverted to either the attendant or to a recorded announcement, depending upon the customer's system. The customer indemnifies and saves harmless the Telephone Company from any and all claims, losses or damages caused by this denial.

13.17.2 Rates and Charges

- A. These rates and charges are in addition to the established monthly and nonrecurring charges applicable to services or equipment associated with Toll Diversion - Battery Reversal Service.

MISCELLANEOUS SERVICE OFFERINGS

(CP) 13.19 8A KEY TELEPHONE SYSTEM(1)

13.19.1 Description

- A. The 8A Key Telephone System, hereinafter termed 8A System, is designed for use with Universal Emergency Number Service, hereinafter termed "911" and allows for the provision of the following features: Call Transfer, Called Party Hold, Forced Disconnect, Switchhook Status and Emergency Ringback of the 911 calling party.
- B. The 8A System equipment is arranged so that one wall-mounted cabinet will serve up to five 911 lines, four two-way lines and two attendant positions. The maximum system is composed of four wall-mounted units, accommodating twenty 911 lines, eight two-way lines and eight attendant positions.
- C. The system permits termination of incoming 911 calls and call transfer to an emergency agency via two-way private lines or central office access lines.
- D. Attendant positions utilize 18- or 30-button key sets. The Transfer, Transfer Release and Hold features are located in the pick-up key field of the attendant positions, which reduces the maximum number of line terminations per set to 15 and 27, respectively.

13.19.2 Definitions

A. Call Transfer

Attendant can transfer the 911 incoming calling party to another agency via a two-way line circuit.

B. Called Party Hold

A 911 connection is retained regardless of the switchhook status of the 911 calling party. The 8A attendant remains off-hook or places the calling party on hold. This feature is a function of the 911 central office trunk circuit and is applicable only to 911 calls trunked directly from the originating central office.

(AT) (1) Obsolete - Applicable to existing customers.

MISCELLANEOUS SERVICE OFFERINGS

(CP) 13.19 8A KEY TELEPHONE SYSTEM-(Continued)(1)

13.19.2 Definitions-(Continued)

C. Forced Disconnect

An 8A attendant can release the 911 connection even though the 911 calling party remains off-hook. This feature is a function of the 911 central office trunk circuit.

D. Switchhook Status

Audible and visual indications alert an 8A attendant that the held on-hook 911 calling party has gone off-hook. This feature is limited to 911 calls trunked directly from the originating central office via metallic facilities.

E. Emergency Ringback

An 8A attendant can ring the 911 calling party who goes on-hook after the call is answered by the attendant. This feature is limited to 911 calls trunked directly.

13.19.3 Rules and Regulations

- A. The 8A System will be offered only for 911 applications that are under the control of one or more political subdivisions, acting as a single customer or their agent. The Telephone Company must be provided with satisfactory certification of appointment of the agent as the Customer before installation of any system.
- B. The Switchhook Status, Called Party Hold and Emergency Ringback features of the 8A System are only applicable to 911 lines directly trunked to the 8A System location from an originating central office. Mileage charges apply to lines directly trunked at the customer's request.
- C. A maximum of eight two-way lines can be provided with each 8A System with no more than four of these being central office access lines.

(AT) (1) Obsolete - Applicable to existing customers.

MISCELLANEOUS SERVICE OFFERINGS

13.19 8A KEY TELEPHONE SYSTEM-(Continued)

13.19.2 Definitions-(Continued)

C. Forced Disconnect

An 8A attendant can release the 911 connection even though the 911 calling party remains off-hook. This feature is a function of the 911 central office trunk circuit.

D. Switchhook Status

Audible and visual indications alert an 8A attendant that the held on-hook 911 calling party has gone off-hook. This feature is limited to 911 calls trunked directly from the originating central office via metallic facilities.

E. Emergency Ringback

An 8A attendant can ring the 911 calling party who goes on-hook after the call is answered by the attendant. This feature is limited to 911 calls trunked directly.

13.19.3 Rules and Regulations

- A. The 8A System will be offered only for 911 applications that are under the control of one or more political subdivisions, acting as a single customer or their agent. The Telephone Company must be provided with satisfactory certification of appointment of the agent as the Customer before installation of any system.
- B. The Switchhook Status, Called Party Hold and Emergency Ringback features of the 8A System are only applicable to 911 lines directly trunked to the 8A System location from an originating central office. Mileage charges apply to lines directly trunked at the customer's request.
- C. A maximum of eight two-way lines can be provided with each 8A System with no more than four of these being central office access lines.

MISCELLANEOUS SERVICE OFFERINGS

(CP) 13.19 8A KEY TELEPHONE SYSTEM-(Continued)(1)

13.19.3 Rules and Regulations-(Continued)

- D. All 911 lines terminating in the 8A System are incoming only.
- E. The necessary power wiring, power outlets and commercial power for the operation of the system are furnished by the customer, who assumes all responsibility for the safe condition of such wiring, outlets and power.
- F. Message Registers, Recorder Connectors and other items of equipment or service will be provided at existing rates as covered elsewhere in this Tariff.

13.19.4 Rates

- A. The rates for the service features and equipment items for the 8A System, set forth below, are in addition to the established monthly and nonrecurring charges applicable to the services terminated in the system.
- B. The 8A Key Telephone System is available under Plan I and Plan II under the following rules and regulations:
 - 1. As a condition to providing service under Plan I, a written Service Application will be required from the customer for the equipment provided.
 - 2. Monthly rates for Plan I are the sum of Fixed Rates and Variable Rates and apply from the date equipment is placed in service subject to the following conditions:
 - a. Fixed Rates apply in the form of monthly charges for Fixed Rate Terms of either 1, 36, 60, 84 or 120 months at the option of the customer.

13.19.4 Rates-(Continued)

B. The 8A Key Telephone System is available under Plan I and Plan II under the following rules and regulations:-(Continued)

5. Additional equipment provided under Plan I and Plan II may be added subsequent to the initial installation of the service upon payment of applicable Installation/Move Charges and subject to conditions and rates then in effect in the Telephone Company's Tariffs. The customer may select any Plan I or Plan II payment option for the equipment added. If a Plan I payment option is selected, the customer will be given a choice of a separate or coterminous Fixed Rate Term. A coterminous Fixed Rate Term will expire within the same billing period as that of the Fixed Rate Term of the initial Service Application. For the equipment added under a coterminous agreement, Fixed Rates will be adjusted on a present-worth basis.
6. All equipment provided on a single customer order and offered under this Section of this Tariff under Plan I must be provided under the terms of the same Plan I Fixed Rate Term.
7. Subject to prior written consent of the Telephone Company, service provided under Plan I may be transferred to others upon payment of a Transfer Charge of \$50.00, provided that the assignment does not require the Telephone Company to remove any of the equipment provided under Plan I from the premises where located. In addition, the assignee shall establish financial responsibility to the Telephone Company's satisfaction.
8. Plan I customers may elect to prepay all of the unexpired portion of the Fixed Rates during the Fixed Rate Term. The amount billed to the customer will be the present-worth amount of the sum of the remaining monthly payments.

MISCELLANEOUS SERVICE OFFERINGS

(CP) 13.19 8A KEY TELEPHONE SYSTEM-(Continued)(1)

13.19.4 Rates-(Continued)

B. The 8A Key Telephone System is available under Plan I and Plan II under the following rules and regulations:- (Continued)

- 9. Plan II customers may elect to change to any Plan I payment period. In this event, initial Plan I Installation/Move Charges will not apply, and the Fixed Rate Term will commence as of the date the customer elects to make the change.
- 10. Equipment shall at all times remain the property of the Telephone Company, and the customer shall obtain no right, title or interest therein.
- 11. Where present-worth amount or basis is referred to in regulations stated for this offering, the percentage to be used will be 9 percent per annum.
- 12. Where reference is made in Paragraph 13.19.4, D. and E. to this regulation, the Fixed Monthly Rates and Installation/Move Charges will remain in effect only for service ordered on or before November 20, 1980, and installed on or before January 30, 1981.

C. Nonrecurring Charges

- 1. Installation/Move Charges are in addition to applicable Service Connection Charges as provided for in Section 19 of this Tariff. For Plan I service, the initial and subsequent Installation/Move Charges may, at the customer's option, be paid at the time incurred or as an additional monthly charge over the Fixed Rate period. If the customer elects to pay the charges as an additive to the Fixed Monthly Rate, the following annuity factors will be applied in determining the amount to be billed:

<u>Fixed Rate Perio</u>	<u>Annuity Factor</u>
36 Months	.0329
60 Months	.0214
84 Months	.0166
120 Months	.0130

MISCELLANEOUS SERVICE OFFERINGS

(NR) 13.20 FIRE RETARDANT INSIDE WIRING CABLE

13.20.1 General

For ordinary installations, the Telephone Company will use a standard type of inside wiring or cable of a size required to meet minimum equipment requirements. At the specific request of the customer or applicant for Fire Retardant Wiring Cable or where the customer or applicant requests that the wiring cable be placed in air ducts, plenums, or other air-handling spaces and not enclosed in conduit, the Telephone Company will install Fire Retardant Inside Wiring Cable at rates and charges as described in the following paragraphs.

RECEIVED
JUN -6 1984
MISSOURI
Public Service Commission

13.20.2 Regulations

A. This type of inside wiring has insulation, core wrap and jacket made of flame retardant materials and may be used in air return plenums without conduit where authorized by local codes.

B. THE TELEPHONE COMPANY MAKES NO EXPRESS OR IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE IN REGARD TO ITS FIRE RETARDANT INSIDE WIRING CABLE, AND ALL SUCH WARRANTIES ARE HEREBY DISCLAIMED. SPECIFICALLY, THE TELEPHONE COMPANY DOES NOT WARRANT THAT THIS CABLE WILL PREVENT FIRE OR THAT IT WILL MEET ANY PARTICULAR ELECTRIC, BUILDING OR FIRE SAFETY CODE NOW, OR HEREAFTER, IN EFFECT.

JAN 1 1987

THE TELEPHONE COMPANY SHALL NOT BE LIABLE FOR ANY CONSEQUENTIAL DAMAGES INCLUDING, BUT NOT LIMITED TO, ANY USER DAMAGE OR EXPENSE DIRECTLY OR INDIRECTLY ARISING FROM THE CUSTOMER OR APPLICANT'S USE OR NONUSE OF FIRE RETARDANT INSIDE WIRING CABLE. HOWEVER, THIS PARAGRAPH SHALL NOT APPLY TO CONSEQUENTIAL DAMAGES FOR INJURY TO THE PERSON IN THE CASE OF FIRE RETARDANT INSIDE WIRING CABLE USED PRIMARILY FOR PERSONAL, FAMILY OR HOUSEHOLD PURPOSE.

C. The charges for the following Fire Retardant Inside Wiring Cable are in addition to all other rates and charges for inside wiring found elsewhere in this Tariff.

(NR) 13.21 INFORMATION SERVICES CALL RESTRICTION (ISCR)

MISSOURI

Public Service Commission

13.21.1 Regulations

- A. Information Services Call Restriction (ISCR) is a central office service which allows customers to restrict certain types of outgoing calls from being placed over their exchange access lines. ISCR is activated when a dialed number is preceded by a 700 or 900 prefix. Restricted calls are directed to a central office announcement.
- B. ISCR is provided in conjunction with residence and business single party flat rate, message and measured local exchange services, including Centrex and Plexar. ISCR is also available with Lifeline measured and flat rated services. ISCR is furnished only from central offices equipped to provide this service and where facilities permit.
- C. The minimum contract period for this service is one month.

13.21.2 Rates and Charges

- A. The following rates and charges apply in addition to the established rates and charges for the services with which this service is associated.

ISCR, Single Payment Option (CREXB)
 Residence.

13.23 CONSOLIDATED BILLING

13.23.1 Description of Service

(CT)

- A. Consolidated Billing allows the Telephone Company to mechanically combine most business customer accounts, within a single Revenue Accounting Office (RAO), into one customer bill for ease of customer payment.
- B. Consolidated Billing Service customers will order a Consolidated Billing Account (CBA) that contains a limited number of subordinate accounts (SUBs).
 - 1. CBA - Refers to the main billing account set up for a customer. This is the account under which a Consolidated Bill will be rendered.
 - 2. SUB - Applies to each individual customer account that is to be billed within a Consolidated Billing arrangement on a CBA set up for the customer.
- C. To the extent possible, Consolidated Billing allows customers to select their bill date, if they so desire.(1)
- D. This service is classified as a noncompetitive service under Section 392.220.4, RSMo. 1987 (Supp.).

13.23.2 Rules and Regulations

(AT)
(AT)

- A. The service is available for business customers subscribing to services from any approved tariff, except those customers subscribing to WATS and DECCO.
- B. Consolidated Billing applies to accounts billed from the Customer Records Information System (CRIS) only.
- C. Consolidated Billing allows for combined billing of accounts within a single RAO only. Accounts in different RAOs or states cannot be consolidated for billing purposes. Both residence and business accounts cannot be consolidated on the same CBA.

- (1) Some negotiation may be required to establish dates acceptable to both the customer and the Telephone Company. The Telephone Company retains the right to make the final determination of a bill date.

13.24 Customer Billing Reports (1)

13.24.1 Description of Service

- A. The Customer Billing Reports package is a series of billing-related reports. It has been developed to supplement the customer bill for business customers subscribing to services from any Telephone Company approved tariff in the state of Missouri. The package is designed to enable customers to better manage their basic telecommunications service.
- B. Four reports are available to customers. Refer to 13.23.3, for the applicable rates. The reports are toll detail reports based on information from the customer's long distance usage billed by the Telephone Company. Both intraLATA usage carried by the Telephone Company and interLATA usage carried by interexchange carriers, which is billed by the Telephone Company, will be included on the reports.(2)

(FC)

Usage Summaries (Report Number T01) - Domestic/International usage and peak hour usage are summarized in two separate report sections. The Domestic/International Usage Summary section shows, by rate period, the number of calls, total minutes of use and amount charged. The Peak Hour Usage Analysis shows the same categories of data, by hourly period. Data for both sections are depicted for a master billing account number.

Billing Number Summary (Report Number T02) - For each billing number, information pertaining to number of calls, total minutes of use and amount charged is displayed for a master billing account number.

Number Called Summary (Report Number T03) - For each number called, data is shown for number of calls, total minutes of use and amount charged for a master billing account number.

International Call Detail (Report Number T04) - For each international call, detailed information, including place called, number called, number called from, billing number, date of call, time of call, type of call, minutes of use and amount charged is shown for a master billing account number.

- C. This service is classified as a noncompetitive service under Section 392.220.4, RSMo 1987 (Supp.).

- (1) As of October 1, 2006, this service is obsolete and will only be available to existing customers at existing locations. This service will be discontinued for all customers on December 31, 2006.
- (2) If a customer has ordered a report(s) for a particular master billing account number, and that number does not incur toll charges for the period under report, the customer will still receive a report(s). The report(s) will state that there were no charges or usage for that number. The customer will also be charged the rates associated with the report(s) received.

13.30 PREFERRED NUMBER SERVICE

13.30.1 General Regulations

- A. Preferred Number Service (PNS) is a residential service whereby incoming calls to the subscriber's PNS number are automatically forwarded by the Telephone Company central office equipment to the subscriber's current Southwestern Bell Telephone Company residence number. The terminating number must have incoming call capability.
- B. A unique ringing signal is available as an option to Preferred Number Service. A unique ringing signal will allow the PNS subscriber to distinguish if the incoming call was placed by dialing the subscriber's PNS number or the subscriber's current residence local exchange telephone number. The termination with unique ringing must be in the Telephone Company's service area.
- C. The Unique Ring option cannot be provided on Preferred Number Service if more than one unique ringing pattern is already on the customer's local exchange number (e.g. two Personalized Rings).
- D. Preferred Number Service and the Unique Ring capability is offered subject to the availability of Telephone Company central office facilities.
- E. Preferred Number Service is not offered where the terminating system is a business, Public, Semi-Public, Customer Owned Pay Telephone class of service.
- F. Transmission quality may vary depending on the distance and routing necessary to complete the forward call. Preferred Number Service is not represented as suitable for satisfactory transmission of data.
- G. Preferred Number Service is available when used in connection with local exchange service or Long Distance Telecommunications Service (LDMTS) or inward Wide Area Telecommunications Service (WATS) lines (800 Service).
- H. The Local Exchange Tariff shall apply for optional MCA Service availability calling scopes, regulations, and rates and charges.
- I. Incoming calls to the Preferred Number Service number can be forwarded within the local calling scope of the exchange in which the customer is located and cannot be used to expand the local call scope beyond that available to the PNS subscriber. Preferred Number Service may result in a toll call if the incoming call is forwarded outside of the local calling scope.

Section 13
4th Revised Sheet 119
Replacing 3rd Revised Sheet 119

MISCELLANEOUS SERVICE OFFERINGS

13.30 Preferred Number Service (cont'd)

13.30.1 General Regulations (cont'd)

- J. The originating caller is responsible for any charges incurred from the point of origination to the PNS number.

The Preferred Number Service subscriber is responsible for all charges incurred between the PNS number and the terminating number. If calls between the PNS number and the terminating number are within the same local calling scope, only the monthly rate applies. If such calls go outside the local calling scope, toll charges apply in addition to the monthly rate.

- K. A residential directory listing, either the current residence local exchange number or the subscriber's PNS number in the same local exchange, is provided to the PNS subscriber at no additional charge. If the customer wants both numbers to be listed, an additional listing may be obtained at the appropriate rates outlined in the Directory Listing Section of this tariff. If the customer wants a non-published or non-listed telephone number the appropriate charges as outlined in the Directory Listing Section of this tariff are applicable on the "forwarded-to" local residence exchange number.
- L. Rules and Regulations pertaining to the application of residence service are the same in conjunction with Preferred Number Service as with other exchange services. See "Rules and Regulations Applying To All Customer's Contracts" section of this tariff.

13.30.2 Rates

The following rates are applicable to Preferred Number Service only:

	USOC	Monthly Rate	Installation Charge (1)(2)(3)(4)
Preferred Number Service			
Without Unique Ring	P6N	\$4.20(CR)	\$7.75
With Unique Ring	PWN	5.09(CR)	7.75

- (1) The installation charge will not apply on outside moves of a customer's other service if there is no telephone number change.
- (2) If the customer requests to change the PNS number, an installation charge applies.
- (3) If the customer requests to change the number to which calls are forwarded, an installation charge applies.
- (4) The subsequent addition of Unique Ring will require an installation charge.

(CT) 13.30 PREFERRED NUMBER SERVICE (cont'd)

REC'D APR 21 2003

(CT) 13.30.1 General Regulations (cont'd)

J. The originating caller is responsible for any charges incurred from the point of origination to the PNS number.

The Preferred Number Service subscriber is responsible for all charges incurred between the PNS number and the terminating number. If calls between the PNS number and the terminating number are within the same local calling scope, only the monthly rate applies. If such calls go outside the local calling scope, toll charges apply in addition to the monthly rate.

K. A residential directory listing, either the current residence local exchange number or the subscriber's PNS number in the same local exchange, is provided to the PNS subscriber at no additional charge. If the customer wants both numbers to be listed, an additional listing may be obtained at the appropriate rates outlined in the Directory Listing Section of this tariff. If the customer wants a non-published or non-listed telephone number the appropriate charges as outlined in the Directory Listing Section of this tariff are applicable on the "forwarded-to" local residence exchange number.

L. Rules and Regulations pertaining to the application of residence service are the same in conjunction with Preferred Number Service as with other exchange services. See "Rules and Regulations Applying To All Customer's Contracts" section of this tariff.

MISCELLANEOUS SERVICE OFFERINGS

13.31 INTERCEPT REFERRAL SERVICES

13.31.1 General

- A. Intercept Referral Service is a service used when a customer disconnects service or changes his telephone number. Calls to the intercepted telephone number are referred to an operator or a recorded message. The caller is provided with information such as a new telephone number and/or name and/or address. This service is available where resources permit.
- B. The "Rules and Regulations Applying to All Customers' Contracts", section 23, of this tariff is applicable to the provision of Intercept Referral Service.

13.31.2 Description Of Service

A. Basic Intercept Referral Service

This level of service provides either an operator-handled or recorded announcement (the type of recording is based on availability of telephone company resources). The announcement states that the called number has been disconnected or changed. If the number is available, it is given to the caller. The number may not be available if it is non-published or the customer left the area without providing a forwarding telephone number.

Basic Intercept Referral Service is provided free of charge to residential customers for a minimum of thirty days where facilities exist, and the threat of telephone exhaustion is not imminent.

Basic Intercept Referral Service for single line business customers and the primary listed telephone number for Direct Inward Dial (DID), Centrex, Plexar II and Plexar Custom customers shall be available upon request, free of charge, for a minimum of thirty days or the life of the directory, whichever is greater. However, if the threat of telephone number exhaustion becomes imminent for a particular central office, the company may reissue a disconnected number prior to the expiration of the directory but no earlier than 30 days after the disconnection of the business telephone number. A charge will apply on all other non-primary DID, Centrex, Plexar II and Plexar Custom numbers (see section C).

B. Special Intercept Referral Service

(RT)
|
(RT)

This level of service provides the same information, as Basic Intercept Referral Service using either an operator-handled or recorded announcement, plus this level of service provides callers with additional information. Two types of information are available:

Replacing Original Sheet 121

MISCELLANEOUS SERVICE OFFERINGS

13.31 INTERCEPT REFERRAL SERVICES-(Continued)

13.31.2 DESCRIPTION OF SERVICE-(Continued)

B. SPECIAL INTERCEPT REFERRAL SERVICE-(Continued)

1. Location Referral Service provides the caller with the customer's new street address, city, and/or state.
2. Multiple Referral Service accepts calls placed to a single disconnected or changed telephone number and refers them to a message which provides several different numbers. Under Multiple Referral Service, calls to the disconnected number may be routed to a recorded announcement or to an operator. Either option is available to the customer when there are three or less referrals to be given. For more than three referrals, the calls must be routed to an operator. When the calls are routed to an operator, the calling party is queried as to whom they wish to reach, and the appropriate number is provided.
- (AT) 3. Name Referral Service provides the caller with the name of the customer's business and new
(AT) telephone number.

C. INTERCEPT REFERRAL SERVICE FOR DID, CENTREX, PLEXAR II AND PLEXAR CUSTOM CUSTOMERS

Direct Inward Dial (DID), Centrex, Plexar II and Plexar Custom customers are characterized by a large number of telephone numbers, and a concentration between numbers and trunks or trunk equivalents. For these customers, two referral configurations are available:

1. Each telephone number may be referred to an individual message, or
2. A block of sequential telephone numbers may be referred to a common message.

DID, Centrex, Plexar II and Plexar Custom customers may purchase basic intercept or special intercept service. Operator-handled multiple intercept for a block of numbers is not available for DID, Centrex, etc.

13.32 PREPAID CALLING CARD SERVICE

13.32.1 Service Description

The Prepaid Calling Card Service is a card which will allow callers to pre-pay for local or long distance calls from any telephone without the use of coins, credit cards, telecommunications company calling cards, automated or live operator assistance. The Prepaid Calling Card has a pre-established value that is decreased with each minute of usage. The card is paid for in advance and may be billed to a major customer's telephone bill, subject to the customer having satisfactory credit with the Telephone Company. Installment billing of Prepaid Calling Cards is not permitted.

(AT) This service is competitively classified.

13.32.2 Regulations

- A. The Prepaid Calling Card Service will be accessed by dialing an 800 number, entering a security code, and the telephone number of the called party. Dialing instructions will appear on the back of the card.
- B. The calling card customer will only be charged for completed calls.
- C. The customer's call may be interrupted or terminated, if during the call, the value of the calling card is exhausted.
- D. Some prepaid cards may be marketed with limited calling scopes.
- E. IntraLATA calls originated within the Telephone Company's service area will be carried by the Telephone Company. The Telephone Company does not provide interLATA service.
- F. The card will be available in various denominations.
- G. The Telephone Company will not be responsible for lost or stolen cards.
- H. The value of the Prepaid Calling Card will be refunded only if the full value of the card is remaining. Refunds will not be made if the card has been used, or if the card has expired.
- I. Prepaid Calling Cards will have expiration dates printed on the cards. All cards will expire no later than 12 months from the date of sale.
- J. Live customer assistance will be available to Prepaid Calling Card users in the event they need assistance while using the card.

13.32 PREPAID CALLING CARD SERVICE

MISSOURI
Public Service Commission

13.32.1 Service Description

The Prepaid Calling Card Service is a card which will allow callers to pre-pay for local or long distance calls from any telephone without the use of coins, credit cards, telecommunications company calling cards, automated or live operator assistance. The Prepaid Calling Card has a pre-established value that is paid for in advance, and that value is decreased with each minute of usage.

13.32.2 Regulations

- A. The Prepaid Calling Card Service will be accessed by dialing an 800 number, entering a security code, and the telephone number of the called party. Dialing instructions will appear on the back of the card.
- B. The calling card customer will only be charged for completed calls.
- C. The customer's call may be interrupted or terminated, if during the call, the value of the calling card is exhausted.
- D. Some prepaid cards may be marketed with limited calling scopes.
- E. IntraLATA calls originated within the Telephone Company's service area will be carried by the Telephone Company. The Telephone Company does not provide interLATA service.
- F. The card will be available in various denominations.
- G. The Telephone Company will not be responsible for lost or stolen cards.
- H. The value of the Prepaid Calling Card will be refunded only if the full value of the card is remaining. Refunds will not be made if the card has been used, or if the card has expired.
- I. Prepaid Calling Cards will have expiration dates printed on the cards. All cards will expire no later than 12 months from the date of sale.
- J. Live customer assistance will be available to Prepaid Calling Card users in the event they need assistance while using the card.

(FC) 13.33 SECOND LINE CONTROL

(FC) 13.33.1 Description of Service

A. Second Line Control allows a subscriber to interrupt and reinstate their residential local exchange service additional line (ADL), two times within a twelve month period for a total of sixty days, (thirty days per period for a total of sixty days, (thirty days per occurrence) without charge. Interruptions of service for a greater amount of time are beyond the scope of this service. During the time that their local exchange service is interrupted, the applicable monthly rates for the local exchange access line and any features associated with that line will not apply. However, the rate for Second Line Control will continue to apply.

B. Second Line Control also includes Toll Restriction as an optional component of the service. Rates, rules and regulations noted in Section 13.20, preceding, will apply. The nonrecurring charges for Toll Restriction will be waived when associated with Second Line Control.

(FC) 13.33.2 Rules and Regulations

- A. Second Line Control is only available on additional lines for residence customers.
- B. The subscriber must designate the service reinstatement date at the time service is interrupted.
- C. Second Line Control does not apply to Suspension of Service Initiated by the Telephone Company, as described in Section 22 of this Tariff, nor does it forgive the associated restoral charges specified therein.

MISCELLANEOUS SERVICE OFFERINGS

(NR) 13.34 SPECIAL HIGH VOLTAGE PROTECTION SERVICE AND EQUIPMENT

13.34.1 General

Telephone Company services provided on metallic facilities that extend to electric power generating, switching, and distributing locations may require special high voltage protection equipment to protect against the effects of Ground Potential Rise (GPR) and or induction caused by faults in the customer's electric power system. The special protection equipment is designed to isolate or neutralize the fault-produced hazardous voltages. The protection objectives on Telephone Company services and facilities at these locations are as follows:

1. To minimize electrical hazards to personnel engaged in construction, operation and maintenance or use of the telecommunications system.
2. To prevent electrical damage to telecommunications equipment and cable or wire facilities.
3. To provide the required service continuity and integrity of telecommunications transmission as specified by the customer.

13.34.2 Requirements for Special High Voltage Protection Equipment

A. Special high voltage protection equipment is required on the telephone facilities at the customer location under either of the following conditions:

1. When the fault-produced GPR and/or induction at the customer location is 1000 Volts peak-asymmetrical (Vpk) or greater; or,
2. At the customer's option, when the fault-produced GPR and/or induction at the customer location is greater than 300 Vpk, but less than 1000Vpk, and at least one telecommunications service has been assigned a Class A Service Performance Objective (defined in Paragraph 6, following) by the customer.

B. Special protection equipment may also be required on the serving telephone facilities at the Telephone Company Central Office and on the drainage locations. right-of-way at remote

13.34.3 Responsibility of the Customer

A. The customer shall be responsible for providing to the Telephone Company, in writing, (form SW6060A) the following technical information:

1. The technical data needed by the Telephone Company to determine the level and method of protection required at each location where service is requested. This data includes, but is not limited to, the GPR (in root-mean-square volts) under worst-case, single-phase fault conditions, the ground grid area, impedance of the station ground grid to remote earth, X/R ratio of the power system at the worst-case point of fault, the GPR profile, and the fault current diagrams and maps of relevant power feed routes.
2. The service type, quantity and projected forecast of each service requested at a given location, including those requested by contractors or any other temporary service needs, in accordance with the definitions given in Paragraph 13.34.5, following.
3. The Service Performance Objective Classification for each service requested in accordance with the definitions in Paragraph 13.34.6, following.

B. Changes in the information previously provided in statement A., above, will require written notification. Notification of these changes shall be provided with sufficient lead time to permit Telephone Company reevaluation, redesign, implementation and testing of the required modifications or new protection method.

C. Sufficient floor space and the necessary power wiring, power outlets, backboards, etc., are to be furnished by the customer who assumes all responsibility for the safe condition of same.

D. The customer or customer representative shall, when ordering telephone service, specifically inform the Telephone Company agent of the fact that the service will be terminating in a high voltage environment.

13.34 SPECIAL HIGH VOLTAGE PROTECTION SERVICE AND EQUIPMENT-(Continued)

13.34.4 Responsibility of the Telephone Company

The Telephone Company, working in conjunction with the customer and with data provided by the customer, shall determine the proper levels of protection required to achieve the objectives set forth in Paragraph 13.34.1. The method of protection for every service in a cable shall be coordinated by the Telephone Company to be compatible with the protection provided for the most critically important service in that cable.

13.34.5 Service Type

- A. Services (telecommunications channels) which the Telephone Company offers in other sections of this tariff are identified according to the following service types:
1. Type 1 - Service requiring either DC transmission or AC and DC transmission used for:
 - a. Basic exchange telephone service and/or private line voice telephone service.
 - b. Teletypewriter, telemetering, supervisory control, etc.
 2. Type 2 - Private line services requiring AC and/or DC transmission used for pilot wire protective relaying or DC tripping.
 3. Type 3 - Private line services requiring AC transmission only used for telemetering, supervisory control, data, Supervisory Control and Data Acquisition (SCADA), etc.
 4. Type 4 - Private line services requiring AC transmission only used for audio tone protective relaying.
- B. When a nonstandard, less than economic type of construction of facility is required at the customer's request, a one-time charge will apply, equal to the difference between the estimated cost of the special facilities and the estimated cost of standard construction.

General Exchange Tariff
Section 13
Original Sheet 131

MISCELLANEOUS SERVICE OFFERINGS

13.34 SPECIAL HIGH VOLTAGE PROTECTION SERVICE AND EQUIPMENT-(Continued)

13.34.6 Service Performance Objective Classifications

- A. Interruptions or outages of telecommunications circuits serving electric power stations may occur for physical reasons such as cable damage due to extraordinarily heavy storm loading, a vehicle striking and breaking a utility pole, a direct lightning strike, or acts of God. Circuit failures caused by such events cannot be anticipated and the Telephone Company expressly states that provision of the equipment provided in this section cannot preclude such service outages as may normally occur due to the above-mentioned circumstances. To minimize service interruptions caused by man-made accidents and/or acts of God, "dual alternate routing" should be employed, wherein critical operating circuits are duplicated, end-to-end, over two geographically diverse routes such that an interruption on one route will not likely result in an interruption on the other. Rates for Special Routing may be found in either the Private Line or Access Tariffs, depending upon jurisdiction and type of circuit involved.
- B. Because of the customer's need for service continuity during power system faults on some types of telecommunications services provided to power locations, the following system of Service Performance Objective Classifications has been established for the purpose of permitting the customer to specify the performance objectives for all types of telecommunications services provided to power locations. These Service Performance Objective Classifications, which are defined with respect to power system fault conditions, are as follows:
1. Class A - Noninterruptible service performance (must function before, during and after the power fault condition) for services requiring AC transmission only. Class A service cannot tolerate even a momentary service interruption. Service interruptions that are not tolerable include both loss of dependability (failure to deliver a valid trip or control signal) and loss of security (delivery of false trip or control signal).
 2. Class B - Self-restoring interruptible service performance (must function before and after the power fault condition) for any service. Class B service can tolerate a service interruption for the duration of a power system fault, but service continuity must be restored immediately after the fault without requiring any repair personnel activity.

Issued: Dec. 23, 1996

Effective: Jan. 30, 1997

By KAREN JENNINGS, President-Missouri
Southwestern Bell Telephone Company
St. Louis, Missouri

No supplement to this tariff will be issued except for the purpose of canceling this tariff.

Section 13
Original Sheet 132

MISCELLANEOUS SERVICE OFFERINGS

13.34 SPECIAL HIGH VOLTAGE PROTECTION SERVICE AND EQUIPMENT-(Continued)

13.34.6 Service Performance Objective Classifications-(Continued)

B. (Continued)

3. Class C - Interruptible service performance (can tolerate a normal station visit to restore service) for power stations with a fault environment of less than 1000 Vpk asymmetrical. Class C service can tolerate a service interruption which requires a station visit by repair personnel to restore service. Class C service cannot be provided in conjunction with Class A or Class B service.

13.34.7 Provision of Special High Voltage Protection Service and Equipment

- A. The Telephone Company or the customer may provide the necessary special high voltage protection equipment at the customer's premises. If the customer elects to provide the special high voltage protection equipment, all the high voltage protection equipment at that premises will be provided by the customer. Any equipment so provided shall conform to industry standards as established by the Institute of Electrical and Electronics Engineers (IEEE), Reference Standard #487-1980, IEEE Guide for the Protection of Wireline Communication Facilities Serving Electric Power Stations. In addition, the Telephone Company will provide high voltage protection at the Telephone Company Central Office and at the remote drainage location, if required. The Telephone Company will inspect and verify the protection equipment when service is established at new or existing customer locations, and at future times as deemed necessary due to additions, deletions, rearrangements or maintenance.(1)
- B. The customer may add to and make changes in his equipment at existing locations provided such additions and changes meet the Company's technical requirements and are covered by the preceding service types in Paragraph 13.34.5(1). Some examples of primary special high voltage protection equipment which may be owned by the customer under these conditions are high voltage neutralizing and isolation transformers, high voltage isolation relays, optical coupler devices and lightning arresters for communications applications.
- C. The Telephone Company reserves the right to suspend any service without adequate high voltage protection, including that which is customer-owned, until adequate protection is provided.
- D. Whenever the hazardous voltage caused by the GPR and/or induction which results from AC power faults exceeds the technical capability (18,000 volts rms) of off-the-shelf high voltage protection equipment, the

(1) Rates and charges for High Voltage Protection as specified in Paragraph 13.34.8, following, will apply.

13.35 Star Code Access to Voice Mail

13.35.1 Description of Service

- A. Star Code Access to Voice Mail service is abbreviated dialing access to Voice Mail from the customers premises via an abbreviated code (* and a two-digit code).

The customer, when calling from the line on which the voice mailbox is associated, will use the feature by picking up the telephone handset and dialing an abbreviated code (* and a two-digit code). This action will forward the call to the customer's voice mailbox.

B. Rules and Regulations

1. Star Code Access To Voice Mail Service requires Call Forwarding Busy Line / Don't Answer on the customer's exchange line. The call forward number for Star Code Access to Voice Mail Service must be the same as that of Call Forwarding Busy Line / Don't Answer.
2. Star Code Access To Voice Mail Service is provided subject to the availability of Central Office capacity and facilities.
3. Star Code Access To Voice Mail Service is offered only in association with residence and business exchange services unless otherwise specified.
4. Star Code Access To Voice Mail Service is not available with Centrex/Plexar, PBX, Payphone Exchange Access Service, and other non-POTS classes of service (e.g. Inmate or hotel-motel lines). The service will not be available with Telebranch, Preferred Number Service, Outgoing Call Control or Multi-Line Hunt Groups.
5. Star Code Access to Voice Mail service is available with Primary Rate ISDN only if the lines are not built as part of a Plexar common block. This service is not available with ISDN BRI.
6. Star Code Access to Voice Mail requires Touchtone service.
