TARIFF FORMAT

Service Commission

- A. Sheet Numbering** - Sheet numbers appear in the upper right corner of the page. Sheets are numbered sequentially. However, new sheets are occasionally added to the tariff. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 14 and 15 would be 14.1.
- B. Sheet Revision Numbers** - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current sheet version on file with the Commission. For example, the 4th revised Page 14 cancels the 3rd revised Page 14.
- C. Paragraph Numbering Sequence** - There are seven levels of paragraph coding. Each level of coding is subservient to its next higher level:
- 2.
 - 2.1.
 - 2.1.1.
 - 2.1.1.A.
- D. Check Sheets** - When a tariff filing is made with the MPSC, an updated Check Sheet accompanies the tariff filing. The Check Sheet lists the sheets contained in the tariff, with a cross reference to the current revision number. When new pages are added, the check Sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this page if these are the only changes made to it (i.e., the format, etc. remain the same, just revised a revision levels on some pages). The tariff user should refer to the latest Check Sheet to find out if a particular sheet is the most current on file with the MPSC.

2.16 Calculation of Distance

Service Commission

2.17.1 Usage charges for all mileage sensitive products are based on the airline distance between rate centers associated with the originating and terminating points of the call.

2.17.2 The airline mileage between rate centers is determined by applying the formula below to the vertical and horizontal coordinates associated with the rate centers involved. AmeriVision used vertical and horizontal coordinates produced by Bell Communications Research in their NPA-NXX V & H coordinates tape and Bell's NECA tariff No. 4.

2.7.13 Formula:

2.19 Minimum Call Completion Rate

2.22 Payment for Service, (Cont'd.)

- (F) Bills are due by the date marked upon the invoice received by the Customer. (T)
- (G) Late Fee in the amount of 1.5% per month will be applied on all delinquent bills. In addition, bills that remain unpaid forty-five (45) days after the postmark date may be subject to call blocking and/or temporary disconnection. Notice of this action will be sent to the Customer ten (10) days prior to the call blocking or temporary disconnection.
- (H) Except as provided in Section (I) herein below, Customers will be billed on a monthly basis. However, the Company may, upon Customer notification, adjust a Customer's billing date to coincide with current billing cycles of the Company.
- (I) In lieu of sending a Customer a monthly bill, the Company may choose to defer its mailing to a Customer whose charges are less than \$7.50. Said charges will be accrued and added to the following month's charges. A billing for all accrued and current charges will be mailed to the Customer upon reaching \$7.50 in amount, but in no case less than once per quarter. (T)

- (L) AmeriVision will not bill for unanswered calls in areas where Equal Access is available, nor will AmeriVision knowingly bill for unanswered telephone calls where Equal Access is not available. In the event that an unanswered call is inadvertently billed due to the unavailability of Equal Access, AmeriVision will cancel all such charges upon request or may credit the account of the Billed Party. Any call for which the billed duration exceeds one minute shall be presumed to have been answered.
- (M) In the event the Customer is overfilled, an adjustment will be made to the Customer's account and the Customer will be deemed to not owe overfilled amount. If the Customer is under billed, the Customer is allowed to either pay in lump sum or in installments.
