1. Private Coin Service is offered for use with a customer-provided instrument-implemented coin telephone. (1) All attachments of Private Coin Telephones to the network must be made pursuant to the rules and regulations set forth in this Tariff.
  2. Private Coin Service is a two-way or, optionally, one-way originating only business exchange access line composed of the serving central office line equipment with Selective Class of Call Screening treatment (where available); all outside plant facilities needed to connect the serving central office with the customer's premises and the network interface. These facilities are Telephone Company-provided and maintained and provide access to and from the tele-communications network for long distance service and local calling.
  3. Selective Class of Call Screening treatment enables the customer to restrict outgoing operator-handled calls from a called telephone, a third number or a Calling Card account.
  4. In the case of one-way service, intercept treatment will be provided.
  5. A maximum of one customer-provided instrument-implemented coin telephone may be connected to any one Private Coin Service line.
  6. Selective Class of Call Screening must be provided wherever available. Any customer who offers Private Coin Service where Selective Class of Call Screening is not available, nonetheless assumes full and complete responsibility for all calls billed to his line.
  7. General Regulations are applicable to the provision of Private Coin Service.
  8. Directory listings may be provided under the regulations governing the furnishing of listings for business subscribers.
- (1) For purposes of this Tariff, the term "customer" is defined as the party who is responsible for payment of Private Coin Service Access Line.
