Case No. TD-2002-101

ORDER CANCELING CERTIFICATE AND TARIFF

On August 17, 2001, the Staff of the Missouri Public Service Commission filed a motion asking the Commission to cancel the certificate of authority and tariff of Hospitality Communications Corporation (HCC). The Commission granted HCC a certificate of service authority to provide intrastate interexchange telecommunications services in case number TA-95-124.

Staff attached a copy of a note in response to a notice in an unrelated case stating that HCC was no longer in business. Staff reviewed the Missouri Secretary of State's web site and determined that HCC was listed as inactive due to withdrawal from the state of Missouri. HCC has not responded to Staff's motion and no party has requested a hearing.

The Commission has reviewed the motion and the official file and finds that the certificate of service authority and accompanying tariff to provide intrastate interexchange telecommunications services granted to HCC in case number TA-95-124 shall be canceled.

IT IS THEREFORE ORDERED:

1. That the certificate of authority granted and tariff approved in case number TA-95-124 for Hospitality Communications Corporation shall be canceled on September 23, 2001.
2. That the tariff of Hospitality Communications Corporation shall be canceled on September 23, 2001.
3. That this order shall become effective on September 23, 2001.
4. That this case may be closed on September 24, 2001.

A. Sheet Numbering - Sheet numbers appear in the upper right corner of the page. Sheets are numbered sequentially. However, new sheets are occasionally added to the tariff. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 14 and 15 would be 14.1.

B. Sheet Revision Numbers - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current sheet version on file with the PSCM. For example, the 4th revised Sheet 14 cancels the 3rd revised Sheet 14. Because of various suspension periods, deferrals, etc. the PSCM follows in its tariff approval process, the most current sheet number on file with the Commission is not always the tariff page in effect.

C. Paragraph Numbering Sequence - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:

- 2.

- 2.1.1.A.
- 2.1.1.A.1.

Public Service Commission**

Usage charges for all mileage sensitive products are based on the airline distance between the serving wire center locations associated with the originating and terminating points of the call.

The distance between the originating and terminating points is calculated by using the "V" and "H" coordinates of the serving wire centers as defined by BellCore (Bell Communications Research), in the following manner:

- Step 1 - Obtain the "V" and "H" coordinates for the serving wire center of the Subscriber's switch and the destination point.
- Step 2 - Obtain the difference between the "V" coordinates of each of the serving wire centers. Obtain the difference between the "H" coordinates.
- Step 3 - Square the differences obtained in Step 2.
- Step 4 - Add the squares of the "V" difference and "H" difference obtained in Step 3.
- Step 5 - Divide the sum of the square obtained in Step 4 by ten (10). Round to the next higher whole number if any fraction results from the division.
- Step 6 - Obtain the square root of the whole number obtained in Step 5. Round to the next higher whole number if any fraction is obtained. This is the distance between the originating and terminating serving wire centers of the call.

Formula:

$$\sqrt{\frac{(V_1 - V_2)^2 + (H_1 - H_2)^2}{10}}$$
