GENERAL EXCHANGE SERVICE TARIFF

CUSTOMER PROVIDED EQUIPMENT

A. Rates and Charges

1. Where a customer-provided instrument is used, in lieu of the Telephone Company provided instrument, as a main station with individual line residence or business local exchange service, the customer will be given a monthly credit of 40¢ per telephone instrument not provided by the Company. Such credit will be applied to the basic local exchange rate. Such credit is given as recognition of the customer's ownership of the instrument and responsibility for maintenance thereof.
2. Service connection charges are applicable to the installation of jacks and wiring as covered elsewhere in this tariff.

B. Maintenance of Service Call Charges

1. The customer shall be responsible for the payment of all charges for visits by the Telephone Company to the premises of the customer where the service difficulty or trouble reported results from use of equipment or facilities provided by the customer or his authorized users.

Per service visit...\$20.00

B. CALLING SERVICES

MO. PUBLIC SERVICE COMM

1. **Custom Calling Services** consists of one or more of the following features which provide special kinds of customer-controlled communications features on individual service lines. Custom Calling Service is available only through central offices which, at the Company's option, are appropriately equipped. Operating specifics may vary by central office equipment type but can be described generally as:

- a. **Call Waiting**--provides a signal to a customer using the telephone that another call is being attempted to his number. The customer can "hold" the original call to answer the incoming call.
- b. **Call Forwarding**--permits all calls directed to a customer number to be routed on to another dialable number, predetermined and activated by the customer. (See Note) Calls forwarded beyond the local (toll free) calling area will be charged to the customer, at the dial station-to-station rate, on every call answered at the "forwarded to" number.
- c. **Three Way Calling**--enables a customer to add a third party to an existing call without operator assistance, thereby establishing a three-way conversation. (See Note)
- d. **Three Way Calling with Transfer**--this allows the customer to transfer calls to another station by flashing the hookswitch, dialing the transfer-to number, and going on hook. Operation of this feature is the same as described for Three-Way Calling except that disconnect by the transferring station does not cause the other parties to be disconnected.
- e. **Speed Calling**--permits customer calling to other telephone numbers through the dialing of a code rather than an entire telephone number. Two capacities are available: 8- or 30-number code lists.

Note: The grade of transmission on calls forwarded and three-way calling may vary upon the distance and routing required to complete such calls; therefore, the normal grade of end-to-end transmission cannot be guaranteed on such calls.

B. CUSTOM LOCAL AREA SIGNALING SERVICES (CLASS)

JAN 15 1997

1. General

Custom Local Area Signaling Services (CLASS) are basic local exchange telecommunications services which provide call management features to single line residence and business customers. The features enable the user to load and maintain call processing instructions for incoming and outgoing calls.

2. Rules and Regulations

- a. CLASS features are available only to Single Line Residence and Business exchange services customers served by central offices equipped to provide these services.
- b. Features cannot be activated unless both the called and calling parties are served by, and the call is routed through, appropriately equipped central offices.
- c. To activate a feature the subscriber must activate a company designated code.
- d. Variations in central office equipment and the activation of other central office features by the called and/or calling party may cause differences in the operation of various features.
- e. The customer is responsible for providing terminal equipment compatible with and necessary for CLASS features.
- f. CLASS features are not available with the following: PBX Trunks, DID trunks, hunt arrangements, Payphone Services, or lines terminated in Multi-function Systems (Hybrid) or button telephone systems. +
- g. Call Return and Repeat Dialing Features cannot be activated for numbers with an 800 or 900 prefix, or PBX station lines not equipped with Direct Forward Dialing service.

MAR 18 1998

MO. PUBLIC SERVICE COMM

B. CALLING SERVICES (continued)

f. **Warm Line**--this allows the customer to designate a 7 or 10 digit number to which the line is to route upon off-hook. The service provides a timed interval of dial tone prior to the off-hook routing, allowing the customer to dial a call if desired.

g. **Personal Ringing**--this allows a customer to establish up to two additional telephone numbers on the same access line and distinguish calls to each number by a distinctive ringing pattern. The customer can then determine which telephone number a calling party has dialed. Unique call waiting tones are also provided.

A directory listing is provided for each Personal Ringing number.

h. **Toll Control/PIN**--this allows the customer to over ride the Toll Restriction Feature by dialing the Toll Control access code followed by the customer's Personal Identification Number (PIN). After receiving a coded dial tone, the customer is allowed to place a toll call.

i. **Toll Restriction**--this allows the customer to restrict long distance services, which may include 1+, 0 or international, in combination or individually.

j. Custom Calling Services will be provided in connection with individual and multi-line residence and business lines. PBX, Centrex customers and Public and Semi-Public Telephone services are excluded.

k. Promotional periods may be instituted by Craw-Kan with regard to these services. Promotion periods may include temporary waiver of applicable Service Connection Charges, or a free additional Custom Calling or Advanced Calling Service feature with the purchase of another Custom Calling or Advanced Calling Service feature. Promotional periods will be limited to sixty (60) days in duration. The Company will notify the Missouri Public Service Commission 30 days prior to the promotional period.

l. Rates--The following rates and charges apply in addition to the established rates and charges for the services with which these features are associated.

B. CUSTOM LOCAL AREA SIGNALING SERVICES (CLASS) (con't)

3. CLASS Features

- a. Call Return--permits a customer to automatically redial the most recent incoming local call or call attempt. If the number is busy, Call Return will continue to dial the number for up to 30 minutes. The feature cannot be activated for calls originating from a line that is forwarded or from a line not associated with a telephone number, e.g. multiline hunt groups.
- b. Repeat Dialing--permits the customer to automatically redial the last outgoing number dialed, whether it was answered or not. If the called number is busy, the number is automatically redialed for up to 30 minutes.
- c. Call Trace--allows customers who have been receiving harassing or prank calls to activate an immediate trace of the last incoming call. After hanging up, the customer dials a company provided tracing activation code. A successful trace receives a message which tells the customer to contact the telephone company for further assistance.

The Telephone Company will not provide the results of the trace to the customer. The call detail may be provided only to law enforcement authorities upon proper request.

- d. Caller ID-Calling Number Delivery--allows a customer to see the caller's telephone number on display equipment. The display equipment is owned and maintained by the customer. The telephone number is transmitted during the silent interval between the first and second ring of the customer's line.

Caller ID-Calling Name Delivery--this feature allows the terminating customer to identify the calling party by a displayed name before answering the call. The display equipment is owned and maintained by the customer. The calling party's name is displayed during the silent interval between the first and second ring of the customer's line.

After hanging up, the customer dials a company provided tracing activation code. A successful trace receives a message which tells the customer to contact the telephone company for further assistance.

The Telephone Company will not provide the results of the trace to the customer. The call detail may be provided only to law enforcement authorities upon proper request.

d. Caller ID--allows a customer to see the caller's telephone number on display equipment. The display equipment is owned and maintained by the customer. The telephone number is transmitted during the silent interval between the first and second ring of the customer's line.

e. Caller ID Blocking--allows a caller to prevent his or her number from being delivered to the called party's display unit. The number is replaced by a "P" (for person) on the called party's equipment. *any law-Kan calling party may prevent his or her number from being delivered to the called*

B. CUSTOM LOCAL AREA SIGNALING SERVICES (CLASS) (con't)

3. CLASS Features (cont.)

- e. Caller ID Blocking--allows a caller to prevent his or her name and/or number from being delivered to the called party's display unit. The name and/or number is replaced by a "P" (for person) on the called party's equipment. Any Craw-Kan calling party may prevent his or her name and/or number from being delivered to the called party by dialing an access code immediately prior to placing a call. The access code activates per call blocking. Per call blocking is available at no charge.

Line blocking for the delivery of the calling name and/or number is available upon request, at no charge to the following entities and their employees/volunteers, for lines over which the official business of the agency is conducted. This includes lines at the residence of employees or volunteers where an executive officer of the agency registers with the Telephone Company a need for blocking nonprofit, tax-exempt, domestic violence intervention agencies, and federal, state, and local law enforcement agencies.

4. Rates and Charges

- a. The rates and charges following are for CLASS features and are in addition to any applicable service connection charges, monthly rates, and non-recurring charges for access lines and other services or equipment with which they are associated.
- b. Local or Message Toll Service (Long Distance) calls established by using Call Return and Repeat Dialing will be charged for at the tariff rates.
- c. An Installation Charge is applicable when coding CLASS features to an existing access lines.

GENERAL EXCHANGE TARIFF

MAR 18 1998

B. CALLING SERVICES (continued)

MO. PUBLIC SERVICE COMM

2. **Advanced Calling Services** are basic local exchange telecommunications services which provide call management features to single line residence and business customers. The features enable the user to load and maintain call processing instructions for incoming and outgoing calls.

Rules and Regulations

- a. Advanced Calling Service features are available only to Single Line Residence and Business exchange service customers served by central offices equipped to provide these services.
- b. Features cannot be activated unless both the called and calling parties are served by, and the call is routed through, appropriately equipped central offices.
- c. To activate a feature the subscriber must activate a company designated code.
- d. Variations in central office equipment and the activation of other central office features by the called and/or calling party may cause differences in the operation of various features.
- e. The customer is responsible for providing terminal equipment compatible with and necessary for Advanced Calling Service features.
- f. Advanced Calling Service features are not available with the following: PBX Trunks, DID trunks, hunt arrangements, payphone services, or lines terminated in Multi-function Systems (Hybrid) or button telephone systems.
- g. Call Return and Repeat Dialing features cannot be activated for numbers with an 800 or 900 prefix, or PBX station lines not equipped with Direct Forward Dialing service.

Advanced Calling Service Features

- h. **Call Return**--permits a customer to automatically redial the most recent incoming local call or call attempt. If the number is busy, Call Return will continue to dial the number for up to 30 minutes. The feature cannot be activated for calls originating from a line that is forwarded or from a line associated with a telephone number, e.g. multi-line hunt groups.

B. CALLING SERVICES (continued)

MO. PUBLIC SERVICE COMM

- i. **Repeat Dialing**--permits the customer to automatically redial the last outgoing number dialed, whether it was answered or not. If the called number is busy, the number is automatically redialed for up to 30 minutes. +

- j. **Call Trace**--allows customers who have been receiving harassing or prank calls to activate an immediate trace of the last incoming call. After hanging up, the customer dials a company provided tracing activation code. A successful trace receives a message which tells the customer to contact the telephone company for further assistance. +

The Telephone Company will not provide the results of the trace to the customer. The call detail may be provided only to law enforcement authorities upon proper request.

- k. **Caller ID-Calling Number Delivery**--allows a customer to see the caller's telephone number on display equipment. The display equipment is owned and maintained by the customer. The telephone number is transmitted during the silent interval between the first and second ring of the customer's line. +

Caller ID-Calling Name Delivery--this feature allows the terminating customer to identify the calling party by a displayed name before answering the call. The display equipment is owned and maintained by the customer. The calling party's name will be displayed during the silent interval between the first and second ring of the customer's line.

- l. **Caller ID Blocking**--allows a caller to prevent his or her name and/or number from being delivered to the called party's display unit. The name and/or number is replaced by a "P" (for person) on the called party's equipment. Any Craw-Kan calling party may prevent his or her name and/or number from being delivered to the called party by dialing an access code immediately prior to placing a call. The access code activates per call blocking. Per call blocking is available at no charge. +

Line blocking for the delivery of the calling name and/or number is available upon request, at no charge to the following entities and their employees/volunteers, for lines over which the official business of the agency is conducted. This includes lines at the residence of employees or volunteers where an executive officer of the agency registers with the Telephone Company a need for blocking: private, nonprofit, tax-exempt, domestic violence intervention agencies, and federal, state, and local law enforcement agencies.

B. CALLING SERVICES (continued)

MO. PUBLIC SERVICE COMM

- m. **Anonymous Call Rejection**—is a terminating feature that allows a customer to reject calls from parties who used a privacy feature to restrict presentation of their directory number or name to the customer.

Rates and Charges

- n. The rates and charges following are for Advanced Calling Service features only and are in addition to any applicable service connection charges, monthly rates, and non-recurring charges for access lines and other services or equipment with which they are associated.
- o. Local or Message Toll Service (Long Distance) calls established by using Call Return and Repeat Dialing will be charged for at the tariff rates.
- p. An Installation Charge is applicable when coding Advanced Calling Service features to an existing access lines.
- q. Promotional periods may be instituted by Craw-Kan with regard to these services. Promotion periods may include temporary waiver of the applicable Service Connection Charge, or a free additional Advance Calling Service feature with the purchase of another Advance Calling Service feature. Promotional periods will be limited to sixty (60) days in duration. The Company will notify the Missouri Public Service Commission 30 days prior to the promotional period.

r. Rates¹

Per Month

1. Call Return	\$ 3.00
2. Repeat Dialing	2.75
3. Caller ID-Calling Number Delivery	4.50
4. Caller ID-Calling Name Delivery	4.50
5. Caller ID-Number and Name Delivery	6.00
6. Call Trace	5.00 per trace
7. Anonymous Call Rejection (fixed or variable)	2.00

s. Service Connection Charge

Installation Charge

\$5.00 per line²

- (1) Current customers with discounted features will be grandfathered with the effective date of this tariff; thereafter, no previously discounted features will be offered.
- (2) The maximum Installation Charge for one or more features will be \$5.00.

H. CUSTOM CALLING SERVICES

Custom Calling Services consists of one or more of the following features which provide special kinds of customer-controlled communications features on individual service lines. Custom Calling Service is available only through central offices which, at the Company's option, are appropriately equipped. Operating specifics may vary by central office equipment type but can be described generally as:

1. Call Waiting--Provides a signal to a customer using the telephone that another call is being attempted to his number. The customer can "hold" the original call to answer the incoming call.
2. Call Forwarding--Permits all calls directed to a customer number to be routed on to another dialable number, predetermined and activated by the customer. (See Note) Calls forwarded beyond the local (toll free) calling area will be charged to the customer, at the dial station-to-station rate, on every call answered at the "forwarded to" number.
3. Three Way Calling--enables a customer to add a third party to an existing call without operator assistance, thereby establishing a three-way conversation. (See Note)
4. Speed Calling--Permits customer calling to other telephone numbers through the dialing of a code rather than an entire telephone number. Two capacities are available: 8- or 30-number code lists.
5. Warm Line--This allows the customer to designate a 7 or 10 digit number to which the line is to route upon off-hook. The service provides a timed interval of dial tone prior to the off-hook routing, allowing the customer to dial a call if desired.

Note: The grade of transmission on calls forwarded and three-way calling may vary upon the distance and routing required to complete such calls; therefore, the normal grade of end-to-end transmission cannot be guaranteed on such calls.

H. CUSTOMER CALLING SERVICES

MISSOURI
Public Service Commission

Customer Calling Service consists of one or more of the following features which provide special kinds of customers-controlled communications features on individual service lines. Custom Calling Service is available only through central offices which, at the Company's option, are appropriately equipped. Operating specifics may vary by central office equipment type but can be described generally as:

1. Calling Waiting--Provides a signal to a customer that the telephone that another call is being attempted to his number. The customer can "hold" the original call to answer the incoming call.
2. Call Forwarding--Permits all calls directed to a customer's number to be routed on to another number, predetermined and activated by the customer. (See Note) Calls forwarded beyond the local (toll free) calling area will be charged to the customer, at the dial station-to-station rate, on every call answered at the "forwarded to" number.
3. Three Way Calling--enables a customer to add a third party to an existing call without operator assistance, thereby establishing a three-way conversation. (See Note)
4. Speed Calling--Permits customer calling to other telephone numbers through the dialing of a one digit code rather than an entire telephone number. A capacity of 8 telephone numbers may be coded.
5. Custom Calling Services will be provided in connection with individual and multi-line residence and business lines. Party line, PBX, and Centrex customers and Public and Semi-public Telephone services are excluded.

NOTE: The grade of transmission on calls forwarded and three-way calling may vary upon the distance and routing required to complete such calls; therefore, the normal grade of end-to-end transmission cannot be guaranteed on such calls.

GENERAL REGULATIONS

G. DIRECTORY LISTINGS (Continued)

1. General Regulations (Continued)

d. (Continued)

Company for the acceptance for insertion or for the continuance of such listings; and is privileged to refuse to accept or to delete such listing where (1) such written authority is not so furnished or (2) such authority is withdrawn by such owner in writing to the Telephone Company.

e. Primary Listings

(1) One listing without charge, termed the primary listing, is provided as follows:

- (a) For each separate customer service. When two or more exchange access lines or PBX trunk lines are consecutively operated, the first number of the group is considered the primary listing.
- (b) For each semipublic service.
- (c) For each joint user.
- (d) For each service station customer.

2. Regular Extra Listings

- a. Business extra listings may be the names of partners or members of the firm, if the customer or joint user is a partnership or firm; the names of officers of the corporation, if the customer or joint user is a corporation; and for any business establishment, the names of associates or employees of the customer or joint user. No other class of listing, such as service, agency, commodity, etc., will be accepted.
