AT&T COMMUNICATIONS OF THE SOUTHWEST, INC.  
PRIVATE LINE SERVICES TARIFF

Section 7  
1st Revised Sheet 111.4  
Replacing Original Sheet 111.4

SECTION 7 - REGIONAL FRAME RELAY SERVICE (Continued)

Missouri Public

7.1.2 REGULATIONS (Continued)

REC'D OCT 25 2002

H. EXPEDITE OF AN ORDER

Service Commission

At the Customer's request, the Company will attempt to advance the Due Date of an order for the installation of a Regional Access Port to a new negotiated Due Date. If the new date is met, a Nonrecurring Charge applies.

Nonrecurring Charge

- per expedited Regional Access Port \$850.00 (CR)

I. MINIMUM PAYMENT PERIOD

There is no minimum payment period for RFRS.

7.1.3 PROVISION OF ACCESS LINES

Regional Access Ports are available for connection to Regional PVCs. Regional Access Ports include a digital access line from the Customer Premises to an AT&T Central Office providing RFRS within that LATA.

Equivalent digital access lines provided by the Customer, in lieu of the access lines provided by AT&T, may be connected to Regional Access Ports, however, all nonrecurring and monthly charges for Regional Access Ports as specified in Section 7.1.6, following will apply.

Digital access lines connected to a Regional Access Port cannot connect to a Domestic Port or Global Port, provided under AT&T Tariff F.C.C. No. 4.

7.1.4 CREDIT ALLOWANCES FOR INTERRUPTIONS

A. RFRS CREDIT ALLOWANCE FOR INTERRUPTIONS

RFRS Credit Allowance for Interruptions are based on Regional PVC charges. If a Regional PVC is interrupted for 30 minutes or more, a Credit Allowance based on the Regional PVC Monthly Charge will be made for the interrupted Regional PVC as set forth in Section 2.7 preceding. Regional PVCs are eligible for a credit allowance for interruptions only if the Regional PVCs which were interrupted are not entitled to any other credit for interruptions in lieu of, or in addition, to credit allowances specified herein.

SECTION 7 - REGIONAL FRAME RELAY SERVICE (Continued)

7.1.4 CREDIT ALLOWANCES FOR INTERRUPTIONS (Continued)

REC'D OCT 25 2002

B. CALCULATION OF CREDIT ALLOWANCE

Service Commission

1. Calculate the Regional PVC Daily Charge by dividing the Regional PVC Monthly Charge (less any applicable discount) by 30 days;
2. Determine the Interruption Period to be Credited based upon the actual length of interruption using the Calculation Table in AT&T Tariff F.C.C. No. 4;
2. Multiply the Regional PVC Daily Charge by the Interruption Period to be Credited to determine the Credit Allowance.

7.1.5 AVAILABILITY

Regional FRS is available at AT&T Central Offices within LATA 520, and within LATA 524 which provide ACCUNET T1.5 Service or ASDS as listed in AT&T Tariff F.C.C. No. 10.

7.1.6 REGIONAL FRS COMPONENTS AND RATES

The charges for Regional FRS consist of Non-Recurring Charges and Monthly Charges for Regional Access Ports and Regional PVCs.

A. REGIONAL ACCESS PORTS

Provides connection capability within and between any of the LATAs specified in Section 7.1.5, preceding. Regional Access Ports connect to Regional PVCs as specified in Section 7.1.7, following. A Regional Access Port can connect within the same LATA to a Domestic Port, Global Port or a Regional Access Port via an IntraLATA PVC. A Regional Access Port can connect to a Regional Access Port in another LATA within the state of Missouri, as specified in Section 7.1.5 preceding, via an InterLATA PVC.

7.1.6 REGIONAL FRS COMPONENTS AND RATES (Continued)

REC'D OCT 25 2002

B. REGIONAL ACCESS PORT CHANGE CHARGES

Service Commission

1. A Customer can request to increase or decrease a port speed or change a Domestic Port to a Regional Access Port or change a Global Port to a Regional Access Port at any time after the service date for the Port. A Regional Access Port Change Charge will apply for each change.

Port Change Charge

- per port speed change or port type change \$100.00

2. A change of the physical location of a Customer's Premises that requires a change to an existing Regional Access Port connection is considered to be a discontinuance and re-installation of the Regional Access Ports involved. Discontinuance provisions will apply as specified in Section 7.1.2.B., preceding. Installation Charges for Regional Access Ports will apply as specified in 7.1.6.C., following. A change of the physical location of a Customer's Premises that does not require a change to an existing Regional Access Port connection is considered a change and the Regional Access Port Change Charge in 7.1.6.B.1., preceding will apply.

C. REGIONAL ACCESS PORT CHARGES

Installation Charges and Monthly Recurring Charges apply for each Regional Access Port as specified in the Regional Access Port Charges Table. A Port Interconnection Monthly Charge applies for each Regional Access Port on which an InterLATA PVC or Domestic PVC terminates. The Port Interconnection Monthly Charge is in addition to the Regional Access Port Monthly Charge.

SECTION 7 - REGIONAL FRAME RELAY SERVICE (Continued)

REC'D MAY 04 1999

7.1.7 REGIONAL PVCs

Regional PVCs are provided solely in a two-way configuration. Regional PVCs must connect to at least one Regional Access Port. Domestic and Global Ports are available as specified in AT&T Tariff F.C.C. No. 4. A two-way PVC transmits and receives simultaneously. There are two types of Regional PVCs: IntraLATA and InterLATA.

An IntraLATA PVC is a logical connection between two Regional access Ports located within the same LATA, or between a Regional Access Port and a Domestic Port located within the same LATA, or between a Regional Access Port and a Global Port located within the same LATA.

An InterLATA PVC is a logical connection between two Regional Access Ports located in different LATAs in the same state.

A. REGIONAL PVC CIR CHANGE CHARGE

A Customer can request to increase or decrease a Regional PVC CIR at any time after the service date for that Regional PVC. A PVC CIR Change Charge will apply for each change to a Regional PVC CIR.

Regional PVC Change Charge

- per Regional PVC CIR change \$25.00

A change of the physical location of the Customer's Premises that requires a change to an existing Regional Access Port connection requires discontinuance and re-installation of the Regional PVCs involved.

Discontinuance provisions will apply as specified in Section 7.1.2.B., preceding. Installation Charges for Regional PVCs will apply as specified in 7.1.7.B., following.

B. REGIONAL PVC INSTALLATION CHARGES

Installation Charges apply for the installation of each Regional PVC.

Installation Charge

- per Regional PVC

\$25.00

SECTION 8 - VOICE GRADE LOCAL CHANNEL SERVICES

RECEIVED

MAR 30 1992

8.1 GENERAL

A Voice Grade Local Channel Service provides for the transmission of analog signals within a frequency bandwidth of approximately 300 to 3000 Hz.

8.1.1 DESCRIPTION

A Voice Grade Local Channel Service is suitable for transmission in one direction only (one-way) or transmission in two directions (two-way), of voice, data or any other application required by the Customer which utilizes analog signals within the specified transmission parameters of the local channel. The application required by the Customer is accommodated via a technical specifications package. The transmission standards for the various technical specifications packages and for Voice Grade Local Channel Service in general are contained in Technical Publications-PUB 41004, Table 4, PUB 62501 and PUB 62501, Addendum (see Technical Publication Information, Sheet 18).

A Voice Grade Local Channel Service is provided (1) between one or more Customer premises and an AT&T Central Office, or (2) between two or more Customer premises, or (3) solely as an access coordination function(s).

At the Customer's request AT&T will provide service to multiple Customer premises within a LATA through the use of a bridge(s) located at a Local Exchange Company central office(s). However, if AT&T determines that it is unable to meet service design and technical performance criteria in the configuration requested, the Customer will be advised and given the opportunity to cancel or change the order. In such cases, no charge will apply for the cancellation or change in the Customer's order.

SECTION 8 - VOICE GRADE LOCAL CHANNEL SERVICES

8.1 GENERAL (Continued)

8.1.1 DESCRIPTION (Continued)

Examples of technical considerations are:

- generally data circuits will not perform satisfactorily with more than three inter-bridge circuit links in tandem.
- AT&T's ability to test and restore circuits is diminished when bridging occurs outside its Central Offices. This is particularly severe when bridges are connected in tandem outside its Central Offices.

When a multipoint local channel service is furnished the local channel is billed in accordance with the configuration provided via Bridged and Inter-Bridge Channels as set forth in Sections 8.2.3 and 8.2.4.

8.1.2 REGULATIONS

In addition to the regulations in Section 2 preceding, the following apply.

A. AVAILABILITY OF A LOCAL CHANNEL SERVICE

Voice grade Local Channel Services are available from the AT&T Central Offices listed in Tariff F.C.C. No. 10. In addition, the Local Exchange Company central offices at which bridging is available are listed in the Local Exchange Company Special Access Tariffs.

B. CREDIT ALLOWANCES FOR INTERRUPTIONS

For purposes of determining credit allowance in accordance with the regulations in Section 2.7 preceding, a Voice Grade Local Channel is considered to be interrupted when:

- There has been a loss of continuity on the local channel, or
- Transmission is unsatisfactory and the local channel does not meet its specified transmission parameters.

8.1.2 REGULATIONS (Continued)

C. INSTALLATION CHARGE WAIVER

REC'D DEC 21 1999

Installation charges will be waived for Voice Grade Local Channel Services including the Access Coordination Function and Voice Grade Local Channel C and D Type Data Conditioning for Customers who order a new ACCUNET Spectrum of Digital Service (ASDS) with IOC provided under AT&T's Tariff P.S.C. Mo. No. 9, used in conjunction with Voice Grade Local Channel Service.

Excluded from the installation charge waiver are:

- IOC or Local Channel signaling capability
- Replacement of existing service with a service of the same type and speed
- Additions to and/or rearrangements to existing services

A Customer who discontinues service prior to 12 full months will be billed for the waived charges.

However, a Customer may discontinue service without liability for waived charges as specified in Section 16 under AT&T's Tariff P.S.C. Mo. No. 9.

AUG 15 1995

8.1.7 SELECT SAVINGS PLAN (SSP)

Select Savings Plans (SSP) with terms from one to five years are available as an alternative to conventional monthly rates for Local Channel Services and Channel Options of Digital Data Local Channel (DDLC) Services, Voice Grade Local Channel (VGLC) Services and ACCUNET Generic Digital Access (AGDA) Services connected to ACCUNET Spectrum of Digital Services (ASDS). In exchange for a term commitment on each individual service, the customer is given monthly rates that are discounted for the duration of the term. Rates may change from time to time however, the discount levels applied will not change during the term of the plan. If a customer requests additions/changes to any service currently included under a SSP, the monthly discounts that were in effect on the date the customer originally committed to a plan will be applied to the new rates.

Non-recurring charges will not be discounted. When a customer requests service, the non-recurring charges will be applied based on the rates in effect on the date that the service order is completed by AT&T.

A. SELECT SAVINGS PLAN STRUCTURE

A SSP will include all of the ACCUNET AGDA Services, DDLC Services and VGLC Services or service components with the exception of Voice Grade Signaling Channel Option and Digital Data Transfer Arrangements.

The plan will be available in one month increments from twelve months (one year) through sixty months (five years). The discount is fixed for the life of a plan. Monthly rates for all months will be discounted based on the term commitment as follows:

<u>Term commitment</u>	<u>Local Channel Discount</u>
12-23 Months	6%
24-35 Months	8%
36-60 Months	10%

SECTION 8 - VOICE GRADE LOCAL CHANNEL SERVICES

RECEIVED

8.1 GENERAL (Continued)

AUG 15 1995

8.1.7 SELECT SAVINGS PLAN (Continued)

B. SELECT SAVINGS PLAN COMMITMENT AND PLAN RESTRICTIONS **NO. PUBLIC SERVICE COMM.**

The customer must commit each individual service into a SSP. Each service must include all AT&T Private Line Services Tariff - Schedules 9 and 11 components under a plan. Both existing and new services are eligible. The following are not eligible for inclusion in a SSP:

- Individual Case Basis (ICB) rates
- Local Channel Special Routing
- Local Channels not connected through an AT&T Central Office
- Signaling
- Transfer Arrangements
- Administrative Charges
- Non-recurring Charges
- Special Access Surcharge

C. DISCONTINUANCE OF SELECT SAVINGS PLAN - WITHOUT LIABILITY

The customer may terminate a SSP without liability under the following conditions:

1. An ASDS Customer with 9.6 kbps or 56 kbps service and voice grade access may replace their end to end service with a new 9.6 kbps or 56 kbps service with digital access, provided the replacement service is enrolled in a SSP with an expiration date equal to or later than that of the service being replaced. The requested installation date for the new service must be on or before the requested disconnect date of the service being replaced.

8.1 GENERAL (Continued)

8.1.7 SELECT SAVINGS PLAN (Continued)

MO. PUBLIC SERVICE COMM.

C. DISCONTINUANCE OF SELECT SAVINGS PLAN - WITHOUT LIABILITY  
(Continued)

2. An existing SSP service may be replaced with a new AT&T ACCUNET digital service of a higher speed, provided the replacement service, if it is ASDS, is enrolled in a SSP that has an expiration date that is equal to or later than that of the service being replaced. The installation date requested for the new ACCUNET service must be on or before the requested disconnect date of the service being replaced.
3. A customer may also move an existing SSP service to a different location(s) or change the AT&T point-of-presence provided that the installation date requested for the move and/or change is on or before the requested disconnect date, and both installation and disconnect requests are made concurrently. The moved and/or changed service will be subject to the time commitment remaining under the original SSP.
4. If the customer commits to a new twenty-four through sixty month replacement SSP with an expiration date that is 12 or more months later than the expiration date of the plan being replaced. The plan being replaced will terminate on the day preceding the start date of the new plan. The rates for the new SSP will be determined using the rates in effect at the time the customer commits to service under the new plan.
5. An ASDS Customer with DDLC access service may replace their DDLC access service with AGDA Service, provided AGDA Service is of equal speed. The AGDA Service will be subject to the time commitment remaining under the customers' original SSP, and all SSP components will be repriced and/or recalculated as specified in existing SSP regulations, concerning customer requested additions and/or changes.

RECEIVED

8.1 GENERAL (Continued)

AUG 15 1995

8.1.7 SELECT SAVINGS PLAN (Continued)

D. DISCONTINUANCE OF A SELECT SAVINGS PLAN - WITH LIABILITY ~~NO PUBLIC SERVICE COMM.~~

Discontinuance of a service and/or service component furnished under a SSP, prior to the expiration of the applicable term will result in customer liability as specified below:

1. For service discontinued prior to the completion of the specified term plan the customer is liable for a percentage of the total undiscounted fixed monthly rates for the remaining portion as follows:

<u>Remaining Portion</u>	<u>Local Channel Liability</u>
1-12 months	50%
13-24 months	40%
25-36 months	30%
37-48 months	20%
49-60 months	10%

The following examples illustrate how the customer will be charged for early discontinuance:

Examples

- (a) A 12 month plan is established for a two-point service but the service is disconnected prior to the end of the 9th month. Discontinuance charges will be calculated at 50% of the monthly charges for the remaining portion of the 9th month and all of months 10-12.
- (b) A 30 month plan is established for a two-point service but the service is disconnected prior to the end of the 22nd month. Discontinuance charges will be calculated at 40% of the monthly charges for the remaining portion of the 22nd month and for all of month 23-24. In addition, discontinuance charges will be calculated at 30% for months 25-30.

D. DISCONTINUANCE OF A SELECT SAVINGS PLAN - WITH LIABILITY  
(Continued)

- (c) A 60 month plan is established for a multipoint service but the service is disconnected prior to the end of the 40th month. Discontinuance charges will be calculated at 20% of the remaining portion of the 40th month and for all of months 41-48. In addition, discontinuance charges will be calculated at 10% for months 49-60.
- (d) A 24 month plan is established for a multipoint service but one location is disconnected prior to the end of the 6th month. Discontinuance charges for all service components associated with the disconnected location will be calculated at 50% for the remaining portion of the 6th month and all of months 7-12. In addition, for the disconnected service components, discontinuance charges will be calculated at 40% for months 13-24. No discontinuance charges are applied to the service components that remain in service at all of the other circuit locations.

AUG 15 1995

8.1.7 SELECT SAVINGS PLAN (Continued)

E. EXPIRATION AND RENEWAL OF A SELECT SAVINGS PLAN

MO. PUBLIC SERVICE COMM.

Upon expiration of a SSP, the customer has the option to obtain a new SSP, or other available plan or to obtain service under conventional monthly rates.

If the customer chooses to subscribe to a new SSP, the start date of the new plan may not be earlier than the day following the expiration date of the former plan.

To continue the same service under monthly rates, no action is required on the part of the customer. Upon expiration of the SSP, and unless notification to the contrary is received, the customer's service will automatically be continued at rates specified under the monthly rate plan in effect at that time.

The customer may renew service under a new SSP by notifying AT&T in writing anytime prior to the expiration of the current SSP.

SECTION 8 - VOICE GRADE LOCAL CHANNEL SERVICES

8.2 VOICE GRADE LOCAL CHANNEL SERVICE RATES (Continued)

8.2.6 SPECIAL ACCESS SURCHARGE

In addition to the rates set forth in Sections 8.2.1 through 8.2.4 preceding, a Special Access Surcharge applies to each termination of a Voice Grade Local Channel Service which is terminated in a PBX or equivalent device capable of interconnecting the channel with the local exchange network. When such terminations are connected by one local channel service, only one Special Access Surcharge applies (for additional information regarding the application of the Special Access Surcharge, refer to the regulations set forth in Section 2.6.6.B preceding).

A. RATES

- Per Special Access Surcharge (USOC and rates are as set forth in Section 5.2.4 preceding).

8.2.7 CHANNEL OPTIONS

The following channel options are available for use with Voice Grade Local Channel Services.

A. CONDITIONING

Conditioning provides more specific transmission characteristics for Voice Grade Local Channel Services. For two-point local channel services the parameters apply to each local channel. For multipoint local channel services, the parameters apply between two communicating points. The types of conditioning which are available are C-Type Conditioning and D-Type Conditioning. The specifications for each type of conditioning are set forth in Section 5 of Technical Publications-PUB 62501 and PUB 62501, Addendum (see Technical Publication Information, Sheet 18).

SECTION 8 - VOICE GRADE LOCAL CHANNEL SERVICES

8.2 VOICE GRADE LOCAL CHANNEL SERVICE RATES (Continued)

8.2.7 CHANNEL OPTIONS (Continued)

B. SIGNALING (Continued)

The signaling arrangement to be used on a local channel service is dependent on the type of equipment connected to the local channel service, the function of the channel (e.g., off-premises station, foreign exchange, tie trunk) and the manner in which the Customer wants the signal process to operate (e.g., ringdown, dial).

1. LOOP START LOOP SIGNALING

Loop Start Loop Signaling is used for off-premises stations, trunk to station tie lines, and other channels which are terminated in switching equipment at one end and other terminal equipment (e.g., in a handset) at the other end. The interface with the switching equipment is referred to as the open end and the interface with the station is referred to as the closed end.

This signaling arrangement is designed to pass an open loop (idle condition) or closed loop (seized condition) from the station to the switching equipment. It will transmit dial pulse or multifrequency pulsing signals from the station to the switching equipment and dial tone and 20 Hertz ringing from the switching equipment to the station.

2. GROUND START LOOP SIGNALING

Ground Start Loop Signaling is used for channels which interface with central office switching equipment on the open end and PBX on the closed end to provide a PBX to central office trunk.

In the operation of this arrangement the closed end provides a closed loop and momentary ground for the ring conductor as a seizure. The open end provides a ground on the tip and battery on the ring as a seizure. This arrangement will transmit dial tone and 20 Hertz ringing from the open end to the closed end, and will transmit dial pulses or multifrequency pulsing address signals from the closed end to the open end.

B. SIGNALING (Continued)

3. E&M SIGNALING INTERFACE

This signaling arrangement is used for registered or grandfathered switching equipment tie trunks and is available as Type I, II or III E&M Signaling.

4. TWO-POINT AUTOMATIC RINGDOWN SIGNALING ARRANGEMENTS LOOP CLOSURE INTERFACE

In this signaling arrangement, the calling station activates 20 Hertz ringing by providing a tip to ring conductor short as an off-hook signal. The 20 Hertz ringing operates a bell or relay at the distant station. Loop Closure interface is used for handset, key set, switchboard and console terminations.

5. MANUAL SIGNALING ARRANGEMENTS FOR TWO-POINT OR MULTIPOINT LOCAL CHANNEL SERVICES 20 HERTZ INTERFACE

In this signaling arrangement the calling station transmits 20 Hertz ringing activated by the operation of a key or a button. The 20 Hertz ringing activates a bell or relay at the distant station. In the multipoint local channel service application, all stations receive the ring from the calling location.

6. MANUAL SIGNALING ARRANGEMENTS WITH CODE SELECTION FOR MULTIPOINT LOCAL CHANNEL SERVICES

This signaling arrangement is similar to the Manual Signaling Arrangement for Two-Point Local Channels except that the calling station can select a single distant station or group of stations by keying one of nine predetermined codes. Only the station or stations called will respond to the ringing current.

C. SPECIAL ROUTING

A Voice Grade Local Channel is normally furnished using facilities selected by AT&T. Various special routing options are available for Voice Grade Local Channels. These special routing options have associated charges in addition to other applicable charges. If complete Special Routing is not available when ordered, or if it becomes unavailable at a later date due to network rearrangements, Special Routing may only be furnished on a partial basis. The Customer will be advised before partial Special Routing is provided and may cancel the order or discontinue the special routing if the partial Special Routing is not acceptable. No cancellation charge will apply in such cases. The Customer options for special routing follow. Special Routing is furnished subject to the availability of facilities.

1. DIVERSITY

Two or more local channels are furnished partially or entirely over not more than two physically separated routes. Diversity is furnished for any portion of the local channel or in its entirety. If there are more than two local channels, the local channels are divided into two groups and furnished partially or entirely over two physically separated routes.

The rates for diversity are as set forth in a. following.

SECTION 12 - TERRESTRIAL 45 MBPS LOCAL CHANNEL SERVICES

12.1 GENERAL

JAN 30 1998

A Terrestrial 45 Mbps Local Channel Service provides for the transmission of 44.736 Mbps digital signals. **MISSOURI**  
Public Service Commission

Terrestrial 45 Mbps Local Channel Services use a framed DS3 signal format. When used to carry Multiplexed DS1 Channels the signal carried within the framed DS3 format must contain Extended Superframe formatted DS1 channels, to a maximum of 28.

12.1.1 DESCRIPTION

A Terrestrial 45 Mbps Local Channel Service provides a digital channel for the two-way simultaneous transmission of signals at the DS3 rate of 44.736 Mbps. The transmission specification standards for Terrestrial 45 Mbps Local Channel Service are contained in Technical Publications-PUB 43802 and 54016 and Compatibility Bulletin 119 (see Technical Publication Information, Sheet 18).

A Terrestrial 45 Mbps Local Channel Service is suitable for the transmission of voice, data (including ACCUNET Spectrum of Digital Services) or any other application required by the Customer which utilizes digital signals within the specified transmission parameters of the local channel.

A Terrestrial 45 Mbps Local Channel Service may be furnished (1) between a Customer's premises and a designated AT&T Central Office or (2) between two Customer's premises or (3) solely as an Access Coordination Function. (CT)  
(CT)

12.1.2 REGULATIONS

In addition to the General Regulations in Section 2 preceding, the following apply.

A. AVAILABILITY OF A LOCAL CHANNEL SERVICE

Terrestrial 45 Mbps Local Channel Services are available from the designated AT&T Central Offices listed in AT&T Tariff F.C.C. No. 10. Terrestrial 45 Mbps Local Channel Services may not be available in every LATA.

(AT)

B. CREDIT ALLOWANCES FOR INTERRUPTIONS

For purposes of determining credit allowances in accordance with the regulations in 2.7 preceding, a Terrestrial 45 Mbps Local Channel Service is considered to be interrupted when:

- there has been a loss of continuity, or
- 300 or more seconds of transmission containing errors occur in a 15-minute period on a DS3 level.

12.1.3 MINIMUM PAYMENT PERIOD

The minimum payment period for a Terrestrial 45 Mbps Access Coordination Function shall be one year, unless otherwise indicated in 12.2.2 following. The minimum payment period for a Local Channel is established on an individual case basis.

12.1.4 (RESERVED FOR FUTURE USE)

12.1.5 NOTICE OF DISCONTINUANCE

The Notice of Discontinuance for Terrestrial 45 Mbps Local Channel Services is three months. Recurring charges will apply for a period of three months from the date the Company receives the discontinuance notice or until the discontinuance date, whichever period is longer.

12.1.6 (RESERVED FOR FUTURE USE)

12.1.7 CANCELLATION CHARGE

As specified in Section 2.6.7.B.1 preceding, the cancellation charge for Terrestrial 45 Mbps Local Channel Service orders canceled after the start of installation will be equal to an estimate of the net costs incurred in each installation not to exceed the charges for the minimum payment period.

JAN 30 1998

12.2 TERRESTRIAL 45 MBPS LOCAL CHANNEL SERVICE RATES

The rates applicable to Terrestrial 45 Mbps Local Channel Services are as follows.

**MISSOURI**  
Public Service Commission

Service provided to a Customer whose aggregate monthly charge is expected to be \$2,000 or more will be provided on an Individual Case Basis (ICB). Rates for services offered on an Individual Case Basis will be structured to recover the Company's cost of providing the services. Terms of specific ICB contracts will be made available to the Commission upon request on a proprietary basis. Any of the Company's service rates may be revised, discontinued or supplemented from time to time, in accordance with applicable law and the rules, regulations and orders of the Commission.

12.2.1 LOCAL CHANNELS

The rates for the local channel component of a Terrestrial 45 Mbps Local Channel Service are established on an individual case basis.

The rates for local channels are as follows:

A. MONTHLY RATES

InterLATA and IntraLATA

RECEIVED

JUL 17 1992

SECTION 12 - TERRESTRIAL 45 MBPS LOCAL CHANNEL SERVICES

12.2 TERRESTRIAL 45 MBPS LOCAL CHANNEL SERVICE RATES

MISSOURI (AT)

The rates applicable to Terrestrial 45 Mbps Local Channel Services are as follows.

Service provided to a Customer whose aggregate monthly charge is expected to be \$2,000 or more will be provided on an Individual Case Basis (ICB). Rates for services offered on an Individual Case Basis will be structured to recover the Company's cost of providing the services. Terms of specific ICB contracts will be made available to the Commission upon request on a proprietary basis. Any of the Company's service rates may be revised, discontinued or supplemented from time to time, in accordance with applicable law and the rules, regulations and orders of the Commission.

12.2.1 LOCAL CHANNELS

The rates for the local channel component of a Terrestrial 45 Mbps Local Channel Service are established on an individual case basis.

The rates for local channels are as follows:

A. MONTHLY RATES

LEC/LATA	USOC	MILEAGE	MONTHLY FIXED	MONTHLY PER MILE	INSTALLATION CHARGE
----------	------	---------	------------------	---------------------	------------------------

Rate Schedule 1 - SWBT

520	1LNV9	0	ICB	ICB	
521		1-4	ICB	ICB	
522		5-8	ICB	ICB	
524		9-25	ICB	ICB	
		26-50	ICB	ICB	
		Over 50	ICB	ICB	

Rate Schedule 2 - OTHER THAN SWBT

520	1LNV9	0	ICB	ICB	ICB
521		1-4	ICB	ICB	
522		5-8	ICB	ICB	
524		9-25	ICB	ICB	
		26-50	ICB	ICB	
		Over 50	ICB	ICB

SECTION 12 - TERRESTRIAL 45 MBPS LOCAL CHANNEL SERVICES

12.2 TERRESTRIAL 45 MBPS LOCAL CHANNEL SERVICE RATES (Continued)

12.2.2 ACCESS COORDINATION FUNCTION (ACF)

An Access Coordination Function is required for each local channel provided under this schedule or for each access channel provided by the Customer for which the Company provides access coordination.

The rates for Access Coordination Functions are established on an individual case basis.

A. RATES

	<u>USOC</u>	<u>MONTHLY</u>	<u>INSTALLATION CHARGE</u>
- Per access coordination function	AHOAA	ICB	ICB

12.2.3 SPECIAL ACCESS SURCHARGE

In addition to the rates set forth in Sections 12.2.1 and 12.2.2 preceding, a Special Access Surcharge applies to each voice grade equivalent channel, derived from a Terrestrial 45 Mbps Local Channel Service which is terminated at a PBX or equivalent device capable of interconnecting the derived channel with the local exchange network. (For additional information regarding the application of the Special Access Surcharge, refer to the regulations set forth in Section 2.6.6.B preceding.)

A. RATES

- Per termination of a derived voice grade equivalent channel (USOC & rates are as set forth in Section 5.2.4 preceding).

SECTION 13 - AT&T PRIVATE LINE LOCAL CHANNEL SONET SERVICES

(CT)

13.1 GENERAL

(N)

The AT&T Private Line Local Channel SONET Services provide for transmission of various digital signals.

13.1.1 DESCRIPTION

These AT&T Private Line Local Channel SONET Services are configured by combining service components at designated AT&T Central Offices. The AT&T Central Offices may be within the same LATA or may be in different LATAs.

Local Channel Service used for AT&T Private Line SONET Services is suitable for the transmission of voice, data (including ACCUNET Spectrum of Digital Services) or any other application required by the Customer which utilizes digital signals within the specified transmission parameters of the local channel.

Local Channel Service may be furnished (1) between a Customer's premises and a designated AT&T Central Office or (2) solely as an Access Coordination Function.

All signals carried by local channels or other access and presented to the AT&T Central Offices must meet certain signal and format constraints. These constraints are described in the following Technical Publications:

- TR 54018 - Optical Interface Specifications
- GR-523-CORE - Synchronous Optical Network (SONET) Transport Systems:
  - Common Generic Criteria
  - (Bellcore)

13.1.2 REGULATIONS

In addition to the regulations in Section 2., preceding, the following apply.

A. AVAILABILITY OF LOCAL CHANNEL SERVICE

Local Channels used for AT&T Private Line SONET Services may not be available in every LATA.

B. CREDIT ALLOWANCES FOR INTERRUPTIONS

For purposes of determining credit allowances in accordance with the regulations in 2.7. preceding, a Local Channel Service used for AT&T Private Line SONET Services is considered to be interrupted when:

- there has been a lost of continuity, or
- 300 or more seconds of transmission containing errors occur in a 15-minute period on an OC3 level.

13.1.3 MINIMUM PAYMENT PERIOD

The minimum payment period for a Local Channel Service or Access Coordination Function used for AT&T Private Line SONET Service shall be 12 months.

13.1.4 CANCELLATION CHARGE

As specified in Section 2.6.7 preceding, the cancellation charge for individual case basis orders canceled after the start of installation will be equal to an estimate of the net costs incurred in each installation not to exceed the charges for the minimum payment period.

(Continued)

(N)

13.1.7 SPECIAL ACCESS SURCHARGE

Special Access Surcharge as specified in Section 5.2.4.,  
preceding.

13.1.8 CHANNEL OPTIONS

The following channel option(s) are available for use with Local  
Channel Services used for AT&T Private Line SONET Services:

A. SPECIAL ROUTING

Local Channel Service is normally furnished using facilities  
selected by AT&T. However, special routing options are available  
where the required components are available. If complete Special  
Routing is not available when ordered, or if it becomes  
unavailable at a later date due to network arrangements, Special  
Routing may only be furnished on a partial basis. The Customer  
will be advised before partial Special Routing is provided and may  
cancel or discontinue the special routing if the partial Special  
Routing is not acceptable. No cancellation charge will apply in  
such case. The special routing option available for Local Channel  
Service is Local Channel Protection Capability.

1. LOCAL CHANNEL PROTECTION CAPABILITY

Local Channel Protection Capability (LCPC) provides two  
physically separate high capacity fiber optic local channels  
(primary and secondary) equipped within automatic restoration  
capability to provide backup in the event of a single facility  
break or an electronic failure. Local Channel Protection  
Capability is available between the Customer premises and the  
AT&T central office, between the LEC serving wire center for  
the Customer premises and the AT&T central office or between  
the Customer premises and the LEC serving wire center for that  
premises.

When facilities are not available, the Company may request  
special construction of plant to satisfy its requirement.  
When special construction is necessary, charges will be  
developed on an individual case basis.
