TARIFF FORMAT SHEET

1. Page Numbering. Page numbers appear in the upper-right corner of the page. Pages are numbered sequentially. New pages may occasionally be added to the tariff. When a new page is added, the page appears as a decimal. For example, a new page added between pages 34 and 35 would be 34.1.
2. Page Revisions Numbers. Page Revision Numbers also appear in the upper-right corner of the page. These numbers are used to determine the most current page revision on file with the Missouri Public Service Commission. For example, the fourth revised Page 34 cancels the third revised Page 34. Because of deferrals, notice periods, *etc.*, the most current page number on file with the Commission is not always the tariff page in effect. Business Customers should consult with check sheet for the page currently in effect.
3. Paragraph Numbering Sequence. There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level of coding.
  - 1.
  - 1.1.
  - 1.1.1.
  - 1.1.1.A.
  - 1.1.1.A.1.
  - 1.1.A.1.(a)
  - 1.1.1.A.1.(a)(I)
  - 1.1.1.A.1.(a)(I)(i)
  - 1.1.1.A.1.(a)(I)(i)(1)
4. Check List of Effective Pages. When a tariff filing is made with the Commission, an updated Check List of Effective Pages ("Check List") accompanies the tariff filing. The Check List lists the pages contained in the tariff, with a cross-reference to the current revision number. When new pages are added, the Check List is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (\*). There will be no other symbols used on the Check List if these are the only changes made to it (i.e., the format, *etc.*). Customers should refer to the latest Check List to find out if a particular page is the most current page on file with the Commission.
5. Symbols Used in This Tariff.

(AT)	To signify addition to text.
(C)	To signify a correction.
(CP)	To signify a change in practice.
(CR)	To signify a change in rate.
(CT)	To signify a change in Text.
(DR)	To signify a discontinued rate.
(FC)	To signify a change in format lettering or numbering.
(MT)	To signify moved text.

SECTION 3 - DESCRIPTION OF SERVICES3.1. Local Exchange Telecommunications Services (cont'd)3.1.2. Service Description (cont'd)3.1.2.B. Residential Services (cont'd)

2. Residential service offerings that include unlimited usage are limited to use for residential voice applications. This includes service offerings providing for unlimited local usage, unlimited intraLATA usage and/or unlimited interLATA usage. No commercial use of any form is permitted for such unlimited service offerings. Incidental calling for dial-up internet access, for data and fax type applications and for other similar restricted uses reflected in this tariff is permitted up to a maximum of 1200 minutes within any thirty-day period; any such usage beyond this threshold shall be presumed to be non-residential in nature. If, at any time, the Company determines that the Customer's usage is non-residential or is not consistent with use for residential voice applications, the Company may immediately take actions to enforce adherence to this tariff and to the Company's Statement of Terms and Conditions of Service that are applicable to interLATA and international long distance. Such actions may include the transition to a higher tier within the customer's existing service plan and the application of the High Usage Charge as specified in Section 4.1.12, following.

The High Usage Charge is applicable to all Residential service plans whenever usage thresholds established in Section 4.1.12, following, are exceeded, including plans that offer unlimited usage and plans that do not offer unlimited usage. The existence of the High Usage Charge shall be communicated to the Customer in advance of its initial application, and shall thereafter apply automatically whenever the threshold is exceeded. Upon request, usage information will be provided pursuant to Section 4.1.12, following.

For residential service offerings that include unlimited usage, the Company will notify the Customer in writing when the previous month's usage exceeds that normally associated with residential voice applications. Such written notice will inform the Customer that a higher tier rate will apply if, after two additional months, the usage remains above usage thresholds established in the existing service plan. Customers whose excessive usage levels resulted in a higher rate will, upon request, qualify for the lower-tier rate(s) after three consecutive months of usage below usage thresholds established in the existing service plan. The High Usage Charge is a separate element and applies independently of any unlimited plan rate tier.

SECTION 3 - DESCRIPTION OF SERVICES3.1. Local Exchange Telecommunications Services (cont'd)3.1.8. Custom Calling Features

3.1.8.A. Service Offerings available to Customer's and End Users of Sage's local exchange service on local access lines only, subject to availability from the central office serving the customer:

1. Auto Redial - Enables the customer to redial automatically the last outgoing telephone number. If the telephone number is busy, Auto Redial will continue trying to call the number for a maximum of thirty (30) minutes, beginning with the customer's activation of Auto Redial, in an attempt to establish the call. The customer will be signaled with a distinctive ring when the call can be completed. Auto Redial is available as a monthly plan or on a per use basis. Per use functionality is automatically provisioned on all lines. The customer may request to have Auto Redial taken off their lines.
2. Call Blocker - Enables the customer to block calls from pre-selected telephone numbers and/or the last incoming call (without knowing the number). To block specified telephone numbers, the customer builds a screening list of up to 31 telephone numbers. To block an unknown number after receiving a call, the customer enters a code to add the number to their screening list. If facilities are unavailable to provide incoming call screening via the customer's list, standard call completion will occur. Customers whose telephone numbers are blocked are directed to a recorded announcement.
3. Call Forwarding - Enables the customer to transfer all incoming calls to another telephone number within the exchange or on the Long Distance Telecommunications Network. The Call Forwarding customer is responsible for the payment of charges (e.g., toll charges) for each call between his Call Forwarding-equipped telephone and the telephone to which the call is being forwarded.

Includes Busy Line and Don't Answer features, as defined below. Customer may decline these additional features.

Call Forwarding - Busy Line allows incoming calls that encounter a busy condition to be forwarded to a pre-designated telephone number within the exchange or on the Long Distance Telecommunications Network.

Call Forwarding - Don't Answer allows incoming calls which are not answered after a pre-determined number of rings to be automatically forwarded to a pre-designated telephone number within the exchange or on the Long Distance Telecommunications Network.

4. Call Return - Enables the customer to redial automatically the last incoming telephone number. If that telephone number is busy, Call Return will continue trying to call the number for a maximum of thirty (30) minutes beginning with the customer's activation of Call Return in an attempt to establish the call. The customer will be signaled with a distinctive ring when the call can be completed. This service will not function if the calling party's telephone number has been Call Forwarded. Also, this service will not function from a line that does not have an associated telephone number, e.g., multi-line hunting groups. Call Return is available as a monthly plan or on a per use basis. Per use functionality is automatically provisioned on all lines. The customer may request to have the per use functionality taken off its lines.
5. Call Trace - Enables the customer to initiate a trace of the last completed incoming call by dialing an activation code before receiving another call. If a trace is successful, Call Trace will record the incoming call detail (not the conversation). A successful trace cannot be made if the incoming call originates in a central office not equipped for Call Trace service. The customer will not be provided the results of the trace (*i.e.*, the telephone number traced). Such call detail may be provided only to law enforcement authorities upon proper request.

For further action to be taken, the customer is required to contact Sage Telecom via the telephone number provided in the Call Trace announcement.

At its option or upon receipt of proper request from a law enforcement agency, Sage will set up a temporary tracing arrangement using Call Trace or manual trap and trace where Call trace is not available at no charge to the customer when in the judgment of Sage or law enforcement agency, the unwanted call(s) present a serious threat of bodily harm or destruction of property.

9. Personalized Ring - Personalized Ring service permits a customer to establish up to three telephone numbers on the same access line and to distinguish calls to each number by distinctive incoming ring patterns. The billing telephone number is the "master" number and the other telephone numbers are "dependent" numbers. The standard ringing pattern is provided for the master number while distinctive ringing patterns are provided for a maximum of two dependent numbers.

When a Personalized Ring customer subscribes to any Call Forwarding feature, dependent numbers can either be forwarded to the same number as the master number or receive no forwarding treatment at all.

When a Personalized Ring customer subscribes to Call Waiting, incoming calls to the master number will activate the standard Call Waiting tone. Incoming calls to the dependent numbers will activate a distinctive Call Waiting tone per dependent number.

A directory listing is furnished per telephone number. When a customer requests the dependent numbers to be non-published or non-listed, Sage Telecom will provide without charge. However, if the master number and all dependent numbers are non-published and/or non-listed, the appropriate monthly rate is applicable to the master number.

10. Priority Call - Provides the customer with a distinctive ring or distinctive Call Waiting tone (if the customer has subscribed to Call Waiting and Priority Call), when the customer is called from pre-selected telephone numbers. The customer can construct or modify a telephone number screening list. Priority Call will screen incoming calls against the customer's list and provide the distinctive ring for telephone numbers on the list.
11. Remote Access to Call Forwarding - Permits the customer who also subscribes to Call Forwarding with the ability to activate, deactivate or change Call Forwarding from a remote location. Remote Access to Call Forwarding can only be accessed from a Dual Tone Multi-Frequency (DTMF) telephone which has a full set of characters, including "\*" and "#". All charges incurred to access the remote number will be billed appropriately.

## 3.1.8.A. Service Offerings (cont'd)

12. Selective Call Forwarding - Provides the customer with the ability to forward incoming calls from pre-selected telephone numbers to another telephone number. The customer may construct or modify a telephone number screening list. Selective Call Forwarding will screen incoming calls against the customer's list and forward only those calls from telephone numbers on the list. The maximum amount of telephone numbers available for each customer's list may vary depending on switch type. The Selective Call Forwarding customer is responsible for the payment of charges (e.g., toll charges) for each call between the Selective Call Forwarding equipped telephone line and the line to which the call is being forwarded. Calls from numbers not on the list will receive standard call completion.

13. Speed Calling 8 - Enables a customer to place calls to other telephone numbers by dialing a one- or two-digit code rather than the complete telephone number. Customer may store up to eight (8) telephone numbers.

14. Speed Calling 30 - Enables a customer to place calls to other telephone numbers by dialing a one- or two-digit code rather than the complete telephone number. Customer may store up to 30 telephone numbers.

For residence customers, Speed Calling 30 is obsolete except for existing Speed Calling customers at existing locations. Speed Calling 30 is available to business customers.

15. Three-Way Calling - Enables a customer to add a third party to an existing call without operator assistance, thereby establishing a three-way conversation.

3.1.8.B. Calling features are subject to availability of facilities and compatibility with central office equipment, access lines, and customer premises equipment.

3.1.8.C. Auto Redial, Call Blocker, Call Return, Call Trace, Priority Call, Selective Call Forwarding and Caller ID are functional when both the call originating customer and the call terminating customer are served from central offices capable of sending and receiving the Calling Party Number (CPN) and are linked by appropriate facilities.

3.1.8.D. Services with call forwarding capabilities (including Call Forwarding, Call Forwarding Busy Line, Call Forwarding Don't Answer) cannot be used on a continual basis to expand the local calling scope beyond that available to a customer's premise.

---

SECTION 3 - DESCRIPTION OF SERVICES3.1. Local Exchange Telecommunications Services (cont'd)

3.1.9. Caller ID Service - Display of Calling Number and/or Name on customer provided equipment. Available to Customers and End Users of Sage's local exchange service on local access lines only. Service includes:

3.1.9.A. Calling Number Delivery - Allows the transmission of Calling Party Number (CPN) to the subscriber's access lines. When a Calling Number Delivery equipped line is on-hook, CPN is transmitted across the line during the silent interval between the first and second ring.

3.1.9.B. Calling Name Delivery - Enables the Caller ID subscriber to identify the calling party by a displayed name before the call is answered. The displayed name is the name associated with the CPN. When a Calling Name Delivery equipped line is on-hook, the Calling Party Name is transmitted across the line during the silent interval between the first and second ring.

3.1.9.C. Anonymous Call Rejection - Allows customer to automatically reject all calls that have been marked anonymous by the calling party. When ACR is active, the called party receives no alerting (ringing) for a call that has been rejected. The call is routed to a denial announcement and subsequently terminated.

3.1.9.D. Calling Name and Number Blocking - Any Sage Telecom calling party may prevent the delivery of CPN and of Calling Party Name to the called party by dialing an access code (\*67 on their touch-tone pad or 1167 from a rotary telephone) immediately prior to placing a call. The access code activated per call blocking is available at no charge. If a calling party activates blocking, the CPN and Calling Party Name will not be transmitted across the line. Instead, the Caller ID subscriber will receive an anonymous indicator. This anonymous indicator notifies the Caller ID subscriber that the calling party chose to block name and number delivery.

Per line blocking for the blocking of CPN will be available upon request, at no charge, to the following entities for lines over which the official business of the agency is conducted, including those at the residences of employees/volunteers, where an executive officer of the agency registers a need for blocking and provides the required certification to Sage: a) private, nonprofit, tax exempt, domestic violence intervention agencies and b) federal, state, and local law enforcement agencies. The CPN will not be transmitted from a line equipped with this capability. Per line blocking is operational on a continuous basis but can be deactivated by the customer by dialing an access code immediately prior to placing a call. Line blocking customers can unblock their CPN information on a per call basis, at no charge, by dialing an access code (\*82 on their touch tone pad or 1182 from a rotary phone) immediately prior to placing a call.

SECTION 3 - DESCRIPTION OF SERVICES3.1. Local Exchange Telecommunications Services (cont'd)3.1.9. Caller ID Service (cont'd)

Caller ID subscribers must provide and connect their own compatible customer premises equipment (CPE) to process the Calling Number and/or Calling Name transmission. The installation, repair, and technical capability of that equipment to function in conjunction with the feature specified herein will be the responsibility of the customer. Sage assumes no liability and will be held harmless for an incompatibility of this equipment to perform satisfactorily with the network features described herein. Subscribers will automatically be provided with both Calling Number and Calling Name delivery, subject to availability in the central office that is servicing the subscriber. If the combination of the two is not available, the subscriber will receive whatever is available, either Calling Number OR Calling Name.

Caller ID features are subject to availability of facilities and compatibility with central office equipment (for both the calling and the called parties), access lines, and customer premises equipment. Caller ID information will not be displayed under the following conditions: (a) if the called party is off-hook; or (b) if the called party answers during the first ring interval. Telephone CPN information transmitted via Caller ID is intended solely for the use of the Caller ID subscriber. Resale of this information is prohibited by this tariff.

3.1.10. Multi-Line Hunting Service - This service is used to establish hunting arrangements between two or more of a customer's local exchange service access lines, and is available to Business and Residential Customers. Customers may choose from one of the following hunt group arrangements:

3.1.10.A. Series Hunting - The hunt for an idle access line starts with the called access line in a prearranged hunt group and ends with the last access line in the hunt group, completing the call to the first idle access line encountered. Unless the first access line in the hunt group is called, only a portion of the access line group is hunted.

3.1.10.B. Circle Hunting - Permits a complete hunt over all the access lines in a prearranged access line hunt group. If no idle access line is encountered, the hunting will continue until it reaches the access line that was originally called.

3.1.10.C. Preferential Hunting - Individual access lines in an access line hunt group may have an associated preferential hunt list. This hunt list specifies a hunting sequence over a predetermined subset or preferential arrangement of up to 18 access lines before proceeding to hunt through the remaining access line hunt group.

Each hunt group arrangement is subject to availability in the customer's serving central office switch. All of the lines in a hunt group arrangement must be of the same class of service (*i.e.*, same local calling plan).
