Electronic Tandem Switching

A. General

Electronic Tandem Switching (ETS) features are provided only in association with Centrex Service furnished from No. 1 Electronic Switching System (ESS) central office equipment located on Telephone Company premises and may be provided, subject to the availability of facilities, to Centrex Systems which are served by the same such equipment.

B. Regulations

1. Explanation of Terms

a. ETS Features

ETS features are Centrex optional features which are, except as specified in this Tariff, available on an individual basis. They include:

- Automatic Route Selection-Deluxe
- Time-of-Day Routing
- Authorization Codes
- Deluxe Queuing
- Station Message Detail Recording to Premises
- Facility Administration and Control
- Traffic Data to Customer (Pollable)
- Facility Assurance Reports
- Uniform Numbering/Automatic Alternate Routing
- Automatic Overflow to DDD
- Facilities Restriction Levels

(AT) (1) Available only to existing customer.

2.9.1 Centrex Optional Features-(Continued)

Electronic Tandem Switching-(Continued)

B. Regulations-(Continued)

1. Explanation of Terms-(Continued)

b. Automatic Route Selection - Deluxe (ARS-D)

ARS-D provides for the origination of only ten-digit off-network calls to a public network telephone number, after the Centrex ARS-D access code, (e.g., "8"), automatically scans the digits and selects a first choice completing route when available, or subsequent route if the first choice route is not available. Routes may include Foreign Exchange Trunk lines, Wide Area Telecommunications Service lines, exchange trunk lines to the toll network and access lines to Common Control Switching Arrangements or other arrangements where compatible with sendedized operation and uniform numbering.

The final completing route may be the toll network or, at the option of the customer, the call attempt is routed to overflow tone if a Facilities Restriction Level (FRL) is insufficient to complete the call.

When ARS-D is provided in conjunction with Uniform Numbering/Automatic Alternate Routing (UN/AAR), incoming tie lines from other Centrex or PBX Systems connected directly to the Centrex System may be arranged to have automatic access to the ARS-D and UN/AAR features. When such arrangements are provided, the tie lines to the ARS-D become "dedicated" tie lines and separate tie lines are required from the distant Centrex or PBX System if access is to be provided to other Centrex functions at the ARS-D equipped Centrex System. In addition, when ARS-D is provided in conjunction with UN/AAR, routes may include tie lines to a distant Centrex or PBX System equipped with an ARS-D like capability for subsequent access to the toll network.

(AT) (1) Available only to existing customer.

2.9 OPTIONAL FEATURES-(Continued)

2.9.1 Centrex Optional Features-(Continued)

Electronic Tandem Switching-(Continued)

B. Regulations-(Continued)

1. Explanation of Terms-(Continued)

b. Automatic Route Selection - Deluxe (ARS-D)-(Continued)

The ARS-D feature provides all number translation and supervision necessary to route the call. "More Expensive Route" (MER) Tone is supplied, at the option of the customer, as a function of the route selected for a particular call.

Time-of-Day (TOD) Routing is an ARS-D option which permits pre-programmed selection of alternate routing pattern groups for off-network calls (up to three sets of ARS-D routing pattern groups) on a time-of-day and day-of-week basis. Manual override is available with the Facility Administration and Control feature. The maximum number of programmed changes per week is 16.

c. Facilities Restriction Levels (FRL)

FRL is required in connection with ARS-D and is provided on each station and incoming or two-way tie line to determine both the types of calls and types of facilities within the privileges of the associated user. When the FRL is transmitted over a tie line to a distant PBX or Centrex System equipped with ARS-D (for call screening at the distant point), it is identified as a Traveling Class Mark (TCM).

Authorization Codes are an FRL option which provide for a station user to dial a code which overrides the FRL associated with that station line or incoming tie line. The Centrex requests dialing of the authorization code when the default FRL (i.e., the FRL associated with the station line or incoming tie line) has insufficient privileges to complete the call. The Authorization Code is also inspected for validity as a security check. The Authorization Code is recorded in the Station Message Detail Recording to Premises record of the call when the SMDR-P feature is provided.

2.9 OPTIONAL FEATURES-(Continued)

2.9.1 Centrex Optional Features-(Continued)

Footnotes:

- (1) Applicable where facilities permit.
- (2) This feature can only be provided to serve customer stations excluding the attendant) that are co-located in the same ESS Centrex as the WATS-simulated facilities.
- (3) Priority Queuing is available with initial Complex Installation/Move Charge at no additional charge.
- (4) Customer may specify the length of time a call is held in queue (threshold time limit) before overflowing to the MTS Network or to overflow tone.
- (5) Applicable only when adding or removing WATS bands in queue.
- (6) Regulations covering the provisions of this service are applicable as provided in Section 4 of this Tariff.
- (7) A Preferential Hunt list may have a maximum of 18 terminals included.
- (8) These rates are additive to Circle Hunt rates if the customer requires both.
- (9) The Complex Installation/Move Charge applies when initially equipping a Multiline Hunt group with at least one Preferential Hunt list. This charge also applies each time a Multiline Hunt group has at least one Preferential Hunt list addition, deletion or change.
- (10) Apply the appropriate Complex Installation/Move Charge per arrangement when changing or rearranging the Speed Calling arrangement.
- (11) The maximum number of 30-code arrangements is 100 per customer in No. 1 Electronic Switching Systems and 64 in No. 2 Electronic Switching Systems per customer.
- (12) Each station equipped may have access to only one 30-code arrangement and only one six-code arrangement.
- (13) The first common block of a Centrex System and one additional common block required for Centrex Dormitory Service are not considered an optional feature and do not require these additional charges for Split Service Offering.
- (14) Not applicable to those customers served by No. 2 Electronic Switching System.
- (15) Obsolete-applicable to existing installations at existing locations for existing customers.
- (16) The Inhibit Inflow/Outflow optional features require separate control channel(s) between the central office and the customer premises, one per queue.
- (17) The Service and Equipment Charges for optional features apply only to changes or additions to existing systems.
- (18) The Inhibit/Inflow/Outflow optional features require separate control channels between the central office and the control key at the customers premises, one per queue.
- (19) In addition, apply rates and charges for a signal grade channel between the serving central office and the customer's premises.

2.9 OPTIONAL FEATURES-(Continued)

2.9.1 Centrex Optional Features-(Continued)

Footnotes (Continued):

- (20) Where available in #1A ESS central offices only.
- (21) Message Desk stations must be in the same Centrex group as the stations accessing the Message Desk. This feature also allows a Message Desk attendant to activate/deactivate an audible message waiting indication (stutter dial tone) for the Message Desk's client stations. Message Desk client stations must have at least one of the following: call forwarding-variable, call forwarding-busy line, call forwarding-answer, or night service-make busy arrangement, in order to forward calls to the Message Desk center. The rates and charges for these features apply in addition to the Simplified Message Desk Interface rates and charges. A 420-type data channel is also required for this service. Apply the appropriate rates and charges as specified in Section 2 of the Private Line Service Tariff. Customer-provided, mod- em, answering equipment, and Message Desk controller conforming to the technical specifications of the Company are also required. A Service Establishment Charge of \$680.00 applies (USOC: (SESVM).
- (22) A Service Establishment Charge of \$1300.00 applies (USOC: SESCL).
- (23) A maximum of \$4.00 applies per station line when installing any 3 or fraction thereof noted optional features with the initial installation of the station line or on subsequent additions of these features to an existing station line.
- (AT) (24) Available only to existing customer.

2.9 OPTIONAL FEATURES-(Continued)

2.9.1 Centrex Optional Features-(Continued)

Remote Access Capability

Definitions of terms used in this Tariff:

Incoming Facility - The means by which the remote caller gains access to Centrex Services. This incoming facility may be a Centrex station or other tariffed exchange access line (e.g., 800 Service).

Outgoing Facility - This will always be a Centrex station line. The line class of service assigned to this station will determine what Centrex features/services can be accessed by the remote caller.

Remote Access Path - The combination of one incoming facility and one outgoing facility constitutes a remote access path.

A. Description:

Remote Access is an arrangement that will permit a remote caller access to the features and/or service facilities of a C.O. Centrex. Access is gained by dialing the number associated with the incoming facility. Optionally, the remote caller may be required to input a customer-specified security code. This code must be transmitted in the form of a TOUCH-TONE Signal.

The quality of transmission is not assured when this service is provided. If the customer requests additional equipment to improve the quality of transmission, and it is feasible, additional charges are applicable based upon costs.

Liability for charges incurred as a result of the use of this service is as provided for in this and other applicable tariffs of the Telephone Company.

CENTREX SERVICE

2.9 OPTIONAL FEATURES-(Continued)

2.9.1 Centrex Optional Features-(Continued)

Remote Access Capability

B. Features:

Standard features of this service include:

Remote Flash - Permits the calling party to generate a switchhook flash thereby allowing the user to activate Centrex system features.

Remote Retrial - Permits the calling party to originate additional calls through the system without disconnecting and redialing the associated incoming facility and authorization code.

In addition to the standard features shown above, the following feature is provided on an optional basis:

Security Code - Permits the customer to require that the remote caller input a three-digit code before gaining access to the Centrex. This number is specified by the customer and administered by the Telephone Company.

C. Rules and Regulations:

All security code assignments will be specified by the customer. The customer is responsible for notifying the Telephone Company of any required security code change or rearrangement. Charges for such charge or rearrangement are as specified in Paragraph 29.9.1, preceding.

In addition to charges for Remote Access Capability, appropriate tariff rates and charges for the incoming and outgoing facilities also apply.

2.9 OPTIONAL FEATURES-(Continued)

2.9.1 Centrex Optional Features-(Continued)

Routed Numbers

This feature routes calls to a Centrex C.O. System telephone number to an answering point at the customer location. Routed Numbers include the Centrex C.O. telephone number and the routing facility. Calls must be routed within the customer's common block. Customers may request Routed Numbers in quantities that do not exceed either 1) the customer's current in service Centrex C.O. station capacity or 2) the customer's Centrex C.O. station capacity that is in service 6 months following installation of a new Centrex C.O. system. Customers must convert 50% of their Routed Numbers to Centrex C.O. stations within 36 months of when they were first established as Routed Numbers. Customers must convert 80% of their Routed Numbers to Centrex C.O. stations within 60 months of when they were first established as Routed Numbers. Customers who do not meet these percentages will have the Routed Numbers, that exceed the percentages listed previously, disconnected and made available for other customer's use. Centrex C.O. station numbers can only be assigned as Routed Numbers once and can not be reinstated as Routed Numbers following disconnection.
