TARIFF FORMAT

A. Sheet Numbering - Sheet numbers appear in the upper right corner of the page. Sheets are numbered sequentially. However, new sheets are occasionally added to the tariff. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 14 and 15 would be 14.1.

B. Sheet Revision Numbers - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current sheet version on file with the PSCM. For example, the 4th revised Sheet 14 cancels the 3rd revised Sheet 14. Consult the Check Sheet for the sheet currently in effect.

C. Paragraph Numbering Sequence - There are nine levels of paragraph coding. Each level of coding is subservient to the next higher level:

- 2.
- 2.1
- 2.1.1
- 2.1.1.A.
- 2.1.1.A.1.
- 2.1.1.A.1.(a)
- 2.1.1.A.1.(a).I.
- 2.1.1.A.1.(a).I.(i).
- 2.1.1.A.1.(a).I.(i).(1).

D. Check Sheets - When a tariff filing is made with the PSCM, an updated Check Sheet accompanies the tariff filing. The Check Sheet lists the sheets contained in the tariff, with a cross reference to the current revision number. When new pages are added, the Check Sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this page if these are the only changes made to it (i.e., the format, etc. remain the same, just revised revision levels on some pages.) The tariff user should refer to the latest Check Sheet to find out if a particular sheet is the most current on file with the PSCM.

The customer pre-selects a second telephone number to which all incoming calls are to be transferred automatically. Calls may be transferred to a long distance message telecommunications point subject to the availability of the necessary facilities in the central office from which the calls are to be transferred. Call Forwarding shall not be used to extend calls on a planned and continuing basis to intentionally avoid the payment in whole or in part, of message toll charges that would regularly be applicable between the access line originating the call and the access line to which the call is transferred. - h. **Call Forwarding - (Selective)** - Selective Call Forwarding provides the Customer with the ability to forward incoming calls from pre-selected telephone numbers to another telephone number. The Customer can construct or modify a telephone number screening list. Incoming calls will be screened against the Customer's list and only those telephone calls from telephone numbers on the list will be forwarded. The Selective Call Forwarding Customer is responsible for the payment of charges (i.e., toll charges) for each call between the Selective Call Forwarding equipped telephone line and the line to which the call is being forwarded. Calls from numbers not on the list will receive standard call completion. The Customer must also subscribe to the Call Forwarding feature.

Subscribers to Selective Call Forwarding activate the service and construct or modify the screening list by dialing *63 and following the prompts. This service may be temporarily deactivated by dialing *83.

Such call detail shall be provided only to law enforcement authorities upon request. A trace cannot be successfully completed if the incoming call originates in a telephone central office not equipped for Call Trace Service.

At its option or upon receipt of a proper request from a law enforcement agency, the Company will set up a temporary tracing arrangement using Call Tracing at no charge to the customer when in the judgment of the Company or law enforcement agency, the unwanted call(s) present a serious threat of harm or destruction of property.

3.7 Prepaid Local Exchange Services

Service Commission

Prepaid Local Exchange Services allow residential Customers to place local calls according to the rates as set forth herein. The standard features of Prepaid Local Service include an assigned telephone number, dial tone, Dual Tone Multi-Frequency (DTMF – i.e., Touch Tone) and rotary signaling. Prepaid Local Service enables the Customer to do the following: place calls to or receive calls from any calling station within the standard local calling area; place calls to toll-free 800 telephone numbers; and utilize 911/E911 emergency services. The Customer will have a listing in the applicable 911/E911 database, white pages telephone directory and the Directory Assistance database. Information obtained from the Customer is required but may have a designation for non-publication as described in Section 3.4.4. Increments for provision of non-optional Extended Area Service will be added when applicable.

Each Prepaid Local Service telephone line will also include mandatory toll restriction. Customers subscribing to Prepaid Local Service shall not place or receive calls or access any service that may be billed to Customer's telephone number, including but not limited to presubscribed and dial-around (e.g., 101XXXX dialing) long distance calling, international toll calling, directory assistance, operator services, collect and third-party billed calling, 900/976 calling and other pay-per-use services.

Customers subscribing to Prepaid Local Service will be required to remit payment for all monthly recurring charges in advance of the period for which services will be rendered. Customers may only remit payment at specified billing agent locations or alternative payment processing options, including but not limited to, credit card payments and automated clearing house ("ACH") transactions. Upon conclusion of all periods for which an advance payment has been applied to the Customer's account and the Customer's account has a zero balance, Excel may disconnect service after proper notice as described in Section 2.16.4.

Customer subscribing to Excel's Prepaid Local Services may select from the following service plans:
