Secretary
Missouri Public Service Commission
Governor Office Building
200 Madison Street
Jefferson City, MO 65101

Dear Secretary:

Enclosed herewith for filing with the Missouri Public Service Commission are the following revised tariff sheets which are applicable to both divisions of Laclede Gas Company:

P.S.C. MO. No. 5 Consolidated
Original Sheet No R-45-c
Second Revised Sheet No. R-48-a

Pursuant to the Stipulation and Agreement (“S&A”) in Case No. GR-2007-0208, an Energy Efficiency Collaborative (“EEC”) was formed to develop and implement a portfolio of cost effective energy efficiency programs for the Company’s customers, subject to the funding levels and other terms of the S&A, as modified in Case Nos. GR-2010-0171 and GR-2013-0171. The enclosed tariff sheets have been revised upon the recommendation of the EEC to provide direct-install water consumption reduction and heat retention measures at no cost to low income customers who occupy multifamily and single-family dwelling units within the Laclede Gas service territory, and to reflect other minor changes.

The revised tariff sheets have an issue date of August 27, 2013 and an effective date of September 27, 2013.

Sincerely,

Michael C. Pendergast

RULES AND REGULATIONS

35. Conservation and Energy Efficiency Programs (continued)

A2. Residential Direct-Install Low Income Program

Purpose - The purpose of the Residential Direct-Install Low Income Program is to deliver long-term natural gas savings and bill reductions to low income customers who occupy multifamily and single-family dwelling units within the Laclede Gas service territory. This will be achieved through direct-install water consumption reduction and heat retention measures at no cost to participating customers. The program will also provide residents of the dwelling units with education on the use of the natural gas conservation measures.

Availability - The Program is available to income qualified multifamily and single-family properties that contain natural gas space-heating and/or water-heating equipment and receive gas service from Laclede Gas. The direct-install measures will include programmable setback thermostats, low-flow faucet aerators, low-flow showerheads, and insulating water-heater pipe wrap. Multifamily dwelling units are defined as structures of three (3) or more attached unit complexes. Single-family dwellings are defined as residents of single-family and duplex housing units. Residents may include but are not limited to families, the elderly, or disabled that are income qualified. For the purposes of this Program the term "income qualified" refers to residents of dwelling units that are in federally subsidized housing units and who fall within that federal program's income guidelines. The intent of this Program is to install measures only within income qualified dwelling units. However, as a requirement of Program participation, comparable energy efficiency measures must be installed in all dwelling units, federally subsidized and non-federally subsidized, located on the same property and equipped with natural gas.

Program Description - The Company will co-deliver the Program with the local electric utility provider so that eligible customers utilizing both services may receive energy savings and bill reductions from both energy sources. At the same time, the Company will offer a similar Program to qualifying multifamily properties where the local electric utility already installed electric energy saving measures but where the installation of gas saving measures was bypassed. Under both Programs the Company will enter into a contract with a Program Administrator, selected by the EEC, to develop, implement, and maintain all services associated with the Program. Each Program Administrator will direct the necessary services to provide the installation of Program-specified measures noted. Participants who receive measures installed pursuant to the Program, except for non-incented measures for market rate or non-federally subsidized units, are not eligible for incentives for similar measures contained in any of the Company's other energy efficiency programs.

A detailed post-implementation evaluation by an independent evaluation contractor selected by the EEC shall be completed within six (6) months following conclusion of the Program's second year. If feasible, this detailed evaluation will include both a process evaluation and at a minimum, a preliminary cost effectiveness (impact) evaluation.

RULES AND REGULATIONS

35. Conservation and Energy Efficiency Programs (continued)

D. Program Year:

Effective beginning in 2013 the program year will begin on October 1 and end on September 30 of the following year, except for the first year of each new program, in which case the program year will begin with the Commission-approved effective date of the tariff sheets originally filed to implement such program.

E. Program Tracking and Reporting:

Within forty-five days of the end of each calendar quarter, the Company shall submit a status report to the EEC regarding the cost and participation of its conservation and energy efficiency programs including:

- the number of energy efficiency measures implemented, summarized by measure type, and customer type for each calendar quarter and cumulatively for the fiscal year or program year; (Measure Types: Residential - summarized for each type of prescriptive equipment or service. Commercial and Industrial - summarized for each type of prescriptive equipment or service, type of custom rebate, and for the audits.)
- funds invested in each energy efficiency program for each calendar quarter and cumulatively for the fiscal year or program year.
- estimated savings for each energy efficiency program for each calendar quarter and cumulatively for the fiscal year or program year

F. Post-implementation Evaluation:

A detailed post-implementation evaluation of the initial two (2) years of each new program shall be completed within six (6) months of the end of each program's second year. Where feasible, these reviews will include both process evaluations and cost effectiveness (impact) evaluations. Evaluations may be performed after less than two years of program implementation if the EEC determines this is preferable. Further evaluation of existing programs may be performed as determined by the EEC. Post-implementation evaluations will then be used in the selection and design of future programs.
