RE: Request Commission Approval of Revised Tariff Sheet No. R-62.19 Solar Photovoltaic Rebate Program

Dear Secretary:

KCP&L Greater Missouri Operations Company ("GMO" or "Company") seeks approval from the Missouri Public Service Commission of the enclosed revision to the Solar Photovoltaic Rebate Program tariff (Program).

Significant rebates have been paid out under the Program and will reach the funding limits established by §393.1030, RSMo and 4 CSR 240-20.100. Consistent with 4 CSR 240-20.100(4)(L), the Company requests suspension the Program tariff. The Company will continue to accept applications for Net Metering the Net Metering Rider, but rebates for Solar Electric Systems will not be available until a subsequent calendar year. Rebates will be paid in order, based on the operational date of the Solar Electric System.

We request this tariff be made effective in 60 days, on September 3, 2013.

Thank you for your consideration of this revised tariff. Please contact me directly at (816) 654-1689 or brad.lutz@kcpl.com if you require any additional information.

Sincerely,

Brad Lutz
