RE: Tariff Tracking No. JG-2015-0295

Dear Secretary:

On April 1, 2015 the Company filed several tariff sheets to reflect various revisions in the Company's Conservation and Energy Efficiency programs that were recommended by the Energy Efficiency Collaborative ("EEC"). Subsequently, the Company became aware of a different ENERGY STAR product specification than one of the specifications it used in the April 1 filing. As a result, in Sheet No. R-45 the minimum Energy Factor rating for a customer to qualify for a rebate for a residential gas storage water heater greater than 55 gallons and less than or equal to 100 gallons has been revised from .75 to .77. The members of the EEC are agreeable to such revision.

Please substitute the attached tariff sheet for the corresponding sheet submitted on April 1.

Sincerely,

/s/ L. Craig Dowdy
