TARIFF FORMAT

- A. Page Numbering** - Page numbers appear in the upper right corner of the page. Page are numbered sequentially, however, new pages are occasionally added to the tariff. When a new page is added between pages already in effect, a decimal is added. For example, a new pages added between pages 14 and 15 would be 14.1.
- B. Page Revision Numbers** - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current page version on file with the MO PSC. For example, the 4th Revised Page 14 cancels the 3rd Revised Page 14. Because of various suspension periods, deferrals, etc. the MO PSC follows in their tariff approval process, the most current page number on file with the Commission is not always the tariff pages in effect. Consult the check sheet for the page currently in effect.
- C. Paragraph Numbering Sequence** - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:

SECTION 3.0 - DESCRIPTION OF SERVICE AND RATES, (CONT'D.)

3.2 Calculation of Distance

Usage charges for all mileage sensitive products are based on the airline distance between serving wire centers associated with the originating and terminating points of the call.

The serving wire centers of a call are determined by the area codes and exchanges of the origination and destination points.

The distance between the Wire Center of the Customer's equipment and that of the destination point is calculated by using the industry-standard "V" and "H" coordinates.

- Step 1:** Obtain the "V" and "H" coordinates for the serving wire center of the Customer's switch and the destination point.
- Step 2:** Obtain the difference between the "V" coordinates of each of the Rate Centers. Obtain the Difference between the "H" coordinates.
- Step 3:** Square the differences obtained in Step 2.
- Step 4:** Add the squares of the "V" difference and "H" difference obtained in Step 3.
- Step 5:** Divide the sum of the square obtained in Step 4 by ten (10). Round to the next higher whole number if any fraction results from the division.
- Step 6:** Obtain the square root of the whole number obtained in Step 5. Round to the next higher whole number if any fraction is obtained. This is the distance between the originating and terminating serving wire centers of the call.

Formula:

$$\sqrt{\frac{(V_1 - V_2)^2 + (H_1 - H_2)^2}{10}}$$

Effective: February 27, 2009

SECTION 3.0 - DESCRIPTION OF SERVICE AND RATES, (CONT'D.)

3.3 Timing of Calls

Billing for calls placed over the network is based in part on the duration of the call. Timing of each call begins when the called party answers the call (i.e. when two way communications are established.) Answer detection is based on standard industry answer detection methods, including hardware and software answer detection. Call timing ends when either party hangs up.

3.3.1 Unless otherwise described in the individual service description in this tariff, calls are measured and billed in one (1) minute increments. The minimum call duration for billing purposes is one (1) minute.

3.3.2 There is no billing applied for incomplete calls.

3.3.3 When a call is established in one rate period and ends in another rate period, the rate in effect at the calling station applies to the portion of the call occurring within that rate period. When a unit of time is split between two rate periods, the rate applicable to that unit of time is based on the rate period in which it began.

3.4 Applicable Rate Periods

Unless otherwise indicated elsewhere in this tariff, usage-based rates may be subject to the following time-of-day, day-of-week, and holiday rate periods:

3.4.1 Day Rate Period - Applies to that portion of a call occurring from 8:00 AM to, but not including, 5:00 PM Monday through Friday.

3.4.2 Evening Rate Period - Applies to that portion of a call occurring from 5:00 PM to, but not including, 11:00 PM Sunday through Friday.

3.4.3 Night/Weekend Rate Period - Applies to that portion of a call occurring from 11:00 PM to, but not including 8:00 AM all days, all day Saturday, and Sunday to, but not including 5:00 PM.

3.5 Pay Telephone Surcharge

In order to recover the Company's expenses to comply with the FCC's pay telephone compensation plan effective on October 7, 1997 (FCC 97-371), an undiscountable per call charge is applicable to all interstate, intrastate and international calls that originate from any domestic pay telephone used to access the Company's services. This surcharge, which is in addition to standard tariffed usage charges and any applicable service charges and surcharges associated with the Company's service, applies for the use of the instrument used to access the Company service and is unrelated to the Company's service accessed from the pay telephone.

Pay telephones include coin-operated and coinless phones owned by local telephone companies, independent companies and other interexchange carriers. The Pay Telephone Surcharge applies to the initial completed call and any reoriginated call (i.e., using the "#" symbol).

Whenever possible, the Pay Telephone Surcharge will appear on the same invoice containing the usage charges for the surcharged call. In cases where proper pay telephone coding digits are not transmitted to the Company prior to completion of a call, the Pay Telephone Surcharge may be billed on a subsequent invoice after the Company has obtained information from a carrier that the originating station is an eligible pay telephone.

The Pay Telephone Surcharge does not apply to calls placed from pay telephones at which the Customer pays for service by inserting coins during the progress of the call.

SECTION 3.0 - DESCRIPTION OF SERVICE AND RATES, (CONT'D.)

3.6 Institutional Collect-Only Calling Service

The Company processes one type of institutional collect call: automated collect. Automated Collect Calls are billed to the called party and completed through an automated call processing system that prompts the call originator and the called party such that the call is completed without live operator assistance. The call processing system collects the billing information of the called party and routes the call through terminating facilities. The called party must accept the charges for the call, or the connection will be dropped.

Calls are measured as described in Sections 3.2, 3.3 and 3.4 of this tariff and rated based on time of day, call duration and mileage. Per-minute usage sensitive charges, as well as a per-call automated operator surcharge apply.

Service may be limited or restricted at the request of the Institution administration. Restrictions include, but are not limited to: call duration limits, call-to number blocking, emergency call blocking, blocked access to a live operator and to alternate carriers, collect or person to person collect only, service availability hours, or other restrictions deemed necessary for the welfare of the institution and safety of the public. All services are offered in conjunction with interstate service.

3.7 Prepaid Institutional Calling Services

Prepaid Institutional Calling Services provide alternative methods for inmates in Confinement Institutions and their families to communicate with each other. This service is designed for those who prefer to prepay for calls rather than being billed for collect calls monthly on their local telephone bills, for those who would like to pay for another family member's calls, for those whose credit history is inadequate to receive collect calls, and for those who wish to budget their inmate calls.

Calls are made by dialing either a toll-free access number or other access dialing sequence. Depending on the facility, a Personal Account Code may also need to be entered.

Two options are available with Prepaid Institutional Calling Services. The first option, the Commissary Account, allows the inmate (via the Institution personnel) to set up his/her own prepaid account at the Confinement Institution utilizing the inmate's commissary account; the second option, the Customer Account, allows the called party, usually a family member, who receives collect calls from inmates to set up his/her own prepaid account.

3.7 Prepaid Institutional Calling Services, *continued*

With a Commissary Account, upon notification by the Confinement Institution that an inmate wishes to utilize the Company's Prepaid Institutional Commissary Account Service, a prepaid account is set up by the Company with the Institution's commissary; the Company assigns an authorization code to the inmate, and provides instructions for accessing and using the service. All deposits to the account are paid to and handled by the Institution. The Company receives payment from the Institution; it does not engage in direct monetary transactions with the inmate.

The Company's system automatically informs the caller of the Available Usage Balance remaining in the Prepaid Account, and provides prompts to place the call by entering the destination telephone number. Network usage is deducted from the Available Usage Balance in the account on a real time basis as the call progresses.

Payment for Prepaid Institutional Calling Services and any Available Usage in the Prepaid Account is refundable upon request after release of the inmate from the Confinement Institution.
