Jefferson City, MO 65102-0360

Re: File No. ET-2016-0152

Dear Mr. Woodruff:

On December 17, 2015, Union Electric Company d/b/a Ameren Missouri (Ameren Missouri or Company) submitted several revised tariff sheets that were part of Schedule No. 6, Schedule of Rates for Electric Service, including 2<sup>nd</sup> Revised Sheet No. 58 which was to supersede 1st Revised Sheet No. 58. These sheets were filed to add LED rates to the Company's Rate 5M – Street and Outdoor Area Lighting. They bore an effective date of January 16, 2016.

A change in the language regarding High Pressure Sodium and Mercury Vapor offerings under sections C. and D. necessitates substituting the attached tariff sheet for the 2<sup>nd</sup> revised tariff sheet no. 58 filed on December 17. The change to the language is below:

The High Pressure Sodium and Mercury Vapor offerings under sections C. and D. below will only be available for new installations through on or about March 31, 2016. After such time, Company ~~anticipates~~ **will** replacement of these existing fixtures, upon failure, ~~to~~ **with** an LED fixture under sections A. and B.

The tariff substitution has been discussed with Staff and the Office of the Public Counsel.

Sincerely,

*Wendy K. Tatro*

Wendy K. Tatro  
Director and Assistant General Counsel
