

BEFORE THE PUBLIC SERVICE COMMISSION

OF THE STATE OF MISSOURI

In the Matter of the Cancellation of the
Certificate of Service Authority and
Accompanying Tariff of Global
Telephone Corporation)

Case No. TD-2002-107

ORDER CANCELING CERTIFICATE AND TARIFF

On August 17, 2001, the Staff of the Missouri Public Service Commission filed a motion asking the Commission to cancel the certificate of authority and tariff of Global Telephone Corporation (Global) under the Commission's authority pursuant to Section 392.410, RSMo 2000. The Commission granted Global a certificate of service authority to provide intrastate interexchange telecommunications services in case number TA-97-322.

Staff provided documentation with its motion showing Global to be in a Chapter 7 bankruptcy proceeding. Staff contacted Global's bankruptcy trustee who was of the belief that Global had no customers in Missouri. Staff served its motion on Global's bankruptcy trustee. The trustee has not responded to Staff's motion. No party has requested a hearing.

The Missouri Secretary of State's web site shows that Global's corporate authority in Missouri was administratively dissolved during 2001.

The Commission has reviewed the motion and the official file and finds that the certificate of service authority and accompanying tariff to provide intrastate

interexchange telecommunications services granted to Global in case number TA-97-322 shall be canceled.

IT IS THEREFORE ORDERED:

1. That the certificate of authority granted and tariff approved in case number TA-97-322 for Global Telephone Corporation shall be canceled on September 23, 2001.
2. That the tariff of Global Telephone Corporation shall be canceled on September 23, 2001.
3. That this order shall become effective on September 23, 2001.
4. That this case may be closed on September 24, 2001.

BY THE COMMISSION

TARIFF FORMAT

A. Sheet Numbering - Sheet numbers appear in the upper right corner of the page. Sheets are numbered sequentially. However, new sheets are occasionally added to the tariff. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 14 and 15 would be 14.1.

B. Sheet Revision Numbers - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current sheet version on file with the PSCM. For example, the 4th revised Sheet 14 cancels the 3rd revised Sheet 14. Because of various suspension periods, deferrals, etc. the PSCM follows in its tariff approval process, the most current sheet number on file with the Commission is not always the tariff page in effect. Consult the Check Sheet for the sheet currently in effect.

C. Paragraph Numbering Sequence - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:

2.

2.1.1.
2.1.1.A.
2.1.1.A.1.

Usage charges for all mileage sensitive products are based on the airline distance between serving wire centers associated with the originating and terminating points of the call. The serving wire centers of a call are determined by the area codes and exchanges of the origination and destination points.

The distance between the Wire Center of the Customer's equipment and that of the destination point is calculated by using the "V" and "H" coordinates found in BellCore's V&H Tape and NECA FCC Tariff No. 4.

Step 1 - Obtain the "V" and "H" coordinates for the Wire Centers serving the Customer and the destination point.

Step 2 - Obtain the difference between the "V" coordinates of each of the Wire Centers. Obtain the Difference between the "H" coordinates.

Step 3 - Square the differences obtained in Step 2.

Step 4 - Add the squares of the "V" difference and "H" difference obtained in Step 3.

Step 5 - Divide the sum of the square obtained in Step 4 by ten (10). Round to the next higher whole number if any fraction results from the division.

Step 6 - Obtain the square root of the whole number obtained in Step 5. Round to the next higher whole number if any fraction is obtained. This is the distance between the Wire Centers.
